Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Marion philosophy.

Top

Merleau-Ponty

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Merleau-Pony philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Merleau-Ponty philosophy.

Top

Moore

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Moore philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Moore philosophy.

Top

Oakeshott

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Oakeshott philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Oakeshott philosophy.

Top

Peirce

PHIL 350R

Hours	0.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Peirce philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Peirce.

Top

Phenomenology

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in phenomenology.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on phenomenology.

Philosophy of Cognitive Science

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in the philosophy of cognitive science.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on the philosophy of cognitive science.

Philosophy of History

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in the philosophy of history.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on the philosophy of history.

Philosophy of Logic

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	Fall, Winter

Course Outcomes

Phil 350R (Heidegger's Being and Time)

1. Identify some basic principles and strategies of early German phenomenlogy
2. Identify principle theses and arguments of Heidegger's "Being and Time"
3. Improve ability to read, summarize, analyze, speak and write about philosophical texts and issues

Figures and Topics

Understand a major figure, text, or problem in philosophy of logic.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on the philosophy of logic.

Philosophy of Psychology

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in philosophy of psychology.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on philosophy of psychology.

Top

Philosophy of Social Science

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in the philosophy of social science.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on the philosophy of social science.

Top

Pragmatism

PHIL 350R

Hours	0.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on pragmatism.

Top

Ricoeur

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Ricoeur philosophy.

Figures and Topics

Understand a major figure, text, or problem in Ricoeur philosophy.

Top

Russell

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Russell philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Russell philosophy.

Top

Sartre

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Sartre philosophy.

Figures and Topics

Understand a major figure, text, or problem in Sartre philosophy.

Studies in Contemporary Philosophy

Selected figures or topics.

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in the studies in contemporary philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on the studies in contemporary philosophy.

Top

Topics in Contemporary Philosophy

Selected figures and topics.

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in the topics in contemporary philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a complex, nuanced, and well-referenced research paper on the topics in contemporary philosophy.

Top

Truth

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on truth.

Figures and Topics

Understand a major figure, text, or problem in truth.

Top

Whitehead

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Whitehead philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Whitehead philosophy.

Top

William James

PHIL 350R

Hours	0.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in William James philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on William James philosophy.

Top

Wittgenstein

PHIL 350R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 202.
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Wittgenstein philosophy.

Figures and Topics

Understand a major figure, text, or problem in Wittgenstein philosophy.

Top

Buddhism

Study selected figures, texts, and problems in the history of non-Western philosophy.

PHIL 360R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Buddhism.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Buddhism.

Top

Hindu Philosophy

Study selected figures, texts, and problems in the history of non-Western philosophy.

PHIL 360R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Hindu philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Hindu philosophy.

Top

Non-Western Philosophy

Study selected figures, texts, and problems in the history of non-Western philosophy.

PHIL 360R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Phil 300 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Figures and Topics

- Understand a major belief system, figure, text or problem in non-Western philosophy

Critical Reading and Writing

- Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched essay on non-Western philosophy.

Top

Non-Western Philosophy

Study selected figures, texts, and problems in the history of non-Western philosophy.

PHIL 360R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Phil 300 or equivalent.
Taught	

Course Outcomes

Figures and Topics

Understand a major figure, text, or problem in Chinese philosophy.

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-researched paper on Chinese philosophy.

Top

Philosophy Program Internship

Credit for career-oriented or job-related internship work. Internships can be in any field for which the student qualifies.

PHIL 399R

Hours	3.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship Experience

Complete a university-approved internship in any job or field likely to enhance job prospects or graduate/professional school performance

Writing

Submit a written report on the internship experience

Top

Advanced Logic and Metalogic

Completeness, soundness, and undecidability of first-order logic; incompleteness of arithmetic; treatment of related philosophical topics and of nonclassical topics as time permits.

PHIL 405

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 305.
Recommended	Phil 300 or equivalent.
Taught	Fall, Winter

Course Outcomes

History

Prove and understand the completeness and consistency of first-order logic as well as the Solem-Löwenheim theorem, Gödel incompleteness, Church's undecidability theorem, etc.

Figures and Topics

Formulate and evaluate the philosophical ramifications of these theorems.

Top

Applied Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of applied ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of applied ethics.

Top

Care Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202; Phil 300 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of care ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of care ethics.

Consequentialism

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of consequentialism.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of consequentialism.

Top

Deontology

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of deontology.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of deontology.

Top

Environmental Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of environmental ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of environmental ethics.

Ethical Argumentation

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of ethical argumentation.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of ethical argumentation.

Top

Ethics of War and Peace

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of the ethics of war and peace.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of the ethics of war and peace.

Top

Media and Cyber Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of media and cyber ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of media and cyber ethics.

Medical Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of medical ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of medical ethics.

Top

Meta-ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of meta-ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of meta-ethics.

Moral Psychology

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of moral psychology.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of moral psychology.

Objectivity, Subjectivity, and Relativism

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of objectivity, subjectivity and relativity.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of objectivity, subjectivity, and relativity.

Skepticism

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of skepticism.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of skepticism.

Top

The Good Life

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of the good life.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of the good life.

Top

Theoretical Foundations of Business Ethics

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the foundations of business ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the foundations of business ethics.

Topics in Ethics

Select topics, figures, problems, and theories in ethics. Topics include meta-ethics, deontology, consequentialism, virtue theory, applied ethics, ethical argumentation.

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the topics in ethics.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the topics in ethics.

Top

Virtue Theory

PHIL 413R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202, 213.
Taught	Fall, Winter, Spring

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in virtue theory.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on virtue theory.

Contemporary Art Theory

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Contemporary Art Theory

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Film Criticism and Theory

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Philosophy and Literature

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Philosophy of Architecture

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Philosophy of Art

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Philosophy of Music

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Philosophy of Theater

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Topics in the Advanced Philosophy of Art, Architecture, Music, and Film

Topics and figures in the philosophy of art, architecture, music, and film.

PHIL 414R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures and texts in the philosophy of art, architecture, literature, theater, music or film.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of art, architecture, literature, theater, music or film.

Application

Be able to explain the practice and value of (as appropriate) art, film, music, or literary criticism and theory

Top

Philosophy of Religion

Selected figures or problems.

PHIL 415

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Understand at an advanced level selected concepts, theories, figures, and texts in the philosophy of religion

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of religion.

Application

Be able to explain the practice and value of philosophy of religion.

Top

Philosophy of Law

The relation between natural and enacted law; theories of punishment; utilitarian and nonutilitarian theories of law; liberty.

PHIL 416

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Know major concepts, theories, figures, and texts in the philosophy of law.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of law.

Application

Be able to explain the practice and value of philosophy of law.

Philosophy of Language

Meaning and reference, synonymy, metaphor, exemplification, translation; linguistic, artistic, and perceptual symbol systems.

PHIL 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall, Winter, Summer Contact Department

Course Outcomes

Figures and Topics

Know major concepts, theories, figures, texts, and issues in the philosophy of language.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on the philosophy of language.

Application

Be able to explain the practice and value of philosophy of language.

Top

Metaphysics

Basic categories of being: appearance and reality, law, causality, space, time, eternity, deity.

PHIL 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Taught	Fall, Spring Contact Department

Course Outcomes

Figures and Topics

Know major concepts, theories, figures, and texts in metaphysics

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on metaphysics.

Application

Be able to explain the practice and value of metaphysics.

Epistemology

Meaning, limits, and justification of knowledge.

PHIL 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Taught	Winter, Summer Contact Department

Course Outcomes

Figures and Topics

Know major concepts, theories, figures, and texts in epistemology.

Critical Reading and Writing

Practice philosophical analysis and argumentation orally and in writing; write a cogent and well-referenced research paper on epistemology.

Application

Be able to explain the practice and value of epistemology.

Top

Antiquity to Present

PHIL 423R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phy S 100 or instructor's consent; Phil 300.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

History and Philosophy of Science

Scientific explanation, concepts, and models. Philosophical assumptions and criteria for theory selection, as exemplified by historical development of basic ideas in science.

PHIL 423R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phy S 100 or instructor's consent; Phil 300.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

History of Medicine

PHIL 423R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phy S 100 or instructor's consent; Phil 300.
Recommended	Phil 201, 202.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Philosophy of Mind

Relationship between the mental and the physical: consciousness, intentionality, mental causation.

PHIL 424

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Recommended	Phil 201, 202.
Taught	Fall, Winter

Course Outcomes

History

Know major concepts, theories, figures and texts in the philosophy of mind including possible answers to questions like: what is the mind/body problem? What is the difference between a mind and a brain? What is materialism or physicalism? What is a person?

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a cogent and well-referenced research paper on the philosophy of mind

Application

Be able to explain the practice and value of philosophy of mind.

Top

Philosophical Lecture Series

Lectures on philosophical topics by faculty and advanced students.

PHIL 449R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Figures and Topics

Become acquainted with a range of figures, topics and problems in the history of philosophy as presented by different faculty members, visiting lecturers, and advanced students.

Critical Reading and Writing

Learn how to articulate and critique philosophical assertions, arguments, questions and presentations.

Application

Recognize and participate in accepted forms of philosophical thought and discourse.

Senior Seminar

Review of philosophical principles and advanced writing experiences culminating in a publishable paper.

PHIL 490

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Phil 300.
Taught	Fall, Winter

Course Outcomes

Application

Prepare for graduate/professional school and the job market.

Application

Better understand the relevance of philosophy to life and to career options

Critical Reading and Writing

Gain added experience in professional-level writing and communication

Directed Readings in Philosophy

For instructors and students who wish to pursue special problems or projects, or who wish to read texts that are not covered by available courses.

PHIL 495R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PHIL 300
Recommended	Phil 201, 202.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

History

Read and critically discuss related figures, texts, or issues under the tutelage of an expert in the field

Critical Reading and Writing

Practice philosophical analysis and argument orally and in writing; write a short essay or a longer research paper (depending on the number of credits for which one is enrolled) on the related figures, texts, or issues addressed by the course readings

Top

Graduate Seminar

Selected topic, figure, or movement in philosophy, as announced in current class schedule.

PHIL 501R

Hours	0.5 - 5.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Critical Reading and Writing

Earn graduate credit for attending and completing an upper-division philosophy course with enhanced assignments, research, and writing.

Figures and Topics

Investigate and understand an advanced philosophical issue or research topic.

Top

Basic Physics

Principles of classical and modern physics. Concepts and simple calculations applied to the world around us.

PHSCS 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Classical Physics

Use basic physical laws and concepts to analyze everyday phenomena and do simple calculations involving those laws. These laws and concepts include Newton's laws of motion, conservation laws, simple thermodynamics, fluids, and electricity and magnetism.

Modern Physics

Qualitatively discuss and do simple calculations involving modern physics concepts that are not everyday but which have important practical and philosophical implications in today's world, such as quantum mechanics, nuclear physics and relativity.

Top

General Physics 1

Applied physics course not requiring calculus. Mechanics, heat, wave motion, and sound.

PHSCS 105

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	High school algebra and trigonometry.
Recommended	Concurrent enrollment in Phscs 107.
Taught	Fall, Winter, Spring

Course Outcomes

Newton's Laws

Solve problems and answer conceptual questions about kinematics and Newton's laws in both linear and rotational contexts.

Energy and Momentum

Solve problems and answer conceptual questions about energy and momentum in both linear and rotational contexts.

Fluids, Temperatures, and Heat

Solve problems and answer conceptual questions about static flowing fluids, heat capacity and transfer, ideal gases, laws of thermodynamics, and heat engines.

Waves

Solve problems and answer conceptual questions about harmonic motion, waves, interference, and sound.

General Physics 2

Continuation of Phscs 105. Electricity and magnetism, modern physics, and optics

PHSCS 106

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 105 or equivalent.
Recommended	Concurrent enrollment in Phscs 108.
Taught	Fall, Winter, Summer

Course Outcomes

Electric Charges, Fields, Potentials, Circuits

Solve problems and answer conceptual questions about electric charges, fields, electric potentials, and circuits.

Magnetic fields, Forces, Faraday's Law, EM Waves

Solve problems and answer conceptual questions about magnetic fields, magnetic forces, Faraday's Law, and electromagnetic waves.

Geometric and Wave Optics

Solve problems and answer conceptual questions about geometric and wave optics.

Special Relativity, Quantum, Atomic, and Nuclear Physics

Solve problems and answer conceptual questions about special relativity, quantum physics, atomic physics, and nuclear physics.

Top

General Physics Lab 1

Lab experiments in mechanics and thermodynamics. Measuring and analyzing data.

PHSCS 107

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Phscs 105 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Hands-on Experience with Mechanics and Thermodynamics

Develop a greater conceptual understanding of mechanics and thermodynamics through hands-on experience with physical systems that illustrate lecture course material.

Measuring and Analyzing Physical Data

Develop skills in measuring and analyzing physical data.

Top

General Physics Lab 2

Lab experiments in electricity, magnetism, optics, and modern physics. Measuring and analyzing data.

PHSCS 108

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Phscs 106 or concurrent enrollment
Taught	Fall, Winter, Summer

Course Outcomes

Hands-on Experience with Electricity, Magnetism, and Optics

Develop a greater conceptual understanding of electricity and magnetism, optics, and modern physics through hands-on experience with physical systems that illustrate lecture course material.

Measuring and Analyzing Physical Data

Develop skills in measuring and analyzing physical data.

Top

Introduction to Newtonian Mechanics

Linear, circular, and projectile motion; their prediction from forces and torques. Conservation of energy and momentum. Weekly lab.

PHSCS 121

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Calculus or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Units and Significant Figures

Convert quantities from one set of units to another and use a reasonable number of significant digits when expressing answers.

Motion of a Particle

Interpret and draw motion diagrams including "blinking light' diagrams, x(t), v(t), a(t), and y(x) plots. Understand what time derivatives mean and how to estimate time derivatives from the information in these diagrams. Compute a particle's classical translational motion in one or two dimensions, including circular motion, both in Cartesian coordinates and in polar coordinates.

Newton's Second Law

Use Newton's Second Law to calculate the motion of objects, both in translation and rotation, and also those in simple harmonic motion, as well as the forces and torques acting on systems in equilibrium. Also use Newton's inverse-square law of gravity to calculate how objects move.

Energy and Momentum

Use the ideas of energy, work, power, linear momentum, impulse, and angular momentum to arrive at conclusions about the motion of a system, including systems in which collisions occur.

Scientific Process

Demonstrate an understanding of the basic scientific principles that undergird the scientific process, including the strengths and weaknesses of this process.

Top

Introduction to Waves, Optics, and Thermodynamics

Waves, thermal physics, optics, special relativity, and introduction to modern physics. Weekly lab.

PHSCS 123

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Phscs 121 or equivalent. Calculus.
Taught	Fall, Winter, Spring

Course Outcomes

Fluid States

Solve problems and answer conceptual questions using the basics of fluid statics and dynamics, including Bernoulli's principle and Pascal's law.

Temperature, Pressure, Entropy, and Volume for Ideal Gases

Answer conceptual questions and calculate changes in temperature, pressure, entropy and volume for quasistatic ideal gas processes and be able to determine work done and efficiency for gas engines, heat pumps, and refrigerators. Determine heat flow and temperatures in systems in steady state.

Physics of Waves

Solve problems and answer conceptual questions involving waves, using concepts such as wave speed, wavelength, frequency, superposition, beats, and resonance. Solve wave interference problems.

Imaging with Optics and Optical Systems

Find the location and magnification of images in single- and multiple-lens/mirror systems by calculation and by ray tracing, and be able to work general problems in optics using Snell's law and specular reflection.

Special Relativity, Quantum Mechanics, and Nuclear Physics

(Section 1) Solve problems and answer conceptual questions in basic modern physics including special relativity, and quantum mechanics and nuclear physics.

Waves, Fourier Anaylsis, Musical Acoustic,Special Relativity

(Section 2) Solve more advanced problems and answer conceptual questions in wave analysis,

including calculating group and phases velocities, solving for Fourier coefficients of periodic functions, and frequencies of notes in the equal temperament musical scale. Solve problems in special relativity.

Descriptive Astronomy

Nonmathematical presentation of knowledge of the content and history of the cosmos, frequently using observatory and planetarium.

PHSCS 127

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring
Offered	Honors also.

Course Outcomes

Astronomical Terminology and Perspective

Students will be able to answer conceptual questions using correct astrophysical terminology about the following core astronomy concepts:
* the motion of the Earth and the objects seen in the visible sky
* how and into what the Universe is organized by gravity at all scales from the solar system to the superclusters of galaxies.
* the significant and unique characteristics of each planet and other components of the solar system.
* the essential physical concepts that govern the life cycle of stars from creation to death, how the Sun compares to other stars, and the changes the Sun and stars will go through during their life cycles.
* the structure and classification of galaxies and clusters of galaxies.
* the central ideas of and evidences for current big bang cosmologies.

Night Sky

Students will be able to identify common naked eye constellations, bright stars and deep sky objectsin the sky.

Observing Projects

Students will gain practical experience by performing their own astronomical observations, interpreting their observations and communicating their results.

Appreciation of our Creator's Universe

Students will appreciate the grandeur of our Savior's universe.

Top

Honors Descriptive Astronomy

Nonmathematical presentation of knowledge of the content and history of the cosmos, frequently using observatory and planetarium.

PHSCS 127

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Astronomical Terminology and Perspective

Students will be able to answer conceptual questions using correct astrophysical terminology about the following core astronomy concepts:

Observing Projects

Students will gain practical experience by performing their own astronomical observations, interpreting their observations and communicating their results.

Appreciation of our Creator's Universe

Students will appreciate the grandeur of our Savior's universe.

Top

Severe and Hazardous Weather

Nonmathematical introduction to meteorology. Atmospheric structure and dynamic behavior, focusing on short-term violent weather and longer-term hazards: drought, floods, heat waves, cold waves, and climate change, including human environmental impact.

PHSCS 137

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phy S 100 or high school/college physics.
Taught	Fall

Course Outcomes

Types of Weather

Describe and explain types of severe weather, how they impact human lives, and how to minimize weather-related risks to themselves, others, and property.

Short-term and Seasonal Weather Patterns

Understand the reasons for short-term and seasonal weather patterns and changes and how those patterns and changes are represented in weather maps, charts, and images.

Climate

Explain the factors that control climate. Thereby explain the causes of climate change and the potential effects, catastrophic and benign, of such change.

Weather Forecasts

Formulate short-term weather forecasts directly from observations; fine-tune professional forecasts to their specific locations.

Electronics Lab

Introduction to analog and digital circuits.

PHSCS 140

Hours	1.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Simple Analog Circuits

Build and debug basic analog circuits that are of practical use in experimental physics such as voltage dividers, diode rectifiers, inverting and non-inverting op amp circuits, and transistor switches.

Voltage, Current, Resistance, Power, and Circuit Analysis

Demonstrate understanding of electrical concepts of voltage, current, resistance, power, and input and output resistance through the analysis of simple circuits.

Sources and Test Equipment

Demonstrate proper use and limitations of electrical sources and test equipment including DC power supplies, multimeters, oscilloscopes, and function generators.

Simple Digital Circuits

Build and debug basic digital circuits that use components such as digital gates, flipflops, counters, and digital to analog converters.

Top

Experimental Methods in Physics

Introduction to physical measurement and analysis, optics, sensors, actuators, and computer-based data acquisition.

PHSCS 145

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	PHSCS 140; Phscs 121 or equivalent.
Taught	Fall, Summer

Course Outcomes

Basic Skills

Demonstrate good practices in experimental physics documentation and communication such as data collection, record keeping, and presentation.

Data Analysis

Demonstrate the ability to analyze experimental data this includes techniques such as error estimation, error propagation, model selection, and curve fitting.

Oscillating Signal Analysis

Apply AC concepts such as frequency response, frequency filtering, fourier transform analysis, and impedance to sinusoidally-driven electrical, mechanical, optical, and acoustical systems.

Descriptive Acoustics of Music and Speech

Introductory acoustics course, emphasizing physical principles underlying production and perception of music and speech.

PHSCS 167

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Concepts

Define the basic terminologies of acoustics, identify physical principles involved in common situations and answer conceptual questions related to hearing, speech, audio, listening environments, and musical instruments.

Models of acoustical systems

Apply scientific models to analysis of hearing, speech and musical instruments, etc.

Analysis

Solve basic problems related to hearing, speech, audio, listening environments, and musical instruments.

Writing

Write effectively using the terminology of acoustics and logically outline how acoustics is important in a discipline of their choice.

Introduction to Physics Careers and Research 1

Survey of BYU undergraduate physics and astronomy programs, careers in physics and astronomy, and current physics and astronomy research.

PHSCS 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Take first semester after registered as physics major.
Taught	Fall Term 1

Course Outcomes

Subfields of Physics

Describe the major subfields of physics and the breadth of interdisciplinary research to which physicists contribute.

Current Physics Research

Describe examples of current research in physics or astronomy, explaining what questions are being asked by the investigators and why these questions are interesting.

Careers in Physics

Describe career opportunities available in physics and astronomy and the specific preparation necessary for these careers.

Educational Plan

Develop a draft of an educational plan for both undergraduate and graduate training.

Physics and Mathematics Review

Review of mathematics and introductory physics for returning missionaries and others returning after a significant break.

PHSCS 198

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Phscs 121 or equivalent. Math 113 or concurrent enrollment.
Taught	Fall Term 1

Course Outcomes

Math Review

Recall and apply the fundamental mathematical concepts and techniques up to the level of differential and beginning integral calculus that are necessary for Physics 121.

Physics Review

Recall and apply fundamental physics concepts at the level of Physics 121.

Introduction to Electricity and Magnetism

Electricity and magnetism. Weekly lab.

PHSCS 220

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MATH 113; Phscs 121 or equivalent.
Taught	Fall, Winter, Summer

Course Outcomes

Electrostatics

Use Maxwell's equations to find electric and magnetic fields in symmetric arrangements of static charges and steady currents. Also find electric and magnetic fields by integrating over charge and current densities.

Energy and Motion of Charged Particles

Solve problems and answer conceptual questions involving electromagnetic energy (potential), forces, and the motion of charged particles and dipoles.

Electrical Circuits

Analyze simple direct current and alternating current circuits of resistors, inductors, capacitors and power supplies.

Electrodynamics

Use Maxwell's equations to solve problems and answer conceptual questions with changing electric and magnetic fields, including induction and electromagnetic radiation.

Modern Physics

Quantum physics, atoms, molecules, condensed matter, nuclei, elementary particles, and selected topics in contemporary physics.

PHSCS 222

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 123 & PHSCS 220; Phscs 121 or equivalent.
Taught	Fall, Winter

Course Outcomes

Fundamental Principles

Demonstrate their understanding of the fundamental postulates and principles of special relativity and quantum mechanics.

Simple Systems

Apply the principles of quantum mechanics to predict the results of measurements in simple systems such as a free particle, simple potential wells, and central potentials.

Applications

Solve problems and answer conceptual questions applying the principles of quantum mechanics and special relativity to topics in modern physics such as atomic physics, molecular physics, the physics of solids, statistical physics, nuclear physics, radioactivity, and particle physics.

Solar System Astronomy

Solar-system dynamics, planetary surfaces and atmospheres. Analysis of stellar data from telescopes, spectrometers and photometers. Interaction of light with atoms and molecules. Extrasolar planets.

PHSCS 227

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 121; Math 112 or equivalent; Phscs 127 or concurrent.
Taught	Fall

Course Outcomes

Celestial Mechanics and the Nature of Light

Students will be able to solve elementary problems in classical celestial mechanics and in the interaction of light with atoms and molecules. Mastery will be measured through the use of homework and exam problems.

The Solar System

Students will be able to describe the differences between the planets and the moons and how these differences provide clues as to their formation history. Mastery of this knowledge will be determined through short answer essay questions on exams and preclass questions.

Scientific Writing

Students will be taught how to search astronomy publications to gather information on a given topic and present their findings in the form of a scientific paper with proper acknowledgement. Progress will be monitored through regular meetings with the instructor who will determine at each interview the student's progress and provide appropriate guidance. Students will be given a rubric to guide them in the writing of the paper, and the rubric will be used to grade the final paper

Research Opportunities

Students will write an ORCA or Internship application specific to their area of study. This will introduce them to research opportunities. Students will be guided throughout the process. Applications will be graded by the professor for completeness and the student may submit the application to the appropriate funding agency if they choose, but this is not required.

Stellar and Extragalactic Astronomy

Stellar atmospheres, stellar interiors, stellar evolution, interstellar matter, galactic structure, external galaxies, and cosmology.

PHSCS 228

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 227
Taught	Winter

Course Outcomes

The Interstellar Medium, Star Formation, and Evolution

Display a qualitative and simple quantitative understanding of the role of the interstellar medium in star formation, stellar structure and evolution;

Stellar Populations and Galactic Structure

Demonstrate an understanding of stellar populations and galactic structure;

The Milky Way and Other Galaxies

Display a knowledge of the basic properties of galaxies;

Cosmology

Display a qualitative grasp of up-to-date observational cosmology and solve elementary problems in theoretical cosmology.

Computational Physics Lab 1

Introduction to numerical and symbolic computation and graphical analysis using a symbolic mathematics program. Applications to mechanics, optics, and special relativity.

PHSCS 230

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MATH 113 & PHSCS 121 & PHSCS 123; Phscs 220 or concurrent enrollment. Math 302 or 313 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Mathematical Basics

Demonstrate the ability to apply calculus, linear algebra, and complex analysis to solve undergraduate-level physics problems.

Programming

Demonstrate the ability to use programming constructs such as looping, conditional execution, and iteration to solve physics problems.

Solve Equations

Solve equations, including systems of equation, related to physical phenomena both symbolically and numerically.

Develop Insight

Demonstrate the ability to visualize, analyze, and interpret equations, data, and physical models.

Design, Fabrication, and Use of Scientific Apparatus

Machining, computer interfacing, controls, and vacuum systems.

PHSCS 240

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	PHSCS 123 & PHSCS 145
Taught	Fall, Winter

Course Outcomes

Design and Build

Design, build, and interface experimental apparatus.

Measurements

Make involved physical measurements and analyze experimental results.

Record Keeping

Document in a personal lab notebook the procedures, methods, results, and analysis of laboratory exercises.

Presentation

Present work in writing and through oral presentations.

Ethics

Demonstrate understanding of professional ethics guidelines for research activities and presentation of results.

Top

Experiments in Contemporary Physics

In-depth, multi-period experiments in contemporary physics, using advanced instrumentation.

PHSCS 245

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	PHSCS 220 & PHSCS 240
Taught	Fall, Winter

Course Outcomes

Perform Experiments

Independently design and carry out multi-period in-depth projects.

Lasers, Chips, and Vacuum

Demonstrate the use and assembly of experimental systems using contemporary instrumentation components to perform experiments in areas such as coherent optical systems, microfabrication, and vacuum systems.

Presentation

Present research results through oral presentations.

Principles of Solid State Physics

Introduction to physics of solids, including laboratory experience.

PHSCS 281

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PHSCS 220; Phscs 121 or equivalent.
Note	For students in science, computer science, technology, and engineering.
Taught	

Course Outcomes

Crystals

Use the concepts of lattices, unit cells, and the atomic basis to describe the structure of crystals.

Reciprocal Space

Apply the concept of reciprocal lattices and the first Brillouin zone to arrive at conclusions about wave diffraction, dispersion graphs of lattice waves, and electron energy bands.

Electrons in Crystals

Apply basic principles of quantum mechanics to describe the behavior of electrons in crystalline solids and describe the concepts of density of states, Pauli's exclusion principle, the Dirac distribution function, and band structure.

Band Structure

Use the ideas of band structure to arrive at conclusions about the electrical properties of materials. Use the ideas of doping to arrive at conclusions about the electrical properties of semiconductors.

Introduction to Physics Careers and Research 2

Career opportunities for physicists in industry, interdisciplinary research, national labs and observatories, and professions such as medicine, law, and business. Personal planning for research or internship involvement.

PHSCS 291

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 123; Phscs 191 or concurrent enrollment.
Note	Take first semester as a sophomore.
Taught	Fall Term 2

Course Outcomes

Careers

Describe career opportunities for physicists in industry, interdisciplinary research, national labs and observatories, and professions such as medicine, law and business.

Prepare for Success

Learn how to prepare for and succeed in such careers from physicists working in them.

Research Plan

Develop a plan for research or internship involvement.

Graduate School

Develop a plan for graduate school (if the student's career path requires it).

Top

Introduction to Research

Faculty-supervised research experience.

PHSCS 297R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research and Write

Produce an informal written report in acceptable scientific style describing the results of this mentored research experience.

Physics By Inquiry: Mechanics

Exploring principles of mechanics through scripted inquiry resulting in personal discovery of key principles and learning to teach through inquiry methods.

PHSCS 310

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	PHSCS 105; or PHSCS 121
Taught	Winter

Course Outcomes

Constructivist Learning Model

Teach and learn physics using constructivist inquiry based modes of instruction.

Physics Teaching Using Technology

Be able to deliver laboratory instruction to students using only meter sticks and stopwatches (low tech data collection) and also using electronic probes (high tech data collection).
Use of Video and Computer Data collection techniques.

Development and Experience with of a Suite of Secondary Scho

Leave class with a suite of about 15 labs that they have completed and written up from the constructivist teacher model that they can use immediately in the 7-12 secondary physics classroom.

Development of Physics Pedagogic Teaching Skills

Develop teaching skills in using projects, practicums and lab experimentation that can be transferred to secondary schools when they are teachers.

Physics By Inquiry: Electricity

Exploring principles of electricity through scripted inquiry resulting in personal discovery of key principles and learning to teach through inquiry methods.

PHSCS 311

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	PHSCS 106; or PHSCS 220
Taught	Winter

Course Outcomes

Constructivist Learning Model

Teach physics using constructivist inquiry based modes of instruction, scripted inquiry.

Physics Teaching Using Technology

Be able to deliver laboratory instruction to students from the CASTLE Electricity units.

Development & Experience a Suite of Secondary School Electr

Develop teaching skills in using projects, practicums and lab experimentation that can be transferred to secondary schools when they are teachers.

Development of Physics Pedagogic Teaching Skills

Develop a teaching suite of labs for teaching electricity.
Develop the ability to use alternative modes of assessment that take students beyond the multiple choice format of assessment to open ended, "apply the physics you understand" to this problem.

Top

Special Topics in Physics

Special topics in physics for undergraduate physics majors.

PHSCS 313R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Master Subject

Achieve the learning outcomes of the trial courses assigned this number from time to time.

Introduction to Mathematical Physics

Partial differential equations, classical field equations, algebra of complex variables, Fourier analysis, integral transforms, and orthogonal functions.

PHSCS 318

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 303 & PHSCS 230; or MATH 334 & PHSCS 230
Taught	Fall, Winter

Course Outcomes

Partial Differential Equations

Solve partial differential equations in Cartesian, cylindrical, and spherical coordinates using separation of variables and expansions in orthogonal functions. Apply boundary conditions appropriate for physical systems.

Complex Numbers

Perform algebraic computations involving complex numbers and functions.

Special Functions

Use the properties (such as recursion relations, derivative relationships, and orthogonality conditions) of various special functions, including trigonometric functions, Bessel functions, and Legendre polynomials to solve problems involving those functions.

Fourier Analysis

Use Fourier series and transforms to expand functions and solve partial differential equations on appropriate domains.

Mechanics

Newton's laws applied to particles and systems of particles, including rigid bodies. Conservation principles and Lagrange's and Hamilton's equations.

PHSCS 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 121 & PHSCS 230 & MATH 302; or PHSCS 121 & PHSCS 230 & MATH 314; Math 303 or 334 or concurrent enrollment.
Recommended	Concurrent enrollment in Phscs 330.
Taught	Fall, Spring

Course Outcomes

Newton's Laws

Use Newtonian mechanics with forces and torques to solve problems in Cartesian and curvilinear coordinates.

Work, Energy, and Momentum

Solve mechanics problems using work-energy, and conservation of energy, momentum and angular momentum.

Rotation

Solve and analyze rigid-body problems and problems in non-inertial frames.

Lagrangion and Hamiltonian mechanics

Use Lagrangian and Hamiltonian mechanics to obtain the equations of motion for a variety of problems, including the use of generalized coordinates and cyclic coordinates.

Perturbation Theory

Use perturbation and similar techniques to linearize equations of motion to analyze stability and study coupled systems using normal modes.

Observational Astronomy

Basic techniques of observational astronomy, emphasizing practical experience in optical data acquisition and analysis.

PHSCS 329

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	PHSCS 127
Note	See instructor about proficiency exam if you have taken Phscs 127 equivalent.
Taught	Winter

Course Outcomes

Observing with a Telescope and CCD camera

Obtain publication quality astronomical data (photometric data) using a telescope and CCD camera.

Optical Data Reduction and Analysis

Process raw data and extract astrophysically significant information from data about astronomical objects.

Astronomical Written and Verbal Presentation Skills

---Present results in astronomical publication format written in AASTeX.
---Present results in poster form like those at American Astronomical Society meetings.
---Prepare a request for telescope time at a facility outside of BYU

Professional Ethics

Follow professional ethics guidelines in research activities and presentation of results.

Top

Computational Physics Lab 2

Numerical solution of ordinary differential equations with applications to dynamics and chaos. Introduction to scientific programming.

PHSCS 330

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	PHSCS 121 & PHSCS 230; Math 303 or 334 or equivalent; CS 142 or equivalent.
Taught	Fall, Spring

Course Outcomes

Computer Programming and Differential Equations

Write and debug scientific programs to solve ordinary differential equations and simulate dynamical systems.

Explain Differential Equations

Qualitatively explain how differential equations generate their solution curves.

Top

Statistical and Thermal Physics

Principles of statistical mechanics and thermodynamics, with applications.

PHSCS 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 222 & MATH 303; or PHSCS 222 & MATH 334
Taught	Winter

Course Outcomes

Thermodynamics

Use statistical arguments to explain thermodynamics from first principles, including heat flow and the increase of entropy. Apply these to solve quantitative problems in thermodynamics.

Equilibrium and Phase Transformations

Use thermodynamic potentials, e.g. the Helmholtz and Gibbs free energies, to predict equilibrium states in physical systems and predict phase transformations.

Explain Physical Phenomena

Use simple models to explain physical phenomena in a variety of systems, including: classical and quantum ideal gases, magnetic systems, solids.

Seminar in Current Physics

PHSCS 391R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Current topics

Students will become familiar with current topics in this content area.

Build & strengthen career network

Students will build and strengthen their career network.

Attend seminars

Students will attend 50% of the seminars offered this semester and write a summary of the topic discussed each time.

Top

Academic Internship

PHSCS 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Both department chair's and internship coordinator's consent.
Note	For students engaged in the internship program.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research, Write, Present

Student will report, both verbally and in writing, what he or she learned from the internship experience.

Writing in Physics

Writing scientific and technical articles and proposals. Writing and presentation skills applied to senior thesis or capstone project. Resources and guidelines for publishing in physics.

PHSCS 416

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Completed research for thesis or capstone project.
Taught	Winter

Course Outcomes

Communication

Communicate succinctly and precisely in both written and oral formats.

Thesis

Write a thesis/capstone report or a professional paper.

Ethics

Describe ethical issues that may arise in the physics profession and formulate appropriate responses to these issues.

Professional Documents and Presentations

Produce professional documents (resume, memo, etc.) and presentations.

Introduction to Astrophysics

Principles and observational techniques of astrophysics.

PHSCS 427

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 227 & PHSCS 228
Taught	Fall

Course Outcomes

Synthesizing Relevant Journal Articles

Read multiple astronomy journal articles covering content from this course and synthesize the information to provide a clearly written discussion of the material.

Astrophysical Content

---Discuss conceptual understanding and work mathematical solutions of orbits related to the solar system, extra-solar planets, and binary stars.
---Discuss conceptual understanding and work mathematical solutions for the formation of spectral lines in astrophysical objects.
---Discuss conceptual understanding and work mathematical solutions for the basics of stellar structure and evolution.

Astronomical Writing Skills

Prepare an astronomy journal style article detailing a single astronomical topic related to class material. Do this with proper ethical considerations.

Top

Introduction to Astrophysics

Principles and observational techniques of astrophysics.

PHSCS 428

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 227 & PHSCS 228
Taught	Winter

Course Outcomes

Spectroscopy

Explain and apply the basic laws and conventions of atomic spectroscopy.

Electromagnetic Radiation and the Equation of Transfer

Explain and apply fundamental radiation laws for both continuum and discrete line processes. Relate line emission and absorption coefficients to the Einstein coefficients. Be familiar with the equation of transfer and solve it for the interstellar medium and an Eddington model atmosphere. Explain stellar limb darkening.

Understanding Stellar Spectra

Describe the physical mechanisms that broaden and shape line absorption coefficients and show how to convolve various combinations of coefficient profiles. Then explain the changes that occur in a line profile as causative conditions change. Explain why an actual line profile is proportional in shape to its absorption coefficient profile in weak but not in strong lines.

Stellar Composition

Use curve-of-growth analysis to determine stellar composition.

Stellar Spectra and the Earth's Atmosphere

Explain and quantify the degradation of stellar spectra by terrestrial atmospheric absorption, scattering and refraction.

Top

Computational Physics Lab 3

Computational study of static and dynamic boundary value problems, partial differential equations, linear algebra, and eigenvalues. Applications in electrostatics, thermodynamics, waves, and quantum mechanics.

PHSCS 430

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	PHSCS 222 & PHSCS 318 & PHSCS 330
Taught	Winter, Summer

Course Outcomes

Numerically Solve Partial Differential Equations

Write and debug programs to solve physics problems involving partial differential equations.

Linear Algebra

Use linear algebra and eigenvalues in the solution of partial differential equations and to find normal modes in mechanical systems.

Top

Electrostatics and Magnetism

Classical theory of static electric and magnetic fields.

PHSCS 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 220 & PHSCS 318
Taught	Fall, Spring

Course Outcomes

Vector Calculus

Demonstrate the ability to apply the concepts of vector calculus as used in Maxwell's equations.

Integrating Static Sources

Demonstrate the ability to integrate over a source distribution to calculate time-independent fields and potentials for both electricity and magnetism. Also demonstrate the ability to use Gauss's law and Amperes law to find electric and magnetic fields in symmetric situations.

Image Charges and Currents

Demonstrate the ability to use vacuum harmonics, image charges, and image currents to solve for time-independent electric and magnetic potentials and fields.

Material Influences

Demonstrate the ability to calculate electric and magnetic fields in the presence of matter which can be electrically and magnetically polarized, including the ability to solve problems involving torques and potential energies of electric and magnetic dipoles.

Top

Electrodynamics

Maxwell's equations, radiation, interaction of electromagnetic fields with matter, and special relativity.

PHSCS 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 441
Taught	Winter, Summer

Course Outcomes

Time-dependent Sources

Demonstrate the ability to calculate time-dependent electric fields using Faraday's law and the ability to calculate time-dependent magnetic fields using Maxwell's displacement current.

Energy Densities

Demonstrate the ability to solve problems involving electric and magnetic energy densities and the Maxwell stress tensor.

Electromagnetic Waves

Demonstrate the ability to use Maxwell's equations to solve problems involving electromagnetic waves in vacuum and in matter.

Retarded Time

Demonstrate the ability to use the concept of retarded time to compute radiation potentials.

Relativity

Demonstrate the ability to solve problems involving the special theory of relativity, including 4-vectors, form invariance, and the electromagnetic field tensor.

Top

Quantum Mechanics

Analytical foundations of quantum mechanics.

PHSCS 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 222 & PHSCS 318
Taught	Fall

Course Outcomes

Concepts of Quantum Mechanics

Understand the mechanics of operators, eigenstates and eigenvalues. Learn how to build wave functions, estimate expectation values and standard deviations, and apply the Heisenberg uncertainty principle.

Mathematical Techniques

Manipulate the Schrödinger equation to solve for wave functions.

Solutions for Standard Potentials

Develop free-particle and bound-state solutions to the Schrödinger equation. (In particular, harmonic oscillator, infinite and finite square-well, finite barrier potentials...).

Hydrogen

Construct simple solutions for Hydrogen atom, angular momentum and spin systems, atoms and solids.

Applications of Quantum Mechanics

Applications of quantum mechanics to atomic, molecular, statistical, condensed-matter, and nuclear physics; elementary particles.

PHSCS 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 451
Taught	Winter

Course Outcomes

Quantum systems

Apply techniques such as time-independent perturbation theory, variational methods, time-dependent perturbation theory, and scattering theory to quantum systems.

Level Splitting

Describe and quantify fine, hyperfine, and Zeeman level splittings in atoms.

Emission and Absorption

Characterize emission and absorption of radiation by atoms, and derive the associated selection rules.

Scattering and Tunneling

Solve quantum scattering and tunneling problems.

Introduction to Acoustics

Mathematical descriptions of physical phenomena in generation, propagation, and reception of acoustic waves. Fundamental acoustical instrumentation and analysis techniques. Application of physical principles and mathematical models to realistic problems.

PHSCS 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 121 & PHSCS 123 & MATH 303; or PHSCS 121 & PHSCS 123 & MATH 334
Recommended	Concurrent enrollment in Phscs 318 or equivalent.
Taught	Winter

Course Outcomes

Principles of Acoustics

Demonstrate a conceptual and mathematical understanding of acoustical phenomena, including source radiation, transmission, absorption, and reflection.

Acoustical Measurements and Reporting

Perform acoustical measurements, interpret the data, and document the results in the form of technical laboratory reports.

Acoustical Calculations

Appropriately calculate various measures of sound, including sound pressure level, transmission loss, sound power, weighted levels, and noise criteria.

Principles of Optics

Electromagnetic wave phenomena, including polarization effects, interference, coherence, dispersion, ray theory, diffraction; introduction to quantum nature of light. Laboratory component emphasizes applications.

PHSCS 471

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PHSCS 123 & PHSCS 220 & MATH 302; or PHSCS 123 & PHSCS 220 & MATH 314; Math 303 or 334 or concurrent enrollment.
Recommended	Phscs 318.
Taught	Winter, Summer

Course Outcomes

Basic Optics Concepts

Use mathematical and conceptual descriptions of propagation of light in matter, reflection/transmission at boundaries, polarization effects, interference, dispersion, coherence, image formation, diffraction, and quantum aspects of light to analyze and predict optical phenomena.

Lab Work

Manipulate and measure properties of light in a laboratory setting.

Mathematical Tools

Apply mathematical tools such as vector calculus, complex numbers, matrices, and Fourier transforms (1D and 2D) to optical problems.

Capstone Project in Applied Physics

Conduct and report original research or appropriate creative work. Mentored career experience combining physics and the chosen area of interest. Complete senior physics examination.

PHSCS 492R

Hours	2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Note	Project must be approved before registration or starting project.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research and Write

Students will produce, in both verbal and written form, a report of what was accomplished in his or her capstone project.

Top

Research in Physics

PHSCS 497R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research and Write

Produce a written report in acceptable scientific style describing the results of this mentored research experience.

Senior Thesis

Conduct and report research under a department faculty mentor or other professional. Complete senior physics examination.

PHSCS 498R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Note	Thesis topic must be cleared by faculty member before registration.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research

Perform significant research in physics or astronomy under the direction of a faculty or internship mentor.

Writing

Present their research in a written document that follows professional standards in the field.

Ethics

Do the above within professional ethical standards.

Top

(Phscs-Chem-C S-Geol-Math-MthEd-Stat) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

PHSCS 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Top

Special Topics in Contemporary Physics

Topics generally related to recent developments in physics.

PHSCS 513R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Master Subject

Demonstrate the ability to achieve the learning outcomes of this trial course whose subject is variable.

Advanced Observational Astronomy

Advanced techniques of observational astronomy, emphasizing knowledge and skills necessary to carry out observational scientific investigation in astronomy.

PHSCS 529

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 427 & PHSCS 428
Taught	Fall

Course Outcomes

Optical Astronomy

Reduce all-sky photometric astronomical data in multiple filters.

Robotic and Remote telescopes

Program an observing schedule into a remote/robotic telescope system to acquire high quality data.

Infared Observations

Process and analyze infrared astronomical data sets.

Radio Astronomy

Obtain, process, and analyze radio data on astronomical objects.

Spectroscopic Observations

Reduce raw astronomical spectroscopic data to 1D wavelength calibrated stectra and calculate astrophysically important data from those spectra.

Multi-wavelength Observations

Describe observing programs that require multi-wavelength observing programs.

Top

Electrical Engineering Principles and Practices for Physicists

Electronic instrumentation theory and methods. Computer aided circuit design and analysis with transforms, logic and computer simulation. Analog, digital, and discrete signal systems. Printed circuit design and system-on-a-chip creation.

PHSCS 540

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Phscs 140, 145, 220; Math 303 or 334; ability to program in Matlab.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Mathematical modeling of electronic circuits & software simulation of circuits

Students will acquire introductory skill in topics advanced for typical physics curriculum
in the application of Laplace Transforms to passive and active analog circuits.
in SPICE simulation software for transistor and operational amplifier circuits.
in component level debug and repair.
in digital logic synthesis and reduction.

Microcontroller implementation and programming

Students will acquire introductory skill in topics advanced for typical physics curriculum
in computing theory and microcontroller applications and programming.

Synthesis of programmable logic

Students will acquire introductory skill in topics advanced for typical physics curriculum
in field programmable gate array (FPGA) configuration, application, and the notion of a system on a chip (SoC).

Circuit manufacturing and packaging skills

Students will acquire introductory skill in topics advanced for typical physics curriculum
in computer aided design (CAD) for printed circuits, soldering, manual chassis wiring, and the use of sheet metal for constructing electronic chassis.
in thru hole and surface mount technology assembly and repair, including high pin count, high pin pitch parts.

Top

Introduction to Plasma Physics

Introduction to plasma physics, including single-particle motion and both fluid and kinetic models of plasma behavior.

PHSCS 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 321 & PHSCS 441
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Particle and Fluid Descriptions

Solve problems and answer conceptual questions involving both the single-particle and the fluid descriptions of a plasma.

Waves

Describe and characterize the various waves found in a plasma.

Equilibrium and Stability

Determine the equilibrium and evaluate the stability of simple plasma configurations.

Kinetic Theory and Nonlinear Effects

Solve problems and answer conceptual questions involving the kinetic theory of plasmas and nonlinear effects.

(Phscs-Me En) Fundamentals of Acoustics

Vibrating systems, elastic media, mechanical energy, and radiation. Sound generation, transmission, reflection, and reception.

PHSCS 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 318 or equivalent; Phscs 461 or concurrent enrollment.
Recommended	Phscs 318, 321; or equivalents.
Taught	Fall

Course Outcomes

Vibration and Sound

Conceptualize and solve problems in fundamental areas of vibroacoustics, including: strings, rods, membranes, beams, plates, plane and spherical waves, reflection and transmission phenomena, and radiation of sources.

Analyze Acoustical Data

Acquire and analyze acoustical data for physical understanding, and document the results in the form of technical laboratory reports.

Lasers and Atoms

Laser amplification, cavity design, and control and characterization of temporal and spatial modes. Interactions between lasers and atoms.

PHSCS 571

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 451, 471; or equivalents.
Taught	Fall

Course Outcomes

Laser Design

Design stable laser resonators, frequency-locking feedback systems, and pulsed-output mode-locking systems.

Measuring Laser Characteristics

Measure durations of femtosecond pulses and the line width and center frequency of frequency-stabilized sources.

Physics of Lasers

Compute cavity threshold gain, optimal output coupling, and gain saturation.

Light-matter Interactions

Describe interactions of light and matter within a semi-classical two-level-atom framework.

Atomic Properties

Compute cross sections and selection rules for transitions in hydrogen.

Solid-State Physics

Introduction to the physics of solids. Crystal structure and symmetry, X-ray diffraction, lattice vibrations, metals and semiconductors, superconductivity, thermal properties, magnetic properties, and dielectric and optical properties.

PHSCS 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 222 or equivalent.
Taught	Winter

Course Outcomes

Basic Concepts in Condensed Matter Physics

Explain the following basic concepts underlying the topics in solid state physics: (1) crystal symmetry, (2) reciprocal lattice and the first Brillouin zone in k-space, and (3) the quantum behavior of electrons, Pauli's exclusion principle, and the Fermi-Dirac distribution function.

Physical Properties of Solids

Use these basic concepts to explain crystal structure, x-ray diffraction, lattice vibrations, behavior of electrons in metals and semiconductors, and thermal, magnetic, dielectric and optical properties of materials.

Solve Problems

Show their understanding of these topics and their underlying concepts by solving problems using a variety of mathematical tools.

Top

Physics of Nanostructures, Surfaces, and Interfaces

Properties of nanostructures, surfaces, and interfaces; experimental methods. Applications to emerging problems and opportunities in science and technology. Emphasis on concepts.

PHSCS 583

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 222 or equivalent.
Recommended	Phscs 281 or 581 or equivalent; Phscs 451 or Chem 462 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Deepen understanding

Students will deepen their understanding of nano and surface physics.

Demonstrate knowledge

Students will demonstrate knowledge in nano and surface physics.

Improve ability to solve problems

Students will improve their ability to solve problems using nano and surface physics.

Thin-Film Physics

Preparation, characterization, use, and special properties of modern thin films; interdisciplinary treatment. Of interest to students in applied physics and engineering.

PHSCS 585

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Phscs 222 or equivalent.
Taught	Winter even years

Course Outcomes

Thin Film Basics

Solve problems and answer conceptual questions, utilizing the graphs, figures and photographs of thin film material science, about structural and chemical aspects of thin films in relation to their environment.

Solve Problems

Solve problems and answer conceptual questions involving deposition and characterization of films, and explain which ones that best match resources and requirements.

Transmission Electron Microscopy for Physical Science and Engineering

Practical and theoretical aspects of sample preparation, basic and advanced imaging, electron diffraction, and other analytical materials characterization techniques on the transmission electron microscope (TEM).

PHSCS 586

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Alignment

Perform basic, necessary alignments of the transmission electron microscope (TEM).

Images

Use the TEM to acquire different types of images and diffraction patterns of various materials.

How the TEM works

Demonstrate a working knowledge of the physical components of the TEM and peripheral equipment.

TEM Research

Show understanding of the theory and practice of electron imaging, electron diffraction and X-ray energy dispersive spectrometry, as how they apply to the characterization of materials.

Physics of Semiconductor Devices

Device physics, with an in-depth study of the MOS transistor and other nanoscale computing devices.

PHSCS 587

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 281; or PHSCS 581; or EC EN 450
Taught	Fall Contact Department

Course Outcomes

Fundamental Mechanisms

Identify the fundamental mechanisms and models of these mechanisms controlling the operation of semiconductor devices.

Analyze Devices

Apply the fundamental mechanisms and models to the analysis of devices such as silicon mosfets, silicon on insulator transistors, carbon nanotube transistors, and graphene transistors.

Learn the Literature

Find, read, and utilize contemporary semiconductor device physics literature to write reviews of this literature.

Top

Scanning Electron Microscopy (SEM) for Physical Science and Engineering

Theoretical aspects of sample preparation, basic and advanced imaging, X-ray energy dispersive spectrometry, and other analytical materials characterization techniques on the scanning electron microscope (SEM).

PHSCS 588

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Academic Internship

Cooperative education internships off campus.

PHSCS 599R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department internship coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Report

Student will report, both verbally and in writing, what he or she learned from the internship experience.

Honors Physical Science

Conceptual lectures and demonstrations of the most significant and universal laws and models describing the physical world by faculty from Physics and Astronomy, Chemistry and Biochemistry, and Geology departments.

PHY S 100

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Note	Satisfies GE Physical Science requirement.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Observe and Apply Physical Principles

Students will be able to observe physical phenomena and recognize and apply the fundamental principles of science to these simple physical situations.
They will also be able to extend these principles and models to situations they have not observed and make predictions about the outcomes.

Express Scientific Ideas

Students will be able to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data.

Science and Religion

Students will be able to rationally reflect and discuss about the interface between science and religion.

Further Scientific Questions

Students will be able to explain how these principles and models in turn lead to further scientific questions.

Public Policy

Students will be able to evaluate scientific data and claims in order to make rational decisions on public policy issues related to science that affect them and their communities.

Physical Science

Conceptual lectures and demonstrations of the most significant and universal laws and models describing the physical world by faculty from the Physics and Astronomy, Chemistry and Biochemistry, and Geology departments.

PHY S 100

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Note	Satisfies GE Physical Science requirement.
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Observe and Apply Physical Principles

Students will be able to observe physical phenomena and recognize and apply the fundamental principles of science to these simple physical situations.
They will also be able to extend these principles and models to situations they have not observed and make predictions about the outcomes.

Express Scientific Ideas

Students will be able to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data.

Science and Religion

Students will be able to rationally reflect and discuss about the interface between science and religion.

Further Scientific Questions

Students will be able to explain how these principles and models in turn lead to further scientific questions.

Public Policy

Students will be able to evaluate scientific data and claims in order to make rational decisions on public policy issues related to science that affect them and their communities.

Top

Exploration of Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

PHY S 276

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	FBI fingerprint and background clearance.
Taught	

Course Outcomes

Moral Dimensions of Education

Students will become familiar with the four moral dimensions of education as outlined by the McKay School of Education

Complete 40 hours of classroom observation

Engage in the exploration of teachers and students in the public school to come to a conclusion if teaching physical science is a career path you want to pursue.

Complete all transition points in transition one moving towa

Complete PIBS, CDS, Field Experience Demographic forms in Mackay School date collection program.

Top

Teaching Methods and Instruction

Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

PHY S 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PHY S 276
Taught	Fall, Winter

Course Outcomes

Develop a Unit Plan of Secondary Science Instruction

Using Science Standards as a quide develop Assessments, Lesson Plans, Outlines, and all parts of a unit of science instruction.

Introduction to different teaching styles

Inquiry, Constructivism, Lab, Activities, Projects and other methods to engage students in learning. These teaching methods will be modeled and practiced by the students.

Transition 2 completed

Students will complete Transition 2 level toward teaching license.

Top

Practicum in Secondary Education

Implementing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

PHY S 378

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Concurrent enrollment in Phy S 377.
Taught	Fall, Winter

Course Outcomes

Teach unit prepared in PHY S 377

30 practicum hours where you teach a unit of instruction with guidance public school mentor.

Top

Current Events and Political Science

An introduction to political science using both national and international current events. Introduces faculty and academic expectations. Appropriate for non-majors.

POLI 101R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will gain a deep understanding of the relationship between current events and political science.

Top

American Government and Politics

Origin and development of federal Constitution; national, state, and local governments and politics.

POLI 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Honors also. Independent Study also.

Course Outcomes

Analyze and Contextualize Current Events

Analyze current events in American politics using Political Science concepts.

Describe Constitutional Provisions

Describe the most important constitutional provisions in American national government and how they have changed over time.

Explain Individuals' Roles in American Government

Explain the role individuals play in American government and what factors influence their behavior.

Assess American Political Institutions

Assess the functions and interactions of American political institutions.

Learn to Participate Effectively in Political Process

Evaluate how you as an individual can effectively participate in the political process.

Honors American Government and Politics

Origin and development of federal Constitution; national, state, and local governments and politics.

POLI 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Analyze and Contextualize Current Events

Analyze current events in American politics using Political Science concepts.

Describe Constitutional Provisions

Describe the most important constitutional provisions in American national government and how they have changed over time.

Explain Individuals' Roles in American Government

Explain the role individuals play in American government and what factors influence their behavior.

Assess American Political Institutions

Assess the functions and interactions of American political institutions.

Learn to Participate Effectively in Political Process

Evaluate how you as an individual can effectively participate in the political process.

Top

Comparative Government and Politics

Patterns of European, Asian, Latin American, and other political systems.

POLI 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Honors also.

Course Outcomes

Familiarity with Political Science Subfields

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Comparative Politics Familiarity

Demonstrate a familiarity with the subfield of comparative politics

Faith and Political Analysis

Reflect on the way that religion affects politics in their own lives and in the lives of others

Knowledge of Countries

Possess a factual and conceptual knowledge of countries and political processes

Effective Research and Analysis

Begin to develop skills of effective research, analysis and writing in social science

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Integrity in Daily and Civic Activities

Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work

Top

Honors Comparative Government and Politics

Patterns of European, Asian, Latin American, and other political systems.

POLI 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab

Familiarity with Political Science Subfields

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Comparative Politics Familiarity

Demonstrate a familiarity with the subfield of comparative politics

Faith and Political Analysis

Reflect on the way that religion affects politics in their own lives and in the lives of others

Knowledge of Countries

Possess a factual and conceptual knowledge of countries and political processes

Effective Research and Analysis

Begin to develop skills of effective research, analysis and writing in social science

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Integrity in Daily and Civic Activities

Bring honesty and integrity to daily life, public affairs and professional activities and in their academic work

Top

Introduction to International Politics

Basic forces, practices, institutions, and foreign policies of major powers; problem areas in international politics.

POLI 170

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate and understanding of basic concepts of International Relations.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Demonstrate understanding of causes of war and causes of international cooperation.

Be intellectually enlarged

Demonstrate a familiarty with international politics

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Demonstrate understanding of different theories of the study of international politics, including Realism and Idealism

Politics, International Relations, and Political Philosophy

Demonstrate understanding of key actors and processes in international politics.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Critical Thinking and Analysis

Demonstrate understanding of how different theories lead to different interpretations of key events and processes in international politics

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Participation in Political Processes

Be better prepared to participate as a national and global citizen

Community Service

Want to serve the communities and organizations to which they belong.

Top

Political Inquiry

Methodology of political science, including theory and techniques of qualitative and quantitative research design.

POLI 200

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Prerequisite to all upper-division courses.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Citation

Write multiple papers correctly using the Turabian style of citation.

Integrity in Daily and Civic Activities

Learn and understand the consequences of plagiarism and write multiple papers without plagiarizing sources.

Faith and Political Analysis

Students will understand and be able to discuss the differences between secular and spiritual learning

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective and Professional Writing

Write and receive feedback on at least fifty pages of writing. Write and receive feedback on at least five different papers.
Learn the principles of effective revision and practice those principles on at least one major writing assignment. Learn how to write a research design and practice writing a design. Learn how to write a report of research and practice writing a report.

Effective Research and Analysis

Learn the basic principles of statistical analysis, including statistical significance, fit, and substantive significance.
Understand how to interpret statistical analyses, including regressions.
Understand limitations on research and be able to write research designs that show an awareness of those limitations. Understand differences in qualitative and quantitative methods, and be able to write research designs that show an awareness of differences in qualitative and quantitative methods. Understand the importance of case selection and principles that should guide case selection in both qualitative and quantitative methods

Top

Honors Western Political Heritage 1

Western civilization from Greek antiquity to Renaissance, primarily from perspective of political philosophy and scriptures; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

POLI 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will become familiar with the broad concerns and major authors of classical and medieval political thought.

Faith and Political Analysis

Students will learn to explore the connections between ultimate political questions (Who should rule? For what purpose? What is the best institutional form of government?) and the deepest moral, philosophical, and religious questions concerning the best way of life and the nature of things.

Faith and Political Analysis

Students will come to understand both the alliance and the tension between Greek political philosophy and the Bible friends. They will be conversant with the questions: should reason rule in politics, or must we rely on an authority beyond reason? Can we be loyal to the kingdom of God and at the same time good citizens of our earthly city?

Sacred Texts and Doctrine

Possess a command of sacred texts and doctrines gained by completing the University's religion course requirements.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Critical Thinking and Analysis

Students will learn to think critically about our Western ideals of democracy and human rights, and about their implications for our understanding of higher education, particularly in a Latter-day Saint university.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Critical Thinking and Analysis

Students will begin to learn to think critically about the assumptions underlying the modern world as a whole, to consider our ruling "dogmatic beliefs", to ask what is good and what is not about the social and political world we inhabit and its definition of "success."

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective and Professional Writing

Students will show improved ability to think about texts by writing about them.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Students will develop the ability to summarize a complex argument from a literary or philosophical text.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Faith and Political Analysis

Students will be able to articulate and begin to answer challenging questions addressing the place of faith and intellect in the good life.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Community Service

Want to serve the communities and organizations to which they belong.

Top

Honors Western Political Heritage 2

Western civilization from Renaissance to present, primarily from perspective of political philosophy; exploring fundamental questions in human experience; examining formative events in history; understanding value of important texts.

POLI 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will become familiar with the main themes and major authors of modern political philosophy.

Politics, International Relations, and Political Philosophy

Students will understand both the power and limitations of the intellectual and spiritual traditions that constitute the modern half of our Western heritage.

Be spiritually strengthened

Possess a command of sacred texts and doctrines

Sacred Texts and Doctrine

Possess a command of sacred texts and doctrines gained by completing the University's religion course requirements.

Politics, International Relations, and Political Philosophy

Students will recognize and intelligently employ a wide array of sophisticated philosophical and political terms

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Critical Thinking and Analysis

Students will understand the main ideas of each author considered, and be able to compare and contrast the various authors

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Students will recall the basic intellectual/cultural milieu and chronological sequence of each author

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Students will be able to summarize and independently critique important political-philosophical arguments, and write about them in a clear and convincing fashion

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Students will become critically aware of how now conventional assumptions derived from modern philosophers limit much current thought and challenge revealed truth.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Critical Thinking and Analysis

Students will see the practical consequences of abstract philosophical ideas

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Faith and Political Analysis

Students will think more deeply, coherently and originally about their own moral and political commitments

Students will think more deeply, coherently and originally about their own moral and political commitments

Principles of American Politics

An introduction to the subfield of American politics for advanced students and majors. Basic concepts, theories, and methods of American politics and political science.

POLI 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

Craft your own effective and insightful argument using clear and engaging prose that is analytically sound.

Politics, International Relations, and Political Philosophy

Understand important theoretical traditions in the study of (American) politics.

Critical Thinking and Analysis

Apply theories of politics to explain current practices in American Politics.

Be intellectually enlarged

Demostrate a familiarity with American politics and political philosophy

Top

Introductory Topics in Politics

Special topics course; unique topic for each section is chosen by the professor.

POLI 249R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Topics in Political Science

Students will gain further understanding of topic related to a specific area of political science (topics vary by semester).

Principles of Comparative Politics

An introduction to the subfield of comparative politics for advanced students and majors. Basic concepts, theories, and methods of comparative politics and political science.

POLI 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Research and Analysis

In this course, you will learn how to complete a research project

Be intellectually enlarged

Demonstrates a familarity with comparative politics

Political Process, Theory, and Thought

In this course, you will learn how to critique and construct theories in comparative politics through a number of individual, group, oral and written exercises.

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the research traditions and theoretical paradigms of comparative politics and of political science more broadly.

Critical Thinking and Analysis

All of the above items also contribute to the development of this skill.

Principles of International Relations

An introduction to the subfield of international relations for advanced students and majors. Basic concepts, theories, and methods of international relations and political science.

POLI 270

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory and Thought

Possess a knowledge of important concepts and theories in international relations

Critical Thinking and Analysis

Think critically, analytically, and synthetically in the context of international relations theories

Be intellectually enlarged

Demonstrates a familiarity with international relations

Applied Statistics for Public Policy and Law

Reinforces statistical knowledge gained in Poli 200 and prepares knowledgeable consumers of empirical social science research for careers in law and policy analysis.

POLI 278

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or equivalent.
Taught	Winter

Course Outcomes

Analyze Policy and Legal Issues

Analyze policy and legal issues using statistical skills and knowledge

Read and Interpret Statistical Evidence

Learn how to read and interpret statistical evidence

Role of Statistics in Policy and Law

Explain the role of statistics in policy and legal debates

Internship Program Preparation

Preparatory seminar for students who will be participating in departmental internship programs.

POLI 297R

Hours	1.0 - 2.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Community Service

Want to serve the communities and organizations to which they belong.

Top

Speaker Series on Political Careers

Networking and career guidance through a series of lectures by career professionals.

POLI 298

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Politics, International Relations, and Political Philosophy

demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Participation in Political Processes

participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

Community Service

want to serve the communities and organizations to which they belong

Experimental Research Methods

Students will learn how to conduct experiments in the social sciences. All students will conduct an original experiment, learn how to analyze the data, and present their results in a publishable format.

POLI 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 and Poli 328, or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Master the Experimental Method

Use appropriate methods of sampling, intervention, random assignment, measurement, and statistical analysis in constructing and executing an original experiment in political science.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high-quality oral presentation.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Qualitative Methods

Qualitative methods for gathering data and analyzing theories, including concept formation, textual analysis, interviewing, archival research, case studies, and comparative historical analysis.

POLI 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 200
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Research and Analysis

Dramatically enhance your grasp of qualitative methods for doing political science, bringing it close to the level that would be taught in graduate school. In the process, gain a better grasp of the principles of scientific research.

Effective and Professional Writing

Improve your ability to write effectively for a professional audience, especially in terms of global-level structure.

Effective Oral Communication

Improve your ability to speak in small-group settings and to make formal presentations.

Critical Thinking and Analysis

Enhance your ability to critically analyze theories and methods of analysis in published research and in your own work.

Top

Game Theory in Political Science

Introduction to game theory, concentrating on applications in politics.

POLI 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Research and Analysis

Be intellectually enlarged.

Effective and Professional Writing

Be intellectually enlarged.

Effective Oral Communication

Be intellectually enlarged.

Critical Thinking and Analysis

Be intellectually enlarged.

Effective Research and Analysis

By the end of the course, you should be able to:
- Recognize and model strategic situations
- Solve game theoretic problems

Survey Research Methods

Teaches principles of survey research methods from a Total Survey Error perspective. Topics and assignments include sampling, non-response, coverage, measurement, and analysis. Course project will conduct a survey for a client from start to finish.

POLI 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 328 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Total Survey Error

Comprehend, implement, and effectively evaluate principles of "Total Survey Error" including sampling error, non-response error, coverage error, and measurement error.

Participate in all phases of survey

Participate in all phases of design, data collection, and analysis of an actual survey

Adapt Survey Design

Adapt survey design to the needs of a client while maintaining high quality

Learn to Effectively Analyze

Learn to effectively analyze and communicate results

Practice High Ethical Standards

Practice high ethical standards

Top

Topics in Political Science Methods

Advanced methods of political science. Topics selected by instructor.

POLI 306R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Science Methods

Students will gain further understanding of a specifc political science research method (topics will vary by semester)

Top

State and Local Government and Politics

Relation of state and national governments, forms of state governments and politics, types of municipal governments and their operation.

POLI 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 110 or Poli 210.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

American Politics

Students will understand why state and local governments matter

Faith and Political Analysis

Students will discuss religion and politics in the context of the course.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

American Politics

Students will understand how state and local politics compare to national politics

American politics, theory, and thought

Students will understand which states govern best and if states produce better (or worse) governance than Washington

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Students will understand how do political institutions and policies vary from state to state and if it matters.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Participation in Political Processes

Students will observe local government in action during this course.

Interest Groups

Theories on formation and maintenance of interest groups; tactics of groups in legislative, executive, bureaucratic, and court settings; influence of groups on elections and public policy.

POLI 313

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 110 or 210; Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical thinking and Analysis

Students will understand how to evaluate interest groups systematically and rigorously

Politics, International Relations, and Political Philosophy

Students will be introduced to interest groups and their role in American politics.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Effective and Professional Writing

Students will write a professional paper that focuses on a political science question

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

The United States Presidency

Presidential power in the United States, focusing on major roles of the American presidency.

POLI 314

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 110 or 210; Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process Theory, and Thought

To become familiar with the major research approaches to the study of the American presidency and the intellectual history of the American presidency

Politics, International Relations, and Political Philosophy

To gain a thorough understanding of the role of the American president in the political system

Critical Thinking and Analysis

To focus on one American President using specified research questions.

Top

Congress and the Legislative Process

Election process; structure, organization, and procedures of legislative bodies; relations with pressure groups, the president, and executive branch.

POLI 315

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 110 or 210; Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will obtain a general working knowledge of the U.S. Congress, and where possible other legislative bodies

Effective Research and Analysis

Students will apply academic literature on Congress to current Congressional politics

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Critical Thinking and Analysis

Students will be able to discuss the role and effectiveness of Congress in particular and representative democracy in general

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Students will gain new perspectives that will shape their future attempts to critically evaluate Congress and its members

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

American Political Parties

Electoral and policy-making roles of American political parties today and their future in American politics.

POLI 316

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Students should understand and appreciate: the origins of American political parties, the nature of the two party system, particularly in comparison with other party systems, the role of third and minor parties, the organization of political parties, the role of political parties in campaigns and elections, the importance of political parties to the electorate, the role of parties in American governance, and the ongoing reforms of political parties.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Public Opinion and Voting Behavior

Relationship between attitudes, opinion, and voting behavior in American politics and institutions.

POLI 317

Hours	3.0 - 4.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	POLI 200
Recommended	Poli 328.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective Research and Analysis

Students will learn the fundamentals of survey research design and analysis, including an understanding and appreciation for the concept of "Total Survey Error."

Political Process, Theory, and Thought

Students will acquire a minimum of two theoretical perspectives to explain why voters choose a particular candidate.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Students will use statistics to make inferences about the relationships between variables that affect voting behavior or public opinion.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Students will be able to articulate the relationship between public opinion and democracy.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Campaigns and Elections

Analyzes electoral process in the United States, including history, significance in governance, campaign strategy, finance, media role, etc.

POLI 318

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Students will examine the historical development of campaigns and elections over the past 200 years and the nature of various players in campaigns and elections today including the electorate, candidates, parties, the media, and interest groups

Politics, International Relations, and Political Philosophy

Students will understand the role of campaigns and elections today in American politics.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Students will assess three levels of elections – presidential, congressional, and state and local.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Students will discuss and evaluate proposed electoral reforms.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Participation in Political Processes

Students will be expected to spend time observing an electoral campaign, designing a campaign

plan for a future campaign, and even working in a local electoral campaign.

Top

Topics in American Government and Politics

POLI 319R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

POLI 319R

Students will gain a deep understanding of topics in American Government and Politics.

American Politics Through Literature

American politics through the novel and other literary works. Developing political concepts and themes that come from significant political novels.

POLI 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Thinking and Analysis

Each of you should become familiar with the political consequences of all 10 of the novels read.

Politics, International Relations, and Political Philosophy

We will focus on the main question that should be asked of each novel we read, namely, "How can literature aid our understanding of politics?"

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Critical Thinking and Analysis

Given these ten novels and the multiple research topics generated from each of them, you will become conversant with the subject matter in your discourse with others outside the classroom.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

The Media in American Politics

News media's role in processes of American politics, including electoral process, legislative process, and public policy-making.

POLI 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Students will analyze media's relationship with political institutions and organizations, policies, and the public.

Political Process, Theory, and Thought

Understand how the media's role in American politics has evolved over time.

Political Process, Theory and Thought

Know what criteria the press uses for newsworthiness and how others attempt to use that criteria for their political ends

Politics, International Relations, and Political Philosophy

Understand the legal structure of media regulation of the press.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory and Thought

Students will analyze the basis for the media's power

Political Process, Theory, and Thought

Students will discuss the historical relationship between the press and political institutions and processes, the news gathering process, the role of the news media in electoral campaigns, the legislative process, presidential decision making, and judicial behavior.

Political Process, Theory, and Thought

Appreciate how the media/political system in the United States compares and contrasts with media/political systems in other nations.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Political Process, Theory, and Thought

Know how news media affect electoral campaigns.

Political Process, Theory, and Thought

Understand media role in shaping individual's political attitudes and behavior.

Political Process, Theory, and Thought

See how the news media's interact with institutions in order to shape public policy.

Critical Thinking and Analysis

Appreciate the varying sides of current debates over the role of the news media

Top

Political Psychology

Survey of classic and contemporary research in political psychology. Special focus on how citizens think and feel about politics and the ways in which those beliefs shape their interactions with the political world.

POLI 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Recommended	Poli 328.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Students will become familiar with basic theories and controversies in political psychology by reading a selection of classic and contemporary works in the field.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Because reading assignments include journal articles and book chapters with heavy theoretical and empirical emphasis, they will gain a better understanding of how to read contemporary work in political psychology and evaluate the theory, empirical results, and substantive implications of the work.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Because the course is structured as a seminar, students will be expected to come to class prepared and participate actively in class discussions. The goals of class discussions include a better understanding of the course reading, critical evaluation of the strengths and weaknesses of each reading, and increased understanding of the implications of the reading for contemporary democracy.

Effective Research and Analysis

Students will read, evaluate, and discuss a selection of the most important works in political psychology, with a special focus on the psychology of mass political behavior. Because much of

this work is quantitative, students will gain experience understanding and critically assessing research design and quantitative results.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective Research and Analysis

Students will better understand the strengths and weaknesses of various research methods, including in-depth interviews, surveys, lab and field experiments, and other approaches found in political psychology.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective and Professional Writing

Students will complete a major paper as part of the course requirements. This paper will include a full experimental research design that addresses a meaningful research question in political psychology.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Critical Thinking and Analysis

Students will critically evaluate, assess, and discuss both empirical results of classic and contemporary work in political psychology and their implications for our understanding of democracy.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Critical Thinking and Analysis

Students will practice the skills of attentive reading, thoughtful questioning, meaningful group discussion, and compelling writing.

Effective Citation

In completing the course paper, students will cite sources properly.

Participation in Political Processes

Because a major theme of the course is the political psychology of political participation, students will better understand why individuals do (or do not) participate in politics. Students will gain a greater appreciation for the role of political participation in contemporary democracy.

Statistical Analysis

Quantitative techniques in political research.

POLI 328

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	POLI 200
Taught	Fall, Winter

Course Outcomes

Critical Thinking and Analysis

Learn how to read and interpret statistical evidence.

Effective Research and Analysis

Analyze political and social behavior using statistical skills.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and professional writing

Produce your own rigorous statistical arguments that you explain carefully and clearly.

Be intellectually enlarged

Use appropriate method of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Politics and Public Policy

Introduction to major public policy issue areas and how political processes are used to address social problems.

POLI 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Winter Term 2

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Top

Public Policy Analysis

Analysis of how societies can and should choose between different public policy options to achieve public ends, with a focus on applied cost-benefit analysis.

POLI 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 200
Taught	Winter Term 2

Course Outcomes

Policymaking Process

Understand the normative foundations for purusing different objectives in the policymaking process.

Identify Stakeholders

Be able to identify stakeholders and those affected by public policy proposals.

Gain experience

Gaine experience in identifying the costs and benefits associated with alternative policy proposals and the analytical methods used to choose between those proposals.

Politics of Bureaucracy

Theory and nature of bureaucracy; sources of power; political executives; staffs and agency personnel; conflicts with elected officials; public interest and bureaucratic control.

POLI 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Bureaucratic Behavior

To learn the foundations of bureaucratic behavior.

Politics and Public Administration

To understand the linkage between politics and public administration.

Policy Design

To develop skills for policy design that integrate bureaucratic norms and behaviors.

Public Ethics

Sources of values, areas of conflict with government policy, means of value accommodation.

POLI 334

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

The goal of this class is to help you develop your critical analytical skills in assessing public policy debates and in formulating your own views about what policies governments should undertake.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

The focus here is on how some of the most prominent theories and conceptual frameworks and normative theories from political philosophy can help illuminate the values and assumptions underlying policy choices and serve as criteria for choosing policy options.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Community Service

Want to serve the communities and organizations to which they belong.

Social Policy

Justifications for government intervention in families and individual lives, effectiveness of social policies.

POLI 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Political Process, Theory, and Thought

To recognize the relationship between public policy and the dimension of choice in service and practice methods.

Political Process, Theory, and thought

To have knowledge and understanding of the impact of social welfare policies on the nation's minorities and other more vulnerable populations (e.g. r ace, culture, class, gender , sexual orientation, religion, physical or mental abilities).

Politics, International Relations, and Political Philosophy

Recognize the extent to which a culture' s structures and values may oppress, marginalize alienate, or create or enhance privilege and power

Political Process, Theory, and Thought

To develop knowledge of our social welfare policies in the context of the systems theory to show how they are interdependent and influenced by various factors and forces in our multiple and complex society .

Political Process, Theory and Thought

Understand the forms and mechanisms of oppression and discrimination

Top

Government and Religion

Christian-Hebraic concepts of state. American experience with church-state relations (First Amendment problems). Policy issues of concern to contemporary religions.

POLI 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Be spiritually strengthened

Be able to articulate principles of faith in political analysis

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Top

Topics in Public Policy

POLI 339R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or equivalent.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Western European Politics

Politics and policy in western Europe. State-building, party systems, nationalism, and cooperation among advanced industrial countries in comparative, historical perspective. Social and Christian democracy; European Union.

POLI 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 200.
Taught	

Course Outcomes

Be intellectually enlarged

Possess a factual and theoretical knowldege of European politics, politcal processes, political theories, and political thought

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Students will improve their ability to communicate their knowledge through writing essays and oral presentation

Political Process, Theory, and Thought

Students will develop a factual and theoretical knowledge of the politics of contemporary Europe by looking at selected countries.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Political Process, Theory, and Thought

Student will come away from the semester with a new set of ideas about how capitalist democracies work and where and how they are struggling to adapt to new challenges.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Gender and Politics

Theories of representation; gender and citizenship; gender and political candidacy; gender and leadership; gendered political issues.

POLI 342

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Thinking and Analysis

To understand the role of gender in a variety of aspects of the political process.
To understand different perspectives and be conversant with arguments about the gender dimensions of various political issues.
To be able to view political issues, political behavior, and even personal behavior from a gender-aware perspective.

Effective and Professional Writing/Effective Oral Communication

To encourage students to write more clearly, and present themselves effectively in class discussions and presentations.

Comparative Institutional Design

Studies the rich variety of political institutions around the world, in both developed and developing countries, democracies, and dictatorships, and their implications for policy decisions and political, social and economic outcomes such as political violence, economic development, and democratization.

POLI 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 150 or 250.
Recommended	Poli 328.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Collaboration

Work effectively with other people.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Comparative Political Economy

Overview of political economy from a comparative perspective. Classic theorists (Smith, Marx, Schumpeter, etc.); classic questions (industrialization, national economic policy, property, globalization, law, and economics).

POLI 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 150 or 250; Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Understand the relationship (factual/theoretical) between political/economic outcomes and political/economic structures/institutions.

Effective and Professional Writing

Develop writing skills through various activities such as regular, short writing assignments in response to readings or topics we cover in class, as well as undertaking a significant research paper that includes the extension of a theory and some form of empirical testing applied to political economy topics.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

You will also be exposed to how international forces affect domestic political economy and how normative considerations shape policy outcomes of interest in this class.

Political Process, Theory, and Thought

Politics, International Relations, and Political Philosophy

Critical Thinking and Analysis

All of the above items also contribute to the development of this skill.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Comparative Parties and Elections

Analyzes the electoral process and political parties in both the United States and other countries. Special attention is given to gender issues, campaigns, financing, corruption, extremist parties, religion, class, issues, fairness, accountability, electoral rules, and democracy.

POLI 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Theoretical Underpinnings

Understand the theoretical underpinnings of political parties in democracies.

Practical Manifestations

Link the theoretical underpinnings of political parties with their practical manifestations in everyday politics.

Clear Communication

Communicate both the theoretical underpinnings and practical manifestations of these theories to a wide variety of audiences.

Top

Russia/Former Soviet Politics

Comparative politics of Russia and Soviet successor states. Development of political systems from common Soviet heritage, emphasizing post-independence politics and institution building.

POLI 347

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Political Process, Theory, and Thought

Politics, International Relations, and Political Philosophy

Be intellectually engaged

Possess a factual and theoretical knowledge of Russia/Former Soviet Union political processes, political theories, and political thought

Effective Research and Analysis

Complete a research paper that uses effective comparison to explain political institutions or processes in former Soviet countries.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Political Process, Theory, and Thought

Demonstrate strong understanding of political and economic changes in former Soviet countries since 1991.
Demonstrate strong understanding of the political institutions and political processes in Russia and other former Soviet countries.
Demonstrate strong understanding of the patterns of interaction between Russia and its neighbors.

Effective and Professional Writing

Demonstrate the ability to write a well-crafted, persuasive research paper.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Demonstrate the ability to apply theories of comparative politics to patterns of politics in former Soviet countries.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Integrity in Daily Activities

Learn the consequences of plagiarism and how to avoid it.
In written assignments, correctly acknowledge the words and/or ideas of other authors.

Government and Politics of Asia

Comparative analysis of political developments of the major countries of Asia not covered in other country-specific classes.

POLI 348

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Politics, International Relations, and Political Philosophy

Political Process, Theory and Thoughts

The course first considers the historical background of government and politics in Asia by looking at pre-colonial systems of government, encounters with the West,Colonialism, and national liberation movements. We then proceed thematically and comparatively by topic: States and Regimes, Political Executives, Governments, Legislatures, Bureaucracies, Political Economy, Parties, Elections, Participation and Power, Ideologies, Identities, Modernization and Democracy, and Globalization and regionalism. Finally, we will cover the "diplomatic history" of a selection of countries.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

POLI 349R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory and Thoughts

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Top

British Government and Politics

Examination of the origin and contemporary operation of British political institutions as they relate to British society.

POLI 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of British government and politics

African Politics

Processes of change and development of nation states; African regionalism and relations with other nations; contemporary political issues.

POLI 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of the themes, issues, and trends that shape politics in Africa.

Top

China: Government and Politics

Structure and behavior of politics; contemporary problems.

POLI 353

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Possess a factual and analytical knowledge of China, its political processes, political theories, and society

Political Process, Theory, and Thought

We will develop and understanding of three general areas: the Communists' rise to power, the party/state structure and policy process, and state-society relations.

Top

Japan: Government and Politics

Structure and behavior of politics; contemporary problems.

POLI 354

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will explicitly compare the American political system to the Japanese political system as a case study of the comparative political method. In addition, students will be encouraged to research and write on a comparison of Japan to other countries.

Faith and Political Analysis

Students will study and analyze moral issues such as colonialism, paternalism, government transparency, using immoral means to accomplish moral ends, corruption, pacifism, and war crimes.

Political Process, Theory, and Thought

A third of the course is devoted to learning the historical context of Japanese politics. The remaining two thirds of the course explores theories and political processes in Japan. Students will show their mastery of these materials in exams and papers.

Effective Research and Analysis

Required course readings will use both qualitative and quantitative methods and students will learn how to interpret and criticize both types of research. A significant portion of the readings will also use historical comparison, and students will also be expected to use interdisciplinary studies, especially from the fields of sociology, history, and anthropology.

Effective and Professional Writing

Students will have the option of writing a high quality research paper that requires significant research and argumentation or translating and discussing current news accounts of relevant Japanese events written in Japanese newspapers.

Critical Thinking and Analysis

Students will be given specific questions to prepare in advance of each day's assigned readings, and they will be expected in class to answer and discus those questions.

Integrity in Daily and Civic Activities

By analyzing important ethical decision such as Hara Kei's lukewarm defense of democracy in the 1910s, the US decision to use information gained from illegal medical experiments, the US decision to extensively censor Occupation publications, and motivations surrounding Japan's 1994 electoral reforms, students will better understand the role that ethics plays in the daily decisions and activities of any political leader or citizen.

Participation in Political Process

Students will learn how the Japanese experience informs many of the pressing political issues that we face in the United States. They will make connections between Japan and these issues and be able to discuss how the Japanese experience sheds light on these important topics of current political discourse.

Canadian Government and Politics

Growth and development of Canada and its government; Canada's role in the contemporary world

POLI 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of Canadian Government and politics. Special emphasis will be placed on the Canadian political heritage, federal-provincial relations, the formulation and implementation of Canadian policy, the individuals, groups, and institutions involved in this process, and Canada's role in the contemporary world, including its relationship with the United States

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Be intellectually enlarged

Possess a factual and theoretical knowledge of Canadian Government political processes, political theories, and political thought

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of Canadian Government and politics. Special emphasis will be placed on the Canadian political heritage, federal-provincial relations, the formulation and implementation of Canadian policy, the individuals, groups, and institutions involved in this process, and Canada's role in the contemporary world, including its relationship with the United States

Top

Middle East: Political Systems

Social, philosophical, and religious impact on Middle East political institutions in an era of modernization and conflict.

POLI 357

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 200.
Taught	Fall, Winter

Course Outcomes

Political Process, Theory and Thought

The class is designed to help the student gain a basic knowledge of Middle Eastern politics and the social pressures that underlie political forces, to study several countries in depth and to gain an understanding of the culturally-based and traditional political structures and forces that operate in these governmental systems.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

We will concentrate on problems of political development, leadership, political institutions and religion

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

We will study the conflicts of political legitimacy and Islamic activism.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Critical Thinking and Analysis

Students will develop analytical and logical writing abilities with an emphasis on critical reading and writing skills.

Top

Latin American Politics

Conceptual and contemporary issues in Latin America's search for political order and economic development.

POLI 358

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or Lt Am 211.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Learning Facts About Latin American Politics

In this course you develop a general understanding of Latin American politics and how politics in the region compares with that of the rest of the world. You also develop expert knowledge of at least one Latin American country, and you learn about databases and other sources of information on the region.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Developing Broader Writing and Methods Skills

You will develop broader skills of research, writing, and "numeracy." These basic skills are taught in most Political Science classes, and you have several opportunities here to improve them.

Learning Theories to Understand Facts

You will learn how to apply theories in order to understand the facts. Beyond learning facts, you will improve your ability to identify patterns in Latin American politics and explain them. This analytical knowledge will allow you to make predictions and prescriptions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Topics in Comparative Politics

POLI 359R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or equivalent.
Taught	

Course Outcomes

Political Process, Theory and Thoughts

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Reason, Revelation, and Politics

The fruitful tension between the authority of reason and that of revelation in the Western tradition and in contemporary politics.

POLI 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 201 or 202 or class in philosophy.
Taught	

Course Outcomes

Be spiritually strengthened

Possess a command of sacred texts and doctrines gained

Political Philosophy

Summarize and independently critique important philosophical arguments bearing on religion and contemporary issues, and write about them in a clear and orderly fashion.

Political Thought

Understand the main ideas of each author considered, and be able to compare and contrast the various authors

Political Theory

Be critically aware of conventional assumptions regarding religion, reason and politics that limit much current thought

Political Philosophy

Summarize and independently critique important philosophical arguments bearing on religion and contemporary issues, and write about them in a clear and orderly fashion.

Critical Thinking and Analysis

See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments

Top

Theories of Human Freedom

Scope of human freedom at the metaphysical, individual, social, and political levels.

POLI 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

This course will address the writings of a variety of thinkers who ask what does it mean to be free? We will look at canonical writers of political philosophy, as well as pieces about the play of power and the political and moral challenges presented by the Nazi Holocaust.

Top

Jurisprudence

Problem approach to ancient and modern legal philosophies, emphasizing the nature of justice and the relation of law to morality.

POLI 364

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Critical Thinking and Analysis

Students will articulate, compare, and evaluate the specific ways in which different jurisprudential approaches understand and appreciate the rule of law.

Politics, International Relations, and Political Philosophy

Students will understand key historical and contemporary approaches to the philosophy of law.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective and Professional Writing

Students will analyze, evaluate, and respond critically to Letwin's assessment of a particular philosopher in an oral presentation and in a term paper.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Integrity in Daily Life and Civic Activities

Students will work effectively in groups to help colleagues prepare their individual term papers, providing and receiving peer review at each stage and sharing research efforts.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Early American Political Thought: 1620-1865

Core principles and seminal texts of American politics from Colonial times through the Lincoln administration.

POLI 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Students will consider some of the major themes/issues that emerge instudies of the American founding--with brief considerations of the earliest English settlements in America, America's colonial history, America's post-Constitutional history, Manifest Destiny, and the Civil War. We will examine the American Revolution and the Constitutional period in greater detail.

Political Process, Theory and Thought

Students will understand the ideals and institutions the contributed to the founding of America

Top

Modern American Political Thought: 1865-Present

Core principles and seminal texts of American politics from Reconstruction to the present.

POLI 366

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Contemporary Political Theory

History of political science, including the moral and ethical dimensions of politics.

POLI 367

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 201 or Poli 202 or Phil 201 or Phil 202.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Philosophy

Students will have a factual and theoretical knowledge of contemporary normative political theory from the standpoint of the question of the relationship between theory and practice.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Critical Thinking and Analysis

See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments

Political Philosophy

Students will attend to the deeper question of the nature and limits of theory (or “reason,” or “philosophy”) as it functions in the political-moral realm.

Political Process, Theory, and Thought

Possess a faculty and theoretical knowledge of countries, poilitical processes, political theories, and political thought.

Political Philosophy

Students will examine the risks both of a postmodern celebration of irrationalism and those inherent in the ongoing project of constructing a purely “rational” politics and morality.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

To learn to address significant, complex and challenging ideas in clear, correct, and strong English, based upon a careful engagement with textual sources

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Topics in Political Philosophy

POLI 368R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory and Thoughts

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Top

Foreign Policy Analysis

Survey of research regarding multiple levels of foreign policy analysis: individual, group, bureaucratic, societal, economic, systemic.

POLI 371

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200; Poli 170 or 270.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Students will understand the genesis, evolution, and current status of the field of Foreign Policy Analysis.

Political Process, Theory, and Thought

Students will understand what is meant by "foreign policy," "foreign policy behavior," and “foreign policy decisionmaking.”

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Students will appreciate explanations of foreign policy/behavior/decisionmaking on a variety of levels - individual, group, organizational, societal, systemic, etc.

Effective Research and Analysis

Students will examine the various methodologies employed in Foreign Policy Analysis, such as event data, psychobiography, content analysis, and so forth.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Student will begin integration of these diverse types of explanation through case studies and model formalization.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically

Effective Research and Analysis

Students will probe the limits of the comparative approach and of the idiosyncratic approach to explanation in foreign policy analysis.

Effective and Professional Writing

Students will learn to write a substantial piece of original research, and to have experience writing a book review.

Top

International Political Economy

Political implications of international trade, investment, and monetary policies within an increasingly interdependent global context; transnationalism.

POLI 372

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Demonstrate understanding of how International Relations theory applies to the subject matter of International Political Economy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Demonstrate understanding of different issue areas in international political economy.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective Research and Analysis

Complete a research paper that uses IPE theory to explain aspects of global political and economic interaction.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective and Professional Writing

Demonstrate the ability to write a well-crafted, persuasive research paper.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Critical Thinking and Analysis

Demonstrate the ability to apply different theories of international political economy.

Integrity in Daily and Civic Activities

Learn the consequences of plagiarism and how to avoid it.
In written assignments, correctly acknowledge the words and/or ideas of other authors.

International Law

Nature and function of international law; recognition, succession, jurisdiction rights, and immunities of states; nationality and jurisdiction over nations.

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will learn the role of legal norms in international relations and will be able to discuss the relative importance of international law in constraining the actions of states.

Faith and Political Analysis

Students will discuss the moral issues surrounding issue of international law.

Political Process, Theory, and Thought

Students will learn the legal perspective of important events of world history and current issues of international conflict and cooperation.

Effective and Professional Writing

Students will write either a legal brief for a mock argument before an international tribunal or a research paper that conforms to the conventional expectations for a research paper in a political science class.

Critical Thinking and Analysis

In class discussions, writing, and course readings, students will practice analyzing and evaluating the logic and arguments used in international legal decisions themselves and discussions of international legal issues.

Participation in Political Process

Students will learn the history of the development of international legal norms and how those norms affect important political issues in the United States.

Top

Ethics and International Affairs

Ethical considerations in study and practice of international politics. Realism, idealism, and other theories of state behavior subjected to ethical standards.

POLI 374

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Within a historical and theoretical context, students will demonstrate understanding of the ethical challenges confronting international policymakers and the challenge of including ethical analysis in foreign policy decision-making.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Effective Research and Analysis

Students will acquire analytical tools with which to address international issues having ethical implications, focusing on realism and idealism, and be able to apply these tools to a variety of significant case studies.

Be spiritually strengthened

Be able to articulate principles of faith in political analysis

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Students will become acquainted with and analyze the concept of just and unjust wars, drawing on historical and contemporary examples as illustrations.

Faith and Political Analysis

Course participants will inquire into how Latter-day Saint perspectives might contribute to better understanding of ethics and international relations.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Political Process, Theory, and Thought

In the context of the course's overarching themes, students will survey war, international law, war crimes and crimes against humanity, genocide, human rights, human trafficking, torture, humanitarian intervention, democratization, reconciliation, economic justice, and other concepts lending themselves to ethics-based understanding.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Political Process, Theory, and Thought

Students will demonstrate knowledge and understanding of the watershed historical and current events that lend themselves most readily to ethical analyses.

Critical Thinking and Analysis

Students will demonstrate increased confidence in their abilities to assess and express the ethical implications of international relations.

Top

International Organizations

International institutions; transnational relations; rise of newer political organizations: League of Nations, United Nations, European communities, world religions, multinational corporations, terrorist groups, global regimes.

POLI 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Critical Thinking and Analysis

You will understand the inner logic of each approach and its implications.

Politics, International Relations, and Political Philosophy

You will know the proper terminology to describe and define the major theoretical traditions in international relations.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

You will be able to compare, contrast, and critique these approaches and begin developing your own ideas.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Research and Analysis

You will be able to begin testing the propositions of the theories.

Effective Citation

In addition, it is hoped that you will better appreciate the importance of, and apply high ethical standards of academic conduct, including proper source citation, calibrating conclusions to evidence honestly, and working alone without help when required.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

U.S. Foreign Policy

Formation, implementation, analysis, and criticism of themes in American foreign policy.

POLI 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Be intellectually enlarged

Possess a factual and theoretical knowledge of foreign policy and its relationship to political processes, political theories, and political thought

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Political Process, Theory, and Thought

Demonstrate strong background in important developments and events in U.S. foreign policy history.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Research and Analysis

Complete a research paper that explains some aspect of U.S. foreign policy.

Political Process, Theory, and Thought

Demonstrate ability to explain U.S. foreign policy-making process.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Effective and Professional Writing

Demonstrate the ability to write a well-crafted, persuasive research paper.

Political Process, Theory, and Thought

Demonstrate understanding of key current foreign policy issues facing U.S., and be able to discuss how history and policy process shape U.S. response to those issues.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Critical Thinking and Analysis

Demonstrate the ability to analyze U.S. foreign policy in a specific policy area.

Integrity in Daily and Civic Activities

Learn the consequences of plagiarism and how to avoid it.
In written assignments, correctly acknowledge the words and/or ideas of other authors.

Participation in political processes

Be better prepared to participate as a national and global citizen.

Top

National Security Affairs

Foreign policy, defense strategy, and intelligence.

POLI 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will understand Security Studies

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Politics, International Relations, and Political Philosophy

Students will understand the evolution of American national security policy since WWII, especially since 9/11

Effective Research and Analysis

Students will write a Policy Position Paper

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Faith and Political Analysis

Throughout the course, students will integrate moral perspectives on American national security policy with secular perspectives thereof

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Political Process, Theory, and Thought

Students will be familiar with the primary institutions and processes of American national security policy making

Effective and Professional Writing

Write professional grade research papers on political science questions.

International Conflict

Causes of war; alliances and empires; military innovation; civil-military relations; fungibility of forces; terrorism; security studies methods; use and misuse of history.

POLI 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 150, 170, 250, or 270; Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

We will seek to deepen our understanding of war through a theoretical analysis of the causes of war by focusing attention on war as an outcome of the nature of the international system, war a result of the nature of the state, and war as a product of human nature.

Top

Topics in International Relations

POLI 379R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or equivalent.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Top

International Relations of Latin America

Factors that affect foreign relations of Latin American countries, including the U.S. role, emphasizing intervention, democracy, development, and trade.

POLI 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200 or Lt Am 211.
Taught	

Course Outcomes

Critical Thinking and Analysis

This course will help you improve your reasoning

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Be intellectually enlarged

Possess a factual and theoretical knowledge of Latina American countries, political processes, political theories, and political thought

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective Research and Analysis

This course will help you improve your research skills

Political Process, Theory, and Thought

In this course you will build your repertoire of facts and theories for understanding international politics in Latin America. Specifically, you will learn the history of wars and diplomacy in Latin America (particularly with reference to the United States) and recent patterns of economic development and democratization

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective and Professional Writing

This course will help you improve your writing skills.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

International Relations of the Middle East

Interregional relations and conflicts, political economics, Arab nationalism, processes of political change, alliances, and superpower relations.

POLI 381

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Analyze the international relations of the Middle East from a historical, theoretical, and contemporary perspective

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

International Relations of North America

Examination and analysis of factors that affect foreign relations of Canada, U.S., and Mexico, emphasizing trade, security, migration, environment.

POLI 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

This course will examine the major foreign and domestic policy issues facing the United States,Canada, and Mexico. It will look at the development of North American relations, especially the implementation of NAFTA, and the special challenges facing all three nations in increasingly complex and interdependent regional and global settings.

Top

International Relations of Asia

Foreign policies and international relations of China, Japan, and Northeast and Southeast Asia; historical and contemporary review and analysis.

POLI 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Understand the extent to which Asian states have not simply "reacted" to the West, but have "interacted" with it

Political Process, Theory, and Thought

Possess a factual and analytical knowledge of East Asia and its international relations, political theories and political processes

Effective and Professional Writing

Write professional grade research papers on political science questions.

Political Process, Theory, and Thought

Developing an appreciation for the diversity and dynamism of the Asia Pacific

Critical Thinking and Analysis

Interpret contemporary developments by reference to past traditions and history

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Globalization

Understand the extend to which Asian States have not simply "reacted" to the West, but have "interacted" with it in an increasingly globalized world.

Top

Japanese Foreign Policy

Process and outcomes of Japan's foreign policy; analysis of its relations with other nations in a historical and contemporary setting.

POLI 386

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Be spiritually strengthened

Be able to articulate principles of faith in political analysis-Students will articulate and discuss the moral issues surrounding the US decision to use nuclear weapons against Japan, decisions to wage war in East Asia, imposition of the Western international system on East Asian countries, dealing with war guilt and war atrocities, pacifism, foreign aid, and human rights.

Politics, International Relations, and Political Philosophy

Students will study important theories of international relations as applied to Japan’s relations with other countries.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy

Political Process, Theory and Thought

Students will learn the facts, events, personalities, and ideas that have animated Japan’s relations with other countries from about 1850 to the present.

Faith and Political Analysis

Students will articulate and discuss the moral issues surrounding the US decision to use nuclear weapons against Japan, decisions to wage war in East Asia, imposition of the Western international system on East Asian countries, dealing with war guilt and war atrocities, pacifism, foreign aid, and human rights.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

In each class period students will be asked to identify the main points of the assigned readings as well as the evidence presented to support those main points. This method will exposestudents to each of the methods of analysis and research described above, seeing how eachmethods is used in the context of well-regarded research. Students will also be expected to critique each article, including its methods used.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Students will write two separate research papers, both on topics of their own choosing. The papers will requireoriginal research, organized and clear presentation of ideas, and adherence to high standards of grammar and style.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Each student will present his or her research to the rest of the class in a carefully evaluated oralpresentation. In addition, each student will participate in evaluating the presentations of other students.

Critical Thinking and Analysis

Students will have a rare opportunity in this course to set the topics for each day's discussions based on their own analysis of theassigned readings. In each class period one or two students will be called on to lead a discussion of the implications of that day's readings, and the implications identified by the students will be the topics that occupy the bulk of each class day's discussions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Integrity in Daily and Civic Activities

Students will reinforce professional honesty and integrity by learning about the real world consequences of deceit in international relations, especially as they relate to Japan's relationswith other countries.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Effective Citation

Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in theiruse of materials for their oral presentation.

Participation in Political Processes

Students will become more informed voters and participants in political processes by learning the history of US involvement in China,Japan, Korea, and in war, imperialism, trade disputes, democratization, reparations, and the United Nations and East Asia.

International Relations of Developing Countries

Global politics in developing countries, focusing on trade, aid, conflict, women's rights, and the changing global balance of power.

POLI 387

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 150, 170, 250, or 270; Poli 328.
Taught	Fall

Course Outcomes

Learn the Experimental Method

Use appropriate methods of sampling, intervention, random assignment, measurement, and statistical analysis in constructing and executing an original experiment in political science.

Effective and Professional Writing

Write a professional grade research paper on the international relations of developing countries.

Effective Oral Communication

Communicate effectively by presenting ideas in high-quality oral presentations.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Substantive Knowledge of International Development

Learn the major categories of thinking on the international relations of developing countries.

Top

Chinese Foreign Policy

Structure and process of foreign policy of the People's Republic of China.

POLI 388

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Students will become familiar with the formulation and implementation of China's foreign policy

Political Process, Theory, and Thought

Develop skills in policy analysis-examining historical, cultural, international, and domestic factors that influence Chinese foreign relations.

Top

Advanced Seminar on Current Issues

Briefings and lectures from government officials and agencies, as well as directed readings on current issues.

POLI 391

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance to Washington Seminar.
Note	For students interning in Washington, D.C.
Taught	

Course Outcomes

Politics, International Relations and Political Philosophy

Students will be expected to examine policies and institutions with the intent of seeing how the overall policy-making processes and institutions might be ameliorated.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Politics, International Relations, and Political Philosophy

During the course of this semester, we intend to identify some best practices which might improve both the overall U.S. system of governance and the ability of government officials in Washington, D.C. to represent the citizens of the United States of America more effectively.

Faith and Political Analysis

Students should always remember what is cited in the *Doctrine and Covenants*, Section 134: 1: "We believe that governments were instituted of God for the benefit of man; and that He holds men accountable for their acts in relation to them, both in making laws and administering them, for the good and safety of society," and apply this to studies.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Topics in Political Strategy

Special topics for the Political Strategy track. Topic chosen by instructor.

POLI 392R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topics in Political Strategy

1 & 2 Students will master a new topic related to one of the vocational emphases of Political Science (Political Process, Theory, and Thought); Students will learn to appropriately apply theories and methods learned in previous courses to understanding this new topic (Critical Thinking and Analysis); Students will improve their writing and research skills (Effective and Professional Writing; Effective Research and Analysis)

Master the Literature

Master the literature of a relevant subfield in Political Strategy

Apply Methodologies

Acquire and apply the appropriate methodologies of Political Strategy

Advanced Writing

Write advanced papers on the topic

Understand the role of Political Strategy

Understand how Political Strategy fits into the broader context of political science

Topics in Legal Studies

Special topics for the Legal Studies track. Topic chosen by instructor.

POLI 393R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topics in Legal Studies

1 & 2 Students will master a new topic related to one of the vocational emphases of Political Science (Political Process, Theory, and Thought); Students will learn to appropriately apply theories and methods learned in previous courses to understanding this new topic (Critical Thinking and Analysis); Students will improve their writing and research skills (Effective and Professional Writing; Effective Research and Analysis)

Master the Literature

Master the literature of a relevant subfield in Legal Studies

Apply Methodologies

Acquire and apply the appropriate methodologies of Legal Studies

Advanced Writing

Write advanced papers on the topic.

Understand the role of Legal Studies

Understand how Legal Studies fits into the broader context of political science

Topics in Global Development

Special topics for the Global Development track. Topic chosen by instructor.

POLI 394R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topics in Global Development

1 & 2 Students will master a new topic related to one of the vocational emphases of Political Science (Political Process, Theory, and Thought); Students will learn to appropriately apply theories and methods learned in previous courses to understanding this new topic (Critical Thinking and Analysis); Students will improve their writing and research skills (Effective and Professional Writing; Effective Research and Analysis)

Master the Literature

Master the literature of a relevant subfield in Global Development

Apply Methodologies

Acquire and apply the appropriate methodologies of Global Development

Advanced Writing

Write advanced papers on the topic

Understand the role of Global Development

Understand how Global Development fits into the broader context of political science

Utah Legislative Politics

Preparatory seminar for students in the Utah State Legislature internship. Utah history and political structure. Relations between legislature and other branches of government. Challenges of legislative service.

POLI 397

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Political Process, Theory, and Thought

"Possess a factual and theoretical knowledge of ... political processes." We may discuss less theory than is typical for an upper-division political science course, but your factual knowledge will go through the roof.

Participation in Political Processes

"Participate effectively in political processes." You will learn how constituents and lobbyists interact with elected officials to craft policy.

Effective and Professional Writing

"Effective and professional writing." You will practice several forms of professional writing in this preparation course, including memos, reports, constituent emails, and so on.

Community Service

"Want to serve the communities ... to which [you] belong." Few experiences at BYU provide you with a richer opportunity to serve your fellow citizens than this internship.

Academic Internship

Work-study on the international, national, state, and local level.

POLI 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into program.
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Community Service

Want to serve the communities and organizations to which they belong.

Campaign Internship

POLI 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Community Service

Want to serve the communities and organizations to which they belong.

City Government Intership

POLI 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought.

Community Service

Want to serve the communities and organizations to which they belong.

Congressional Internship

POLI 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Participation in Political Processes

Participate effectively in political processes by having an appropriate knowledge of international and national politics and political thought

Community Service

Top

Research Project in Political Theory

Advanced research skills and advanced writing for students in their junior year.

POLI 400

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 200 & POLI 201; or POLI 200 & POLI 202
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses

Political Process, Theory, and Thought

You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Be spiritually strengthened

Be able to articulate principles of faith in political analysis

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Top

Research Project in American Politics

Advanced research skills and advanced writing for students in their junior year.

POLI 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 110 & POLI 200; or POLI 210 & POLI 200; or instructor's consent.
Note	For political science majors only.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.

Political Process, Theory, and Thought

You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Top

Constitutional Law - American Federal System

POLI 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Demonstrate Advanced Understanding of the Discipline

Demonstrate advanced understanding of the discipline of political science, including familiarity with each of the four major subfields: American politics, comparative politics, international relations, and political philosophy-Students will learn about some of the US Supreme Court and its decisions as well as the historical development of the most important legal doctrines of the Supreme Court.

Demonstrate Advanced Understanding of the Discipline

Demonstrate advanced understanding of the discipline of political science, including familiarity with each of the four major subfields: American politics, comparative politics, international relations, and political philosophy-Students will learn both the detailed arguments of important US Supreme Court decisions and the context surrounding those decisions. Students will discuss the institutional issues surrounding US government structures, specifically the rights and powers of the President, Congress, the judiciary, states, and individuals.

Use Rigorous Methods of Research Design & Analysis

Use rigorous methods of research design and analysis to answer political questions, including multiple research methodologies-Through our daily analysis of Court decisions, we will practice textual analysis as it is done by legal professionals. In addition, the oral presentation, papers, and exams will also require a high level of competency at legal textual analysis, testing how well students have acquired this skill from the daily reading and discussion of cases.

Write and Speak with Originality and Clarity

Write and speak with originality and clarity, providing reasons and evidence to support claims using proper citation of source material-Students will write a specialized legal research paper that will require mastery of case law precedent and relevant law review articles, characteristics of high quality legal research.

Write and Speak with Originality and Clarity

Write and speak with originality and clarity, providing reasons and evidence to support claims using proper citation of source material-Each student's oral presentation will encourage the development of the following skills: asking critical questions, formulating persuasive answers immediately, simplifying difficult topics, and arguing persuasively. These presentations will differ significantly from the typical oral presentation made in a class and will practice a different set of presentation skills than the typical classroom oral presentation.

Write and Speak with Originality and Clarity

Write and speak with originality and clarity, providing reasons and evidence to support claims using proper citation of source material-Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in their use of materials for their oral presentations. Students will also be introduced to the ABA citation style in addition to the Turabian citation style.

Think Critically and Analytically

Think critically and analytically about government, political processes, and political theories, including the components of a good society-In our daily discussion, in mock trial presentations, in exams, and in writing briefs or court decisions, students will practice analyzing and evaluating the logic and arguments used in past Supreme Court decisions.

Collaborate Effectively

Collaborate effectively with others, including participation in political processes and engagement on issues of political importance-Students will become more informed voters and participants in political processes by learning the history of US Supreme Court decisions as well as the legal and political logic that underpins those same decisions.

Top

Constitutional Law - Rights and Immunities

POLI 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Think Critically and Analytically about Politics

Students will discuss the moral issues surrounding the constitutional decisions about the death penalty, abortion, death (including a righ to die and assisted suicide), discrimination, privacy rights, the free exercise of religion, the establishment of religion, hate speech, and free speech rights.

Understand Political Science and its Subfields

Students will learn about some of hte most important parts of American politics, the US Supreme Court and its decisions as well as the historical development of the most important legal doctrines of the Supreme Court.

Understand Political Science and its Subfields

Students will learn both the detailed arguments of important US Supreme Court decisions and the context surrounding those decisions.

Employ Rigorous Research Methods

Through our daily analysis of Court decisions, we will practice textual analysis as it is done by legal professionals. In addition, the oral presentation, papers, and exams will also require a high level of competency at legal textual analysis, testing how well students have acquired this skill from the daily reading and discussion of cases.

Write and Speak with Originality and Clarity

Students will write two specialized types of legal research papers, a legal brief for a mock argument before the US Supreme Court and a mock decision from the same Court. Both papers will require significant legal research and argumentation that is expected in high quality legal research.

Write and Speak with Originality and Clarity

Each student will participate in two oral presentations in class, either as a party to a case brought before the Supreme Court or as a judge of the same Court questioning counsel in a mock Supreme

Court case. These presentations will develop the skills of asking critical questions, formulating persuasive answers immediately, simplifying difficult topics, and arguing persuasively. These presentations will differ significantly from the typical oral presentation made in a class and will practice a different set of presentation skills than the typical classroom oral presentation.

Think Critically and Analytically about Politics

In our daily discussions, in mock trial presentations, and exams, and in writing briefs or court decisions, students will practice analyzing and evaluating the logic and arguments used in past Supreme Court decisions.

Write and Speak with Originality and Clarity

Students will be expected to adhere to the highest standards of intellectual honesty in writing both research papers and in their use of materials for their mock legal presentations. Students will also be introduced to the ABA citation style in addition to the Turabian citation style.

Collaborate Effectively

Students will become more informed voters and participants in political processes by learning the history of US Supreme Court decisions as well as the legal and political logic that underpins those same decisions.

Interests and Ideas in the American Founding

A systematic investigation of the American founding, focusing on key interests and ideas represented at the Federal Convention of 1787 (and in other seminal events) emphasizing historical and empirical literature.

POLI 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Poli 202.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Obtain Knowledge of the American Founding

Obtain a working knowledge of the American founding through a thorough consideration of each of the following.
Historical documents
Historical treatments of the period
Empirical models of the covention

Apply Knowledge of the American Founding

Connect this working knowledge of the period to more modern political science questions about the nature of democracy and governance

Critical Thinking

Improve your ability to think critically, write about, and discuss all of this material

Top

Research Project in Public Policy

Advanced research skills and advanced writing for students in their junior year.

POLI 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 110 & POLI 200; or POLI 210 & POLI 200; or instructor's consent.
Note	For political science majors only.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.

Political Process, Theory, and Thought

You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

The Political Economy of Development

Political foundations of growth, providing public goods, and political reform in developing countries. Development and how institutions and culture shape it.

POLI 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Econ 110, Poli 200.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of development theory

Understand the most important concepts within the subfield of development as discussed by leading authorities.

Critical Thinking and Analysis

Learn how to answer pressing but unanswered questions in international development

Effective and Professional Writing

Conceive, design and execute a professional-grade experiment on a research question related to international development.

Political Process, Theory, and Thought

Learn a good deal about all substantive areas of development (economic adjustment, social welfare, political reform)

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Top

Research Project in Comparative Politics

Advanced research skills and advanced writing for students in their junior year.

POLI 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 150 & POLI 200; or POLI 250 & POLI 200; or instructor's consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.

Political Process, Theory, and Thought

You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the subfield of _____ and of political science more broadly.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Top

Islam and Politics

Tensions and accommodations between religion and politics in Muslim nations.

POLI 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

It will focus on the political implications of the emergence of Islam as a major world religion and on its use as a force in politics by Islamist groups by examining its rise, teachings, practices, metamorphoses, debates, and polemics.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Politics, International Relations, and Political Philosophy

This course will introduce students to the study of Islamic fundamentalism through taking up the question of the relationship of Islam and politics in the contemporary world.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Top

Federalist Papers

The primary defense of the Constitution of the United States, which also constitutes the major commentary on that document.

POLI 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Tocqueville on America

Alexis de Tocqueville's Democracy in America.

POLI 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Politics, International Relations, and Political Philosophy

To gain a thorough familiarity with the text of Democracy in America, including an understanding of its basic structure and main parts, and its most significant themes and there interconnections

Critical Thinking and Analysis

To understand the deepest questions that arise from a selection on the themes of Democracy in America with the help of the best commentators on Tocqueville's text, such as Harvey Mansfield and Delba Winthrop, Pierre Manent, and Peter Lawler

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Critical Thinking and Analysis

See the practical consequences of abstract philosophical ideas, think more deeply and coherently about their own moral and political commitments

Politics, International Relations, and Political Philosophy

To understand the permanent interest of the challenging questions framed by Tocqueville, and their relevance to contemporary political and ethical issues

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Effective and Professional Writing

To learn to write significant ideas in clear, correct, and strong English, based upon a careful engagement with Tocqueville's text

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Philosophy of the Social Sciences

Comparative analysis of the philosophy of scientific and normative inquiry.

POLI 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Effective Research and Analysis

Distinguish the different approaches to research in the social sciences.

Political Process, Theory, and Thought

Identify the differences between social and natural sciences.

Effective Research and Analysis

Consider whether and how social sciences can address normative concerns.

Critical Thinking and Analysis

Analyze, think, and write critically about social research.

Top

Plato's Political Thought

Plato's dialogues that contain political teachings or implications.

POLI 466

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Philosophical Dialogue

Learn to read a philosophical dialogue, that is, to find insight, not in philosophical propositions alone, but in the interplay of characters and actions with the argument.

Understand Plato's Philosophical Revolution

Understand how Plato carries on the philosophical revolution initiated by his teacher, Socrates, who brought philosophy down from the heavens to consider human things, especially politics and ethics.

Politics and Philosophy

Understand Plato's teaching on the deep interrelation between politics and philosophy – how political debate gives rise to philosophical questioning and how philosophy always has political implications.

Interpret Plato's Dialogues

Learn to interpret and to be able to summarize the teaching of at least one longer dialogue (*The Republic* or *The Laws*) as well as one or more shorter dialogues (for example *The Apology of Socrates, The Phaedo, The Symposium*).

Top

Research Project in International Relations

Advanced research skills and advanced writing for students in their junior year.

POLI 470

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLI 170 & POLI 200; or POLI 270 & POLI 200; or instructor's consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

In this course, you will learn how to complete an article-length research project using appropriate methods of analysis and a professional standard of writing. In doing so, you will draw heavily from your learning in previous courses.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

You will accomplish these first objectives by studying a specialized topic in political science together with your classmates, under the guidance of the professor.

Politics, International Relations, and Political Philosophy

Thus, you will deepen your familiarity with the selected subfield and within political science more broadly.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback in a community of scholars.

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Top

International Political Economy of Women

Effects upon national, international, and developmental policies when women are rendered visible and valued.

POLI 472

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Politics, International Relations, and Political Philosophy

Students will understand the roles women play in the world society as producers, reproducers, agencies of cultural continuity and change.

Political Process, Theory, and Thought

Students will explore in greater depth women's choices about education, family, and work in the developing world.

Faith and Political Analysis

Be able to articulate principles of faith in political analysis.

Political Process, Theory, and Thought

Students will discuss the dynamics of change in women's lives and in their societies, including the dynamics of religious beliefs, and to learn about programs for change that already exists

Political Process, Theory, and Thought

Students will investigate transnational issues directly concerning women's lives and their societies.

Politics, International Relations, and Political Philosophy

Demonstrate a familiarity with each of the four major subfields of political science: American politics, comparative politics, international relations, and political philosophy.

Political Process, Theory, and Thought

Students will discuss the dynamics of change in women's lives and in their societies, including the

dynamics of religious beliefs, and to learn about programs for change that already exists

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Community Service

Want to serve the communities and organizations to which they belong.

Human Rights

Causes of human rights violations and societal and state responses; nature, history, and impacts of international human rights norms; ways to define and promote rights.

POLI 473

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of human rights.

Critical Thinking and Analysis

Think critically, analytically and synthetically about human rights

Arab-Palestinian-Israeli Conflict

Emphasizes historical background, current situation, and alternatives leading to conflict resolution.

POLI 474

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Critical Thinking and Analysis

Students will have an increased ability to think, read, and write clearly.

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Students will have an increased understanding of the Arab-Israeli conflict and of the peoples, governments, and cultures it involves. Some of us enter this class with prior knowledge of the conflict; none of us enter with perfect knowledge

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Political Process, Theory, and Thought

Students will have an increased understanding of political and social analysis, terms, and ideas. We will discuss political science topics like "deterrence" and "conflict."

Civil Wars and Ethnic Violence

Foundations of ethnic and nationalist identities and how they related to civil wars worldwide, emphasizing theoretical explanations of civil wars and their resolution. Key civil war cases examined.

POLI 475

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Recommended	Poli 150 or 250; 170 or 270; 328.
Taught	

Course Outcomes

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Students will gain a knowledge of countries and wars, theoretically and factually

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Critical Thinking and Analysis

Students will think critically, analytically and synthetically

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Effective Writing

Students will write a professional research paper.

Top

Terrorism

Defining and conceptualizing terrorism; causes and varieties of terrorism; counterterrorism; the future of terrorism.

POLI 476

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Recommended	Poli 150 or 250; 170 or 270; 328.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Effective and Professional Writing

Students will write professional research papers

Political Process, Theory, and Thought

Possess a factual and theoretical knowledge of countries, political processes, political theories, and political thought.

Political Process, Theory, and Thought

Students will gain a knowledge of countries and wars, theoretically and factually

Effective Oral Communication

Students will communicate effectively in a high quality oral presentation

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Students will think critically, analytically, and synthetically.

Effective Oral Communication

Communicate effectively by presenting ideas in a high quality oral presentation.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Mentored Research

Original research under the guidance of a faculty mentor. Proposals must be approved by the department curriculum coordinator.

POLI 497R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Poli 200.
Taught	

Course Outcomes

Mentored Research Project

Students will complete a mentored research project related to an area of political science.

Top

Directed Readings

POLI 498R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Political science major status; senior status; department chair's and instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Science Directed Readings

Students will read,evaluate, and critique literature related to a specific topic area in political science.

Top

Honors Thesis

POLI 499

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Completion of lower-division political science major requirements.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Political Science Honors Thesis

Students will complete an honor's thesis in a topic related to political science.

Advanced Topics in Public Policy

POLI 539R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Effective Research and Analysis

Use appropriate methods of analysis and research, including qualitative and quantitative methods, historical comparison, and textual interpretation to answer political questions.

Effective and Professional Writing

Write professional grade research papers on political science questions.

Critical Thinking and Analysis

Think critically, analytically, and synthetically.

Top

Topics on World Politics

POLI 579R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Master the Literature

Master the literature of a relevant subfield in World Politics

Apply Methodologies

Acquire and apply the appropriate methodologies of World Politics

Advanced Writing

Write advanced papers on the topic

Understand the role of World Politics

Understand how World Politics first into the broader context of political science

Academic Internship

Internships for master's candidates.

POLI 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into program.
Taught	

Course Outcomes

Political Science Internship

Students will complete an internship experience related to political science

Top

Graduate Internship

POLI 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Political Science Internship

Students will complete an internship experience related to political science

First-Year Polish

Basic language skills.

POLSH 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Polish

Continuation of Polsh 101.

POLSH 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	POLSH 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Polish

Conversation, vocabulary building, and reading and writing skills, emphasizing reading.

POLSH 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	POLSH 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Top

Second-Year Polish

Emphasis on literature and culture with continued writing, grammar, listening, and speaking.

POLSH 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	POLSH 201; Teacher may waive prerequisite based on prior experience.
Note	Culminating course for Languages of Learning requirement. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	

Course Outcomes

Communication skills

In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Comprehension

Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Cultural Knowledge

Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

GE Languages of Learning

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

POLSH 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	POLSH 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out “survival” transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

POLSH 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	POLSH 211R
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities and current events; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions

Organized Speech

Begin to speak in "oral paragraphs."

Strategies

Apply appropriate strategies to deal with unpredictable language situations.

Pronunciation and Accuracy

Be understood by native speakers unaccustomed to dealing with non-native speakers.

Cultural History of Poland

POLSH 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Polsh 202 or foreign residence experience.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

Polish Literature Survey

Survey of Polish literature from Kochanowski to Szymborska, including works by Rej, Krasicki, Mickiewicz, Slowacki, Norwid, Prus, Sienkiewicz, Zeromski, Reymont, and others.

POLSH 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	POLSH 330
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Recognize and Analyze

Recognize and analyze the most important genres in target-language literature.

Key Characteristics

Identify and discuss key characteristics of the most important literary movements in the target culture.

Context

Place literature in a meaningful cultural and historical context.

Language Skills

Improve target-language reading, writing, and speaking skills.

Top

First-Year Portuguese

Pronunciation, conversation, reading, and fundamentals of grammar. Specific attention to Portuguese as the language of Brazil.

PORT 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Native speakers of Portuguese must enroll in Port 321.
Taught	Fall

Course Outcomes

Communicate verbally in routine situations

Communicate verbally in routine situations such as greeting people and becoming acquainted.

Understand simple conversations

Understand the main ideas in simple conversations about some familiar, concrete topics such as daily activities, likes and dislikes, family, and home.

Read short texts

Read short texts such as text messages, emails, posts on social media, and personal ads.

Write short messages

Write word- and sentence-length messages such as lists, biographical information on forms, and descriptions of people and things.

Identify basic facts about Lusophone countries

Identify basic facts about some Portuguese-speaking countries.

First-Year Portuguese

Pronunciation, conversation, reading, and fundamentals of grammar. Specific attention to Portuguese as the language of Brazil.

PORT 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Port 101.
Note	Native speakers of Portuguese must enroll in Port 321.
Taught	Winter

Course Outcomes

Participate in short conversations

Participate in short conversations about some familiar, concrete topics such as self, family, friends, and daily activities.

Understand simple conversations

Understand simple conversations about some familiar, concrete topics such as daily activities, likes and dislikes, family, and home.

Read simple texts

Read simple texts such as advertisements, travel brochures, and cultural explanations from the textbook.

Write short messages

Write short messages such as letters and emails.

Identify cultural products, practices, and perspectives

Identify basic cultural products, practices, and perspectives from Portuguese-speaking countries.

Top

Portuguese for Spanish Speakers 1

Intensive course designed for students fluent in Spanish or another Romance language. No previous knowledge of Portuguese required. Emphasis on development of oral skills, vocaulary, grammar, and understanding of Lusophone cultures.

PORT 105

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Participate in conversations

Participate fully in conversations by asking and answering questions about some familiar, concrete topics such as self, family, friends, and daily activities.

Understand spoken Portuguese

Understand conversations and monologues in spoken Brazilian Portuguese on familiar topics.

Read simple authentic texts

Read "cultural blurbs" from the textbook, as well as other slightly longer texts such as advertisements, letters, recipes, and stories.

Write short texts

Write short texts such as email messages, post cards, and descriptions of people and things.

Create with language

Create sentences using basic grammar rules and vocabulary with limited accuracy.

Explain cultural aspects

Know basic facts about some Portuguese-speaking countries and identify cultural products, practices, and perspectives from these countries.

Differentiate between Spanish and Portuguese

Differentiate between basic Spanish and Portuguese grammar, vocabulary, and spelling

conventions.

Top

Third-Semester Portuguese

Second-year grammar, reading, writing, and conversation.

PORT 201

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Port 102 or three units of high school Portuguese.
Note	Native speakers of Portuguese must take Port 321.
Taught	Fall

Course Outcomes

Converse about concrete topics

Participate fully in conversations about concrete topics such as self and others, work, and school.

Handle straightforward transactional situations

Handle straightforward transactional situations such as requesting services or making reservations.

Understand spoken texts

Understand the main ideas from audio and video texts, such as commercials and news broadcasts, on familiar topics.

Read short journalistic and literary texts

Read short journalistic and literary texts, such as articles and cronicas, on familiar topics.

Write short compositions

Write short, simple compositions in a variety of genres (stories, résumés, skits, etc.)

Discuss cultural norms

Discuss some differences between the cultural norms of Americans and Portuguese speakers.

Top

Fourth-Semester Portuguese: Reading and Comprehension

Fourth-semester class introducing grammar and culture through study of literature.

PORT 202

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Port 201.
Note	Not for returned missionaries. Culmination of GE Mathematics/Foreign Language requirement. Native speakers of Portuguese must take Port 321. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Converse about topics of general interest

Converst about some topics of general interest and tell about some past experiences.

Handle some situations with a complication

Handle some situations with an unforeseen complication, such as resolving disagreements or customer complaints.

Understand audio and video texts

Understand the main ideas and some details from authentic audio and video texts on cultural topics from Portuguese-speaking cultures, such as TV and radio programs and films.

Read medium-length texts

Read medium-length journalistic and literary texts on cultural topics, including a short story and a play.

Write short compositions

Write simple compositions in a variety of genres (letters, pamphlets, articles, short stories, etc.).

Discuss cultural differences

Discuss some differences between the U.S. and Portuguese-speaking countries in terms of cultural products, practices, and perspectives.

Top

Portuguese for Spanish Speakers 2

Intensive course designed for students fluent in Spanish or another Romance language. Emphasizes development of reading and writing skills and understanding of Lusophone literary works and cultures.

PORT 205

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Port 105.
Taught	Fall, Winter

Course Outcomes

Converse about topics of general interest

Carry on conversations about an increasing range of topics of general interest and handle some oral situations in which a complication arises (resolving disagreements, traffic violations, etc.).

Understand spoken Portuguese

Understand oral conversations, announcements, and media reports about topics of general interest.

Read journalistic and literary texts

Read journalistic and literary texts on familiar topics, including a short story and a play.

Write short compositions

Write short compositions in a variety of genres (letters, skits, short stories, etc.).

Use grammar with increasing accuracy

Use previously-learned grammar principles with increasing accuracy and ability to differentiate from Spanish.

Discuss cultural themes and compare perspectives

Discuss some common themes from Portuguese-speaking cultures and the differences between the perspectives of these cultures and those of North American and Hispanic cultures.

Intensive Portuguese Skills Development

Intensive development of oral and literacy skills at the Intermediate High to Advanced Low level, with emphasis on improving grammatical accuracy, fluency, and cultural competence. Intended to prepare students for Port 321 and subsequent courses.

PORT 206

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	PORT 202; Port 205 or equivalent experience.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Communicate orally in interpersonal and presentational modes

Communicate orally in Portuguese with confidence at the Intermediate High to Advanced Low level, in both interpersonal and presentational modes.

Write compositions to meet academic needs

Write reactions to readings and short papers on literary works with sufficient grammatical accuracy to meet academic needs in higher-level courses.

Comprehend authentic oral and written texts

Comprehend authentic narrative and informative texts from various Portuguese-speaking countries, both oral and written, on topics of general interest.

Interpret cultural products, practices, and perspectives

Discuss a range of cultural products and practices from Portuguese-speaking countries and interpret the cultural perspectives that they imply.

First-Semester Conversation

PORT 211R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Concurrent enrollment in Port 201.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Communicate orally in interpersonal mode

Communicate effectively in real-life situations at the interpersonal level, including academic, professional, or social situations, in various time frames with some consistency.

Communicate orally in presentational mode

Present information to an audience on general topics related to Portuguese-speaking cultures, professional relevance, as well as topics of broad interest beyond daily life.

Comprehend oral texts

Interpret with ease main ideas and facts from culturally authentic sentence-level texts, and obtain substantial meaning from some connected-level texts.

Apply communicative strategies

Apply appropriate communicative strategies (e.g., restate, request clarification, self-correct, circumlocute) to facilitate conversation and compensate for lack of skill.

Top

Second-Semester Conversation

PORT 212

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course to be deleted

We plan to delete this course in Fall 2015.

Third-Year Conversation

Tools course to help students improve oral proficiency

PORT 311R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Will not count for major or minor.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Communicate orally in interpersonal mode

Communicate orally in Portuguese in real-life situations, including academic, specialized, and public contexts in various time frames and in paragraph length speech.

Comprehend oral texts

Interpret oral and written authentic texts (such as a newspaper articles or a literary text) pertaining to real-world topics of general interest culturally relevant to personal, social, work-related, community, national, and international contexts.

Present arguments orally

Show emerging evidence of the ability to present a well-supported argument, including detailed evidence in support of a point of view.

Discuss discipline-related topics

Understand someone else speaking about a discipline-related topic and be able to engage that person in discussion.

Third-Year Portuguese Reading, Grammar, and Culture

PORT 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Placement by test.
Note	First class for returned Portuguese-speaking missionaries. Fulfills GE Foreign Language requirement.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Analyze literary works

Identify and analyze a selection of literary works in Spanish/Portuguese within their historical and cultural context.

Write short compositions

Write short compositions, including informal and some formal correspondence, narratives, descriptions, or summaries, using paragraph-level connected discourse.

Apply grammar rules

Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Top

Third-Year Portuguese Grammar and Composition

PORT 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Write argumentative essays

Write argumentative essays analyzing specific texts or topics, introducing a clear thesis and developing arguments to support the thesis using valid reasoning and sufficient evidence.

Write expository research papers

Write expository research papers that gather and synthesize information from multiple sources, develop and support the topic with well-chosen facts and examples, and organize ideas to make important connections and distinctions.

Apply writing strategies and processes

Develop and improve writing through multiple drafts by planning, revising, editing, and incorporating feedback.

Apply writing conventions

Apply writing conventions from appropriate style guides (e.g., MLA, APA, Chicago, etc.) in composing papers and citing references.

Give oral presentations

Effectively deliver formal oral presentations that are tailored to a specific audience, making use of appropriate presentational media.

Convey meaning accurately

Convey meaning orally and in writing using a register and level of grammatical accuracy appropriate for academic and professional audiences.

Portuguese for the Professions

Introduction to professional terminology, documentation, and correspondence.

PORT 323R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Fall, Winter

Course Outcomes

Acquire specialized vocabulary

Acquire specialized Portuguese vocabulary related to one or more professional fields.

Read authentic documents

Read and interpret authentic documents and informative texts related to a specific professional field.

Compose written documents

Compose written documents for a specific field, such as correspondence, reports, or case studies, incorporating protocols and a level of accuracy appropriate for a professional audience.

Apply writing strategies and processes

Develop and improve writing through multiple drafts by planning, revising, editing, and incorporating feedback.

Demonstrate intercultural awareness

Demonstrate awareness of cultural issues involved in working with Portuguese speakers, such as their economic and political realities, social and professional practices, and cultural beliefs and values.

Apply professional skills

Demonstrate practical application of professional skills by researching job opportunities, observing, or volunteering in a particular field.

Survey of Luso-Brazilian Linguistics

Introduction to linguistics of Portuguese: phonetics, phonology, morphology, syntax, semantics, history of the Portuguese language, philology, dialectology, sociolinguistics, and psycholinguistics.

PORT 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Winter

Course Outcomes

Explain general principles of linguistics

Identify and explain the foundational concepts of linguistics.

Describe major subfields of linguistics

Describe elements of the sound system, the structure of words and sentences, and the semantic properties of Portuguese.

Relate linguistic principles to language variation

Relate basic principles of linguistics and knowledge of its major subfields to how language varies socially, geographically, and temporally.

Portuguese Phonetics and Pronunciation

Underlying concepts of Portuguese speech production and applications to pronunciation.

PORT 326

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	PORT 321
Taught	Fall

Course Outcomes

Describe articulatory phonetics

Describe the physiology of sound production and how the sounds of Portuguese are articulated.

Analyze structure of Portuguese sound system

Explain and analyze the principles underlying the Portuguese sound system and the relationships among its basic units.

Transcribe texts phonetically

Transcribe phonetically both oral and written texts in Portuguese.

Improve Portuguese pronunciation

Demonstrate improvement in the pronunciation of Portuguese.

Introduction to Portuguese and Brazilian Literature

Readings in modern literature; formal literary analysis.

PORT 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 321.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Describe literary genres

Describe and analyze the most salient elements of key literary genres including poetry, prose, and theater.

Apply tools of literary interpretation

Apply fundamental tools of literary interpretation through reading, writing, and the discussion of a balanced selection of works from the Portuguese-speaking world.

Write about literature

Write in Portuguese about literature with a reasonable degree of grammatical correctness and fluency.

Portuguese Civilization

Culture, history, art, music, and traditions of Portugal.

PORT 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 321.
Taught	Fall, Winter Contact Department

Course Outcomes

Describe geographic regions

Students will be able to describe the principal geographic regions, that might include topological features, important cities, etc.

Analyze historical periods and current events

Describe and analyze historical periods and current events (e.g., political, social, artistic, and religious developments).

Describe cultural products, institutions, and practices

Recognize and describe important cultural products (e.g., art, literature, architecture, and music, including important works and individuals), cultural institutions, and cultural practices.

Discuss influence of own culture

By comparison, recognize and discuss the influence of their own cultural background on their attitudes, beliefs, and worldview.

Conduct research

Engage in research that demonstrate an advanced awareness of cultural and historical knowledge.

Special Topics in Portuguese Culture

An in-depth examination of some aspect of Iberian culture and civilization. Subject matter will vary. This course is recommended for those individuals who may already have a broad exposure to the culture and civilization of Portugal and/or those who desire a more focused experience.

PORT 346R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Identify, describe, and discuss cultural aspects

Identify, describe, and discuss aspects of a specific culture or non-literary cultural topic or theme.

Critically analyze cultural products and practices

Critically analyze cultural products and practices in their historical and social contexts from the perspectives of members of the culture.

Conduct cultural research

Conduct research on a particular cultural topic and formally present the results in oral presentations or written papers.

Brazilian Civilization

Culture, history, art, music, and traditions of Brazil.

PORT 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 321.
Taught	Fall, Winter

Course Outcomes

Describe geographic regions

Describe the principal geographic regions, that might include topological features, important cities, etc.

Analyze historical periods and current events

Describe and analyze historical periods and current events (e.g., political, social, artistic, and religious developments).

Describe cultural products, institutions, and practices

Recognize and describe important cultural products (e.g., art, literature, architecture, and music, including important works and individuals), cultural institutions, and cultural practices.

Discuss influence of cultural background

By comparison, recognize and discuss the influence of their own cultural background on their attitudes, beliefs, and worldview.

Conduct research

Engage in research that demonstrate an advanced awareness of cultural and historical knowledge.

Top

Special Topics in Brazilian Culture

An in-depth examination of some aspect of Brazilian culture and civilization. Subject matter will vary. This course is recommended for those individuals who may already have a broad exposure to the culture and civilization of Brazil and/or those who desire a more focused cultural experience.

PORT 356R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Identify, describe, and discuss cultural aspects

Identify, describe, and discuss aspects of a specific culture or non-literary cultural topic or theme.

Critically analyze cultural products and practices

Critically analyze cultural products and practices in their historical and social contexts from the perspectives of members of the culture.

Conduct cultural research

Conduct research on a particular cultural topic and formally present the results in oral presentations or written papers.

Methods of Portuguese Teaching

Methods for planning Portuguese language and culture instruction, teaching communicative skills, and assessing students' learning. Course is geared toward instructors at K-12 as well as university level.

PORT 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Discuss historical trends in methodologies

Discuss historical trends and methodologies in the teaching of foreign languages.

Select and evaluate textbooks

Select and evaluate textbooks for teaching Portuguese.

Plan and implement instruction

Plan and implement units and lessons incorporating the *World-Readiness Standards for Learning Languages,* as well as grammar and vocabulary, in a thematic context

Differentiate instruction

Differentiate instruction to meet the needs of diverse students, including Spanish speakers.

Create and adapt assessments

Create and adapt formative and summative assessments, including tests, project, rubrics and portfolios, to assess language and culture learning and to inform instruction

Apply technological tools

Apply technological tools for teaching languages and cultures, as well as for collaborating with colleagues in professional communities.

Contemporary Culture

Contemporary Portuguese or Brazilian culture: the people and their customs and institutions.

PORT 395R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For Study Abroad programs only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Macro-Cultural Competence

Through readings, develop a familiarity with macro forces (historical, political, economical) that have shaped the host culture.

Micro-Cultural Competence

Through a series of cultural proofs (visits, interviews, observations), develop a familiarity with the host culture at the level of the individual.

Top

Academic Internship: Portuguese Language Field Experience

On-the-job experience.

PORT 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Complete an internship

Demonstrate capacity to contextualize internship responsibilities and experiences within an academic framework.

Introduction to Translation

Readings, individual research projects, and group translation activities. How the translation profession works. Developing the ability to translate general financial and legal texts. Learning to read texts critically.

PORT 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Fall, Winter

Course Outcomes

Vocabulary development

Students will produce a log of their own malapropisms and false cognates (minimum 100 words or conjugational parts).

Professional level translations

Students will produce, after several edited iterations, a legible translation of a professional treatise or work of fiction, appropriate to the social register of their audience.

(Port-Span) Problems in Translation

Introduction to the language industry, with an emphasis on computer translation tools and project management. Students will complete translation projects and learn how to supervise group projects.

PORT 419

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321; or SPAN 321
Taught	Fall, Winter

Course Outcomes

Discuss the future of translation technology

Discuss the possible future of translation technology, including future applications of existing technology and future development of new technologies, drawing on class assignments and a personal project.

Define specifications for a translation project

Define a set of specifications for a translation project based on text type, audience, and purpose.

Create and use a bi-text corpus

Create a bi-text corpus and derive translation memory and terminology from that bi-text corpus.

Complete a translation project

Use machine translation, translation memory, and terminology in conjunction with a translation environment tool to complete a translation project according to the project's specifications.

Top

Luso-Brazilian Cinema

Introduction to study of film; background in appreciating the best of motion picture art in Brazil, Portugal and other Lusophone countries.

PORT 438

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 321
Taught	Winter odd years

Course Outcomes

Apply tools of film analysis

Demonstrate a mastery of basic tools of film analysis through the study of a variety of films from various film industries from Portugal and/or Brazil.

Recognize film history

Recognize key moments and figures of film industries of Portugal and/or Brazil

Write persuasive essays

Write cogent, persuasive essays using the tools of film analysis.

Luso-Brazilian Theatre Production

Theory and practice of dramatic performance. Includes participation in play to be performed during semester.

PORT 439R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No more than 3 hours of 439R credit may count toward any degree.
Taught	Winter

Course Outcomes

Demonstrate understanding of dramatic theory and practice

Demonstrate understanding of the theory and practice of dramatic performances.

Participate in production of a play

Participate in the production of a play during the course of the semester.

Develop research and writing skills

Develop advanced skills in researching and writing about theatre.

Top

Survey of Portuguese Literature

Literary periods, genres, and great writers of Portugal.

PORT 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 339
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Interpret texts

Formulate interpretations of literary texts that take into account their socio-historical and aesthetic contexts.

Differentiate among contexts

Define and differentiate among periods, representative authors, schools, movements, ideological trends, and the historical contexts of Portuguese literature.

Write interpretive/research papers

Write cogent, persuasive, and grammatically correct interpretive essays that demonstrate competence in library research skills and the appropiate use of secondary sources.

Camoes

PORT 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 441
Taught	Winter

Course Outcomes

Portuguese Literary History

Demonstrate thorough understanding of Portuguese literary history, the context for the work of Camões and its reception.

Critical Practice

Demonstrate ability to apply key terms in critical practice (e.g., practical criticism, structural analysis, hermeneutics, etc.)

Advanced Research and Writing

Develop advanced skills in research techniques and academic writing.

Special Topics in Portuguese Literature

Specific topics in Portuguese (Peninsular) literature. Course content will vary each semester to offer optimum exposure to all areas of Portuguese literature.

PORT 449R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 441
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Research

Write essays in Portuguese, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Literary Study Skills

Develop the habits and skills for Portuguese literary study that inspire continued learning.

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to Portuguese Literature special topics.

Top

Survey of Brazilian Literature

Literary periods, genres, and great writers of Brazil.

PORT 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 339
Taught	Fall, Winter Contact Department

Course Outcomes

Interpret texts

Formulate interpretations of literary texts that take into account their socio-historical and aesthetic contexts.

Differentiate among contexts

Define and differentiate among periods, representative authors, schools, movements, ideological trends, and the historical contexts of Brazilian literature.

Write persuasive/research papers

Write cogent, persuasive, and grammatically correct interpretive essays that demonstrate competence in library research skills and the appropiate use of secondary sources.

Machado de Assis

PORT 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 451
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Brazilian Literary History and Machado de Assis

Demonstrate thorough understanding of Brazilian literary history, the cultural context for the work of Machado de Assis, and the reception of Machado's work.

Critical Practice

Demonstrate ability to apply key terms in critical practice (e.g., practical criticism, structural analysis, hermeneutics, etc.).

Advanced Research and Writing

Develop advanced skills in research techniques and academic writing.

Top

Twentieth-Century Brazilian Literature

PORT 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 451
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

20th Century Brazilian Literary History

Demonstrate thorough understanding of twentieth-century literary history in Brazil.

Critical Practice

Demonstrate ability to apply key terms in critical practice (e.g., practical criticism, structural analysis, hermeneutics, etc.).

Advanced Research and Writing

Develop advanced skills in research techniques and academic writing.

Special Topics in Brazilian Literature

Specific topics in Portuguese (Brazilian) literature. Course content will vary each semester to offer optimum exposure to all areas of Brazilian literature.

PORT 459R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 451
Taught	Fall, Winter

Course Outcomes

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to Brazilian literary texts.

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Literary Study Skills

Develop the habits and skills for Brazilian literary study that inspire continued learning.

Research

Write essays in Portuguese, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Top

African Literature in Portuguese

Modern authors from the five African nations whose official language is Portuguese: Angola, Cabo Verde, Guine Bissau, Mozambique, and the two-island republic Sao Tome and Principe. Authors include Jose Craveirinha, Mia Couto, Noemia de Sousa, Jose Tenreiro, Castro Soromenho, Luandino Vieira, Pepetala, and Baltasar Lopes, among others.

PORT 461R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 339
Taught	Fall, Winter Contact Department

Course Outcomes

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Literary Study Skills

Develop the habits and skills for Luso-African literary study that inspire continued learning.

Research

Write essays in Portuguese, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to Luso-African literary texts.

Top

Literature of the Lusophone World

Authors from the eight nations whose official language is Portuguese, plus former colonies and present regions of important Portuguese influence. These include Luso-American and Azorean writers, as well as authors from East Timor (formerly Indonesia), Goa (India), and Macau (China).

PORT 462R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PORT 339
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to Lusophone literary texts.

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Research

Write essays in Portuguese, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Literary Study Skills

Develop the habits and skills for Portuguese literary study that inspire continued learning.

Top

Directed Research in Portuguese

Under faculty member's direction, designing and conducting research project covering material not normally presented in regular course work. Research paper required.

PORT 480R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Written proposal subject to department approval.
Note	Total Port 480R credit toward bachelor's degree not to exceed 3 hours.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Skills

Conduct advanced, independent research on a topic in Portuguese studies.

Top

Senior Proficiency Evaluation

Course meets only once to provide information on the Oral Proficiency Interview and Writing Proficiency Test, required of all majors and teaching minors.

PORT 491

Hours	0.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No major or minor credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Portuguese Speaking Proficiency

Receive an Advanced Low or better on the Oral Proficiency Interview and Writing Proficiency Test.

Top

Capstone Course in Portuguese

A culminating experience for Portuguese as a first or second major. Students will be able to articulate the value of the Portuguese BA and will develop strategies and a rationale for applying the skills acquired during their undergraduate studies.

PORT 493

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Senior standing or departmental advisor's consent.
Note	Course must be taken concurrently with an approved upper-division, senior-level (e.g. 400-level) course in the semester prior to graduation.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Assemble a portfolio

Students will assemble a portfolio of artifacts demonstrating their language ability, cultural competence, critical thinking and expression, and application of their language skills to their personal and professional life.

Reflect on learning

Students will reflect on their learning and experiences as a Spanish/Portuguese major at BYU and set goals for continued language use and improvement.

Advanced Portuguese Grammar

Applying contemporary grammatical concepts to problems in Portuguese grammar.

PORT 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 326 or 329.
Taught	Fall, Winter Contact Department

Course Outcomes

Grammar Rules and Problems

The student enrolled in Advanced Portuguese Grammar will carefully examine some grammar "problems" by reading and studying selections from grammarians and researchers who provide insights into the problem in question. The student's ability to synthesize coherent and meaningful generalizations will be objectively tested by exams and further evaluated while he or she participates in classroom discussion.

Descriptive and Prescriptive Grammars

The student enrolled in *Advanced Portuguese Grammar* will acquire a greater understanding of both descriptive and prescriptive grammars and their function and limitations. The student will also acquire specialized terms employed by grammarians and morphosyntacticians. The student's ability to understand and use these terms appropriately will also be objectively measured by examination.

Research Paper

Complete a research paper/presentation on a particular grammar point or construction. This assignment will test a student's ability to locate appropriate refereed sources, read and synthesize them and prepare a written document and oral presentation according to a recognized style manual.

Romance Philology

Comparative study of evolution of Latin into modern romance languages.

PORT 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 326 or 329.
Taught	Winter

Course Outcomes

Historical Context

Situate Latin and the Romance Languages in their "external" (i.e. political and literary) historical context.

Phonological Evolution

Recognize the "laws" of regular phonological evolution (e.g. syncope, lenition, diphthongization, etc.).

Language Comparison

Compare the "major" (i.e. literary) Romance languages as far as their phonological development is concerned.

Lexical Differences and Etymology

Lexical Differences and Etymology

Summarize Research

Become familiar with articles published in professional journals relating to the subject matter and produce accurate and meaningful written summaries and reactions to them.

Transcription

Learn the rudiments of transcribing medieval or Renaissance manuscripts.

Top

History of the Portuguese Language

Linguistic sources that contributed to formation of Portuguese.

PORT 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 326 or 329.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Nominal and Verbal Systems

Acquire a basic knowledge of the changes undergone by the nominal and verbal systems of Latin and Portuguese (e.g., the demise of the case system, the development of new verbal tenses, etc.).

Scholarly Articles

Demonstrate the ability to summarize and discuss in a clear and concise manner several scholarly articles on the topic of the history of the Portuguese language.

Political and Literary Contexts

Situate Latin and Portuguese in their political and literary historical contexts.

Phonological Development

Recognize the laws of regular phonological development (e.g. syncope, lenition, diphthongization, etc.).

Lexicon Sources

Identify the sources of the Portuguese lexicon.

Theory

Understand the different theories that claim to understand the relation between Latin and the Romance languages, especially the relation between Latin and Portuguese.

Linguistic Standardization

Understand the process of linguistic standardization in Romance and its implications for the

linguistic map of the Iberian Peninsula.

Special Topics in Portuguese Linguistics

Topics from semantics to dialectology to sociolinguistics.

PORT 529R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Port 326 or 329, or instructor's approval.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic in Portuguese linguistics.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Academic Internship: Portuguese Internship

PORT 599R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Port 321; instructor's consent.
Note	For supervised internship credit on BYU Study Abroad programs only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Internship

Demonstrate capacity to contextualize internship responsibilities and experiences within an academic framework.

Orientation to the Psychology Major

Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, and career possibilities.

PSYCH 101

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required seminar for all students entering major.
Taught	Fall, Winter

Course Outcomes

1. Familiarity with curriculum

Students will demonstrate familiarity with the undergraduate psychology curriculum and requirements of the psychology major in terms of the American Psychological Association standards and their implementation at BYU.
Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally.

2. Occupational and academic opportunities

Students will classify the major post-baccalaureate occupational and academic opportunities available to psychology majors.
Measurement: In-class quizzes from assigned textbook reading; individual exams that apply the reading personally. Design, production, and presentation of a poster that describes an opportunity of interest.

3. Students develop a personal plan

Students will develop a personal plan for transitioning from student to career professional.
Measurement: Produce a personal plan in multiple drafts.

Honors Introduction to Psychological Science

Basic course in modern scientific psychology.

PSYCH 111

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Knowledge of theoretical perspectives

Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections.

2. Applying psychological principles

Objective: Apply psychological principles to personal and social issues and problems.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.

3. Research methods

Objective: Understand the basic research methods used in psychology, including classical and current experiments.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

Introduction to Psychological Science

Basic course in modern scientific psychology.

PSYCH 111

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

1. Knowledge of theoretical perspectives

Objective: Demonstrate a broad knowledge of the basic theoretical perspectives that guide psychological inquiry.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections.

2. Applying psychological principles

Objective: Apply psychological principles to personal and social issues and problems.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper.

3. Research methods

Objective: Understand the basic research methods used in psychology, including classical and current experiments.
Measurement: Examinations, quizzes, comprehensive final examination that includes questions common to all Psychology 111 sections, response papers to essays written by practicing research psychologists or term paper, participation as a subject in actual psychological research.

Top

Understanding and Improving Your Memory

Principles of human learning and memory; study skills and methods for improving memory.

PSYCH 170

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Being considered for expiration.

This course hasn't been taught recently. The department is in the process of evaluating whether to expire this course.

Applying to Graduate School

Overview of graduate programs in psychology; preparing application materials, including the Graduate Record Examination. (GRE).

PSYCH 200

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

1. Steps and timetable for applying to graduate school

Students will demonstrate an awareness of the steps and timetable associated with applying to graduate school.
Measurement: Multiple choice tests, short essays.

2. Students identify appropriate graduate programs

Students will be able to identify appropriate graduate programs based on their academic record and relevant experiences.
Measurement: Multiple choice tests, short essays.

3. Solicit and obtain letters of recommendation

Students will be able to solicit and obtain letters of recommendation.
Measurement: Writing assignment.

4. Students write a statement of intent/interest

Students will be able to write a statement of intent/interest.
Measurement: Writing assignment.

5. Students demonstrate knowledge of interviews

Students will demonstrate knowledge of what occurs during graduate school interviews.
Measurement: Writing assignment.

A History of Psychology

Overview of psychological thinking from Ancient Greece to the present. Emphasizes a critical stance toward the assumptions and implications of major psychological theories.

PSYCH 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	May be taken concurrently with Psych 301.
Note	This course contains content featured in the Graduate Record Examination (GRE) Subject Test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Critical thinking

Students will demonstrate basic critical thinking skills by comparing and contrasting the basic assumptions regarding human nature that have traditionally guided and shaped the various schools of contemporary psychological thought.
Measurement: Short essays on exams and on group quizzes.

2. Implications

Students will identify and evaluate the various implications that these basic assumptions about human nature have for both the theory and the practice of contemporary psychology.
Measurement: Multiple choice and short essay on exams and group quizzes.

3. Identify major figures and schools of thought

Students will identify the major figures and schools of thought that have made significant historical and conceptual contributions to the contemporary disciplinary landscape of psychology.
Measurement: Multiple choice exams and individual quizzes.

4. Reasoned position

Students will express a reasoned position on some of the enduring questions, issues, and concerns of the discipline of psychology that is faithful to the Restored Gospel of Jesus Christ.
Measurement: Essay questions on exams.

Top

Special Topics in Psychology

Small-group seminar focusing on a classical text or on readings related to a contemporary issue in theory and research.

PSYCH 212R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Being considered for expiration.

This course hasn't been taught recently. The department is in the process of evaluating whether to expire this course.

Human Development: Life Span

Interaction of psychological, biological, and social influences on behavior and psychological development through the life span.

PSYCH 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Basic developments and patterns across the lifespan

Students will understand and remember the basic developments that occur across the lifespan, the basic patterns of thought, emotion, and behavior characteristic of individuals at each stage of the lifespan, and the important individual and contextual influences on human development.
Measurement: Multiple choice and short essay questions.

2. Key concepts and theories

Students will understand the key concepts and theories that are predominant in the literature on human development.
Measurement: Multiple choice and short essay questions.

3. Communicate about human development

Students will be able to more effectively communicate verbally and in writing about human development.
Measurement: Research papers or other writing assignments.

4. Analyze and evaluate human development ideas

Students will be able to analyze and critically evaluate ideas, arguments, and points of view about human development.
Measurement: Research papers or other writing assignments.

5. Apply knowledge of human development to real world

Students will be able to apply knowledge of human development to addressing real-world issues.
Measurement: Short writing assignments and in-class activities.

Top

Personal and Social Adjustment

Concepts of adjustment and application of psychological principles for coping with stress and interpersonal, emotional, and psychosexual difficulties.

PSYCH 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will deepen their understanding of personal and social adjustment.

Top

Improving Mental Skills

Improving one or more of the following skills: remembering, studying, problem solving, or rapid reading.

PSYCH 270

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Being considered for expiration.

This course hasn't been taught recently. The department is in the process of evaluating whether to expire this course.

Top

Psychology of Gender

Biological and social contributions to sex role development, sexual self-concept, and complementarity of sex roles.

PSYCH 306

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE) Subject Test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Gender concepts, theories, and research findings

Students will demonstrate a fundamental understanding of (a) various concepts and theories of sex and gender, including models of how gender roles are developed and maintained, and (b) the major research findings regarding gender.
Measurement: Multiple choice tests, short essays.

2. Research knowledge and skills

Students will develop knowledge and skills within gender research for identifying and formulating research hypotheses and the theories supporting them, understanding threats to research validity, formulating designs to test hypotheses, appreciating the limitations of research findings, and critically analyzing the research literature.
Measurement: Writing assignment and/or conducting research project.

3. Develop skills in gender research

Students will develop knowledge and skills within gender research for identifying and formulating research hypotheses and the theories supporting them, understanding threats to research validity, formulating designs to test hypotheses, appreciating the limitations of research findings, and critically analyzing the research literature.
Measurement: Writing assignment.

4. Critical awareness of cultural effects on gender identity

Students will be aware of, identify with, and analyze the influence of media, institutions and culture on the development of gender identity, gender-related beliefs, and attitudes through class room activities and discussions; and develop an awareness of one's own expectations and biases as they relate to gender.
Measurement: Multiple choice tests, short essays, and/or conducting research project.

5. Influence of media, institutions, and culture

Students will be aware of, identify with, and analyze the influence of media, institutions and culture on the development of gender identity, gender-related beliefs, and attitudes through class room

activities and discussions; and develop an awareness of one's own expectations and biases as they relate to gender.
Measurement: Writing assignment.

Top

Writing Within Psychology

Processes of research-oriented writing and presentation for psychology majors.

PSYCH 307

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 101 & PSYCH 111 & WRTG 150; or equivalents.
Note	Must be taken prior to or concurrently with Psych 308. Fulfills GE Advanced Written and Oral Communication requirement. Engl 315 will substitute for this course.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Write clearly and appropriately

Students will demonstrate that they can write clearly, focus on a well-defined purpose in writing, use conventions of format and structure appropriate to their discipline, and adopt a voice, tone, and level of formality suited to multiple purposes and audiences, including audiences both within and outside the discipline in which the course is offered.
Measurement: Informal in-class writing assignments will be given and formal writing assignments will be assigned in multiple drafts with peer- and instructor-review. Genres could include a personal writing journal, letter of intent, letter to the editor, literature review, research proposal, book review, and poster presentation. Explicit focus on the *Publication Manual of the American Psychological Association*.

2. The role of writing in the discipline

Students will demonstrate an understanding of the roles that writing plays in their particular discipline, major, or career as a way of learning, as a way of demonstrating and evaluating what one has learned, and as a way of communicating with others.
Measurement: See (1).

3. Productive and flexible collaborative writing processes

Students will develop productive and flexible individual and collaborative writing processes, including prewriting, drafting, revising, editing, and proofreading. These processes could include the following: collecting data, finding supporting evidence, and creating good arguments; organizing the materials for a paper, writing successive drafts of the same paper; group writing, seeking and using peer responses; revising; editing grammar, usage, and punctuation; and using conventional formats. These processes will reflect processes of inquiry within the student's discipline.
Measurement: See (1).

4. Library research

Students will demonstrate the ability to use appropriate research tools and processes of research within their particular discipline, including library research. Students will demonstrate their ability to identify and evaluate sources, retrieve and evaluate data, take notes, and follow conventions of quoting, paraphrasing, and summarizing. They will cite sources properly and demonstrate an

understanding of ethical issues related to research, including how to avoid plagiarism.
Measurement: Complete the library-usage module provided by the Lee Library.

5. Genres, forms, styles, and documentation conventions

Students will understand the genres, forms, styles, and documentation conventions of writing for their discipline. They will also demonstrate knowledge of edited syntax, grammar, punctuation, and spelling.
Measurement: See (1).

Psychological Statistics

Descriptive and inferential statistical analysis and hypothesis testing applied to psychological research data.

PSYCH 308

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PSYCH 210 & MATH 110
Note	Psych 307 must be taken prior to or concurrently with Psych 308. Stat 121 will not substitute for this course. Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Recognize and understand notation, formulae, and concepts

Students will be able to recognize and understand basic statistical notation, formulae, and concepts.
Measurement: Multiple choice and short answer exams

2. Speak and write about notation, formulae, etc.

Students will be able to accurately speak and write about statistical formulae, concepts, analyses, and results.
Measurement: Short essays.

3. Select and use formulae appropriately

Students will be able to correctly select and use basic statistical formulae and appropriately interpret the results.
Measurement: Multiple choice tests, short essays.

Top

Psychological Testing

Construction and validation of standardized psychological tests.

PSYCH 309

Hours	3.0 Credit, 2.5 Lecture, 1.0 Lab
Prerequisites	PSYCH 210 & PSYCH 307 & PSYCH 308
Note	Must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE) Subject Test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Evaluate psychometric strengths and weaknesses

Students will effectively evaluate the psychometric strengths and weaknesses of individual psychological tests and measurements, using both conceptual and applied metrics.
Measurement: This will be measured by instructors and teaching assistants based on a) multiple choice exams; b) case study evaluations of existing psychological measures; c) application of conceptual and statistical measures to student's own course projects.

2. Create their own psychological measurements

Students will create their own psychological measurements suited to specific theories and hypotheses.
Measurement: This will be measured by instructor evaluation of semester-long course projects that require integration of all course material including a) study design; b) creation of a measure; c) data collection and analysis; and d) written and oral presentation of study findings.

Top

Psychological Research Design and Analysis

Basic principles of designing, conducting, and reporting psychological investigations.

PSYCH 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 210 & PSYCH 307 & PSYCH 308
Note	Psych 309 must be taken prior to or concurrently with Psych 310. Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Critically review literature

Students will be able to critically review the literature to generate a testable hypothesis based on a summation of current research findings and scientific thought.
Measurement: Writing assignment.

2. Methodological designs

Students will be able to distinguish between methodological designs and implement and execute an appropriate design to test the hypothesis, demonstrating an understanding of and sensitivity to relevant ethical considerations, including how to identify and measure dependent variables and measure or control for independent and other variables critical to the design of the study.
Measurement: Multiple choice tests, short essays.

3. Written report of research

Students will be able to prepare a written report of the research project adhering to APA style in all aspects of presentation (e.g., format, figures/tables, referencing) in a format that would be suitable to submit to an APA journal.
Measurement: Writing assignment.

4. Present research orally

Students will be able to present the research orally to an audience of peers in either a paper or poster format.
Measurement: Presentation assignment.

5. Critically evaluate published research

Students will be able to critically evaluate the quality of published research.
Measurement: Writing assignment.

Critical Issues in Psychology

Critical and comparative examination of underlying theoretical and philosophical issues relavant to contemporary social, personality, and cognitive psychology, neuroscience, and psychotherapy.

PSYCH 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Assumptions of major theories

Students will identify and describe basic assumptions (and the implications of those assumptions) that underlie the major theories, methods, practices, and schools of contemporary psychology.
Measurement: Multiple choice quizzes or short essay assignments.

2. Critically evaluate assumptions in published writings

Students will identify and critically evaluate these basic assumptions in the published writings of psychologists.
Measurement: Multiple choice reading quizzes and short paper essay assignments.

3. Compare and contrast alternative assumptions

Students will compare and contrast alternative assumptions (and the implications of those assumptions) to those associated with the major theories, methods, practices, and schools of contemporary psychology, especially as they may be relevant to a Christian perspective.
Measurement: Short paper essay assignments.

Developmental Psychology: Childhood

Physical, mental, emotional, and social development of the child.

PSYCH 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Theories and research in human development

Students will describe current theories and research in human development from pre-natal development through late childhood, demonstrating an understanding of developmental processes that lead to normative development, including perceptual, cognitive, biological, genetic, and social domains, as well as factors that lead to psychopathology and mental illness.
Measurement: Multiple choice tests, quizzes.

2. Assess and critique a key issue

Students will assess and critique a key issue in a group format presented to the class.
Measurement: Assessment of presentation.

3. Integrate current research studies

Students will assess critical issues in early childhood development, integrating current research studies on topics in developmental psychology.
Measurement: APA style paper.

Top

Developmental Psychology: Adolescence

Development and maturation during adolescence; research methodology.

PSYCH 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE) Subject Test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Understand and remember the basic developments in adolescence

Students will understand and remember the basic developments that occur during adolescence, the basic patterns of thought, emotion, and behavior characteristic of adolescents, and the important individual and contextual influences on adolescent psychology and development.
Measurement: Multiple choice and short essay questions.

2. Understand key concepts in adolescent psychology literature

Students will understand the key concepts and theories that are predominant in the literature on adolescent psychology and development.
Measurement: Multiple choice and short essay questions.

3. Effectively communicate about adolescent psychology

Students will be able to more effectively communicate verbally and in writing about adolescence.
Measurement: Research papers.

4. Analyze and critically evaluate ideas about adolescence

Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adolescence.
Measurement: Research papers.

5. Apply knowledge of adolescent psychology to real-world issues

Students will be able to apply knowledge of adolescence to address real-world issues.
Measurement: Short writing assignments and in-class activities.

Top

Developmental Psychology: Adulthood

Stability and change in psychological, physiological, and interpersonal processes through early, middle, and late adulthood.

PSYCH 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE) Subject Test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Understand and remember developments and patterns of adulthood

Students will understand and remember the basic developments that occur during adulthood, the basic patterns of thought, emotion, and behavior characteristic of adults, and the important individual and contextual influences on adult psychology and development.
Measurement: Multiple choice and short essay questions.

2. Understand key concepts and theories of adult psychology

Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.
Measurement: Multiple choice and short essay questions.

3. Effectively communicate verbally and in writing about adulthood

Students will be able to more effectively communicate verbally and in writing about adulthood.
Measurement: Research papers.

4. Analyze and critically evaluate ideas about adulthood

Students will be able to analyze and critically evaluate ideas, arguments, and points of view about adulthood.
Measurement: Research papers.

5. Apply knowledge of adult psychology to real-world issues

Students will be able to apply knowledge of adulthood to address real-world issues.
Measurement: Short writing assignments and in-class activities.

6. Knowledge of the discipline

Students will understand the key concepts and theories that are predominant in the literature on adult psychology and development.
Measurement: Multiple choice and short essay questions.

Top

Organizational Psychology

Personal, interactional, and structural aspects of organizations; motivation, decision making, problem-solving communication, leadership, organizational structure, change.

PSYCH 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Org B 321 will not substitute for this course.
Taught	Fall, Winter

Course Outcomes

1. Understanding of major areas of I/O psychology

Students will demonstrate a basic understanding of the major areas of organizational and industrial psychology, including human resources; leadership development; employee training, motivation, and satisfaction; group dynamics, organizational climate; and team-building.
Measurement: Multiple choice tests, short essays.

2. Apply organizational theory

Students will learn to apply organizational theory to specific organizational situations.
Measurement: Writing assignment.

3. Organizational skills

Students will acquire skill in collaborative teamwork, time management, self-motivation, and project planning.
Measurement: Evaluation of cooperative class assignments.

Sport Psychology

Application of psychological principles to sporting activities.

PSYCH 338

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

1. Current status of sport psychology

Students will demonstrate a basic understanding of the current status of the discipline of sport psychology and of the psychological theories that inform it, including behavioral principles and applications, social psychology, personality psychology, assessment, special athletic populations, coaching, and exercise psychology.
Measurement: In-class exams on assigned textbook reading.

2. Familiarity with journals

Students will demonstrate familiarity with selected sport- psychology journals.
Measurement: Author a paper that combines a literature review with application to a sport-performance environment.

3. Current events

Students will identify and discuss current events related to sport psychology.
Measurement: In-class reports and discussion of video clips or other media reports relevant to sport psychology.

Personality

Individual patterns of behavior, thought, and emotion; personality theories and their associated strategies of research, assessments, and personality change.

PSYCH 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Identify and distinguish personality theories

Students will identify and distinguish the major personality theories of psychology.
*Measurement: M*ultiple choice/Short essay.

2. Contemporary research and applications

Students will identify and give examples of contemporary research or applications of these theories.
Measurement: Multiple choice/Short essay.

3. Theoretical assumptions

Students will identify the theoretical assumptions that underlie these personality theories.
Measurement: Multiple choice.

4. Practical and religious implications

Students will articulate some of the practical and religious implications of these theories.
Measurement: Essay assignments.

Abnormal Psychology

Dynamics of maladjustment; major psychological disorders and therapeutic procedures. Fieldwork required.

PSYCH 342

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Forms of psychological disorders and major theories

Students will identify and describe the major forms of psychological disorders and the major theories regarding the classification, etiology, and treatment of psychological disorders, and current data relevant to such theories.
Measurement: Multiple choice, short answer and essay exams; short writing assignments.

2. Service learning and exposure to psychological disorders

Students will engage in service learning by serving persons diagnosed with psychological disorders.
Measurement: Participation assessment/field work report

3. Critique concepts and theories

Students will critically examine key concepts and theories in abnormal psychology.
Measurement: Essay exams, short writing assignments, in-class debates

4. Use sources to analyze topics regarding disorders

Students will examine and critique a topic in abnormal psychology using the current research literature.
Measurement: APA style paper

Child Psychopathology

Mental disorders of childhood.

PSYCH 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Etiology, assessment, diagnosis, and treatment

Students will identify and describe the etiology, assessment, diagnosis, and treatment of common psychological and developmental disorders in children and adolescents.
Measurement: Multiple choice exams, quizzes.

2. Current issues in child psychopathology

Students will demonstrate familiarity with current issues in child psychopathology.
Measurement: Presentations, short writing assignments.

3. Use current literature to critique a topic

Students will examine and critique a topic using the current research literature.
Measurement: APA style paper.

Clinical Psychology

Personality theories, psychopathology, diagnostic interviewing and testing, psychotherapy techniques; research methods.

PSYCH 348

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Not a practicum.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Theories, practices, and critical issues

Students will identify and describe the theories, practices, and critical issues in clinical psychology.
Measurement: Multiple choice exams, quizzes.

2. Summarize and explain a current topic

Students will summarize and explain a current topic in clinical psychology to the class and/or engage in role play and interview activities.
Measurement: Class presentations, role plays.

3. Career and educational opportunities

Students will assess and evaluate personal career/educational opportunities in the field of clinical psychology.
Measurement: Short writing assignments.

4. Examine and critique current psychotherapies

Students will examine and critique current psychotherapies and describe their personal views about therapy.
Measurement: APA style paper.

Top

(Psych-Soc) Introduction to Social Psychology

Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

PSYCH 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Unique contribution of social psychology

Students will be able to identify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.
Measurement: Multiple choice tests, short essays.

2. Research methods and ethics

Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.
Measurement: Multiple choice tests, short essays.

3. Substantive areas of inquiry

Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.
Measurement: Multiple choice tests, short essays.

4. Contributions of major thinkers and contributors

Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.
Measurement: Multiple choice tests, short essays.

5. Applications of social psychology

Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.

Measurement: Multiple choice tests, short essays.

Applied Social Psychology

Applying social psychological theory, research, and methods to such domains as law, business, education, the media, mental health, and physical health.

PSYCH 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

1. Defining a social problem

Students will be able to understand how one defines something as a "social problem".
Measurement: Multiple choice tests, short essays.

2. Basic compared to applied social psychology

Students will be able to compare and contrast basic and applied social psychology.
Measurement: Multiple choice tests, short essays.

3. Substantive areas of social psychological application

Students will be able to identify substantive areas of social psychological application, such as education, physical health, mental health, the environment, and business.
Measurement: Multiple choice tests, short essays.

4. Research project

Students will be able to apply social psychological methods to an intervention designed to understand or ameliorate a social problem.
Measurement: Evaluation of project

LDS Perspectives and Psychology

Relationships between theories of psychology and LDS thought.

PSYCH 353

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

1. Reasoned position on the enduring questions

Students will express a reasoned position on the enduring questions, issues, and concerns of the discipline of psychology that is grounded in and faithful to the Restored Gospel of Jesus Christ.
Measurement: Essay questions on exams/Term paper option.

2. Gospel-centered perspectives on psychological science

Students will identify various gospel-centered perspectives on psychological science (both in theory and practice) that have been offered by prominent LDS (and other Christian) scholars, as well as prophets, apostles, and other general authorities.
Measurement: Multiple choice questions on exams/Individual quizzes.

3. Critical thinking on basic assumptions about human nature

Students will demonstrate basic critical thinking skills by comparing and contrasting the basic assumptions about human nature found in the Restored Gospel and in the various secular traditions of mainstream psychology.
Measurement: Essay questions on exams/Term paper option.

4. Implications of assumptions for theory and practice

Students will identify and evaluate the various implications that these assumptions about human nature have for both the theory and practice of contemporary psychology.
Measurement: Multiple choice questions and essay questions on exams and quizzes/Term paper option.

Psychology of Religion

Classification of religious behavior and experience; source of religious motivation; religion and the growth process.

PSYCH 354

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Winter

Course Outcomes

1. Key assumptions of psychology, religion, and spirituality

Students will define psychology, religion, and spirituality and compare and contrast their key assumptions.
Measurement: Multiple choice/Analytic essays.

2. Critical examination of perspectives

Students will critically examine the implications of psychological perspectives on religion and spirituality, as well as the implications of religious and spiritual perspectives on psychology.
Measurement: Analytic essays.

3. Alternative perspectives

Students will identify alternative psychological, religious, and spiritual perspectives, examine their assumptions, and consider the value of their alternative implications to the relationship between these three worldviews.
Measurement: Multiple choice/Analytical essays.

4. Critical examination of one's own assumptions

Students will critically examine their own assumptions about the relationship between psychology, religion, and spirituality.
Measurement: Analytical essays.

Top

Introduction to Health Psychology

Psychology focusing on the Biopsychological Model, i.e., health issues from standpoint of biological, psychological, and social factors.

PSYCH 356

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

1. Key concepts and theories in health psychology

Students will identify and describe key concepts and theories in health psychology.
Measurement: Multiple choice and brief response exams; quizzes.

2. Contributions to the understanding of illness

Students will examine the contributions of health psychology to the understanding of acute and chronic illness.
Measurement: Multiple choice and brief response exams; group assignments and presentation.

3. Critique current news articles about health

Students will critique current news articles about health using principles and concepts from class.
Measurement: Writing assignments.

4. Principles of health psychology in everyday life

Students will explain how principles of health psychology operate in everyday life.
Measurement: Writing assignments.

Top

Leadership Development

Principles and practices of successful leadership: decision making, communications, planning, team building, motivation, and interpersonal skills.

PSYCH 358

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

1. Major areas of the psychology of leadership

Students will demonstrate a basic understanding of the major areas of the psychology of leadership, including leadership as trait or as function; leadership styles (charismatic, transactional, transformational); contingency and situational leadership; ethics and responsibility; influence tactics; teamwork and team-building; motivation and coaching skills; creativity and innovation; communication, negotiation, and conflict resolution; strategic and tactical leadership; leadership development and succession planning.
Measurement: Multiple choice tests, short essays.

2. Apply leadership theory to specific situations

Students will learn to apply leadership theory to specific organizational situations.
Measurement: Writing assignment.

Top

Environmental Psychology

Interaction between people and their physical context.

PSYCH 359

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	

Course Outcomes

(Not currently offered.)

Enter ONE outcome here.

Top

Principles of Learning

Principles of learning; representative experiments.

PSYCH 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter

Course Outcomes

1. Understanding of behavior analysis concepts

Students will develop their understanding of and facility with the concepts by which behavior analysis makes sense of selected learning phenomena.
Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.

2. Virtual laboratory rat

Students will connect the concepts to the behavior of a virtual laboratory rat.
Measurement: Individual- and team-based written reports and in-class presentations of the results of virtual experiments. Team-based manuscripts in multiple drafts both peer- and instructor-reviewed.

3. Application of behavioral concepts to humans

Students will apply the concepts to human behavior, including one's own.
Measurement: Out-of-class team-based application activities summarized in written reports. Essay exams that emphasize applications to real-life phenomena.

Motivation

Determinants of motivation, relationship of motives to emotion, cognition, personality, and action. Implications for understanding self and others.

PSYCH 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter

Course Outcomes

1. Theories and research in the psychology of motivation

Students will compare and contrast a wide range of theories and research findings within the sub discipline of the psychology of motivation.
Measurement: In-class quizzes, both individual- and team-based, on assigned textbook and other reading.

2. Application of theories and concepts

Students will categorize and apply theories and concepts to specific fictional characters and settings in film.
Measurement: Out-of-class application activities that focus on four films shown in class and that require application of specific concepts to the characters, plots, and themes of the films.

3. Connections to one's own experience

Students will analyze connections between the subject matter and one’s own experience of motivation.
Measurement: Individual essays and essay exams that focus on the personal application of concepts to one’s experience.

Sensation and Perception

Sensory basis of perception and principles of perceptual organization.

PSYCH 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring

Course Outcomes

1. Understanding of perception, brain, and environment

Students will gain an understanding of how our brains interact with our external environment and give rise to our perceptions.
Measurement: Students will demonstrate this understanding on quizzes and on exams.

2. Research methods in cognitive neuroscience

Students will develop an understanding of how we know what we know about sensation and perception, i.e., research methods in cognitive neuroscience and the scientific method.
Measurement: Students will demonstrate this understanding through in-class discussion, on quizzes/exams, and through coming to class ready to learn. Being ready to learn includes completing the assigned readings and assessments, participating in lecture and discussion, and completing outside assignments (e.g., labs).

3. Apply principles of sensation and perception

Students will be able to apply the principles discussed in class to the world around them.
Measurement: Students will demonstrate this through lab assignments.

4. Critical reflection

Students will be able to critically reflect on the content of psychology as well as on disciplinary values in light of their knowledge of and commitment to the restored gospel of Jesus Christ and to sustain personal values that are true to the gospel while maintaining their serious study of psychology and neuroscience.
Measurement: Multiple choice exams, quizzes.

Cognition

Perceptual organization; information processing; cognitive development; relationships between sensory analysis, perception, memory, learning, language, and problem solving.

PSYCH 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Cognitive processes of perception, memory, language, etc.

Students will recognize and understand the cognitive processes of perception, memory, language, reasoning, and problem solving.
Measurement: This will be assessed on multiple choice and essay quizzes and exams.

2. Application of cognitive psychology

Students will assess and develop ways to apply the principles of cognitive psychology.
Measurement: This will be assessed with a design proposal that implements the principles of cognitive psychology.

Language Development

Principles of language acquisition including communicative development in infancy, sematic and syntactic development, language and literacy in the school years, and effects of brain damage.

PSYCH 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	

Course Outcomes

1. The emergence of language

Students will demonstrate knowledge of early communicative behaviors and the emergence of language.
Measurement: Multiple choice tests, short essays.

2. Phonology, semantics, grammar, and pragmatics

Students will demonstrate knowledge of the components of language – specifically phonology, semantics, grammar, and pragmatics.
Measurement: Multiple choice tests, short essays.

3. Language development

Students will show knowledge of how language continues to develop in school age children as well as adulthood.
Measurement: Multiple choice tests, short essays.

4. Language disorders

Students will have a basic knowledge of various language disorders.
Measurement: Multiple choice tests, short essays.

5. Neurological components of language

Students will be able to describe the basic neurological components of language – including the effects of strokes and dementia on language and speech.
Measurement: Short essays.

Behavioral Neurobiology

Basic physiological, anatomical, and chemical foundations of psychology.

PSYCH 381

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. The brain, experience, and behavior

Students will develop their understanding of how the brain influences one's experience of the world and one's behavior in it.
Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

2. Scientific methods and behavioral neurobiology

Students will identify scientific methods, especially those of cognitive neuroscience, that are valuable in behavioral neurobiology.
Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

3. Diseases, trauma, drug usage, hormones, and genes

Students will extend concepts and research findings to diseases, trauma, drug usage, hormones, and genes.
Measurement: In-class quizzes and/or exams on assigned textbook reading, lectures, and class discussions and written reports and/or in-class presentations of self-selected articles from the scientific literature.

Stress Psychobiology

Behavioral neurobiology of stress.

PSYCH 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent. (Neuro 205 will substitute for Psych 310.)
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

1. Stress, physiology, and physical health outcomes

Students will describe how stress affects physiology and physical health outcomes.
Measurement: Multiple choice exams, quizzes.

2. Analysis of a health condition in the context of stress

Students will integrate their knowledge of stress and health by analyzing a health condition in the context of stress.
Measurement: APA style paper.

3. Experimentation with stress management techniques

Students will experiment with stress management techniques and assess their effectiveness using a stress management journal.
Measurement: Journal entries, critique of experience.

Introduction to Primate Behavior

Overview of primate behavior; the role of parental care on developmental outcome, functional neurobiology, and psychopathology.

PSYCH 387

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or NEURO 205; or instructor's consent.
Taught	Winter

Course Outcomes

1. The diversity of primate species and environments

Students will recognize the diversity of primate species and environments, and examine representative species in detail.
Measurement: In-class quizzes and exams on the assigned reading.

2. Specific aspects of primate behavior

Students will examine specific aspects of behavior, including emotion, cognition, language, parental care, sociality, functional neurobiology, and psychopathology.
Measurement: In-class quizzes and exams on the assigned reading.

3. Compare and contrast non-human and human primates

Students will compare and contrast nonhuman-primate and human behavior and environments, and consider the implications for personal beliefs about human behavior.
Measurement: Literature review on a self-selected topic in multiple drafts with peer-, Writing Center-, and instructor-review.

Drugs, Reward and Addiction

Examines the biopsychosocial nature of drug and behavioral addiction. This course presents the most current research in the field and bridges psychology and neuroscience.

PSYCH 388

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 111; or NEURO 205
Taught	Fall

Course Outcomes

1. Understanding the fundamentals of drug use

Learn the theoretical basis of pharmacology, pharmacokinetics, and pharmacodynamics, and critically evaluate research in the field.
Measurement: Students will demonstrate this understanding through in-class discussion and on quizzes and exams.

2. Understanding the neural basis of reward

Learn the neural underpinnings of drug and behavioral reward, and evaluate research methods in biochemistry, pharmacology, psychology, and neuroscience.
Measurement: Students will demonstrate this understanding through in-class discussion and on quizzes and exams.

3. Understanding the biopsychosocial nature of addiction

Learn the historical, political and sociological aspects of drug abuse, addiction, treatment, and prevention. Use this knowledge to inform real-world treatments and outcomes associated with drug use and abuse. Students will be able to apply the principles discussed in class to problems and solutions regarding drug and behavioral addiction. Students will be able to critically reflect on the content of the course in light of their knowledge of and commitment to the restored gospel of Jesus Christ, and to sustain personal values that are true to the gospel, while maintaining their serious study of psychology and neuroscience.
Measurement: Students will demonstrate this understanding through in-class discussion, on quizzes/exams. In addition, students will demonstrate this through lab reports on guest lecturers, presentations of news reports and current original research articles, and through attending a community addiction treatment facility and experiencing first-hand the practical aspects of addiction treatment.

Top

Advanced Personality Studies

PSYCH 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop understanding of a non-focal topic in psychology

Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise.

2. Identify sub disciplines in psychology related to that topic

Students will identify related sub disciplines in psychology and their primary contributions to the topic.

3. Proposal for a research approach to that topic.

Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.

Top

Comp. Animal Behavior

PSYCH 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop understanding of a non-focal topic in psychology

Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise.

2. Identify sub disciplines in psychology related to that topic

Students will identify related sub disciplines in psychology and their primary contributions to the topic.

3. Proposal for a research approach to that topic.

Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.

Top

Ethology and Sociobiology

PSYCH 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop understanding of a non-focal topic in psychology

Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise.

2. Identify sub disciplines in psychology related to that topic

Students will identify related sub disciplines in psychology and their primary contributions to the topic.

3. Proposal for a research approach to that topic.

Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.

Forum Lecture

PSYCH 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop understanding of a non-focal topic in psychology

Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise. Recent examples include evolutionary psychology and the psychology of humor.
Measurement: In-class quizzes and exams on the assigned reading.

2. Identify sub disciplines in psychology related to that top

Students will identify related sub disciplines in psychology and their primary contributions to the topic.
Measurement: In-class quizzes and exams on the assigned reading.

3. Proposal for a research approach to that topic.

Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.
Measurement: Author a proposal for original research in multiple drafts that includes a literature review, description of method and data analysis, statement of significance, references, and timeline and estimated budget.

Special Topics in Psychology

PSYCH 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop understanding of a non-focal topic in psychology

Students will develop their understanding of a psychological topic that is not focal in the undergraduate curriculum otherwise. Recent examples include evolutionary psychology and the psychology of humor.
Measurement: In-class quizzes and exams on the assigned reading.

2. Identify subdisciplines in psychology related to that top

Students will identify related subdisciplines in psychology and their primary contributions to the topic.
*Measurement:*In-class quizzes and exams on the assigned reading.

3. Proposal for a research approach to that topic.

Students will identify primary means of scientific research in the topic, and formulate a proposal for additional research.
Measurement: Author a proposal for original research in multiple drafts that includes a literature review, description of method and data analysis, statement of significance, references, and timeline and estimated budget.

Academic Internship

PSYCH 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310
Note	A maximum of 9 total internship credit hours from either Psych 399R or Psych 496R may be taken.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Placement in a professionally enhancing work setting

The first and primary objective is the placement of each student in a professionally enhancing work setting. We intend to continuously improve the quality of internship experiences being offered through a process of continuous assessment of all internships, negotiations with agencies, and internship advisement and counseling of students at the beginning of the contractual process.

2. Work experience connections to the content of psychology

Students will critically reflect on the connections between their work experience and the content of psychology and articulate these work-related insights.
Measurement: Short essays essay examinations, and applications book review.

3. Professional skills and attitudes

Students will develop professional skills and attitudes through readings on professional etiquette, in-class presentations to classmates, and poster presentation at open house.
Measurement: Graded writing assignments, PowerPoint presentation, and poster creation and presentation.

Top

Senior Practicum: Teaching of Psychology

Capstone experience as an undergraduate teaching assistant or Psych Central tutor or in other teaching-related activities, including research.

PSYCH 410R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Skill in grading, mentoring, and/or teaching

Students will demonstrate skill in grading, mentoring, and /or teaching one or more areas of psychology. In addition to their applied work under a faculty mentor, they will be instructed in a "teaching of psychology" class.
Measurement: Student academic performance in this capstone will be assessed using multiple choice and short essay exams on the material from the class. Student application of teaching and grading practices and principles will be assessed through mentor evaluation of performance.

Senior Practicum: Community Projects

Capstone experience in community-based service learning related to practice of psychology. Structured record of student's experience required.

PSYCH 420R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Application of psychology within a community setting

Students will demonstrate knowledge of the application of the principles of psychology within a community setting.
Measurement: Application of psychological principles in a community setting will be assessed through a mentor evaluation.

Top

Senior Practicum: Research in Psychology

Capstone experience in psychological research -- laboratory-based, field-based, or otherwise. Student typically works with a research team.

PSYCH 430R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	PSYCH 307 & PSYCH 309 & PSYCH 310; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Skill development in the research process

Students will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.
Measurement: Student mastery of the research process will be assessed from a paper prepared by the end of the semester in proper format for publication.

Top

Supervised Instructional or Research Experience

Course-related instructional activities or laboratory/field research.

PSYCH 492R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Demonstrated Skill in Instruction or Demonstrated Skill in Research

Student(s) will demonstrate skill in developing an instructional plan and lectures in an area of psychology, or skill in an area of psychological research.
Measurement: Student mastery of the instructional process or the research process will be assessed from a paper or other method of documentation prepared by the end of the semester.

Top

Independent Readings

PSYCH 495R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Demonstrated Mastery of a Topic Area of Psychological Research

Student(s) will demonstrate mastery of a topic area of psychological research, obtained by their own independent scholarly work.
Measurement: Student mastery of the research area will be assessed from a paper prepared by the end of the semester.

Top

Academic Internship, Capstone

An academic internship for those who are fulfilling their capstone requirement in their senior year.

PSYCH 496R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 307 & PSYCH 310; senior standing.
Note	A maximum of 9 total internship credit hours from either Psych 399R or Psych 496R may be taken.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Academic Internship, Capstone

(1) The first and primary objective is the placement of each student in a professionally enhancing work setting. We intend to continuously improve the quality of internship experiences being offered through a process of continuous assessment of all internships, negotiations with agencies, and internship advisement and counseling of students at the beginning of the contractual process.
(2) Students will critically reflect on the connections between their work experience and the content of psychology and articulate these work-related insights.
(3) Students will develop professional skills and attitudes through readings on professional etiquette, in-class presentations to classmates, and poster presentation at open house.

Top

Independent Research

PSYCH 499R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Demonstrated Skill in Research

Student(s) will demonstrate skill in several aspects of the research process: literature review and evaluation, data gathering, data analysis, writing, and publishing.
Measurement: Student mastery of the research area will be assessed from a paper prepared by the end of the semester.

Data Analysis in Psychological Research 1

Using and interpreting major quantitative methods in psychology; some commonly used computer methods.

PSYCH 501

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PSYCH 308; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

1. Recognize and understand notation, formulae, and concepts

Students will recognize basic statistical notation, formulae, and concepts.
Measurement: This will be measured by quizzes and exams.

2. Select appropriate method and evaluate results

Students will not only learn how to calculate the statistics we discuss, but also learn when such analyses would be appropriate and how to evaluate the results from statistical analyses.
Measurement: This will be measured by students' performance on homework assignments, quizzes, exams, and the end of semester project.

3. Skill in formulae and software

Students will become skilled in using statistical formulae and statistical software–including interpreting the output from the formulae and software.
Measurement: This will be measured by students' performance on homework assignments and the end of the semester project.

4. Apply statistical ideas to novel situations

Students will become skilled in applying statistical ideas and formulae to novel situations.
Measurement: This will be measured by students' performance on the end of semester project.

Data Analysis in Psychological Research 2

Introduction to multivariate data analysis methods, including multivariate analysis of variance, factor analysis, discriminant analysis, multivariate multiple regression, canonical correlation, structural equations modeling, cluster analysis, etc.

PSYCH 502

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PSYCH 501; or instructor's consent.
Taught	Winter

Course Outcomes

1. Read and understand statistical methods

Students will be able to read and understand the statistical methods in virtually any empirical article.
Measurement: This will be measured by quizzes and exams.

2. Select appropriate methods

Students will know what statistical tests to use to answer specific research questions.
Measurement: This will be measured by quizzes and exams.

3. Statistical software use and interpretation

Students will be able to perform—using statistical software—interpret, and write up for publication the results of the multivariate statistical tests most commonly used in psychological science.
Measurement: This will be measured by performance on a group course project, and also on exams.

Research Measurement

Classical true score and item response theories; estimation procedures for instrument reliability and validity.

PSYCH 503

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 501; or instructor's consent.
Taught	Winter

Course Outcomes

1. Thorough understanding of test and measurement theory

Students will become full-fledged psychometric ninjas. That is, students will develop a thorough understanding of test and measurement theory and their importance to science and practice in clinical psychology.
Measurement: This objective will be assessed through students' contributions to class discussions and students' performance on homework assignments and exams.

2. Statistical software to assess tests

Students will gain experience using the statistical analysis software (for example SPSS and AMOS) needed to develop and assess tests and measures used in psychology.
Measurement: This objective will be achieved through homework assignments.

3. Develop a thoughtful, critical perspective

Students will develop a critical perspective of psychological testing by learning its strengths and limitations. "Critical" is used here to denote a thoughtful analysis rather than simply a negative perspective that focuses on limitations.
Measurement: This objective will be achieved through class discussion, homework assignments, and exams.

4. Write clearly, concisely, and precisely about measures

Students will learn to speak and write about statistics in a way that is *clear, concise, and precise*.
Measurement: This objective will be achieved through class discussion, homework assignments, and exams.

Research Design

Overview of designs used in psychotherapeutic literature, emphasizing critical analysis of empirical research.

PSYCH 504

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Psych 501.
Taught	Fall

Course Outcomes

1. Understanding of research design and methodology

Students will acquire a fundamental understanding of research design and methodology, and the thinking skills to develop and critique a research design.
Measurement: This will be measured by exams and writing assignments.

2. Learn to use research design principles in own research

Students will learn to use research design principles in conducting their own research.
Measurement: This will be measured by exams and writing assignments.

3. Working knowledge of APA ethical standards for research

Students will acquire a working knowledge of APA ethical standards for research with humans and animals.
Measurement: This will be measured by in class conversations about the required reading, exams and assignments.

4. Skill in developing and critiquing study design

Students will acquire skill in developing and critiquing a study from the standpoint of design and methodology.
Measurement: This will be measured by exams and assignments.

Clinical Research

Overview of research examining processes and outcomes of psychological treatments for psychological disorders.

PSYCH 505

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 503 & PSYCH 504; or instructor's consent.
Taught	Winter

Course Outcomes

1. Describe and summarize effectiveness of therapy/interventions

Students will describe and summarize the effectiveness of psychological interventions as well as the effective ingredients of therapy.
Measurement: Class presentations, brief writing assignments.

2. Evolution of themes and controversies

Students will assess the history and evolution of important themes and controversies that have influenced the current state of psychotherapy, such as the impact of managed care, shortened therapy time limits, and the push towards evidence-based practices.
Measurement: Class presentations, essay exam.

3. Implications of current research for the practice of psychotherapy

Students will discuss the implications of current research findings for the practice of psychotherapy and for their own professional practice.
Measurement: Essays questions.

History and Systems of Psychology

Survey of origins and development of modern psychology, including consideration of the schools and theoretical systems.

PSYCH 510

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 210; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	

Course Outcomes

1. Advanced critical thinking and analysis of assumptions

Students will employ advanced critical thinking skills by analyzing via comparison and contrast various assumptions regarding human nature that have traditionally guided and shaped contemporary psychological thought.
Measurement: Short essay format group quizzes and short analytic paper assignments.

2. Identify and evaluate implications of assumptions

Students will identify and evaluate the various implications that these assumptions about human nature have for both the theory and the practice of contemporary psychology.
Measurement: Multiple choice quizzes, short essay format group quizzes, and short analytic paper assignments.

3. Identify major figures and schools of thought

Students will identify the major figures and schools of thought that have made significant historical and conceptual contributions to the contemporary disciplinary landscape of psychology.
Measurement: Multiple choice individual and group quizzes.

4. Reasoned position on enduring questions and concerns

Students will express a reasoned position on some of the enduring questions, issues, and concerns of the discipline of psychology that is faithful to the Restored Gospel of Jesus Christ.
Measurement: Short analytic paper assignments.

Philosophy of Science for the Social Sciences

Issues in philosophy of science as they apply to social sciences, including methods, epistemology, and construction of knowledge.

PSYCH 511

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent or admission to PhD program.
Taught	Winter

Course Outcomes

1. Identify major issues, trends, and schools of thought

Students will identify major issues, trends, and schools of thought in contemporary philosophy of social science.
Measurement: Analytic essays.

2. Critically evaluate issues, trends, schools of thought

Students will critically evaluate via comparison and contrast these issues, trends, and schools of thought.
Measurement: Analytic essays.

3. Articulate their own position on major issues

Students will articulate their own position on major issues in contemporary philosophy of social science, with particular attention toward the theory and practice of psychology.
Measurement: Term paper assignment.

Qualitative Research Methods

Theories and methods of qualitative research emphasizing philosophical assumptions, question formulation, data gathering, interpretation, and presentation of findings.

PSYCH 512

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	

Course Outcomes

1. Identify and critically evaluate qualitative methods

Students will identify and critically evaluate a broad range of qualitative methods of research in contemporary psychology.
Measurement: Multiple choice quizzes/Analytic essays.

2. Propose, design, and conduct a novel qualitative project

Students will propose, design, and conduct a novel research project employing qualitative methods.
Measurement: Course length research project.

3. Critically evaluate contemporary qualitative research

Students will critically evaluate contemporary examples of qualitative research from a variety of traditions, as well as submit their own work in the course to such evaluation.
Measurement: Analytic essays and critical review papers.

Top

Topics in Behavioral Neuroscience

Advanced topics and skills in behavioral neuroscience.

PSYCH 513R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Psych 381 or equivalent or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Topics in Beh Neuroscience

(1) Students will demonstrate skill in several aspects of the research process including such things as: data gathering, data analysis, literature review and evaluation, writing, and publishing.

Advanced Developmental Psychology

Major research in developmental psychology, emphasizing theory, content, and methodology.

PSYCH 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 320 & PSYCH 321 & PSYCH 322; or equivalent; or instructor's consent.
Taught	

Course Outcomes

1. Understand the developmental perspective

Students will extend their understanding of and appreciation for the developmental perspective.
Measurement: Take-home essay examinations and reaction papers based on the assigned textbook reading. Lead class discussions.

2. Explain multifinality and equifinality

Students will explain how similar experiences can lead to different outcomes (multifinality) and how similar outcomes can arise from different starting points (equifinality).
Measurement: Take-home essay examinations and reaction papers based on the assigned textbook reading. Lead class discussions.

3. Justify claim that phenotypes have developmental history

Students will justify the claim that all phenotypic outcomes, including behaviors, have a developmental history.
Measurement: Take-home essay exams and reaction papers based on the assigned textbook reading. Lead class discussions.

Organizational Psychology

Personal and interpersonal aspects of organizational life: goal setting, decision making, problem solving, communication, control, leadership, motivation, and change.

PSYCH 531

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 330; or equivalent; or instructor's consent.
Taught	

Course Outcomes

1. Understanding of major areas of I/O psychology

Students will demonstrate a basic understanding of the major areas of organizational and industrial psychology, including human resources; leadership development; employee training, motivation, and satisfaction; group dynamics, organizational climate; and team-building.

2. Apply organizational theory

Students will learn to apply organizational theory to specific organizational situations.

3. Organizational skills

Students will acquire skill in collaborative teamwork, time management, self-motivation, and project planning.
Measurement: Evaluation of cooperative class assignments.

Top

Personality Theory

Contemporary theories of personality developed within the framework of major psychological systems.

PSYCH 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 341; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Winter

Course Outcomes

1. Identify and distinguish the major personality theories

Students will identify and distinguish the major personality theories of psychology and their specific features and content.
Measurement: Multiple choice/critical analytic essays.

2. Identify, compare, contrast, and evaluate assumptions

Students will identify, compare and contrast, and critically evaluate the philosophical and theoretical assumptions that underlie these personality theories.
Measurement: Multiple choice/critical analytic essays.

3. Conceptual tools of theory construction and evaluation

Students will develop and demonstrate understanding of the conceptual tools of theory construction, analysis and evaluation.
Measurement: Critical analytic essays.

4. Articulate their own position on major issues

Students will articulate their own position on some of the major issues of personality theory, theory construction, and application of theory.
Measurement: Essay assignment.

Top

Theory and Research in Social Psychology

Current theories and research on interaction with others.

PSYCH 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 350; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

1. Familiarity with social psychological theory and research

Students will acquire a deep familiarity with social psychological theory and social psychological research, and will demonstrate advanced competency in the field.
Measurement: Midterm and final essay exams.

2. Summarize empirical research related to major topics

Students will be able to identify and find empirical research related to major topics in social psychology and write knowledgeable summaries of such research.
Measurement: Evaluation of class reports and written research summaries.

Top

Applied Social Psychology

Overview of domains in which social psychological theory and research have been applied in field settings.

PSYCH 552

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 352; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Winter

Course Outcomes

1. Familiarity with applied social versus basic social

Students will understand the distinctions between basic and applied social psychology and will acquire an advanced understanding of and familiarity with the field of applied social psychology. *Measurement:* Midterm and final essay exams.

2. Conduct applied social psychological research

Students will meet with a client and develop, execute, and report the results of an applied research project.

- *Measurement:* Evaluation of written and oral report.

Top

Group Dynamics

Theories and research on small-group processes and mass behavior.

PSYCH 555

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 365; or equivalent; or instructor's consent.
Taught	

Course Outcomes

Being considered for expiration.

This course hasn't been taught recently. The department is in the process of evaluating whether to expire this course.

Learning Theory

Critical review of current theories and persistent issues.

PSYCH 560

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 361; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Winter

Course Outcomes

1. Understanding of behavioristic learning theory

Students will extend their understanding of the behavioristic tradition of learning theory as science and philosophy.
Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.

2. Describe behavioristic account of phenomena

Students will describe the behavioristic account of phenomena typically accounted for in cognitive, intuitive, and humanistic terms, such as mind, will, agency, privacy, and self.
Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.

3. Apply behaviorism to phenomenon of personal interest

Students will apply the behavioristic account in an analysis of a phenomenon of personal interest.
Measurement: Author an argumentative essay in multiple drafts with peer- and instructor-review.

Motivational Psychology

Theoretical, historical, and empirical overview; recent trends and issues; role of animal studies; methodological issues.

PSYCH 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 365; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

1. Synthesize a multi-perspectival psychology of motivation

Students will synthesize a multi-perspectival psychology of motivation from a series of texts.
Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.

2. Compare and contrast the perspectives of the texts

Students will compare and contrast the perspectives represented by the texts.
Measurement: Take-home essay exams on assigned reading. Regular in-class conversation focused on student-submitted questions about the assigned reading.

3. Expound an issue that runs across the texts

Students will identify and expound on a self-selected issue that runs across the texts, and thus illustrate the multi-perspectival view.
Measurement: Author a comparative essay in multiple drafts with peer- and instructor-review. In-class presentation summarizing the essay's argument.

Top

Cognitive Processes

Theory and research in perception, attention, language, problem solving, and other thinking processes.

PSYCH 575

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 370 & PSYCH 375; or equivalents; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Seminar in Mathematical Psychology

Variable topics concerning the application of mathematical and statistical methods to psychology, with emphasis on jointly publishing a methods paper.

PSYCH 578R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 308; or equivalent.
Taught	

Course Outcomes

1. Conceptual basis and theory of the topic(s) in advanced quantitative methods

Students will be able to explain the rationale and the theoretical basis of the statistical/mathematical concepts, formulae, and notations.
Measurement: Essay exam questions

2. Computational ability in advanced quantitative methods

Students will be able to accurately perform the major calculations of the quantitative methods covered in the course.
Measurement: Computational exam questions.

3. Data analysis skills

Students will acquire skill in using statistical/mathematical analysis applications to analyze data sets.
Measurement: Test of computer analysis skill, using a collection of example data sets and a statistical analysis application.

Health Psychology

In-depth examination of behavior from perspective of health and disease

PSYCH 583

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Winter odd years

Course Outcomes

1. Factors that influence health

Students will identify and describe the biological, psychological, social, and spiritual factors that influence health.
Measurement: Multiple choice exams, quizzes.

2. Integrate understanding of health factors

Students will integrate understanding of biological, psychological, social, and spiritual factors that influence health by analyzing a health condition in light of the biopsychosocial model.
Measurement: APA style paper.

3. Biopsychosocial model & stress management journal

Students will examine how the biopsychosocial model applies in their own lives using a stress management journal and assessing how the different factors contribute to their own health and well-being.
Measurement: Journal entries, critique of experience.

Cognition, Affect, and Brain Function

Basic principles of cognition and affect as they relate to normal brain function and following neural disease or injury.

PSYCH 584

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 381; or NEURO 380; or equivalent; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall, Winter

Course Outcomes

1. Brain systems and cognitive/emotional functions

Students will extend their understanding of specific brain systems and the cognitive and emotional functions correlated with those systems.
Measurement: Participation in class conversation about the required reading; in-class presentations on brain function or disorders; final examination.

2. Approaches to the study of the brain, research methods

Students will compare and contrast scientific approaches to the study of brain, cognition, and emotion; and describe specific structural and functional research methods.
Measurement: Participation in class conversation about the required reading; in-class presentations and writing assignments.

3. Brain injury and cognitive/emotional disorders

Students will describe how brain injury can produce cognitive or emotional disorders or both and how the study of brain injury illustrates issues in the evaluation of research findings.
Measurement: Author journal article critiques, final exam, and in-class presentations.

Human Neuropsychology/Biological Bases of Behavior

Critical study of brain-behavior relationships.

PSYCH 585

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
Taught	Winter Contact Department

Course Outcomes

1. Critical understanding of brain-behavior relationships

Students will extend their critical understanding of brain-behavior relationships.
Measurement: A series of exams, including a final exam, on the assigned textbook reading. Participation in class conversation about the required reading.

2. Integrate neuroanatomy with neurobiological functionality

Students will integrate neuroanatomy with neurobiological functionality.
Measurement: A series of exams, including a final exam, on the assigned textbook reading. Participation in class conversation about the required reading.

3. Apply understanding to clinical human neuropsychology

Students will apply their understanding to clinical human neuropsychology.
Measurement: Author a paper on a contemporary issue in human neuropsychology. The final exam will require analysis of specific human cases.

Top

Hormones and Behavior

Neural and endocrine mechanisms underlying behavior.

PSYCH 586

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 381 & PSYCH 382; or equivalents; or instructor's consent.
Taught	

Course Outcomes

Being considered for expiration.

This course hasn't been taught recently. The department is in the process of evaluating whether to expire this course.

Top

Sensory and Perceptual Processes

Critical examination of sensory mechanisms and perceptual organization.

PSYCH 587

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PSYCH 370 & PSYCH 381; or equivalents; or instructor's consent.
Note	Contains content featured in the Graduate Record Examination (GRE).
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Knowledge

Students will deepen their understanding of sensory and perceptual processes.

Top

Plants in the Environment

Introduction to principles of plant function and diversity.

PWS 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Plant Biology Fundamentals

Demonstrate a fundamental knowledge of basic principles and concepts of plant biology (i.e., structure, function, and diversity)

Plant Appreciation

Cultivate an appreciation for the central importance of plants in the way our world and human society functions

Plants in the Environment

Provide a conceptual framework of how plants influence the environment

Environmental Problems

Practice using the scientific method to better understand plant-environment interactions

Effective Communication

Improve verbal and written communication

Cultural History of Medicinal Plants

A global perspective of how medicinal plants have shaped cultural history and how they are used to treat illness and disease. Issues relating to conservation, natural history, biodiversity, and cultural diversity.

PWS 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

PWS 101 Learning Outcomes

1. Explain and interpret a global history of how indigenous people can use plants to treat illnesses and disease.
2. Understand and explain the differences between injurious, remedial, and psychoactive plants.
3. Explain the difference between the Western philosophy of traditional medicine and local indigenous practices for treating illnesses and disease.
4. Analyze and interpret a dose response curve.
5. Define and explain the meaning of an LD-50 and LC-50.
6. Diagram the history behind commercially available cancer chemotherapeutic drugs that are of plant origin, including the drug name, species of plant it was extracted from, acute and delayed toxicity, and major contraindications.
7. Explain the limitations and myths associated with the herbal industry.
8. Read and interpret peer reviewed literature on studies designed to show how human health has improved by using herbal remedies.
9. Explain why it is important to preserve and protect sensitive habitat such as the tropical rainforests, which contain a wealth of biological information related to future drugs as yet undiscovered.
10. Analyze the differences and similarities of how cultures of the world treat illnesses and disease

Residential Landscape Design

Design and composition as applied to development of residential grounds.

PWS 103

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Functional and Beautiful Landscapes

Design residential landscapes that are both funtional and beautiful

Decision Making

Make better decisions when purchasing plants and landscape construction materials

Landscape Planning and Maintenance

Discuss issues and challenges dealing with landscape planning and maintenance.

Nature

Enjoy nature more

Professional Opportunities

Explain professional opportunities related to landscape design.

Top

Landscape Design Graphics

Communication through descriptive drawing and professional plan graphics: plan views, elevation, color, and computer-aided design.

PWS 105

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS 103
Taught	Winter, Spring

Course Outcomes

Methods of Drawing

Feel comfortable and confident with the different methods of drawing as they relate to landscape design

Drawing Style

Have a clear and developed drawing style

Communication

Be able to produce drawings using graphics that clearly communicate and portray the design intent.

Quickness

Develop drawing techniques that allow for quick design and those that allow for more professional design.

Floral Design

History and principles of floral design; identification, care, and handling of cut flowers; techniques of arranging flowers and other plant materials for home and professional use.

PWS 112

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Principles

Students will take a pre- and post-test for foundational principles related to floral design and will show learning by an increase of at least double the average score.

Design

Students will learn how to build various floral arrangements and will successfully complete one design per week.

Safety Certifications for Field Biologists

Certification modules promoting field safety to prepare students to be leaders in workplace safety. Specific trainings include first aid, CPR, hot and cold weather exposure, ATV and snowmobile operation, wild animal safety, and more.

PWS 113

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Certification

Upon completion of this course, students will be certified in the use of ATVs, wilderness first aid, CPR, firearms, rope handling, defensive driving, chainsaws, fire extinguishers, bear safety, and other field biologist-related safety trainings.

Saftey mindset

Students will develop a safety mindset that will serve them throughout their lives.

Workplace hazards

Students will learn to recognize workplace hazards and how to respond appropriately to them.

Top

Introduction to Wildlife and Wildlands Conservation

Assisting students in choosing individual professions and curricula.

PWS 115

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Stewardship

Students will be able to articulate stewardship responsibilities of managers to represent multiple uses of resources by multiple users with divergent opinions and perspectives.

Career Opportunities and Development

Student will be able to make an informed decision on majoring in Wildlife and Wildlands Conservation based on career opportunities and course work required to qualify for career positions.

Top

Environmental Biology

Conservation and management of natural resources concurrent with increasing socioeconomic and human population demands; factors such as soil, water, and air pollution, resources management, bioremediation, nutrient cycles, and global climate changes

PWS 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

Global Environmental Issues

Become fluent in the science of global environmental problems, movements, and solutions including biodiversity, ecosystem function, agriculture and food production, energy systems, water, urbanization, population dynamics, air quality, and climate.

Scientific Principles and Methods

Apply the scientific method through simplified experiments with testable hypotheses. Learn to interpret experimental observations and data and how to communicate discoveries in written and verbal formats.

The Environment and Culture

Discover how environmental quality and conservation is influenced by history, economy, and unique cultural perspectives.

Evironmental Stewardship

Foster and promote environmental stewardship within your realm of influence and your community.

Top

Careers in Environmental Science

PWS 155

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Personal Genomics: Me and My Genes

For non-majors who may have a particular interest in biological and genetic principles as they apply to making informed decisions about health, medical care, and genealogy.

PWS 168

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Fundamental knowledge of genetics and genomics

Students can demonstrate foundational knowledge of genetics, and understanding of emerging concepts of personal genomics in medicine, health, and family history.

Communication of genomic knowledge to peers in a group setting

Students can communicate effectively with classmates through oral, visual, and digital media and present a topic on 'personal genomics' in the news as part of a group.

Social impacts of emerging genomics technologies

Students can analyze and evaluate global and local ethical issues in personal genomics, and how these issues impact individuals, families, and society.

Genomics technologies and personal spirituality

Students can relate personal genomics concepts with teachings of the Restored Gospel, including discussions on evolution, Lamanite ancestry, and use of genomic data in family history.

Analytical thought and problem solving

Students can apply sound thinking in applying personal genomics information to real-life situations.

Top

Introduction to Genetics and Biotechnology

Orientation to the genetics and biotechnology major and introduction to the scientific field, including undergraduate mentored research, internships, extracurricular activities, professional careers, scientific literature, and applications of biotechnology in biomedicine, plant and animal improvement, and environmental remediation. Developing fluency in primary vocabulary of the discipline, familiarization with key technologies, writing reviews of primary literature and portfolio establishment, experiencing basic laboratory protocols.

PWS 188

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	PDBio 120 or concurrent enrollment.
Taught	Winter

Course Outcomes

Fluency in genetics vocabulary.

Students can understand and discuss basic concepts underlying genetics, biotechnology, and genomics.

Familiarization with key technologies.

Students can explain basic operations and applications of existing and emerging technologies for applied genomics.

Literature and writing in the primary discipline.

Students can readily access primary literature in the discipline and draw upon these sources to compose appropriately formatted literature reviews.

Orientation to experiential learning opportunities.

Students can identify and apply for undergraduate educational research opportunities (BYU mentored research and external internships).

Career path orientation.

Students can describe a broad range of careers for geneticists and biotechnologists.

Introduction to Landscape Management

Introduction to the landscape management competency matrix and portfolio. Overview of professional opportunities presented by faculty and industry professionals.

PWS 191

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

available opportunities

Understand the opportunities for learning and growth that are available in the landscape contracting profession

professional opportunities

identify and evaluate professional areas in which to pursue excellence

maximize potential

Maximize your potential for professional success

BYU Grounds Practicum

Multiple horticulture experiences through collaboration with BYU Grounds.

PWS 198R

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent; concurrent employment with BYU Grounds Department.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practical Experience

To provide a practical outside of the classroom experience for students

Student Exposure

To introduce students to a diverse range of practical skills and on the job training.

Green Industry

To expose students to the different aspects of the Green Industry through on campus grounds experience.

Grounds Department

To strengthen the relationship between the Landscape Management Program and the Grounds department on campus.

Campus as Lab

To make campus part of the learning laboratory.

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

PWS 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of both department chair and internship coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Job Experience

Students will find an entry level internship position with a high quality company and receive above average ratings from the employer.

Herbaceous Plants

Systematic study of nearly 170 ornamental herbaceous plant species emphasizing their desirable attributes and cultural requirements.

PWS 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Principles

Students will take a pre- and post-test for foundational principles related to growth of herbaceous plants and will show learning by an increase of at least double the average score.

Application

Students will complete a class project that involves the use of foundation principles in this course and use this written project for their portfolio.

Top

Landscape Structures

Theory and mechanics of hardscape design and construction.

PWS 211

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS 103
Taught	Fall

Course Outcomes

Appllication of Construction

To apply basic knowledge of common hardscape, irrigation, and similar materials learned in the landscape structures course.

Construction of Elements

To be able to implement (construct) certain elements of landscape construction.

Construction Documents

To know how to think creatively and conceptually of a landscape design and be able to translate that into a construction document.

Landscape Irrigation

Working methods of the landscape industry: irrigation, equipment, and materials.

PWS 212

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS 211 or concurrent enrollment.
Taught	Fall

Course Outcomes

Landscape Construction

To apply basic knowledge of common hardscape, irrigation, and similar materials learned in the landscape structures course.

Application

To be able to implement (construct) certain elements of landscape construction.

Construction Documents

To know how to think creatively and conceptually of a landscape design and be able to translate that into a construction document.

Top

Interior Plants and Landscapes

Identification and culture of plants used in the interior landscape industry; applying principles of design to the placement and use in interior landscapes.

PWS 213

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Principles

Students will take a pre- and post-test for foundational principles related to this course and will show learning by an increase of at least double the average score.

Application

Students will complete a class project that involves the use of foundation principles in this course and use this written project for their portfolio.

Landscape Bidding and Estimating

Competitive bidding strategies, quantity takeoffs, bid analyses for landscape construction and maintenance.

PWS 214

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS 103; Math 110 or equivalent.
Taught	Winter

Course Outcomes

Landscape Industry

Understand the different players in the landscape industry and how they interact with each other.

Construction Law

Discuss and understand basic construction law and landscape construction and maintenance contracts.

Estimating

Create and accurately figure estimates for both landscape construction and landscape maintenance projects.

Cost Accounting

Understand cost accounting and cash flow accounting for business.

Measuring Instruments

Be able to use a planimeter and other measuring instruments for estimating purposes.

Principles of Range Management

Overview of rangeland resources and management principles, including rangeland classification, multiple use management, natural resource policy, and grazing management.

PWS 215

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Rangeland Physical Characteristics and Ecology

Describe rangeland physical characteristics, types, physiology, and ecology

Rangelands Stewardship

To understand the principles of stewardship and how they apply to Rangelands

Rangeland Management

To understand the importance of rangeland grazing, how it is managed, and nutrient needs of livestock and wildlife

Multi-use Management

Describe multiple use management and its implications to wildlife and livestock

Research Reading and Writing

To improve reading and writing skills relating to scientific research

Top

Principles of Wildlife and Fisheries Management

Basic principles of fish and wildlife management, their habitats, and their human users. Ecological concepts, population dynamics, nutrition, behavior, population assessment, management strategies, habitat sampling and management.

PWS 225

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	PWS 115.
Taught	Winter

Course Outcomes

Stewardship and Professional Development

Learning Outcome #1: Identify and articulate stewardship for the creation as a basis for professional judgment.
This course not only provides an understanding of tools used by wildlife and fisheries managers to restore, revive, and maintain wildlife and fish populations, but also discusses our stewardship roles and responsibilities for those aspects of the creation.

Wildlife Identification and Function

Learning Outcome #2: Identify wildland plants, soils, and wildlife species and understand how they function in the environment.
This course introduces students to a number of wildlife and fish species, and basic ecological concepts as they relate to wildlife and fisheries. Students will understand the ecological roles, habitat needs, and interactions of fish and wildlife at various levels in an ecosystem

Ecological Processes

Learning Outcome #3: Apply an understanding of ecological processes to wildlife management.
This course includes an extensive overview of basic ecological processes and how to use them for fish and wildlife management.

Analytical Thinking

Learning Outcome #4: Demonstrate the ability to apply the scientific method and analytical thinking to ecological and management issues.
In this course students will be rigorously taught the scientific method and given opportunities to demonstrate the understanding through fish and wildlife management problem solving. They will have writing assignments that provide opportunities for the synthesis and expression of the depth

of their understanding.
The term paper required in this course may be used for one of the “three written papers relating to stewardship ethics and management situations” that will be placed in the student’s portfolio required for graduation with a Wildlife and Wildlands Conservation BS degree.

Animal Husbandry

Introduction to animal husbandry and management techniques for domestic and wild animals.

PWS 270

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Livestock Husbandry and Management

Integrate livestock husbandry and management practices with wildlife management.

Daily Care and Management

Learn important aspects of livestock stewardship through daily care and management.

Livestock Production and Ecological Impact

Understand how livestock production can and will impact wildlife ecology.

Top

Genetics and Reproduction

Principles of inheritance.

PWS 275

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Any general biology course.
Taught	Winter

Course Outcomes

Stewardship and Professional Judgement

Identify and articulate principles of stewardship as a basis for professional judgment.

Genetics and Population Management

Apply knowledge of genetics to conservation and management of natural populations.

Genetics and Natural Resource Management

Provide a foundation in the basic and applied principles of genetics for natural resource management andconservation.

Top

Introduction to Soil Science

Physical, chemical and microbiological properties of soils that affect plant growth in natural, agricultural, and urban environments.

PWS 282

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 283 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Critical Thinking

Enhance critically thinking skills as they apply to soil resource management & conservation

Soil Chemistry, Physics, and Nutrition

Demonstrate a fundamental knowledge of soil chemistry, genesis, microbiology, physics, taxonomy, and nutrient and water relations

Soil Resource Management

Create a conceptual framework to help manage soil resources (i.e., animal habitat, plant nutrient fertility, salinity, soil and water quality, and wind and water erosion) in agricultural, urban, and ecological settings

Current and Historical Soil Issues

Understand the historical and current problems, and cultural concerns facing soils as a natural resource essential to human life

Introduction to Soil Science Laboratory

Laboratory and field techniques in determining soil physical, chemical, and biological properties.

PWS 283

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	PWS 282 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Laboratory Techniques

Apply laboratory techniques to determine problems associated with soil resource conservation and management

Soil Assessment

Understand basic soil assessments related to soil chemistry, physics, biology, and nutrient fertility

Soil Analysis, Classification, and Content

Conduct basic soil methods in nutrient analysis; textural classification; and organic matter, cation exchange capacity, acidity, and alkalinity content

Mentored Laboratory Techniques

Mentored, systematic instruction in basic biotechnology techniques and their application in addressing molecular genetic research questions.

PWS 288

Hours	2.0 Credit, 0.5 Lecture, 1.5 Lab
Prerequisites	CHEM 105
Taught	Fall, Winter, Spring

Course Outcomes

Chemical Reagents

Students can explain purposes of methods and chemical reagents for DNA isolation, amplification, cloning, sequencing, etc.

Laboratory Protocols

Students can perform fundamental laboratory protocols in applied molecular biology

Laboratory Work

Students can accurately document their laboratory work in a written journal (lab notebook)

Key Machinery

Students can demonstrate the roles and basic functions of key machinery used in genomic research

Top

Plant Growth and Reproduction

Scientific principles of plant propagation by seeds, cuttings, budding and grafting, and tissue culture.

PWS 301

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	PWS 100 or equivalent.
Taught	Winter

Course Outcomes

Principles

Students will take a pre- and post-test for foundational principles related to this course and will show learning by an increase of at least double the average score.

Application

Students will complete a class project that involves the use of foundation principles in this course and use this written project for their portfolio.

Soil Conservation and Management

PWS 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.
Recommended	Geol 111.
Taught	Fall

Course Outcomes

Soil Physical Properties

Understand soil physics, chemistry, taxonomy, and water movement to maintain natural resources.

Conservation

Apply soil conservation practices and principles to regions sensitive to soil degradation.

Soil Taxonomy and Classification

Understand the history, development, and terminology associated with USDA Soil Taxonomy and be familiar with other soil taxonomic systems. Recognize soil orders and suborders from the physical and chemical characteristics of the soil

Soils Conservation and Resources

Taxonomy of world soils; conservation and management of agricultural, wildland, wetland, and urban soils.

PWS 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.
Recommended	Geol 111.
Taught	Fall

Course Outcomes

Soil Physical Properties

Understand soil physics, chemistry, taxonomy, and water movement to maintain natural resources.

Conservation

Apply soil conservation practices and principles to regions sensitive to soil degradation.

Soil Taxonomy and Classification

Understand the history, development, and terminology associated with USDA Soil Taxonomy and be familiar with other soil taxonomic systems. Recognize soil orders and suborders from the physical and chemical characteristics of the soil

Top

Conservation and Management

PWS 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.
Taught	Winter

Course Outcomes

Soil-Water-Atmosphere Interactions

Demonstrate a fundamental knowledge in water quality and water resource conservation as influenced by soil-water-atmosphere interactions

Soil and Water

Evaluate case studies in current topics soil and water quality

Critical Thinking Skills

Enhance critically thinking skills as it relates to issues in water quality management and resource conservation

Mathematical and Statistical Skills

Improve mathematical and statistical skills related to nutrient, salinity, sodicity, and toxicity evaluation and management

Soil and Water

PWS 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.
Taught	Winter

Course Outcomes

Soil-Water-Atmosphere Interactions

Demonstrate a fundamental knowledge in water quality and water resource conservation as influenced by soil-water-atmosphere interactions

Soil and Water

Evaluate case studies in current topics soil and water quality

Critical Thinking Skills

Enhance critically thinking skills as it relates to issues in water quality management and resource conservation

Mathematical and Statistical Skills

Improve mathematical and statistical skills related to nutrient, salinity, sodicity, and toxicity evaluation and management

Soils and Water Quality

Principles and practices of safe management of agricultural and urban wastes; amendments and nutrients including remediation methods for conservation of soils and water quality.

PWS 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282 & CHEM 105; or PWS 282 & CHEM 101; PWS 100 or equivalent; Math 110 or equivalent.
Taught	Winter

Course Outcomes

Soil-Water-Atmosphere Interactions

Demonstrate a fundamental knowledge in water quality and water resource conservation as influenced by soil-water-atmosphere interactions

Soil and Water

Evaluate case studies in current topics soil and water quality

Critical Thinking Skills

Enhance critically thinking skills as it relates to issues in water quality management and resource conservation

Mathematical and Statistical Skills

Improve mathematical and statistical skills related to nutrient, salinity, sodicity, and toxicity evaluation and management

Top

Soil and Water Quality Laboratory

Principles of environmental soil and water quality in the context of a case-study watershed. Students will participate in environmental soil and water sampling, laboratory analysis, and data interpretation; synthesizing and creating written and oral reports identifying environmental concerns and proposing solutions.

PWS 306

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Concurrent enrollment in PWS 305.
Taught	Winter

Course Outcomes

Diagnostic Steps

Understand the basic diagnostic steps to test water and soil quality

Investigative Techniques

Gain a fundamental understanding of the investigative techniques necessary to solve problems associated with water and soil resources and management

Statistical Skills

Improve mathematical and statistical skills related to nutrient, salinity, sodicity, and toxicity evaluation and management

Top

Conflict Resolution Management

Modern techniques associated with resolution of conflicts surrounding natural resources.

PWS 315

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Diverse User Groups

Students will be able to recognize that natural resources management requires a balanced review of perspectives of various user and interest groups.

Conflict Resolution

Students will be able to productively engage the conflict resolution process as it relates to natural resource management.

Deepen understanding of conflict resolution methods

Students will become aware of diverse strategies to be employed in resolving conflcts.

Turf Science

Design, installation, and management of agricultural and urban turfgrass systems. Physiological and soil interaction principles of turfgrass management.

PWS 319

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Pass Turfgrass Certification Exam

Students will become compentant enough to pass a mock up of the Turfgrass Certification exam patterned after the industry standard.

Gain Appreciation for Importance of Turfgrass

Students will be given a pre- and post-class attitude survey to access their understanding and appreciation of the importance of turfgrass in terms of aesthetics, environmental quality, and athlete/child safety with a goal of the score doubling (on average) at the end of semester.

Identify Career Possibilities in Turfgrass Science

Students will conduct a research project to the point of having a written manuscript that is in draft form in order to show them the possibility of doing a graduate program. Also, students will write a short paper on how turfgrass science is important in their anticipated field of choice.

Top

Arboriculture

Biology and culture of woody plants for use in urban landscapes.

PWS 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 100 & PWS 282
Recommended	Bio 235.
Taught	Winter

Course Outcomes

biology of woody plants

Understand fundamental concepts dealing with the ecology, biology and culture of woody landscape plants

deep interest

become deeply interested in trees

Top

Wildlife Law Enforcement

Current and historical principles of federal and state wildlife law enforcement, case development, evidence, evaluation, human rights, and testimony.

PWS 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bio 100 or equivalent.
Taught	Winter odd years

Course Outcomes

Familiarity with wildlife laws

Become familiar with significant wildlife laws

Interact with professionals

Interact with professionals in the field

Exposure to process and methods of law enforcement

Gain exposure to the methods and process of wildlife law enforcement

Fisheries and Wetlands Management

Principles of fisheries and wetlands mangement, emphasizing managing fish populations and their diverse micro- and macro-habitats within the context of community and ecosystem dynamics. Case studies and models used to evaluate growth, recruitments, and mortality in age-structured populations in relationship to the dynamics of watershed and wetland landscapes.

PWS 325

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	PWS 225 or equivalent.
Taught	Fall

Course Outcomes

Fishery and Wetlands Management

Learn important aspects of fisheries and wetland management.

Fishery and Wetlands Ecology

Understand ecological aspects of fisheries and wetland systems.

Concept Integration

Integrate concepts taught in class to other ecological systems.

Rangeland Plant Identification and Ecology

Identification, characteristics, phenology, distribution, site adaptation, forage value, and response to management of significant range and pasture plants.

PWS 330

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

North American Range Plant Identification

Students will be able to sight identify many common range plants of North America

Grass Identification

Students will be able to use a grass key to identify unknown grasses

Poisonous Plants and Consumption Symptoms

Students will be able to pair symptoms of sick animals with poisonous plants that may have been consumed

Science of Plant Pest Control

Management of plant health problems, namely weed, insect, and disease, through integrated pest management and proper pesticide management and safety.

PWS 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Critical Thinking

Enhance critical thinking skills.

Pest Management

Develop a framework for decision-making and implementation in applied pest management and ecology.

Pest Management

Recommend control options for plant pest management.

Pesticides

Safely and accurately apply plant pesticides in urban and agricultural environments.

Plant Pest Control

Identify various plant pest control measures.

Communication

Improve communication and interpersonal skills.

Top

Comparative Animal Nutrition

Comparative digestion, absorption, and utilization of nutrients and nutritional applications of domestic, pet, and wildlife species.

PWS 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Digestive systems in animals

Demonstrate an understanding of the diverse digestive systems in the animal kingdom.

Nutrient requirements

Demonstrate an understanding how changes in digestive systems affect both nutrient requirements and affect feeding types and systems.

Cellular metabolism

Apply the roles of nutrients in cellular metabolism.

Nutrient deficiencies and function

Explain how nutrient deficiencies affect body function and performance.

Feed formulation

Demonstrate knowledge of animal feed formulation.

Genetics

Genetic mechanisms, their fundamental nature, interactions, and applications to human affairs. Genetics in quantitative terms. Extensive practice in problem solving.

PWS 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240; or CHEM 481M; or CHEM 481
Taught	Fall, Winter

Course Outcomes

Linkage Maps

Students can construct two- and three-point linkage maps.

Gene Annotation

Students can display fluency in interpreting gene annotation and nomenclature in GenBank records.

Data Set Analysis

Students can demonstrate ability to analyze and apply Chi-square goodness-of-fit tests to complex genetic
data sets involving segregation and Hardy-Weinberg equilibrium models.

Inheritance Patterns

Students can identify differences between extranuclear, autosomal and sex-linked inheritance patterns.

Evolutionary Phylogenies

Students can use genetic data (DNA or amino acid sequence) to reconstruct basic evolutionary phylogenies.

Variance Components

Students can dissect quantitative traits into environmental and genetic variance components.

Natural History of Wildlife

Wildlife species and their habitats, including ecology, life histories, adaptations, behavior, genetics and population viability variables, and the ethics of global stewardship. Field trips required.

PWS 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	PWS 225 or equivalent.
Taught	Fall

Course Outcomes

Ecology Problem Solving

In this course, students will be rigorously taught the scientific method and given opportunities to demonstrate the understanding through wildlife ecology problem solving. They will have writing assignments that provide opportunities for the synthesis and expression of the depth of their understanding.

Wildlife and Fisheries

This course introduces students to a number of wildlife and fish species, and basic ecological concepts as they relate to wildlife and fisheries. Students will understand the biology, ecological roles, habitat needs, ecological adaptations, and interactions of fish and wildlife at various levels in an ecosystem.

Natural History Fundementals

Be able to define “natural history” and be able to describe basic concepts and principles that comprise the natural history of an organism

Lifestyle Diversity in Vertebrates

Gain an appreciation for the diversity of lifestyles among vertebrates

Critical Reading and Thinking

Develop critical reading and thinking skills

Effective Communication

Improve oral and written communication skills

Air Quality and Pollution

Origin, effects, ecology, and management of major atmospheric pollutants - current topics in air quality, methods for quantifying pollutants and assessing air quality, and policy and management principles governing air as a natural resource.

PWS 345

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Fundamental Knowledge

Demonstrate a fundamental knowledge of air pollution and the impacts of pollution on humans and the environment

Historical Contexts

Understand the historical context and current problems facing air quality locally, regionally, and globally

Air Quality Management

Conduct and complete basic air quality measurements, site assessments, and statistics associated with air quality management

Regulatory Standards

Demonstrate a basic understanding of the regulatory standards and policies established to maintain acceptable air quality

Air Quality Stewardship

Foster and promote air quality stewardship within you and your community

Top

Rangeland Ecology

Distribution and abundance of organisms and their interactions with the physical and biotic components of the earth emphasizing rangeland ecosystems.

PWS 350

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PWS 150 or Bio 100 or Bio 130 or PDBio 120.
Taught	Fall

Course Outcomes

Ecology and Biodiversity

Demonstrate a fundamental knowledge of ecological principles and the multiple dimensions of biodiversity.

Soil, Water, and Air Ecology

Possess a working knowledge of the ecology relating to soil, water, and air conservation.

Global and Geologic Processes

Understand how global and geologic processes affect life on earth.

Ecology and Interdisciplinary Connectivity

See the connectivity and relevance of ecology to other fields of study.

Ecology and Human Well-Being

Understand the importance of ecology to issues regarding human well-being.

Top

Rangeland Vegetation Measurements and Analysis

Field methodologies for vegetation inventories and analysis (density, biomass, cover, frequency, utilization, etc.) in wildland settings.

PWS 355

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Vegetation Data Collection Techniques

Students will be able to apply vegetation data collection techniques to quantify vegetation and make interpretations used in resource management decisions.

Lab Exercises and Write-ups

Students will be able to demonstrate, through lab exercises and write-ups, an understanding of ecological processes that drive secondary succession in wildland ecosystems which in turn impact management decisions.

Top

Techniques for Wildlife Investigations and Management

Investigatiion and management of fish and wildlife populations. Methods for population assessment, capture, handling, marking, radio-telemetry, behavioral studies, and human disturbance. Lab is required.

PWS 357

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	PWS 350, 355.
Taught	Fall

Course Outcomes

Wildlife Investigation and Management Methodologies

The purpose of this course is to introduce students to a variety of methods used by wildlife biologists for the investigation and management of wildlife. Course content prepares students to observe wildlife, research wildlife literature, to rigorously apply the scientific method for problem solving, to evaluate data objectively, and to communicate research results effectively. This course is built upon principles of biodiversity, ecology, population dynamics, habitat, and conservation.

Environmental Microbiology and Biogeochemistry

Exploring methods for detection, enumeration, and identification of microorganisms in aquatic and terrestrial environments; bioremediation of organic and metal pollutants; ecology of specific microorganisms essential to nutrient cycling; and spread of water and foodborne pathogens in urban environments; and the techniques associated with the detection, enumeration, and identification of microorganisms in environmental samples.

PWS 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 101 & PWS 305; or CHEM 105 & PWS 305
Recommended	PDBio 120; PWS 150.
Taught	Fall

Course Outcomes

Fundamentals of environmental microbiology

Demonstrate a fundamental knowledge of the environmental microbiology surrounding soil, water, and air conservation, quality, and pollution

Biogeochemistry and bioremediation

Understand the basic chemistry, biochemistry, and physics associated with the bioremediation, nutrient cycling, and pathogenesis

Environmental Stewardship

Foster and promote environmental stewardship within yourself and your community

Written and oral communication

Write and orally communicate more effectively and concisely

Environmental Microbiology and Biogeochemistry Laboratory

Field, laboratory, and statistical techniques investigating the detection, enumeration, and identification of microorganisms via microscopic and cultural assays; microbial transformations, biogeochemistry, and responses to pollutants; and statistical methods to understand microbial activity and biogeochemical processes in soils and waters.

PWS 366

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	CHEM 101 & PWS 305; or CHEM 105 & PWS 305
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Science of Plant Production

Scientific principles of crop production related to agronomic and horticultural plants, including relationship of management principles and physiological processes in plants.

PWS 369

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	PWS 100, 282; or equivalents.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Plant production fundamentals

Gain a deeper understanding of science of plant production.

Application of plant production strategies

Students will improve their ability to tailor plant production strategies for specific environmental conditions.

Environmental Policies and Laws

Inception, current state, and future directions of seminal environmental policies and laws established in the US to improve environmental quality. Application of policies and laws in resource conservation and management, including a National Environmental Policy Act certification program.

PWS 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Environmental Policy and Law Development

Demonstrate a fundamental understanding of the inception, current state, and future needs of the five seminal developments in environmental policy and law (i.e., Clean Air Act; Clean Water Act; National Environmental Policy Act; Comprehensive Environmental Response, Compensation, and Liability Act or Superfund; and the Endangered Species Act)

Policy Analysis Framework

Create your own conceptual framework for analyzing policy change in the United States and abroad, and understand the role of government, society, and economics in shaping this framework

Institutional Policy Development

Understand the formal institutional setting in which policy is developed, the major participants involved, and the role of science in shaping policy

Law and Environmental Interaction

Gain a basic understanding of how environmental laws (e.g., statutes, cases, and common laws) operate to regulate our interaction with the environment and one another

Effective Writing

Write more effectively and concisely

Top

Plant Community Design

Design and ecology of thematic plant communities.

PWS 380

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS 103 & PWS 105 & BIO 235
Taught	Fall

Course Outcomes

Advanced Design

Design a variety of landscapes and gardens with different contextual variables.

Plant Selection

Select plants, appropriate for a given design, based on correct horticultural and ecological knowledge (plant justification)

Faster

Design better, design faster

Critique

Further develop critiquing skills

Portfolio

Prepare a landscape design portfolio for client interviews or graduate school applications.

Top

Soil and Plant Analysis

PWS 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Specialized Instruction

Students will gain knowledge from specialized instruction in focused area
Foster activity in clubs related to majors in PWS department.
Learn principles of leadership in volunteer organizations.

Top

Special Topics in Plant and Wildlife Sciences

Current topics in plant and wildlife sciences.

PWS 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Specialized instruction

Students will gain knowledge from specialized instruction in focused area
Foster activity in clubs related to majors in PWS department.
Learn principles of leadership in volunteer organizations.

Soils and Water in the Urban Environment

Principles of water management, soil physics, and soil fertility used in a problem-solving environment addressing current challenges in managing soils and water in the urban landscape.

PWS 402

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PWS 100 & PWS 282 & PWS 283
Taught	Winter

Course Outcomes

Complete Five Case Studies

Students will apply concepts assimilated in previous courses to solve problems associated with at least five real world case studies. By assignment, eachwill develop an assessment matrix for use in problem solving situations encountered in their future careers.

Competency in Soil and Water Management Principles in the Ur

A primary goal of this course is for students to greatly increase their knowledge base of scientific principles related to plant, water, soil, nutrient, and pest management. This will be assessed by examination at beginning and end of semester with a target of at least doubling of average scores.

Develop Oral and Written Communication Skills

Students will successfully writeseveral documents, including a research paper and diagnostic key at an upperclassmen level of writing. Students will actively participate in team problem solving and a Group presentation.

Portfolio Development

Students will develop at least one individual and group item to add to their portfolio. Development of a diagnostic key, writing an evaluation paper, development of a group presentation and completion of a semester project could each contribute to portfolios.

Top

Environmental Chemistry Lab 1

Soil, water, biosolid, and biotic tissue sample preparation and analysis using chromatography, combustion, and spectroscopy.

PWS 405

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Chem 105, 106, 107; or equivalent.
Recommended	Chem 223; PWS 283, 306.
Taught	Fall

Course Outcomes

Chemistry knowledge

Gain a deeper understanding of environmental chemistry.

Analytical chemistry

Demonstrate the analytical knowledge in environmental chemistry.

Application of analytical chemistry tools

Students will demonstrate an ability to select the most appropriate analytical tools for gathering data necessary for solving specific environmental problems.

Top

Environmental Chemistry Lab 2

Soil, water, biosolid, and biotic tissue sample preparation and analysis using ICP-AES and AAS instrumentation.

PWS 406

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Chem 105, 106, 107; or equivalent.
Recommended	Chem 223; PWS 283, 306.
Taught	Winter

Course Outcomes

Environmental chemistry

Gain a deeper understanding of environmental chemistry.

Analytical chemistry

Demonstrate an analytical knowledge in environmental chemistry.

Application of analytical techniques

Students will demonstrate an ability to select the most appropriate analytical tools for gathering data necessary to solve specific environmental problems.

Top

Watershed Management

Processes and management of the hydrologic cycle of forests and rangelands.

PWS 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BIO 350; or PWS 350
Taught	Winter even years

Course Outcomes

Ecological and Hydrological Processes

Students will understand ecological and hydrological processes and concepts and apply them to watershed management actions such as harvesting, grazing, and restoration.

Water Management History and Policy

Students will understand the history and policy that drives water management in the western US.

Watershed Assessment and Classification

Students will be able to apply assessment and classification tools to watersheds and their components to determine how management actions affect hydrologic responses.

Top

Rangeland Vegetation Improvement

Habitat improvement for domestic and wild animals. Plant control by mechanical equipment, herbicides, and prescribed fire. Restoration of disturbed lands.

PWS 416

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	PWS 330, 350.
Note	Field trips required.
Taught	Fall

Course Outcomes

Rangeland Vegetation History

Apply the historical and successional history of land to current rangeland vegetation conditions and treatments

Land Management Goals and Planning Methods

Describe and plan biological, chemical, mechanical methods, and fire to achieve land management goals.

Site Potential and Fuels

Assess site potential and fuels relative to potential vegetation changes with and without management.

Revegetation, Rehabilitation, and Restoration

Apply and plan revegetation, fire rehabilitation, and restoration practices to rangelands.

Plant Control, Revegetation, and Restoration Practices

Integrate plant control, revegetation and other restoration practices to meet land management goals

Rangeland Vegetation Improvement

Become familiar with approaches, practices, and outcomes of rangeland vegetation improvements in actual field situations.

Top

Rangeland Planning and GIS

Development of a multiple-use natural resource plan for watershed forestry, recreation, wildlife, and livestock. Policies that govern planning and conflict resolution.

PWS 417

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	PWS 215, 225, 350.
Taught	Winter

Course Outcomes

Stewardship and Professional Judgement

Identify and articulate stewardship for the creation as a basis for professional judgment.

Ecological Processes

Apply an understanding of ecological processes to wildland management

Analytical Thinking

Demonstrate ability to apply the scientific method and analytical thinking to ecological and management issues.

Forest Management and Ecology

Managing forests, emphasizing ecosystem managment.

PWS 419

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Field trips required.
Taught	Fall

Course Outcomes

Stewardship

1. Articulate their role as stewards over forested environments.

Global Forest Diversity

2. Appreciate the diversity of forests world-wide and their importance to human populations.

Management Decisions

3. Apply knowledge of forest structure, function, and process in making management decisions

Forest Structure

4. Be able to quantify forest structure and production

Pest and Disease Control

5. Recognize forest pests and diseases and know appropriate control techniques.

Wildlife Habitat

6. Relate forests to wildlife habitat

Tree Species

7. Identify 75 tree species located in Utah and on BYU campus.

Plant Health Diagnostics

Diagnosing plant health problems; pest biology and identification (weed, insect, and disease).

PWS 431

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Critical Thinking Skills

Enhance critical thinking skills.

Plant Health

Diagnose and manage plant health in horticulture.

Plant Pesticides

Safely and accurately apply plant pesticides through integrated pest management.

Weeds and Insects

Be able to identify weeds, insects and diseases that affect plants

Problem Solving Skills

Develop problem solving skills

Communication

Improve communication and interpersonal skills

Top

Plant Physiology

Photosynthesis, respiration, water relations, mineral nutrition, growth of flowering plants.

PWS 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GE Biological Science requirement; college chemistry
Recommended	Chem 285; or 351, 352.
Taught	Winter

Course Outcomes

Plant function

Students will be fluent in understanding plant function at the molecular, biochemical and whole plant levels

Links between plant and ecosystem function

Students will understand the connections between plant function and ecosystem processes

Critical analysis and independent thinking

Student will practice applying the scientific method in order to develop critical thinking and problem solving skills

Communication

Student will engage in learning activities that increase there writing and speaking proficiency

Top

(PWS-Bio) Ornithology

Avian systematics, evolution, distribution, identification, and natural history.

PWS 446

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Bio 100 or Bio 130 or PDBio 120 or PWS 100 or equivalent or instructor's consent.
Note	One three-day field trip required.
Taught	Winter

Course Outcomes

Ornithology

Define ornithology and what it encompasses.

Global Diversity

Discuss the global diversity of birds in both form and function

Bird Evolution

Articulate the current thinking regarding the evolution of birds.

North American Birds

Identify 200 birds common to western North America.

(PWS-Bio-MMBio) Genomics

Current analysis of genes and genomes; computational and statistical approaches for analyzing genomic data, including genome sequencing and annotation, gene expression and the transcriptome, proteomics and functional genomics, and genetic variation and SNPs.

PWS 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & PWS 340
Taught	Fall, Winter

Course Outcomes

Genomic Experiments

Students will complete a series of exercises with data representing genomic experiments (analysis and interpret).

Genome Sequences

Students will describe how genomes are sequenced.

Genomic Features

Students will understand techniques and concepts to assess genomic features such as methylation, gene expression, etc.

Metagenomics

Introduction to comparative and fuctional analysis of genomic and metagenomic datasets, including microbial functions that affect host health. Analyzing existing and novel datasets with field-standard techniques.

PWS 469

Hours	2.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	MMBIO 240 & PWS 340 & BIO 165
Recommended	PWS 468.
Taught	Winter

Course Outcomes

Application of a broad knowledge base in genome biology

Students can apply basic concepts in genetics, molecular biology, and bioinformatics in solving metagenomics problems.

Deep knowledge skills in metagenomics

Students will demonstrate expanded understanding of metagenomic and comparative genomic theories and techniques.

Laboratory skills in metagenomics

Students can predict metagenomic content from samples, and compare genomic and metagenomic content across samples.

Computational research management skills

Students can assemble and annotate genomes, including targeted shotgun metagenomes.

Literature analysis and writing skills

Students can analyze, interpret, and present methodology and results of their own creation in the format of primary literature.

Case Studies, Landscape Management Systems

Understanding and demonstrating competency with business systems used in landscape contracting companies.

PWS 481

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Readings in Biotechnology

Capstone course for the genetics and biotechnology major focusing on scientific literature relating to the biotechnological improvement of plants, animals, and microbes.

PWS 488

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 340 & PDBIO 360
Recommended	PWS 440 or PDBio 362.
Note	Course should be taken the last year before graduation.
Taught	Winter

Course Outcomes

Experimental Approaches

1. Students can describe a variety of techniques and experimental approaches used by biotechnologists to improve plants, animals, microbes and human health.

Oral Presentation

1. Students can deliver an oral presentation summarizing a scientific paper related to the field of biotechnology.

Written Review

1. Students can produce a written review synthesizing scientific findings related to recent biotechnological advances.

Top

Case Studies

Contemporary agricultural and environmental problems using decision case studies dealing with environmental technology issues and analysis.

PWS 490

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	PWS 282
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Undergraduate Seminar

Current information in the plant and wildlife sciences.

PWS 491R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Research and the Gospel

Explain the importance of cross-discipline research for comprehensive scholarship and the importance of Gospel-centered stewardship and sustainability.

Vocabulary and Techniques

Display fluency in the vocabulary and current research techniques in the four focal areas of the PWS Department: environmental science; genetics and biotechnology; landscape management; and wildlife and wildlands conservation

Wildlife and Wildlands Conservation Senior Seminar

Capstone course bringing together portfolios, student experiences, exams, and exercises necessary for completing and assessing wildlife and wildlands program learning outcomes.

PWS 492

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Career Preparation

Students will understand how to take the next step toward permanent employment or post-graduate training.

Competency Exams

Students will pass plant, mammal, and bird ID competency exams as well as a comprehensive discipline exam.

Portfolio

Students will build a professional portfolio that will demonstrate their specific training, experience, skills and abilities relative to Wildlife and Wildlands Conservation.

Analytical Techniques in Plant Biology

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Analytical Techniques in Soil Science

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Animal Cytogenetics Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Animal Genetics and Breeding Techniques

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Animal Reproductive Research Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Biotechnology Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Environmental Science Computation Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Environmental Science Field Techniques

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Environmental Science Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Field Techniques in Environmental Soil Research

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Mentored Learning Experience

Topics vary.

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Registration required for mentored experiences.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

- Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Molecular Genetics and Gene Mapping Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant and Animal Genomics Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant and Soil Science Field Techniques

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant Breeding Field Techniques

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant Cell Biology Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant Cytogenetics Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Plant ID / URME Team

Topics vary.

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Registration required for mentored experiences.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Basic Experiments

Design and/or participate in basic experiments attempting to answer questions in biochemistry, biotechnology, genetics, molecular biology, and soil science

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Plant Physiology Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Plant Tissue Culture and Transformation Techniques

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Soil and Water Chemistry Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Soil Microbiology Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Soil Physical Properties Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Top

Soil, Plant, and Water Science Laboratory

PWS 494R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentoring

Learn how to be an effective and efficient mentor

Experimental Results

Generate and analyze experimental results for publications or presentations at professional meetings

Ecosystem Ecology

Theory and application of nutrient cycling, trophic dynamics, disturbance, and spatiotemporal patterns in terrestrial and acquatic ecosystems - methods in ecological research (e.g., field and analytical chemistry techniques, isotope geochemistry, molecular methods, and ecosystem simulation modeling).

PWS 505

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bio 350 or equivalent.
Taught	Winter odd years

Course Outcomes

Biogeochemical cycling

Understand the fundamentals of biogeochemical cycling in soils, air, and water

Primary producer contributions

Understand the contributions of primary producers form and function in C, N, S, and N cycling

Decomposer contributions

Understand the contribution of decomposers and lithoautotrophs to C, N, P, and S cycling

Univariate and multivariate statistics

Possess a working knowledge of the univariate and multivariate statistics used in ecosystem ecology

Spiritual aspects of ecosystem unity

Students will gain a greater appreciation for the aesthetic beauty of the nutrient cycling systems in nature as expressions of God's handiwork.

Environmental Biophysics: Soil and Plant Water Relations

Integrating biological, physical, and chemical processes of water and solute movements through the soil-plant-atmosphere continuum.

PWS 511

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Phscs 105 and PWS 282; or equivalents.
Taught	Fall odd years

Course Outcomes

Develop Base Understanding of Biophysics

Students will take a pre- and post-semester exam and at least double their score to assess understanding of the importance of physics in biological systems.

Top

Rangeland Landscape Ecology and Geographic Information Systems

Applying landscape ecology theory to evaluate, describe, and predict spatial patterns and processes within rangeland ecosystems using geographic information systems (GIS), remote sensing, and global positioning systems (GPS).

PWS 512

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	PWS 215, Geog 212.
Taught	Fall odd years

Course Outcomes

Landscape Ecology Theory

Students will be able to apply landscape ecology theory to evaluate, describe, and predict spatial patterns and processes in wildlife ecosystems. This will be furthered by synthesis of the literature and current theory.

Environmental Field Instrumentation

Hands-on course and lab teaching students how to use instrumentation in the field and in controlled settings to measure key environmental parameters. Learning the physical principles underlying sensors.

PWS 513

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Phscs 105 and PWS 282; or equivalents.
Taught	Fall

Course Outcomes

Field instrumentation

Gain a deeper understanding of field instrumentation.

Field applications of instrumentation

Students will acquire fluency in their ability to select and use appropriate instrumentation to gather precise data under varying environmental conditions.

Top

Soil Microbiology

Ecology and role of soil microorganisms in biogeochemical cycles, decomposition of organic matter and waste materials, and bioremediation of contaminated soils and water.

PWS 514

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Chem 105 and 106; or equivalents.
Taught	Winter odd years

Course Outcomes

Soil microbiology fundamentals

Ecology and role of soil microorganisms in nutrient cycling, decomposition of organic matter and waste materials, and degradation of agricultural chemicals in soils

Top

Saline and Sodic Soils

Physical and chemical properties of saline and sodic soils and irrigation waters--their diagnosis, reclamation, and management for sustainable crop production.

PWS 520

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PWS 305, Chem 105, 106, 107; or equivalents.
Taught	Fall even years

Course Outcomes

Saline and sodic soil fundamentals

Physical and chemical properties of saline and sodic soils and irrigation waters-their diagnosis, reclamation, and management for sustainable crop production

water and soil interaction

Demonstrate a fundamental knowledge in water quality and water resource conservation as influenced by soil water interactions

Critical Thinking Skills

Enhance critically thinking skills as it relates to issues in water quality management and soil conservation

Mathematical and Statistical Skills

Improve mathematical and statistical skills related to salinity, sodicity, and toxicity evaluation and management

Plant Response to the Environment

Advanced plant physiological ecology principles.

PWS 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 440 or equivalent; PWS 494R or concurrent enrollment.
Taught	Fall even years

Course Outcomes

Plant physiology fundamentals

1) Advanced Topics in Plant Metabolism, 2) Developmental Plant Metabolism, and 3) Advance Topics in Crop Physiology.

Scientifc method

Students will learn to apply the scientific method in order to become more proficient and independent learners

Plant-environment interactions

Students will be able to conceptualize the physiological mechanisms by which plants sense and respond to their environment and how that impacts ecological systems.

Communication

Students will participate in learning exercises that teaches them how to gather, interpret and communicate scientific information.

Instrumentation

Students will be exposed to the instrumentation and techniques commonly used to gather data in the field of plant physiological ecology.

Ungulate Conservation and Management

Integrating principles of natural history, population ecology, behavior, and conservation biology of North American ungulates. Special emphasis on management and conservation applications.

PWS 547

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	PWS or Bio 350; and Bio 447; or equivalents.
Taught	Winter even years

Course Outcomes

Ecology

Will understand and be able to articulate current understanding concerning the role of ungulates in ecosystems

Critical thinking

students will develop the ability to critically think by reviewing and evaluating scientific articles or book chapters that examine ungulate ecology

Presentation skills

Students will develop presentation skills

Quantitative Ecology

Quantitative methods for ecological sampling and data analysis.

PWS 551

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Bio 350 or equivalent; Stat 121 or 511 or concurrent enrollment.
Taught	Winter even years

Course Outcomes

Sampling and Analysis

Learn how and when to use appropriate sampling and a data analysis techniques for ecological inquiry.

Research Application

Demonstrate application of the scientific and analytical methods in ecological research.

Research Project

Demonstrate ability to synthesize literature relevant to a research project.

Effective Communication

Demonstrate oral and written scientific communications skills.

Top

Terrestrial Ecosystems

Theory and application of plant and animal distribution in terrestrial environments.

PWS 552

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Terrestrial field instrumentation

Gain a deeper understanding of terrestrial field instrumentation

Terrestrial fundamentals

Improve their ability to solve contremporary environmental problems using fundamental terrestrial ecosystems.

Ecosystem knowledge

Demonstarte knowledge in the form and function of terrestrial ecosystems

Spiritual appreciation of terrestrial ecosystems

Students will acquire increased appreciation for natural expressions of Divine intelligence in the interconnectivity of terrestrial ecosystems.

Top

Restoration Ecology

Nature of ecosystem disturbance and plant succession; developing science and practice of ecological restoration; case studies of applied restoration.

PWS 553

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 282, 416; Bio 350; or equivalents.
Taught	Winter odd years

Course Outcomes

Ecology Applications

Students will understand the applications of plant population ecology, ecophysiology, and community ecology to restoration ecology.

Plant Succession

Students will understand the processes of plant succession as the foundation for restoration ecology.

Practical Application

Students will be able to apply restoration ecology and techniques to practical problems such mined and other drastically-disturbed lands, disturbed terrestrial and riparian or wetland systems, and invasive species concerns

Top

Wildlife Behavioral Ecology

Integrating principles of ethology, sociobiology, and behavioral ecology using examples from wildlife resources; behavioral sampling methods.

PWS 554

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bio 100, 350; or equivalents.
Note	Field trips required.
Taught	Winter odd years

Course Outcomes

Basic Principles

Students will become familiar with the basic principles of animal behavior including:

1. An introduction to the basic principles of animal behavior
2. A review of natural selection and its role in shaping animal behavior
3. A study of proximate factors which influence behavior
4. The role of learning
5. Cooperation
6. Foraging
7. Antipredator behavior
8. Communication
9. Habitat selection, territoriality, and migration
10. Aggression
11. Play
12. Aging and disease
13. Animal personalities

Molecular Plant Breeding

Molecular genetics methods applied to improvement of economically important plants. Theory and methods of plant transformations.

PWS 559

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 265, 340, 485, 586, PDBio 360; or equivalents; PWS 494R or concurrent enrollment.
Taught	Fall odd years

Course Outcomes

Marker Systems

Discuss with proficiency the pros and cons of a minimum of seven different marker systems. Examples of these systems include RFLPs, RAPDs, AFLPs, SSRs, and SNPs

Genetic Molecular Markers

Outline the history and uses of genetic molecular markers

Lead Discussions

Lead classroom discussions using current scientific literature as the basis for the discussion

Manuscript for Journal

Prepare a manuscript for submission to a refereed scientific journal

Scientific Journals

Explain scientific ethics, etiquette, and the underpinnings as to why it is important to publish scientific journals

Academic & Industry-Based Science

Discuss the differences between academic and industry-based science

Top

Soil and Plant Analysis

Laboratory chemical analysis of soils and plant materials in soil and plant research.

PWS 560

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Chem 105, 106, 107; or equivalent.
Recommended	Chem 223 and/or PWS 283, 306, 405, 406
Taught	Fall odd years

Course Outcomes

Advanced soil techniques

Laboratory chemical analysis of soils and plant materials in soil and plant research

analytical procedures

Understand processes of analytical procedures used in soil and plant analysis

instrumentation

Understand and operate instrumentation used in common soil and plant analysis

intrepreting data

Intrepret data and provide recommendations based on analysis of soil and plant material.

Plant Pathology

Concepts associated with symptoms, development, control, and classification of plant diseases. Identification and classification of plant fungi, bacteria, and viruses.

PWS 575

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	PWS 100 or equivalent.
Taught	Fall odd years

Course Outcomes

Major Plant Diseases

Identify major diseases that affect plants

Plant Problems

Diagnose and treat plant problems

Fungi & Bacteria

Culture and identify fungi and bacteria

Problem Solving Skills

Employ problem solving skills, including enhanced ability to critically think and reason

Communication & Interpersonal Skills

Display enhanced communication and interpersonal skills, including writing

Plant Cell Biology

Molecular aspects of the structural and functional characteristics of plant cells, emphasizing characteristics of plant cells setting them apart from animal cells.

PWS 586

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBio 360, PWS 340, 440; or equivalents.
Taught	Fall even years

Course Outcomes

Published Research

Read and explicate published research in plant cell biology

Plant Cells

Explain unique aspects of plant cell structure and function

Communicate in Writing

Write coherently on topics related to plant cell biology

Communicate Orally

Deliver an oral presentation of a topic related to plant cell biology

Top

Advanced Topics in the Plant and Wildlife Sciences

PWS 598R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Give students a specific topic to increase their understanding of the scientific method as it relates to focused research objectives.

Top

Introduction to Outdoor Recreation Activities

Participation in a variety of outdoor activities.

RECM 123

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Academic Internship: Practicum

Internship or cooperative education experience evaluated by supervisor and posted on student's transcript

RECM 199R

Hours	0.5 - 3.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

RecM 199R

Students will make a significant contribution (at least 50 hours) working with a nonprofit organization

Top

Basic Backpacking

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in basic backpacking skills.

Demonstrate Environmental Ethics

Demonstrate awareness of environmental ethics applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Camping Skills

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understand Camp Cooking Principles

Students will learn about camp cooking equipment, supplies, cooking with charcoal, cleaning Dutch Ovens, and the logistics of cooking for large camp groups as they attend class meetings and access the class blog.

Develop Camp Cooking Skills

Students will become proficient at camp cooking as they prepare 8 different Dutch Oven and backpacking dishes in and out of class.

Demonstrate Camp Cooking Expertise

Students will demonstrate expertise as they post new recipes to the class blog, participate in a final Dutch oven cook-off, and successfully complete a final exam.

Family Outdoor Recreation

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in family outdoor recreation skills.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Fly Fishing

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in fly fishing skills.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Hiking and Survival

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in hiking and survival skills.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Top

Mountain Biking

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in mountain biking skills.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Outdoor Skills Leadership

In-depth approach to leadership skills in selected outdoor specialty areas, including camping, hiking and survival, basic backpacking, winter camping, mountain biking, fly-fishing, sailing, river recreation, rock climbing, family outdoor recreation, and outdoor therapeutic recreation skills.

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in outdoor skills leadership.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Top

River Recreation

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Develop Love of River Recreation

Develop skills and experiences that promote a love of river recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice river recreation skills essential to safe and enjoyable outdoor activity.

Demonstrate Knowledge

Demonstrate knowledge of appropriate river recreation safety and rescue protocols.

Understand River Mechanics

Show knowledge and understanding of river recreation mechanics.

Complete River Excursions

Successfully complete 3 river excursions reported through a detailed river log.

Demonstrate Proficiency

Demonstrate proficiency in river recreation skills.

Consider River Joy

Consider the joys of the river through the eyes of another author.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to river recreation.

Internalize Commitment

Internalize a commitment to rivers through a service-learning activity.

Rock Climbing

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in rock climbing skills.

Demonstrate Environmental Ethic

Demonstrate awareness of an environmental ethic applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Sailing

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in sailing skills.

Demonstrate Environmental Ethics

Demonstrate awareness of environmental ethics applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Ski Instructor

In-depth approach to leadership skills in selected outdoor specialty areas, including camping, hiking and survival, basic backpacking, winter camping, mountain biking, fly-fishing, sailing, river recreation, rock climbing, family outdoor recreation, and outdoor therapeutic recreation skills.

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Winter, Summer

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in ski instruction skills.

Demonstrate Environmental Ethics

Demonstrate awareness of environmental ethics applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Wilderness Trek

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in wilderness skills.

Demonstrate Environmental Ethics

Demonstrate awareness of environmental ethics applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Winter Camping

RECM 223R

Hours	2.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Demonstrate Proficiency

Demonstrate proficiency in winter camping skills.

Demonstrate Environmental Ethics

Demonstrate awareness of environmental ethics applicable to recreation.

Understand Mechanics

Show knowledge and understanding of recreation mechanics.

Demonstrate Knowledge

Demonstrate knowledge of appropriate recreation safety and rescue protocols.

Develop Love of Recreation

Develop skills and experiences that promote a love of recreation resulting in a lifetime of enjoyment, wellness, and an appreciation of God's creation.

Practice Skills

Practice recreation skills essential to safe and enjoyable outdoor activity.

Top

Creating a Good Life through Recreation

Considering foundational recreation concepts and contemporary issues. Exploring professional opportunities in recreation.

RECM 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Family Recreation

Exploring the role of family recreation in building successful families.

RECM 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Introduction to Nonprofit Organizations

Leading in nonprofit organizations using effective administrative practices; financial issues; history and development of nonprofits; organizational structure; membership requirements, fund raising, and marketing.

RECM 306

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

RecM 306 - Introduction to Nonprofit Organizations

RecM 306 Students completing this course will be able to:
• Apply personal integrity through written work and honestly complete course assignments
• Apply excellence in oral and written communication and in applying current technology
• Understand the organizational structure of nonprofit organizations
• Evaluate the methodology and delivery systems of nonprofit organizations

Top

Nonprofit Resource Development

Understanding philanthropy and applying fundraising principles and techniques in a nonprofit organization.

RECM 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

RecM 326 - Nonprofit Resource Development

RecM 326
Students completing this course will be able to:

- Understand basic financial principles and skills used in modern nonprofit organizations.
- Understand and interpret the 990 and 1023 nonprofit tax forms.
- Become familiar with philanthropy
- Apply fundraising principles and techniques in a nonprofit organization.
- Recognize emerging trends and innovations in financial resources development in nonprofit organizations.

Top

Hospitality Management

Introducing hospitality management; integrating with venue and experience management; considering foundational principles, best professional practices; exploring professional opportunities.

RECM 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Understanding foundational principles in hospitality management

Demonstrate an understanding of core principles and concepts in hospitality management

Best practices in hospitality management

Demonstrate a working knowledge of best practices in the field--including hotel, resort, and food and beverage management.

Professional opportunities in hospitality management

Understand the current professional landscape in this industry--career paths, essential skills, social networks, etc.

Top

Nonprofit Management

Management practices in nonprofit setting; analyzing and evaluating personnel; measuring performance evaluations; articulating and appreciating volunteer motivations.

RECM 336

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Youth Development

Basic youth development and leadership theories applied to understanding adolescents' behavior, programming healthy developmental activities, and providing meaningful learning experiences through recreation.

RECM 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Foundations and Career Development

Overview of theories, philosophies, and rationale that guide programming in recreation, experience industry, and venue management in the past and currently. Also, an overview of career possibilities and career development planning for future employment in the field of recreation and the experience industries.

RECM 404

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	FIN 201 & BUS M 241 & RECM 300; or BUS M 201 & BUS M 241 & RECM 300
Note	Students taking this course to satisfy the Nonprofit Management minor requirement do not need to complete the prerequisites.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Commercial Recreation

Entrepreneurial strategies; economic concepts applied to commercial recreation; steps of feasibility study and operations management.

RECM 405

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For junior and senior students.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

NA: Course discontinued

This course has not been offered for the past three years and will not be offered in the future. A new course, Rec M 490, will take its place.

Top

Events and Experience Management

Equipping students with a variety of program planning methods and skills, emphasizing designing and implementing recreation programs and experiences; the fundamental concepts of event planning.

RECM 420

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	BUS M 201 & BUS M 241 & RECM 300; or FIN 201 & BUS M 241 & RECM 300
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Experiential and Outdoor Education

Utilizing experiential and outdoor education practices to facilitate outcome-based programs for diverse populations.

RECM 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Taught	Winter

Course Outcomes

Theories of experiential education

Accurately and effectively describe and assess the major theories applied to experiential education.

Reflective learning

Draft a document describing and analyzing your personal teaching, including personal insights.

Planning and leading experiential projects

Demonstrate the ability to design and lead an effective experiential project.

Experiential project portfolio

Develop and design an experiential education porfolio, that effectively integrates theories, activities, processing methods, etc.

Advanced Event and Experience Management

Advanced understanding and application of event and experience management principles; designing, planning, implementing and evaluating a special event.

RECM 425

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Managing Experience Industries

Developing knowledge and understanding of how to apply the management functions of planning, organizing, leading, and controlling to experience industries.

RECM 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 201 & BUS M 241 & RECM 300; or FIN 201 & BUS M 241 & RECM 300
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Sport and Entertainment Venue Management

Developing knowledge and understanding of specific facets of managing sports and entertainment venues amidst changing technologies and market demands and in an increasingly competitive environment.

RECM 435

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Grant Writing

Understanding the grant seeking process and necessary steps to find fund sources; identifying specific requirements, and preparing and submitting the proposal. Learning knowledge and skills to write competitive grant proposals.

RECM 453

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understanding the grant-seeking process

Understand the grant-seeking process and necessary steps to find fund sources, identify specific requirements and prepare and submit the proposal.

Crafting competitive proposals

Learn knowledge and skills required to write competitive grant proposals.

Top

Inclusion and Disabilities in Therapeutic Recreation

Making recreation / leisure services available to all populations. Analyzing implications of the Americans with Disabilities Act in recreational settings. Preparing recreation providers with knowledge and practical experience to enable them to include people from populations that have historically been underserved.

RECM 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 201 & BUS M 241 & RECM 300; or FIN 201 & BUS M 241 & RECM 300
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Introduction to Therapeutic Recreation

Introduction to therapeutic recreation definitions, philosophies, practice models, history, processes, professional organizations, healthcare; and therapeutic recreation delivery systems, medical terminology, credentialing requirements, disability/diagnostic groups, and settings.

RECM 470

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	BUS M 201 & BUS M 241 & RECM 300; or FIN 201 & BUS M 241 & RECM 300
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Assessment and the Therapeutic Recreation Process

Gaining knowledge and ability in client assessment, theory-based and evidence-based treatment/program planning, and program/outcome evaluation.

RECM 471

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	RECM 460 & RECM 470
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Programming and Interventions in Therapeutic Recreation

Hands-on and traditional educational experiences designed to facilitate the acquisition of skills in planning and implementing therapeutic recreation interventions and programs for a variety of clientele, including the appropriate use of intervention strategies and facilitation techniques.

RECM 472

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	RECM 471
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Issues in Administration of Therapeutic Recreation

Hands-on and traditional educational experiences designed to facilitate the acquisition of skills in personnel/clinical supervision, standards of practice, ethical behavior, program evaluation, quality management and accreditation, financing, organization and service administration, written plan of operations, documentation, safety policies, and credentialing in therapeutic recreation.

RECM 473

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 471
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Leadership and Facilitation Techniques in Therapeutic Recreation

Experiential and traditional educational experiences designed to facilitate acquisition of theoretical and practical knowledge and abilities in the therapeutic use of recreation and experiential interventions from both a client and therapist perspective. Focuses include leadership/facilitation skills, group dynamics and development, sequencing, processing skills, activity adaptation, disability awareness, and increased empathy.

RECM 474

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 471
Taught	Fall

Course Outcomes

RecM 474 Course Learning Outcome 1: Students will demonstrate theoretical knowledge and practical ability to:

a- Use different leadership styles and faciliataion techniques based on population and situational characteristics.
b- Plan and facillitate therapeutic recreation and experiential activites considering different group dynamics (stages of group development) and sequencing needs.
c- Effectively adapt activities and use adaptive equipment for different populations and abilities.
d- Effectivelly use a variety of therapeutic processing skills.

Applying different leadership styles

Use different leadership styles and facilitation techniques based on population and situational characteristics.

Designing TR and experiential activities

Plan and facilitate therapeutic recreation and experiential activities considering different group dynamics (stages of group development) and sequencing needs.

Applying therapeutic processing skills

Effectively use a variety of therapeutic processing skills.

Experience Industry Marketing

Understanding the marketing differences between experience industries and consumer product good industries. Developing a marketing plan, applying strategic marketing principles, using social media, and conducting market research.

RECM 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Taught	Winter

Course Outcomes

Marketing for the leisure and experience industry

Understand the unique aspects of marketing within the leisure and experience industry.

Applying marketing tools and principles

Apply marketing principles to experiences; Implement factors involved in creating a social media marketing campaign for the experience industry.

Developing a marketing plan

Use research to develop a marketing plan specifically targeted toward the experience industry market.

Community Recreation Management

Managing community recreation services; application of management principles to public and nonprofit recreation agencies.

RECM 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Taught	Fall even years

Course Outcomes

Applying recreation management principles to non-profit orgs

Demonstrate and ability to apply to apply recreation management principles to public and non-profit community agencies.

Problem solving in the field

Demonstrate an ability to propose feasible solutions to problems encountered in non-profit recreation settings.

Top

Risk Management in Recreation

Overview of the legal process, legal issues, and risk management considerations regarding the jurisprudence to U.S. civil law as they relate to recreational experiences and venues.

RECM 486

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361 & BUS M 390 & ORG B 321
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Evaluation for Recreation Managers

Acquiring and applying evaluation knowledge and skills to manage quality and effectiveness of recreation services and experiences.

RECM 487

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361 & BUS M 390 & ORG B 321
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Careers in Recreation

Exploring careers available in recreation, experience, and venue management, therapeutic recreation, and nonprofit organizations.

RECM 489

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Note	Fee.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Experience Industry Management Capstone

Synthesizing business and recreation coursework applying to case analysis solving problems for recreation, venue, and experience organizations; developing business plans and establishing nonprofit organization plans; encouraging innovation.

RECM 490

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361 & BUS M 390 & ORG B 321
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Recreation Facility Planning

Developing facilities for public and private recreation programs.

RECM 491

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Facility Design

Students will demonstrate their understanding of key design considerations of recreation faciliteis through completion of a semester project.

Top

Experience Design

Concepts, principles, and theories related to experience design; advanced experience planning and management skills; prerequisite for experience design lab.

RECM 492

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RECM 404 & RECM 420 & RECM 430
Recommended	RecM 425.
Taught	Fall

Course Outcomes

Principles of experience design

Demonstrate an understanding of key concepts, principles and theories related to experience design.

Applying management tools to experience planning

Apply advanced experience planning and management skills such as project management, meeting planning logistics, and economic analysis through practical experience design assignments.

Applying the tools and principles

Demonstrate readiness to apply what you have learned to real company and organization problems and projects in the experience design lab on campus internships.

Top

Experience Design Lab

Direct practical on-campus (not in the field) professional experience consulting with companies and organizations in the experience industries. Students work in teams on specific projects.

RECM 494R

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	RECM 492
Taught	Winter

Course Outcomes

Applying experience design principles and concepts

Effectively apply experience design concepts, principles, and theories as well as general management skills to analyze and recommend solutions to real world situations.

Problem solving in experience management

Demonstrate proficiency in solving experience design and experience industry management problems as assigned by the sponsoring organization.

Top

Senior Internship

Full-time work experience in a recreation or therapeutic recreation agency under the supervision of a recreation or venue management professional or a certified therapeutic recreation specialist. Applying academic skills and knowledge to solve problems and stimulate innovation.

RECM 496R

Hours	0.5 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	RECM 486 & RECM 487
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Special Topics and Research

Special topics, mentored research, and learning experiences, including attending professional conferences, Study Abroad participation, and other learning experiences.

RECM 497R

Hours	0.5 - 4.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Honors Thesis

Thesis project representing independent work and reflecting highest standards of undergraduate achievement.

RECM 499R

Hours	3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Departmental approval.
Note	Must receive both departmental and Honors Program approval.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Significant Scholarly Contribution

Students will make a significant contribution to the advancement of theory, research, and/or practice through the successful development, implementation, and evaluation of an evaluation, measurement, research, or experience design project.

Research Project

Students will demonstrate an ability to design and implement a research project in the recreation management field.

Paper or Presentation Submission

Students will submit a paper for publication or presentation to a regional or national journal or conference.

Top

Academic Internship

Professional leadership practicum.

RECM 599R

Hours	0.5 - 8.0 Credit, 1.0 Lecture, 40.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Old Testament Survey

Survey of the Old Testament, integrated with extensive field study in the biblical world; leads to understanding, appreciation, and application of scriptural teachings today.

REL A 101

Hours	2.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Jerusalem Center courses may not be repeated.
Taught	Spring, Summer
Offered	Offered only at the BYU Jerusalem Center for Near Eastern Studies.

Course Outcomes

Understand in Context

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the Old Testament narrative in its context.

Doctrines and principles

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the Old Testament's fundamental doctrines and principles.

Witness of Jehovah

Students who successfully complete the requirements of this course will be able to demonstrate that they have acquired and understanding of how the Old Testament bears witness of the work of Jehovah.

Application

Students who successfully complete the requirements of this course will be able to demonstrate that they have acquired an understanding of how selected Old Testament passages can be applied to daily living.

New Testament Survey of the Gospels

Survey of the New Testament Gospels integrated with extensive field experience in the biblical world; leads to understanding, appreciation, and application of scriptural teachings today.

REL A 111

Hours	2.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Jerusalem Center courses may not be repeated.

New Testament Studies of the Gospels

Study of the New Testament Gospels integrated with extensive field experiences in the biblical world; leads to an understanding, appreciation, and application of scriptural teachings today.

REL A 311R

Hours	1.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Offered only at the BYU Jerusalem Center for Near Eastern Studies.

Course Outcomes

Context

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the New Testament narrative in its historical and cultural context.

Witness of Christ

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of how the New Testament bears witness of the mission and message of Jesus Christ.

Top

The Joseph Smith Translation of the Bible

Historical significance of Joseph Smith's translation of the Bible, its relationship to the other standard works, and its doctrinal contributions.

REL A 320

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Historical Background

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the historical background of the JST.

Doctrinal Contribution

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the doctrinal contribution of the JST.

Product vs. Process Development

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of the relationship between product and process in development of the JST.

Honors: The Pearl of Great Price

Historical background and doctrines of the Pearl of Great Price.

REL A 327

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Context

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—the Pearl of Great Price in the historical and cultural context of its various components.

Doctrines and Principles

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—the fundamental doctrines and principles found in the Pearl of Great Price.

Witness of Christ

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—how the Pearl of Great Price bears witness of Jesus Christ.

Application

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—how selected passages in the Pearl of Great Price can be applied to daily living.

The Pearl of Great Price

Historical background and doctrines of the Pearl of Great Price.

REL A 327

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Context

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—the Pearl of Great Price in the historical and cultural context of its various components.

Doctrines and Principles

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—the fundamental doctrines and principles found in the Pearl of Great Price.

Witness of Christ

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—how the Pearl of Great Price bears witness of Jesus Christ.

Application

Students who successfully complete the requirements for this course will be able to demonstrate that they have acquired an understanding of—how selected passages in the Pearl of Great Price can be applied to daily living.

Introduction to the LDS Church

Introduction to the doctrines, history, and practices of The Church of Jesus Christ of Latter-day Saints for students who are not members of the church.

REL C 100

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	It is strongly recommended that this course be taken the first semester at BYU.
Taught	Fall, Winter

Course Outcomes

Demonstrate Knowledge

Students will demonstrate their gained understanding of basic LDS history, culture, doctrine, and terminology

Excellence

Students will be empowered to excel in Religion classes with LDS peers

Gain more

Students will gain more from their BYU experience

Honors Missionary Preparation

Focuses upon the purpose, skills, and doctrines of missionary work and prepares prospective missionaries for a more meaningful MTC and mission experience.

REL C 130

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Recommended for all prospective missionaries. This class may not be taken or retaken by returned missionaries or non-LDS students.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Conceptual Learning

Students will create custom lesson outlines which will be used to more effectively understand and teach the gospel of Jesus Christ to others. This will require students to be able to understand key doctrines and principles as well as learn how to effectively share these with other people.

Application Learning

- Students will be able to meet and get to know new people as will be required for effective missionary work
- Students will be able to teach the missionary discussions effectively to other people both inside and outside the classroom

Factual Learning

- Students will be able to identify and understand the doctrines and principles related to missionary work which God has revealed through prophets, seers and revelators.
- Students will be able to understand revealed doctrine and principles in a way which enables them to teach and apply those doctrines and principles in their lives.

Top

Course Outcomes

Global Expansion

Students will learn the history of how the Church of Jesus Christ of Latter-day Saints, has expanded globally and been influenced by global developments

Events and Developments

Students will demonstrably remember and analyze events and developments of the global aspects of LDS history

Participants

Students will demonstrably remember participants in global LDS history and analyze their contributions.

Geography

Students will demonstrably remember the geography of global LDS history

Historical Record

Students will gain experience with the historical record of global LDS history

Relationships with other Historical Contexts

Students will relate global LDS history to larger historical contexts and patterns

Causes and Effects

Students will examine and explain change over time and causes and effects as they relate to global LDS history

Top

Religious Studies in a World Setting

Religious studies related to Latter-day Saint foundations and doctrines as relevant to specific geographical regions (International Study Programs).

REL C 350R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Learn History

Students will learn the LDS Church history of a particular region.

Key Sites

Students will visit key LDS Church history sites in a particular region.

Challenges

Students will become acquainted with the challenges church members face in a particular region.

Interview about History

Students interview Church members in a particular region relative to their history.

Top

Honors Survey of World Religions

Explores the origins, theological doctrines, scriptural works, and religious practices of several internationally religious traditions, including Christianity, Islam, Judaism, Hinduism, Sikhism, Buddhism, Taoism, Confucianism, and Shinto. Comparisions are offered between these religions, and Latter-day Saints belief and practice.

REL C 351

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Other Religious Beliefs

Students will learn the religious beliefs and practices of others

Judiasm

· Students will learn Judaism, including the following:
o Describe the universal nature of the scriptural covenants of Israelites
o Discuss the origin and development of Judaism during the First Temple Period
o Discuss the origin and development of monotheistic Judaism during the Second Temple Period
o Discuss the components and development of the Hebrew Bible (Torah, etc.) and the Talmud
o Identify and discuss basic doctrines, practices, and festivals of modern Jewish movements

Christianity

· Students will learn the New Testament origins of Christianity and the nature of early Christian doctrines and practices, including the following:
o Discuss the development of the doctrine of Trinity, and episcopal versus apostolic authority.
o Describe the major traditions within Christianity: Roman Catholic, Orthodox, and Protestant.

Islam

· Students will learn Islam, including the following:
o Remember the history of Muhammad and the first four caliphs
o Discuss the origin and makeup of the Quran, and identify concepts including Hadith and Sharia
o Identify the major factions of Islam-the Sunni and the Shi'a-and remember their origins

Eastern Religious Traditions

· Students will learn Eastern religious traditions, including the following:
o Describe the concept of "monist" theology and cosmology, as represented in "eastern" religion
o Identify the gods of the Hindu *Trimurti* and their consorts, as well as the avatars of Vishnu
o Identify and discuss major Hindu texts (Baghavad Gita, etc.) and holidays (Holi, etc.)

o Identify the major gurus, scriptures, dietary constraints, and *Khalsa* elements of Sikh faith
o Discuss events in the life of Sidharta Gautama-the Buddha-that led to his enlightenment
o Identify and discuss the four noble truths and the eightfold middle path of Buddhism
o Discuss basic Daoist philosophy, including the notions of *wu wei* and complementary opposites
o Discuss the basic concepts of Confucian philosophy, including respect for state, elders, and others
o Discuss and differentiate between the concepts of "monotheism" and "monoist" religious constructs

o Discuss and differentiate between the concepts of "monotheism" and "monoist" religious constructs

Survey of Christianity

An examination of the history, doctrines, and liturgical practices of the three major branches of Christianity: Roman Catholicism, Eastern Orthodoxy, and Protestantism. Comparisons are offered between these religions, and Latter-day Saint belief and practice.

REL C 352

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Major Events

Students will identify and explain major events in Christian History and describe how they influenced the develoment and direction of "mainstream" Christianity.

Events Relating to the Restoration

Students will identify events in Christian History relative to the restoration and explain why those events are important for Latter-Day Saints.

Context

Students will gain context for doctrines and events in Christian History, and will be able to utilize that context to more accurately and adequately discuss how Christianity has developed, and what has provoked many of its "orthodox" doctrines--particularly those doctrinal positions that differ from LDS positions.

Resarch Primary Sources

Students will experience research in primary sources important for Christian history and demonstrably learn those sources.

Appreciation

Students will gain appreciation for the faith and beliefs of non-LDS brothers and sisters and a simultaneous increase in their understanding of the need for prophets and apostles as a means of insuring orthodoxy and orthopraxy within the Church of Jesus Christ of Latter-day Saints.

American Christianity and the Restored Gospel

History, doctrine, and practices of the major Christian faiths of America in light of the restored gospel.

REL C 353

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Explanations

Students will provide informed explanations of major trends, transformations, and events in the history of American Christianity.

Historical Origins

Students will identify the historical origins and beliefs of major Christian groups in the United States

Compare LDS with other Christians

Students will situate Latter-day Saint beliefs and practices within the wider Christian tradition

Top

Survey of Judaism and Islam

Explores the origins, doctrines, scriptural works, history and religious practices of Judaism and Islam. Comparisons are offered between the two, and Latter-day Saint Christianity.

REL C 357

Doctrines of the Gospel

Doctrines of The Church of Jesus Christ of Latter-day Saints as taught in the scriptures and by latter-day prophets. Intended as a capstone experience to integrate doctrines and principles of the plan of salvation.

REL C 431

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department
Offered	Honors also.

Course Outcomes

Core Doctrines

Students will identify, understand, clarify, and explain core doctrines contained in the Standard Works of the Church of Jesus Christ of Latter-day Saints and taught by LDS prophets.

Life Choices vs. Doctrines

Students will discern whether their life choices are in harmony with the doctrines they understand

Plan of Salvation

Students will explain how various aspects and principles of the plan of salvation work to bring to pass the immortality and eternal life of God's children

Honors Doctrines of the Gospel

Doctrines of The Church of Jesus Christ of Latter-Day Saints as taught in the scriptures and by latter-day prophets. Intended as a capstone experience to integrate doctrines and principles of the plan of salvation.

REL C 431

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Core Doctrines

Students will identify, understand, clarify, and explain core doctrines contained in the Standard Works of the Church of Jesus Christ of Latter-day Saints and taught by LDS prophets.

Life Choices vs. Doctrines

Students will discern whether their life choices are in harmony with the doctrines they understand

Plan of Salvation

Students will explain how various aspects and principles of the plan of salvation work to bring to pass the immortality and eternal life of God's children

Teaching Seminary

An introduction to effective seminary teaching, includes discussion related to professional seminary expectations, teaching techniques, classroom management and direct experience in teaching seminary.

REL C 471

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	It is recommended this course be taken 3 semesters prior to the student's graduation date to accommodate a year for student teaching.
Taught	Fall, Winter

Course Outcomes

Teaching Skills

Acquire understanding and skills that will assist the student as they teach the scriptures in a religious education setting.

Lesson Design

Become effective in designing, preparing, and teaching relevant lessons that will help learners be edified as they study the scriptures.

Practicum

Demonstrate in a practicum experience proficiency of teaching principles and skills taught in the class.

Career Orientation

Understand the requirements for a possible career with Seminaries and Institutes

Top

Teaching the Developmentally Disabled

Training prospective Church Educational System teachers to effectively teach religious education to youth who are developmentally disabled.

REL C 472

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Understanding and Response

Students will identify, understand, and respond to developmentally disabled seminary students

Demonstration

Students will demonstrate in a classroom environment strategies for teaching the developmentally disabled.

Top

Seminary Teaching Seminar

Topics pertinent to success of newly appointed seminary teachers preparatory to fall teaching.

REL C 475

Hours	0.5 - 2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Requires permission-to-add code from instructor.
Taught	Fall, Winter

Course Outcomes

Teaching Competence

Students will demonstrate teaching competence through a student teaching experience in a seminary classroom

Teaching Strategies

Students will demonstrate an ability to employ basic seminary teaching strategies in classroom presentations.

Top

Special Topics in Church History and Doctrine

Subjects and questions typically addressed by Church Educational System instructors.

REL C 510R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	LDS Church Seminaries and Institutes personnel only.
Note	No more than 3 hours may apply toward a graduate degree.
Taught	

Course Outcomes

The meaning and determination of "doctrine"

Be able to articulate various meanings of the word *doctrine* and explain how Latter-day Saint doctrine is determined;

Linking doctrines to Church History

Be able to identify and link foundational doctrines with key figures (Church leaders) and periods in the history of the LDS Church.

Special Topics in Church History and Doctrine

REL C 540R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Graduate Readings

These are assigned graduate-level readings on special topics in Church History, often leading to the writing of a final paper or thesis. Papers are also often assigned, requiring students to master their particular topic and to write a publishable paper.

Educational Philosophy and Values in Religious Education

Philosophical basis and underlying values in religious education.

REL E 500

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Foundations of weekday religious education

Students will be able to examine and evaluate key doctrinal, historical, and philosophical foundations of weekday religious education as taught by the ancient and latter-day prophets and by current and former Seminary & Institute and Church leaders.

Establishing professional relationships

Students will be able to establish professional and collaborative relationships with current and former Seminary & Institute leaders through receiving in-class instruction from guest instructors and conducting out-of-class leadership interviews

Professional Development

Studtents will understand and be able to assume their roles and responsibilities in the world-wide effort of religious education.

Top

Scripture Teaching

Theory, methodology, and issues of scripture-based teaching in religious education.

REL E 501

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Teaching effectively

Develop the capability to teach comfortably and effectively from the Four Standard Works of the Church

Teaching by the Spirit

Show competence in teaching the scriptures from the Spirit and in such a way as to affect positive change in high school students

Working with the difficult student - in love

Develop the human relationship skills so as to know how to love and relate with difficult students.

Research Methods in Religious Education

Methodology in and resources for research in the four areas of focus: Church History and Doctrine, Old Testament, New Testament, and Book of Mormon.

REL E 595

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Scholarly and Critical Thinking Skills

Students will be able to think and discuss critically and scholarly about church history and doctrine, yet do so in a "household of faith."

Research and Writing Skills

Students will be able to demonstrate the skills of essential note-taking, footnote citations, and clarity of writing requisite for writing graduate-level research papers

Document Analysis Skills

Students will be able to write a graduate level document analysis paper.

Bibliographic Essay Skills

Students will be able to write a graduate level bibliographical essay.

Top

First-Year Romanian, Part 1

Basic language skills.

ROM 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Top

First-Year Romanian, Part 2

Basic language skills.

ROM 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Top

Second-Year Romanian

Conversation vocabulary building; reading and writing skills, emphasizing writing.

ROM 201

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Rom 102 or equivalent experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Romanian Conversation

Intermediate listening comprehension and speaking skills.

ROM 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Rom 102 or equivalent experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Third-Year Romanian Conversation

Advanced conversational skills.

ROM 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Rom 211R or equivalent experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities and current events; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions

Organized Speech

Begin to speak in "oral paragraphs."

Strategies

Apply appropriate strategies to deal with unpredictable language situations.

Pronunciation and Accuracy

Be understood by native speakers unaccustomed to dealing with non-native speakers.

Introduction to Romanian Literature and Culture

For returned missionaries or others with extensive Romanian language experience.

ROM 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Foreign residence experience in Romania.
Note	Required course for obtaining language credit by examination. Culminating course for GE Foreign Language requirement.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Recognize and Analyze

Recognize and analyze the most important genres in target-language literature.

Key Characteristics

Identify and discuss key characteristics of the most important literary movements in the target culture.

Context

Place literature in a meaningful cultural and historical context.

Language Skills

Improve target-language reading, writing, and speaking skills.

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

First-Year Russian, Part 1

RUSS 101

Hours	5.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Novice High Proficiency

Speak, read, listen, and write at a level equivalent to Novice High or higher on the American Council of Teachers of Foreign Languages (ACTFL) proficiency scale.v

Basic aspects of Grammar

Demonstrate control over basic aspects of Russian grammar, such as case usage and verb conjugation in controlled settings.

Russian Cultural Norms

Demonstrate an emerging awareness of Russian cultural norms in a limited number of contexts within the scope of learning experiences.

Top

First-Year Russian, Part 2

RUSS 102

Hours	5.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Winter, Summer

Course Outcomes

Novice High Proficiency

Speak, read, listen, and write at a level equivalent to Novice High or higher on the American Council of Teachers of Foreign Languages (ACTFL) proficiency scale.

Basic Aspects of Grammar

Demonstrate control over basic aspects of Russian grammar, such as case usage and verb conjugation in controlled settings.

Awareness fo Russian Cultural Norms

Demonstrate an emerging awareness of Russian cultural norms in a limited number of contexts within the scope of learninig experiences.

Academic Internship

On-the-job experience evaluated by supervisor and posted on student's transcript. Report required

RUSS 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department chair's and internship coordinator's consent.
Note	Not applicable to major or minor.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Internship

Student combines knowledge gained from the Russian curriculum with an internship experience in a related field, preferably connected to the second major or minor.

Top

Second-Year Russian, Part 1

Grammar review and conversation.

RUSS 201

Hours	5.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Russ 102 or instructor's consent, based on prior Russian language experience.
Taught	Fall

Course Outcomes

Short Essays

Students will write short essays incorporating materials introduced in the texts.

Intermediate Low Proficiency

Russian 201-202 are focused on developing learners' proficiency in speaking, reading, listening, and writing. These courses also focus on developing learners' cultural sensitivity. By the end of each course, students will:
1. speak, read, listen, and write at a level equivalent to Intermediate Low or higher on the American Council of Teachers of Foreign Languages (ACTFL) proficiency scale.

Basic Aspects of Russian Grammar

2. Demonstrate increasing control over basic aspects of Russian grammar, such as case usage, verbal conjugation, tense and aspect in controlled settings. This growing accuracy will allow them to begin narrating personal experiences.

Awareness of Russian Cultural Norms

3. Demonstrate a developing awareness of Russian cultural norms in a growing number of contexts within the scope of the learning experience.

Top

Second-Year Russian, Part 2

Grammar review and discussion in Russian of both expository and literary readings.

RUSS 202

Hours	5.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Russ 201 or instructor's consent.
Note	Culminating course for Languages of Learning requirement. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Intermediate Low Proficiency

Russian 201-202 are focused on developing learners' proficiency in speaking, reading, listening, and writing. These courses also focus on developing learners' cultural sensitivity. By the end of each course, students will:
1. speak, read, listen, and write at a level equivalent to Intermediate Low or higher on the American Council of Teachers of Foreign Languages (ACTFL) proficiency scale.

Basic Aspects of Russian Grammar

2. Demonstrate increasing control over basic aspects of Russian grammar, such as case usage, verbal conjugation, tense and aspect in controlled settings. This growing accuracy will allow them to begin narrating personal experiences.

Awareness of Russian Cultural Norms

3. Demonstrate a developing awareness of Russian cultural norms in a growing number of contexts within the scope of the learning experience.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

RUSS 211

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Russ 201 or foreign residence experience.
Note	Offered only as credit by examination upon completion of Russ 330 (maximum 1 hour) or through Study Abroad experience in Russian (1-5 hours).
Taught	Spring Contact Department, Summer Contact Department

Course Outcomes

Conversation

Student increases oral proficiency through directed conversation practice and vocabulary building.

Top

Intermediate Russian on Study Abroad

Grammar and composition, case government, listening and speaking skills.

RUSS 301

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	RUSS 202
Taught	
Offered	Russian Study Abroad only.

Course Outcomes

Intrmed Russian Study Abroad

This course is offered only on study abroad. It focuses primarily on the formal elements of the Russian language and aims to help homegrown students bridge the gap between themselves and Russian RMs.
1. Study the fundamentals of Russian grammar
2. Write descriptive and narrative compositions aimed at improving command of Russian
3. Read short texts designed to supply content for writing composition and class discussion (Russian Section Learning Outcomes 1, 3 and 4) http://germslav.byu.edu/russian/learning-outcomes/

Top

Advanced Conversation

Building vocabulary and developing skills needed to exceed assessed proficiency rating.

RUSS 311R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Russ 211R or equivalent experience.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Conversation

Students will demonstrate an advanced level conversation.

Third-Year Russian Part 1

Grammar and composition, case government, listening and speaking skills.

RUSS 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Russ 202 or equivalent.
Taught	Fall, Spring

Course Outcomes

Grammar

This two-course series focuses primarily on the formal elements of the Russian language and aims to improve students' command of it in the following three ways:
1. grammar, considerable focus on the structure of Russian and fundamentals of grammar

Writing

2. writing, descriptive and narrative writing compositions aimed at improving command of one's language

Reading

3. reading, short texts designed to supply content for writing composition and class discussion

Top

Third-Year Russian Part 2

Grammar and composition, case government, listening and speaking skills.

RUSS 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Russ 202 or equivalent.
Taught	Winter, Summer

Course Outcomes

Grammar

This two-course series focuses primarily on the formal elements of the Russian language and aims to improve students' command of it in the following three ways:
1. grammar, considerable focus on the structure of Russian and fundamentals of grammar

Writing

2. writing, descriptive and narrative writing compositions aimed at improving command of one's language

Reading

3. reading, short texts designed to supply content for writing composition and class discussion

Russian Phonology and Morphology

Perfecting speaking and listening skills through phonetics and applied speaking and listening techniques. Better understanding and using the structures of Russian through studying morphology and historical phonology.

RUSS 323

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RUSS 321
Taught	Winter

Course Outcomes

Phonetics and Phonology

1. Learn the basics of the Russian sound system (phonetics and phonology).

Inflectional and Derivational Morphology and Historical Phonology

2. Learn the basics of Russian inflectional and derivational morphology and historical phonology in order to better understand the way the Russian language functions as a system.

Improving Pronunciation and Listening Comprehension

3. Use new knowledge of the way the sounds of the Russian language are produced and the way they interact to improve pronunciation and listening comprehension.

Improve Language Use

4. Use knowledge of the structures of Russian to help students master the details of conjugation, declension and derivation. (Improve language use)

Cultural History of Russia

RUSS 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Russ 202 or foreign residence experience.
Note	Required course for obtaining language credit by examination (Russ 101, 102, 201, 211R). Culminating course for Languages of Learning requirement. Includes International Cinema.
Taught	Fall, Winter, Summer

Course Outcomes

Cultural History

1. Identify the main periods, figures, and achievements of Russian cultural history.

Cultural Sensitivity

2. Demonstrate sensitivity to cultural difference generally and, more specifically, to differences between their own culture and that of Russian.

Essays

3. Write essays characterized by good organization, coherent development.

Masterpieces of the Russian Novel in English

Survey of Russian novels by such authors as Pushkin, Tolstoy, Dostoevsky, and Pasternak.

RUSS 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Reading

The design of this course is to introduce students to some of the most important works of Russian literature. Our aim is for the student to be able to explain the trends and characteristics of the Classic Russian Novel and illustrate them with examples from the assigned readings. To help the student realize this objective, we focus our attention on three areas:
1. Reading:Those responsible for course instruction choose the assigned readings (mutually agreed upon by members of the section). Students that complete the assigned readings will demonstrate a critical understanding of and appreciation for literature.

Writing

2. Writing: Writing both in and outside of the classroom will enable the student to develop a reasonable interpretation of a literary text and to support that interpretation with evidence.

Student Interaction

3. Significant Student Interaction: Class discussions are led by both the instructor and the student. Active participation in class discussions will increase the student's ability to identify and articulate the concerns raised in the assigned readings.

Dostoevsky's Major Works in Translation

Survey of Dostoevsky's major works in English translation.

RUSS 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Reading

The design of this course is to introduce students to the important works of Fyodor Dostoevsky. Our aim is for the student to be able to explain the key issues Dostoevsky explores in his work and illustrate them with examples from the author's novels and short stories. To help the student realize this objective, we focus our attention on three areas:
1. Reading: Those responsible for course instruction choose the assigned readings (mutually agreed upon by members of the section). Students that complete the assigned readings will demonstrate a critical understanding of and appreciation for Dostoevsky's work.

Writing

2. Writing:Writing both in and outside of the classroom will enable the student to develop a reasonable interpretation of a literary text and to support that interpretation with evidence. Students will be able to write a research paper in the appropriate citation style.

Student Interaction

3. Significant Student Interaction:Class discussions are led by both the instructor and the student. Active participation in class discussions will increase the student's ability to identify and articulate the questions Dostoevsky raises in his work.

Tolstoy's Major Works in Translation

Survey of Tolstoy's major works in English translation.

RUSS 342

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Reading

The design of this course is to introduce students to the important works of Lev Tolstoy. Our aim is for the student to be able to explain the key issues Tolstoy explores in his work and illustrate them with examples from the author's novels and short stories. To help the student realize this objective, we focus our attention on three areas:
1. Reading:Those responsible for course instruction choose the assigned readings (mutually agreed upon by members of the section). Students that complete the assigned readings will demonstrate a critical understanding of and appreciation for Tolstoy's work.

Writing

2. Writing both in and out of the classroom will enable the student to develop a reasonable interpretation of a literary text and to support that interpretation with evidence. Students will be able to write a research paper in the appropriate citation style.

Student Interaction

3. Significant Student Interaction:Class discussions are led by both the instructor and the student. Active participation in class discussions will increase the student's ability to identify and articulate the questions Tolstoy raises in his work.

Masterpieces of Russian Film

Developing listening comprehension and speaking skills through discussing Russian films. Includes International Cinema.

RUSS 343

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	RUSS 330
Taught	Winter

Course Outcomes

Watching Soviet/Russian Films

1. Watch Soviet/Russian films. Due to the rich heritage of Soviet/Russian cinema this course does not claim to be an exhaustive treatment of all the great Soviet/Russian films, but rather aims to concentrate on the most nationally acclaimed Soviet/Russian films, American Academy Award nominated films, and internationally acclaimed Soviet/Russian films.

Critical Analysis

2. Critically analyze cultural and aesthetic aspects of Russian films orally and in writing.

Top

Academic Internship

On-the-job experience in Russian-related areas. Report required.

RUSS 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	RUSS 202; department's consent.
Note	Not applicable to any Russian major or minor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship

Student combines knowledge gained from the Russian curriculum with an internship experience in a related field, preferably connected to the second major or minor.

Top

Fourth-Year Russian, Part 1

Contemporary language and culture.

RUSS 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RUSS 321 & RUSS 322 & RUSS 330
Taught	Fall

Course Outcomes

Vocabulary

1. Increase vocabulary and use of synonyms.

Opinions and Arguments

2. Improve ability to state and support opinions and organize arguments.

Hypothesizing

3. Foster ability to hypothesize in Russian.

Daily Reading

4. Use daily reading as a method for learning vocabulary and improving language.

Top

Fourth-Year Russian, Part 2

The structure of Russian.

RUSS 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RUSS 321 & RUSS 322 & RUSS 330
Taught	Winter

Course Outcomes

Morphology and Phonology

1. Learn the basics of Russian inflectional and derivational morphology and historical phonology in order to better understand the way the Russian language functions as a system.

Improving Language Use

2. Use knowledge of the structures of Russian to help students master the details of conjugation, declension and derivation. (Improve language use)

Masterpieces of Russian Literature 1

Survey of shorter masterpieces in Russian.

RUSS 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RUSS 321 & RUSS 322 & RUSS 340
Taught	Fall, Spring Contact Department, Summer Contact Department

Course Outcomes

Reading

1. To read in Russian mutually agreed upon poems, short stories, and plays of nineteenth-century Russian literature and understand their literary, social, historical, and religious contexts.

Writing

2. To write essays in Russian in which students are able to formulate insightful arguments and support their ideas with detailed textual references. This written work should be characterized by good organization and a logical development of ideas.

Analysis and Discussion

3. To analyze and discuss the literary works and the authors in Russian as the course will be taught predominantly in Russian.

Masterpieces of Russian Literature 2

Survey of shorter masterpieces in Russian.

RUSS 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	RUSS 321 & RUSS 322 & RUSS 340
Taught	Winter

Course Outcomes

Reading

1. To read in Russian mutually agreed upon poems, short stories, and plays of nineteenth-century Russian literature and understand their literary, social, historical, and religious contexts.

Writing

2. To write essays in Russian in which students are able to formulate insightful arguments and support their ideas with detailed textual references. This written work should be characterized by good organization and a logical development of ideas.

Analysis and Discussion

3. To analyze and discuss the literary works and the authors in Russian as the course will be taught predominantly in Russian.

Special Studies in Russian

Variable credit for individual or group study as approved for special circumstances.

RUSS 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Special Studies

Student increases Russian language proficiency and cultural knowledge through directed independent study with a faculty member.

Senior Seminar: Passages and Conclusions

In-depth study of a limited area of literature or language. Content varies; requires research and writing.

RUSS 492R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	RUSS 441; or RUSS 442
Taught	Fall, Winter

Course Outcomes

Critical Thinking

This course provides a culminating undergraduate experience for students in the following three ways:
1. critical thinking, course content affords significant intellectual development and growth

Russian Language

2. target language, the Russian language plays an integral role in the course curriculum

Writing

3. writing, compositions that demonstrate students' critical thinking and Russian language skills

Honors Thesis

RUSS 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Honors Thesis

Student is mentored toward completion of an honors thesis.

Literacy and Learning for the Disciplines

An investigation of the literacies needed to participate in the various disciplines and the support needed to learn those literacies.

SC ED 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Know Theories of the Disciplines

Demonstrate an understanding of the theories related to disciplinary literacy (including texts, reading, writing, communicating, reasoning) and the implications of these theories for participation in disciplinary practices. (GE letters #2)

Identify Disciplinary Texts & Literacies

Identify the range of texts and literacies used to communicate, reason, and participate within a specific discipline. (GE letters #1 & #2)

Contrast Literacy Across Disciplines

Contrast the literacies necessary to participate in a discipline with those needed in different disciplines. (GE letters #1 & #2)

Describe Support for Acquiring Literacies

Describe supports needed for individuals to gain the literacies necessary to read and write disciplinary texts. (GE letters #3)

Exploration of Teaching: Music

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

SC ED 276R

Hours	3.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major-area preadmission requirements; FBI fingerprint and background clearance.
Taught	

Course Outcomes

In this course students will each perform for each other and receive feedback on your performance. Students will also improve as performers by providing feedback for your peers

In this course students will engage in several improvisation and composing opportunities during demonstrations of teaching strategies.

Lectures and Activities

The perspectives lectures and activities in this course are designed to create foundational questions
and a propensity for deep thinking about music through philosophical and theoretical discussions particularly
as part of the re-visioning of music literacy.

Students will conduct 12 observations of successful practitioners in local public schools where they
have the opportunity to gather many strategies and materials along with insights regarding philosophies
underlying them. Practical approaches/techniques are also presented during the â??processâ? discussions in class
and by the rhythm teaching exercises as the beginning of each seminar

The term project for this course and the related â??processâ? discussions represent a carefully guided
incursion into grounded pedagogical practice.

Each student has at least 2 mentored formal teaching experiences involving junior high music students
the interaction between 276 students and the junior high students is carefully reviewed both by the University
supervisor and the 276 student him/herself.

Exploration of Teaching: Physical Science

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

SC ED 276R

Hours	3.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major-area preadmission requirements; FBI fingerprint and background clearance.

SFL 276: Introduction to Secondary Education for Family and Consumer Science Majors

This course is a field-based course taken during the initial teaching experience. It is directed at helping prospective teachers experience the demands and opportunities associated with teaching Family and Consumer Sciences in secondary education classrooms.

A) Students will observe, experience, and analyze firsthand the responsibilities and environment of teaching Family and Consumer Sciences in a secondary public school setting.

- Students observe, teach, demonstrate, and complete a bulletin board out in schools 6 -7 days during the block.
- An hours form and evaluation form is filled out with public teacher signature.

B) Students will identify and discuss the characteristics of an effective teacher

- The First Days of School textbook discussion question assignments are written, turned in and discussed in class.

C) Students will demonstrate ability to research and understand current issues facing public schools by collecting scholarly articles and presenting an opinion.

Students complete a research project by reading and responding to 4 or more current education articles.

Students will reflect and build on the goals of the BYU Educator Preparation Program.

Students increase understanding of personal strengths and weaknesses that will aid in progression toward excellence in teacher preparation by keeping a field journal of their experiences.

Exploration of Teaching: Theatre and Media Arts

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

SC ED 276R

Hours	3.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major-area preadmission requirements; FBI fingerprint and background clearance.
Taught	

Course Outcomes

Each student will understand the theoretical and practical nature of education.

Each student will evaluate a variety of learning styles.

Each student will objectively begin to understand their personal teaching style.

appllication

Each student will gain practical teaching experience.

Each student will acquire confidence in their teaching talents.

Each student will learn to develop specific lesson plans and educational units.

Each student will create a professional education portfolio.

Each student will learn about teaching resources and information.

Issues in Education

Students will have a basic understanding of current issues in public education.

Adolescent Development in an Education Context

Adolescent development in the context of education. Focus is on the implications for integrated school culture, curriculum design, instructional practices, and assessment.

SC ED 350

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Sc Ed 276R or major area equivalent.
Note	Class is restricted to secondary education majors in biology, physical education teacher education, music, dance, and arts.
Taught	Fall Term 2, Winter, Spring

Course Outcomes

Demonstrate Impact on Instructional Processes

Students will be able to recognize and identify the implications of adolescent development on their own teaching and be able to integrate future lessons with the knowledge they have of development.

Developmental Stages

The students will understand the social, physical, and cognitive developmental stages of adolescence in relation to the tasks of automony, identity and intimacy development.

Demonstrate Impact on Classroom Environments

The students will demonstrate understanding of how the stages of development impact classroom environments and management.

Top

Multicultural Education for Secondary Education

Examining and understanding cultural identities, effects of culture on learning and teaching, culturally relevant and responsive teaching, policy impact on current practices, inclusive civic engagement, privilege and inequity, and theoretical frameworks.

SC ED 353

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Sc Ed 276R or major area equivalent.
Recommended	Concurrent enrollment in Sc Ed 350 or Sc Ed 375.
Taught	Fall, Winter, Spring

Course Outcomes

Cultural Identities

Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to through a process of reflection.

Effects of Culture on Learning and Teaching

Acknowledge the dynamics of culture and diversity in school success and teachers' teaching. This includes recognizing and overcoming deficit thinking.

Critical Dispositions

Recognize and use a personal moral spiritual framework. Demonstrate a willingness to engage in self-critique and exploration, developing meekness, comittment to advocacy, and lifelong habits of reflection about self, others and institutions. Exploring frames of reference, ways of knowing, culture, gender, sexuality, race and ethnicty, language abilities, immigration, social class, poverty, potential bias in theses frames and

Inclusive Civic Engagement

Learn to appreciate and value differences. Recognize how diversity enriches opportunities for learning and engagement in the various communities they participate.

Recognize Privilege and Inequity

Recognize and acknowledge racism, discrimination and other forms of inequity and privilege in themselves, in others, and within institutions.

Theoretical Frameworks

Recognize and use a personal moral spiritual framework along with principles and concepts of social science to guide educational accomplishments for diverse learners.

Adolescent Development and Classroom Management

Analysis of education practice and the relationship between theories and research on development, classroom management, education and the practice of teaching. Focus on adolescent development and an introduction to classroom management.

SC ED 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B; or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Demonstrate Impact on Instructional Processes

Students will be able to recognize and identify the implications of adolescent development on their own teaching and be able to integrate future lessons with the knowledge they have of development.

Developmental Stages

Students will understand the social, physical and cognitive developmental stages of adolescence in relation to the tasks of autonomy, identity and intimacy development.

Demonstrate Impace on Classroom Environments

Students will be able to demonstrate an understanding of how adolescent development impacts classroom environments. They will be able to integrate theories of classroom management with their knowledge of adolescent development in order to plan future lessons and management practices based on student developmental needs.

Teaching Methods and Instruction

Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

SC ED 377R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major-specific program requirements.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Instructional Strategies

The students will understand and implement a variety of teaching strategies in teaching content in secondary classrooms.

Assessment

The students will link assessment to learning goals and strategies in teaching content in secondary classrooms.

planning

Students will create learning objectives to meet content and instructional goals.

Classroom Management

Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

SC ED 379

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Sc Ed 377R and 378, or equivalent major courses; Sc Ed 276R or Phy S 276 or Engl 276R or Bio 276 or SFL 276R or Hlth 276R or MthEd 276 or PETE 276R or TEE 276A or TEE 276B.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Instruction

The student will plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.

Learning Environment

The student will create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Reflection and Evaluation for Growth

The student will be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Content-Area Literacy

Current theory and related practices in literacy assessment and instruction for content-area classrooms.

SC ED 380

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Sc Ed 377 or equivalent course.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Teacher candidates will gain an understanding of theories related to literacy, reading, writing, texts, and literacy instruction.

Practices

Teacher candidates will use instructional strategies and design curriculum materials to support students' creation, negotiation, and use of texts.

Dispositions

Teacher candidates will develop an understanding of the place of literacy instruction in content-area classrooms to support students' access to knowledge and participation in a social and political democracy.

Course Outcomes

Performance Evaluation

- Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.

Academic Internship: Physical Sciences

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

SC ED 496R

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Taught	

Course Outcomes

Performance Evaluation

- Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.

Academic Internship: Secondary Education

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

SC ED 496R

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

Academic Internship - Secondary Education

Students will demonstrate that they can teach, manage, and assess content area knowledge and skills in the 7-12 classroom.

Complete Certification Requirements

- Complete the requirements established by BYU's Department of Visual Arts, the Department of Teacher Education, and the Utah State Office of Education including the PRAXIS Test for Art.
- Complete the Teacher Work Sample (TWS) in a professional manner with exemplary content and design. Submit TWS to LiveText.
- Complete a Professional & Interpersonal Behavior Scale (PIBS), a Candidate Disposition Scale (CDS), and Field Experience Demographics (FED) forms and submit to LiveText.
- Allow university supervisor and cooperating teachers to evaluate teaching performance with Clinical Practice Assessment Scale (CPAS) and sign Final Evaluation forms on LiveText.

Complete Course Requirements

- Tape at least one lesson for self and peer evaluation.
- Design a Professional Portfolio for job interviews. Receive timely guidance on job interviewing and placement procedures.
- Record and review valuable student teaching experiences in a Reflective Journal.
- Plan and execute an exhibition of student artwork in at least one school.

Classroom Management

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Comprehension Instruction

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Content-Area Literacy

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Effective Teaching

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Foundations of Literacy

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Literacy Assessment and Intervention

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Literacy Development and Instruction

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Top

Literacy Specialist Practicum

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Top

Literature for Young People

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Organization and Administration of Reading Programs

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Sciences

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Special Topics in Education

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Top

Supervision of Literacy Programs

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Top

Writing Instruction

Topics vary.

SC ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For recertification only. Must have prior approval of department to count toward graduate degrees.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content Knowledge

Candidates will explore special topics in secondary education under the direction of a specific instructor.

Top

(Scand-Germ) German and Scandinavian Cinema

Background for understanding and appreciating the best of motion picture art in Germany and Scandinavia.

SCAND 217

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	A first-year writing course.
Note	Language of instruction is English; no knowledge of German or Scandinavian languages is required.
Taught	Fall

Course Outcomes

Analysis and Writing

Students will develop skills to allow them to view, analyze, critically interpret, and write about films that come from a wide variety of cinematic genres.

Analytic Vocabulary and Critical Skills

Students will develop an analytic vocabulary and critical skills that will allow them to participate in scholarly discussions of key cinematic texts from Nordic and German history.

Reading, Critiquing and Writing Formal Sequence Analyses

Students will be able to read, critique and write formal sequence analyses of key scenes from German and Scandinavian films.

Developing Intellectually Sound Interpretations

Students will be able to develop their own well-informed, critically provocative, and intellectually sound interpretations of different cinematic texts and be able to defend and expand these interpretations in classroom discussions and in writing assignments. A list of these specific skills can be found in the grading rubric for each of these assignments.

Increasing Cultural Literacy

Because the course is structured around a variety of historical, theoretical, and cultural questions, students will develop and demonstrate an increased cultural literacy as they grapple with questions of ideology, identity, class, race, gender and memory in the context of the German and Scandinavian cultures and film history.

Becoming more Aware of Student habits of Seeing and Thinking

As students are confronted with the startling and strange and intriguing ways that Germans and Scandinavians represent the world, they will become more aware of their own habits of seeing and thinking. In several of their written assignments and class discussions, students will demonstrate their ability to thoughtfully reflect upon these different visual practices and to engage these different ideas into meaningful dialogue.

Top

Cultural History of the Vikings

History of art, literature, mythology, culture, and society in medieval Scandinavia.

SCAND 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Medieval Nordic Culture

Students will learn to recognize and critically reflect upon key dimensions of literature, art, society, culture, and history of Scandinavia in the medieval era, with an emphasis on appreciating the culture's literature, mythology, and visual art.

Analytic Skills and Writing

Students will develop analytic skills through class discussion, oral presentations, and/or writing that demonstrate mature thinking, clarity of expression, the orderly development of ideas, and vigorous argument regarding the art, history, and historical reception of Viking culture.

Life-Long Learning

Students will develop attitudes and habits of thought, expression, and study that will supplement other humanities and non-humanities degrees and also encourage life-long learning and continued contact with the informed study of art, literature, and Nordic culture.

Top

Works of Hans Christian Andersen

Study of the life, works, and times of Danish author Hans Christian Andersen.

SCAND 337

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Historical and Cultural Context

Students will know and understand the general historical context that informs the authorship of Hans Christian Andersen as well as the various theoretical contexts that have been instrumental in the reception of his work.

Work of H.C. Andersen

Students will know and understand basic dimensions of H.C. Andersen's authorship, not only his fairytale production, but also his poetry, novelistic production, and his autobiographical work.

Critical Thinking and Writing

Students will develop and implement critical thinking skills through close readings and interpretations of H.C. Andersen's literary production. This will be accomplished through various assignments and learning measures.

Topics in Scandinavian Studies

Topic varies. Typical topics might be folklore, culture, music, film, emigration, art and design, political and economic problems, literature in translation, etc. Includes International Cinema.

SCAND 344R

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Taught	

Course Outcomes

Intellectual History

Students will learn to recognize and critically reflect upon key dimensions of Nordic literature, art, society, culture, and history, with an emphasis on appreciating these cultures' artistic production and intellectual histories.

Analytic Skills and Expression

Students will develop analytic skills through class discussion, oral presentations, and/or writing assignments that demonstrate mature thinking, clarity of expression, the orderly development of ideas, and vigorous argument.

Habits of Thought

Students will develop attitudes and habits of thought, expression, and study that will supplement other humanities and non-humanities degrees and also encourage life-long learning and continued contact with the informed study of Nordic culture.

Methods in Teaching Nordic Languages

Prior or concurrent enrollment in this course required for student instructors of Nordic languages. Focuses on teaching skills specific to foreign language instruction in beginning and intermediate language courses.

SCAND 377

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Must have an assignment teaching a Nordic language class or instructor's consent.
Taught	Fall

Course Outcomes

Language Teaching Skills

Students in this class will develop the skills to effectively teach listening comprehension, reading proficiency, oral proficiency, writing proficiency, and cultural proficiency in beginning language classes.

General Teaching skills

Students will learn effective communication and teaching skills that are not specific only to language instruction but applicable to a wide range of teaching environments in formal and informal settings.

Old Norse

Grammar and exercises. Readings in Old Norse literature.

SCAND 429

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Knowledge of a modern Scandinavian language.
Note	Returned missionaries from Iceland or those with equivalent experience should enroll in IcInd 429.
Taught	Winter odd years

Course Outcomes

Cultural-Linguistic context

Students will develop an understanding of the linguistic and literary features of Old Norse-Icelandic.

Linguistic Skills

Students will develop a sound understanding of Old Norse-Icelandic grammar (morphology, phonology, syntax), in part with reference to that of modern continental Scandinavian languages. They will also learn a substantial vocabulary of Old Norse-Icelandic, again with attention to cognates in modern Scandinavian and Germanic languages. They will develop a capacity to recognize the various morphological and phonological manifestations of the same word.

Reading and Analytical Skills

Students will develop the capacity to read and understand Old Norse-Icelandic texts with reasonable facility and develop an appreciation for the richness and variety of Old Norse-Icelandic literature through close readings from a variety of sagas and poetry.

Top

Cultural History of Scandinavia

Scandinavian culture from the Vikings to the present.

SCAND 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Works may be read in English translation.
Taught	Fall

Course Outcomes

Analysis

Students will be able to read, critique and write formal analyses of key works (literary, cinematic, and artistic) from Scandinavian cultural history.

Nordic Cultural History

Students will develop a familiarity with some of the major works and movements from Scandinavian cultural history as well as a basic introduction to the scholarly discussions surrounding them. They will develop and demonstrate research skills as they complete a series of written assignments and presentations.

Analytic Skills

Students will be able to develop their own well-informed, critically provocative, and intellectually sound interpretations of different texts and be able to defend and expand these interpretations in classroom discussions and in writing assignments.

Cultural Literacy

Because the course is structured around a variety of historical, theoretical, and cultural questions, students will develop and demonstrate an increased cultural literacy as they grapple with questions of ideology, identity, class, race, gender and memory in the context of the Scandinavian cultural history.

Lifelong Learning

As students are confronted with the startling and strange and intriguing ways that Scandinavians represent the world, they will become more aware of their own habits of seeing and thinking. In several of their written assignments and class discussions, students will demonstrate their ability to thoughtfully reflect upon these different literary and visual practices and engage these different ideas in meaningful dialogue.

Seminar in Scandinavian Studies

Topics vary. Includes International Cinema.

SCAND 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.5 Lab
Prerequisites	Reading knowledge of at least one Scandinavian language.
Taught	

Course Outcomes

Specialization

Students will learn to recognize and critically reflect upon a significant dimension of Nordic culture.

Research Arguments and Methodologies

Students will be able to produce original arguments based on sound research methodology.

Subject-Specific Outcomes

Each iteration of this course has more specific outcomes based on the subject matter at hand; those additional objectives are articulated in each instructor's customized syllabus.

Critical Thinking, Analysis, and Writing

Students will demonstrate the ability to analyze cultural artifacts, think critically, and write clearly and persuasively.

Life-Long Learning

Develop a life-long appreciation of Nordic cultures and develop attitudes and habits of thought and study that encourage life-long learning and continued contact with the informed study of culture.

Directed Readings in Scandinavian

Directed individual study.

SCAND 491R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Recommended	Written plan of study approved by both instructor and program coordinator.
Taught	

Course Outcomes

Subject-Specific Outcomes

Each iteration of this course has more specific outcomes based on the subject matter at hand and related to a specific dimension of Nordic culture; those additional objectives are articulated in the contract developed between instructor and student.

Specialization

Students will learn to recognize and critically reflect upon a significant dimension of Nordic culture.

Critical Thinking and Analysis

Students will demonstrate the ability to analyze cultural artifacts and think critically.

Top

Strengthening Marriage and Family: Proclamation Principles and Scholarship

Understanding, applying, and sharing principles of successful marriage and family life from the LDS proclamation on the family, using sacred and scholarly perspectives.

SFL 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Content and Theory

- Critically understand your testimony of the principles of the Restored Gospel pertaining to marriage, home and family.
- Synthesize and be able to apply principles from revealed truth and supportive scholarship to strengthen marriage, home, and family life.
- Be able to confidently share and defend principles of successful marriage, home and family life using support from sacred and scholarly sources.

Effective Writing and Analysis

- Demonstrate improvement in writing skills, speaking, and critical thinking skills to be more effective advocates for marriage, home, and family in a variety of settings.

Top

Introduction to School of Family Life

Required seminar for all students entering the major. Overview of curriculum and major requirements, faculty research programs and specialties, campus resources, future opportunities, and career possibilities.

SFL 101

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Theory

- Create a realistic major or minor plan in the School of Family Life.
- Identify possible post-graduation pathways with a major in the School of Family Life.
- Participate in and develop a sense of community that includes both faculty and students.
- Be able to utilize important resources to become an effective learner during college and after.

Top

Introduction to Interiors

Interior design, emphasizing history and development of the American home.

SFL 102

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Content and Learning

- Become life-long observers of design and the designed environment.
- Develop a basic vocabulary of design through reading, class discussion, class demonstration and memorization.
- Increase awareness and synthesize good and poor design on well being and aesthetic response by experiencing design first-hand on campus and in the community and by responding in learning journals.
- Develop an understanding of design as a problem-solving process through discussion, first-hand experience, and by responding in learning journals.
- Develop a basic vocabulary of architectural stylistic elements and an appreciation for the historic development of the American home through reading, discussion, visual presentation, site visits, and by responding in learning journals.

Food Preparation in the Home

Principles of cooking and skill development in food preparation techniques. Lab required.

SFL 110

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Content and Learning

Understand food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home use.
Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.
Understand and apply knowledge of nutrition to food preparation.
Develop confidence in selecting and following recipes.
Demonstrate proper use of equipment for baking and cooking.

Honors: Introduction to Family Processes

Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

SFL 160

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Content and Theory

- Critically examine the main theoretical frameworks used in the family sciences.
- Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.
- Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.

Research and Evaluation Methodology

- Identify and discuss how researchers uniquely study families and family systems.

Introduction to Family Processes

Ways of strengthening family life by understanding such family processes as generations, emotions, communication, and rituals.

SFL 160

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter
Offered	Honors also; Independent Study also.

Course Outcomes

Content and Theory

- Critically examine the main theoretical frameworks used in the family sciences.
- Demonstrate understanding of basic terms, concepts, and ideas used to describe family systems.
- Apply family systems ideas and concepts to your own family (past and future) in order to learn how they might improve your own family well-being.

Research and Evaluation Methodology

- Identify and discuss how researchers uniquely study families and family systems.

Top

Beginning Clothing Construction

Basics of using a sewing machine for making apparel.

SFL 185R

Hours	3.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	None
Note	Student-supplied materials required.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Content and Learning

- Develop confidence and skill in using a sewing machine and other related items of equipment.
- Learn and use correct terminology of course content.
- Practice following instructions, both oral and written.
- Learn to enjoy sewing and feel satisfaction in creating articles of clothing.
- Recognize good and poor quality workmanship.
- Produce garments that are highly/appropriately wearable.
- Complete a set of samples prior to executing the technique in a project.

Top

Design in the Home

Intermediate application of elements and principles of design in the home.

SFL 202

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	SFL 102
Taught	Fall, Winter, Spring

Course Outcomes

Content and Learning

- Develop or reinforce basic vocabulary of design.
- Increase awareness of design possibilities and the aesthetic and spiritual effect of different designs.
- Develop an understanding of design as a problem-solving process.
- Become a life-long observer of design and the designed environment.

Top

Home and Family Living

Principles for creating an optimal home environment for individual, marital, and family development; secular and sacred significance of temporal activities in the home; the influence of context and family processes on outcomes.

SFL 205

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Human Development

Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

SFL 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Content and Theory

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)
- Critically apply information learned in class to your own life.
- Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.
- Acquire a broad base of knowledge of human development.
- Be conversant with the major human development theories as well as their strengths and weaknesses.

Effective Writing and Analysis

Improve your writing and critical thinking skills.

Research and Evaluation Methodologies

Understand the research methodology utilized in the study of human development.

Advanced Food Preparation

Lecture, readings, and intense practicum in food preparation, food preservation and storage, presentation, consumerism, equipment usage, and social/familial aspects of food. Lab required.

SFL 215

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	SFL 110
Note	Fee.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content and Learning

- Understand advanced food preparation principles and techniques and apply them while mixing, cooking, and baking food products for home and commercial use.
- Identify and prevent food borne illness and safety hazards with appropriate food handling and preparation techniques.
- Apply knowledge of nutrition to food preparation.
- Develop confidence in selecting, presenting, and following recipes.
- Learn proper use of equipment for baking and cooking.
- Identify and discuss cultural influences in the use of foods throughout the world.

Top

Foundations of Developmentally Appropriate Practices in Programs for Young Children

Historical, philosophical, organizational, and curricular issues related to developmentally appropriate practices in programs for young children.

SFL 221

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	SFL 210
Note	Due to enrollment constraints, SFL 221 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.
Taught	Fall, Winter

Course Outcomes

Content and Theory

Obtain an historical perspective of early childhood and a philosophical foundation in developmentally appropriate practices.
Become conversant with the developmentally appropriate practice standards published by NAEYC (National Association for the Education of Young Children) and understand how they apply to making effective educational decisions that will benefit children and enhance their growth and development.
Communicate the principles of developmentally appropriate practices to parents and colleagues.
Understand how to create classrooms that incorporate the five guidelines or points of the "Mariner's Star":

1. creating a caring community of learners
2. teaching to enhance development and learning
3. constructing an appropriate curriculum
4. assessing children's learning and development
5. establishing reciprocal relationships with families.

Gain a functional understanding of how teachers within a developmental model implement appropriate guidance and classroom management strategies, function in "lead" and "support" teacher roles, create and modify effective learning environments, facilitate and scaffold learning and, develop strategies to meet the diversity of needs in the children and families they serve.

Research and Evaluation Methodologies

- Utilize observational opportunities to assess teaching roles, learning environments, and young children's individual and/or group learning.

Practicum in Developmentally Appropriate Practices

Initial practicum with young children to increase understanding of socialization and learning processes, to create meaningful learning opportunities, and to implement developmentally appropriate practices.

SFL 222

Hours	3.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	SFL 240; SFL 221 (must be taken within 5 years of SFL 222).
Note	Due to enrollment constraints, SFL 222 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.
Taught	Fall, Winter, Summer

Course Outcomes

Research and Evaluation Methodologies

Demonstrate understanding of how children develop and learn by assisting in and developing learning opportunities that support social, intellectual and personal growth.
Develop instructional strategies for teaching children in small group and large group classroom settings.
Evaluate and record student learning to assess instructional goals and objectives to drive continuing classroom instruction
Use understanding of individual and group behavior to establish a learning environment that encourages active engagement, positive interactions and self motivation.
Reflectively evaluate daily and weekly goals, assignment objectives and program expectations to refine personal development in teaching.
Demonstrate professional habits that will guide interpersonal and caree choices.

Top

Preparation for Marriage

Factors related to quality relationships, mate selection, and the transition into marriage.

SFL 223

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Content and Learning

Understand the Lord's "divine design" (Proc. ¶ 7) for marriage relationships (e.g., the nature of the marriage covenant, equal partnership, stewardships of husbands & wives, etc).
Increase awareness of marriage as a social institution.
Become sensitized to the modern threats to marriage.
Increase understanding of the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.
Increase awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.
Enhance spiritual awareness and academic skills in order to help them weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship.
Critically explicate your awareness of marriage as a social institution.
Identify and be sensitive to modern cultural threats to marriage.
Be able to grasp and understand the LDS doctrines of marriage, including prophetic counsel on dating, courtship, intimacy, weddings, finances, divorce, and other aspects of the marital stewardship.
Increase your awareness of the factors that social science research has shown to contribute to the formation and maintenance of healthy and stable marriages.
Enhance your spiritual awareness and academic skills in order to help you critically weigh scholarly and contemporary ideas about marriage relationships and use both faith and scholarship to "hold fast to that which is good" (1Thess. 5:21).

Marriage Enhancement

Enhancing marital communication skills, conflict resolution styles, intimacy, stress management, and developing a shared relationship vision using social science theories and research findings.

SFL 224

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Married, engaged, and couples seriously dating are encouraged to enroll together.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Student Learning Outcomes

SFL 224: At the end of this course students will be able to:

1. Define what a gospel principle is and is not.
2. Define what a social science principle is and is not
3. Gain a greater understanding and appreciation of your own marriage strengths and weaknesses.
4. Understand and be able to apply four different styles of resolving conflict in marriage.
5. Recognize examples of the different styles of resolving conflict.
6. Provide informed advise for each marital style reviewed in the class.
7. Understand principles that help strengthen and hold marriages together.
8. Identify behaviors and attitudes that create stumbling blocks in marriage relationships.
9. Demonstrate your ability to integrate and synthesize social science principles of conduct with those taught by the leaders of the Church of Jesus Christ of Latter-day Saints in a manner that helps you to succeed in marriage.
10. Understand the nature of the threats to the traditional family today and the consequences that will come if these changes happen.
11. Demonstrate through reading the Olson text and your writing skills that you have an in-depth understanding your own marriage.
12. Demonstrate your ability to effectively teach the principles you learn from the Olson text to others.

Housing the Family

Social-psychological, economic, and political aspects of housing families; making selections that will enhance the quality of housing, increase productivity, and protect the health, safety, and well-being of the family across the life cycle.

SFL 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Learning

- Become versed in selecting and purchasing homes, including home quality, location and floor plans, building and functional and support systems, evaluation, purchase financing options, responsibilities and obligations of home ownership. This includes online research and in-person examination of model homes to learn about features, benefits and limitations of home layout and quality.
- Understand theory and application of interior design concepts and the ways these relate to creating a home that meets the physical, emotional and psychological needs of the family.
- Critically compare features, benefits and pricing and selecting large home expenditures such as appliances, furnishings, lighting, textile products, flooring, window coverings and accessories through book learning, class lectures, on-line comparisons and field trip experiences.
- Become competent in e-design floor plan software programs in the selection, costing and placement of interior furnishing components, including cross-referencing and sourcing skills.
- Evaluate equally elements of living the gospel in all housing and family living decisions through preparation of assigned gospel living at home topics presented in class.
- Demonstrate competency in learning from each other through in class participation, field trips, in-class presentations, and through interactive teacher presentations.

Parenting and Child Guidance

Theories and skills related to quality parent-child relationships.

SFL 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Content and Theory

Critically examine theories of overall parenting styles and the impact of these styles upon optimal parenting.
Critically examine parenting practices within the overall parenting styles and the impact of these practices upon optimal parenting.
Identify effective parenting practices in the context of various life stages.
Understand parenting principles that may heighten professional and/or parental potential.

Effective Writing and Analysis

Synthesize in writing an analysis of parenting styles and practices of your family of origin and how you may modify those styles and practices with the principles obtained in this class.
Examine and write in depth a specific area of interest related to parenting styles and practices.

Family Finance

Introduction to time value of money, budgeting, saving, credit, taxes, housing, insurance, and investing emphasizing practical application in the home.

SFL 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Learning

Identify areas of financial risk in your personal lives.
Differentiate between a good financial decision and a poor financial decision.
Use financial calculators or financial equations for time value of money to classify various financial products to determine the most appropriate product for their family given their current financial situation.
Generate a family budget and evaluate home and automobile purchasing and financing options.
Analyze and plan for present and future needs by understanding investing option available.

Top

Consumerism and the Marketplace for Secondary Teachers

A pre-service preparation course designed to prepare FACSED classroom teachers to teach content regarding dynamics of consumerism and the marketplace and develop skills for implementing a discipline-based approach for teaching consumerism in secondary schools.

SFL 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Consumer Rights

Identify consumer rights, responsibilities, and remedies and identify effective practices for purchasing consumer goods and services.

Legal and ethical considerations

Synthesize legal and ethical considerations of being an informed consumer in today's market.

Knowledge of private and government agencies

Identify and explain the purposes and features of private and government agencies providing assistance, information, and published materials that are consumer resources for decision making.

Understanding roles of labels and warranties

Distinguish the roles of labels, warranties, guarantees, and advocate groups in wise consumer behavior.

Interaction of how consumer agencies interact

Determine how government, business, and the consumer interact for the mutual benefit of each other in the marketplace.

How to make prudent selection of services

Analyze prudent steps in the selection of healthcare, childcare, elder care, repair services, household materials, automobiles, toys, and equipment.

Ways to avoid identity theft and fraud

Describe ways to avoid identity theft, fraud, deceptions, and rip-offs.

Understanding financial contracts

Explain the importance of understanding financial contracts (disclosure information, grace period, payment penalties, method of interest calculation).

Perform market analysis

Perform a market analysis exercise and exercise better shopping practices.

Top

Exploration of Teaching: Family and Consumer Sciences

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

SFL 276R

Hours	3.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major-area preadmission requirements; FBI fingerprint and background clearance.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Dynamics of Clothing

Introduction to the influences, meanings, and dimensions of individual clothing selection processes and its effect on families, communities, and cultures.

SFL 280

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Clothing and Meaning

Develop critical judgment about the effects of clothing upon the physical, social, psychological, and economic well-being of individuals, families, and social groups.
Understand the terminology, concepts, and theories in clothing, fashion, and consumer behavior.
Identify and understand the interrelationships among areas in the fashion industry and become aware of related careers.
Learn the history of fashion through the 20th century and influential fashion designers and capitals.
Become acquainted with types of research conducted in the field.
Develop critical thinking skills, and use these skills to communicate ideas related to clothing in the family.

Textiles

Natural and synthetic textile fibers, yarns, fabric construction, dyes, and finishes. Care and performance of textile fabrics for clothing and household use.

SFL 282

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Learning

Distinguish between fibers, yarns and fabrics.
Predict behavior of fabric based on fiber content, as much as possible without having studied finishes and dying. That is, they will be able to use fiber and yarn and weave or knit properties to predict behavior.
Choose among alternatives in the creation of simple yarns for specific purposes.
Distinguish a woven fabric from a knitted one.
Identify the basic weaves used in woven fabrics, and the 2 basic classes of knits, with several of the subclasses of common knits.
Utilize correct terminology for the many items and processes used in the textile industry.
Make choices among the many variables to create a particular fabric for a particular use.
Identify forty-six common fabrics on sight.

Intermediate Clothing Construction

Assessing and executing various construction methods, including construction of several full-scale garments.

SFL 287

Hours	3.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	SFL 185R or equivalent sewing skills.
Note	Student-supplied materials required. Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Content and Learning

- Increase your ability in making appropriate choices among various construction methods given various fabric and style variables
- Strengthen and broaden your experience in apparel construction techniques.
- Learn and use correct/appropriate construction terminology
- Recognize and describe quality characteristics of various construction techniques, understand and apply processes necessary to produce them, and accurately evaluate resulting quality.
- Create examples of construction techniques which illustrate personal skill improvement over the course of the semester.
- Assemble a sample portfolio with materials prepared, mounted, and presented professionally.
- Continue to feel a sense of accomplishment and personal satisfaction in sewing.
- Understand and apply garment assembly sequencing as it relates to fabric and style variables.
- Demonstrate the “sample making” teaching approach and the “garment making” teaching approach in order to evaluate and have both in the professional repertoire.

Top

Critical Inquiry and Research Methods

Philosophies of critical inquiry. Principles of designing, conducting, and reporting social science investigations.

SFL 290

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Evaluate Research Designs

Evaluate the strengths and weaknesses of different methods of inquiry used in investigating the human contexts of human development, home, and family.

Conduct a Research Study

Conduct a research study and write up the results.

Practical Experience with Research

Gain practical experience in using research methods.

Top

Forming Marital Relationships

Critical analysis of literature regarding dating, spouse selection, and transition to marriage processes leading to successful marriage. Preparation for research and teaching in the field.

SFL 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Content and Theory

Critically explore and consider ideas and theories about why people form romantic relationships.
Critically examine current cultural trends in relationship formation, duration, and dissolution.
Synthesize and explore scientific findings about why marriages may succeed or fail.
Understand principles that will allow you to integrate the information from class into your personal belief system so that it is useful for you in your professional and personal endeavors while strengthening your beliefs in the gospel.

Top

History of Interior Design and Architecture 1

History of interior design, architecture, and furnishings from ancient Egypt to beaux arts movement. French, English, and American design.

SFL 328

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Content and Learning

Identify important motifs, interior, and exterior architectural styles from each of the historical periods covered in class.
Identify furniture, designers, and minor/decorative arts from each of the historical periods covered in class.
Understand the relationship of the design periods to history and culture.

History of Interior Design and Architecture 2

Furniture, interior design, and architecture from Industrial Revolution to present.

SFL 329

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Housing Styles

Students will identify the popular types of housing styles of 1900-2011. Students will explain how each style was influenced by political and economic factors

Architects

Students will identify the architects that had an impact on the various periods of architecture.

Influence on Culture

Students will analyze how the various styles of architecture were influenced by society and culture.

Preprofessional Preparation for Marriage and Family Therapy

Overview of profession, licensing, and application to graduate study.

SFL 330

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Theory

Review and evaluate at least two accredited Marriage and Family Therapy programs.
Write a letter of application to an accredited Marriage and Family Therapy program of your choice
Have letter of application to an accredited Marriage and Family Therapy program reviewed by at least one Marriage and Family Therapy faculty member.
Become familiar with career options in Marriage and Family Therapy and begin to formulate career choices.

Infant Development in the Family

Conception, prenatal development, pregnancy. Physical, cognitive, and social development of the first twenty-four months. Implications for guidance and care in the family.

SFL 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Human Development Content and Theory

Critically examine the needs, development, and important variation in development during the first 2-3 years of life.

Research and Evaluation Methodologies

Develop skills for critical evaluation of research and theory in the area of infant development.

Human Development Content and Theory

Understand the underlying developmental processes associated with dramatic changes that occur during infancy with the family as an important backdrop.

Effective Writing and Analysis

Critically synthesize and write in depth a specific area of interest related to infant development.

(SFL-Soc 318) Adolescent Development in the Family and Other Social Contexts

Examining the developmental and social contexts of adolescents with emphasis on the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

SFL 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Content and Theory

Critically examine and discuss selected topics in adolescent development, as well as being able to apply the information and skills learned in this class to your own life.
Identify and discuss the major theories of adolescent development, as well as the various research methods used in the study of adolescent development.
Understand the important developmental changes that young people experience during this period and during their transition to adulthood.
Discuss why at-risk issues are so pronounced during this period and understand prevention and intervention measures that can be taken by families to help them cope with this transition.

Effective Writing and Analysis

Synthesize (both in thought and writing) information on adolescent development, and apply this information to "real" adolescents with whom you come into contact.

Adult Development and Aging in the Family

Adjustments to physical, emotional, social, and economic changes. Needs arising from changes in family relationships, living arrangements, and employment; retirement planning.

SFL 334

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 160
Taught	Fall, Winter

Course Outcomes

Content and Learning

Interact with older adults (parents, grandparents, neighbors, ward members, research participants, clients, etc.) in an informed (accurate knowledge of relevant issues) and sensitive (aware of "life course" perspective) manner.
Apply complex interactions of gerontology concepts to real-life situations, including current issues in local, national, and world communities.
Understand and articulate basic age-related biological, psychological, and sociological processes and learn how to access and evaluate information about those age-related experiences.
Synthesize course concepts through observing, serving, and interacting with older adults in the community.

Top

Family Adaptation and Resiliency

Understanding family resiliency and building family strengths in normative transitions (birth, death, job) and nonnormative transitions (divorce, disability, remarriage, poverty, violence). Developing familial, social, religious, and instrumental resources to adapt positively to these transitions.

SFL 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Content and Theory

- Articulate the main conceptual frameworks which help us understand how families cope with stress.
- Demonstrate how a wide range of life events influence families both positively and negatively.
- Demonstrate what factors contribute to whether families respond positively or negatively to life events and transitions.
- Understand and apply how gospel principles regarding the family, charity, faith and trials interconnect with scholarly research on family stress.

Effective Writing and Analysis

- Demonstrate improvement in course content writing skills.

Top

Theories in Family Perspective

Introduction of major theoretical perspectives and of philosophical issues. Readings include representative papers applying theoretical and philosophic tenets.

SFL 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Content and Theory

Recognize important philosophical foundations of social research methods and theory.
Identify and understand the basic components of eight family theories.
Compare and contrast the philosophical underpinnings (assumptions and implications) of theories.

Research and Evaluation Methodologies

- Apply theory to family focused research.

Effective Writing and Analysis

- Represent your own ideas about family life using theoretical language.
- Write more clearly about your ideas and the ideas of other family social scientists.

Family Meal Management

Organizing and managing time, energy, finance, and nutrition in planning, preparing, and serving family meals; ethnic and cultural diversity in etiquette and meal planning. Lab required.

SFL 340

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	SFL 110 or instructor's consent.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Content and Learning

- Develop a philosophy of why meal preparation and consumption at the family table is an important component in development and stability of families.
- Plan attractive meals with consideration for nutritional adequacy, income level, social, cultural, psychological, palatability, and aesthetic factors.
- Employ sanitation standards and safety procedures in food handling and in the use and care of kitchen utensils, equipment, and food storage.
- Demonstrate an understanding of factors affecting food habits, meal consumption patterns, and trends in food cost.
- Utilize managerial skills and available resources in food purchasing, and meal planning, preparation, and service

Top

Family Life in World Religions

How families of various faiths live their religion in their homes, with emphasis on practical, day-to-day home and family life rather than on abstract theology.

SFL 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Content and Theory

Critically evaluate how families of other faiths live their faith in their homes.
Synthesize and give thoughtful consideration on how to best to live LDS beliefs and practices in day-to-day home life.
Evaluate and synthesize how to learn optimal characteristics from people of other faiths.
Demonstrate critical thinking skills on practical living.

Top

Socialization Across Childhood

Processes and sequences of social development across childhood.

SFL 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Content and Theory

Acquire a base of knowledge of how family, peer, and media socialization affects the social development of children and adolescents.
Critically examine principles that are useful in caring for the children under your stewardship.

Effective Writing and Analysis

Develop professional writing skills by working with writing fellows and your instructor to produce a high-quality review of research in a particular domain of social development and/or socialization research.
Develop the ability to translate empirical knowledge for a lay-audience by working with writing fellows and your instructor to produce a high-quality lay-audience brochure/article.

Research and Evaluation Methodologies

Develop academic reading skills via frequent exposure to professional research articles.
Critically evaluate several central debates that are currently being debated in child psychology (particularly regarding child socialization).

Cognitive Development

Development of mental abilities; effects of maturation and learning on memory, perception, attention processes, intelligence, social cognition.

SFL 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Content and Theory

- Critically examine and discuss selected topics in cognitive development.
- Identify and discuss selected theories and theoretical models of cognitive development, as well as the various research methods used in the study of cognitive develop. Understand how cognitive development changes throughout life span.

Research and Evaluation Methodologies

Evaluate in empirical research studies a specific topic in cognitive development and synthesize in each study the research questions, methodology, findings, and discussions of the findings.

Effective Writing and Analysis

- Succinctly summarize in writing a collection of empirical studies on a topic in cognitive development of your interest.

Top

Cross-Cultural Family and Human Development

Comparative study of familial, social, and other factors in development.

SFL 354

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & SFL 290; SFL 160 or SFL 210 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Content and Theory

Critically evaluate the importance of considering gender as an important contextual factor for understanding human development and relationships.
Develop awareness of one's own cultural and gender-based values and beliefs.
Recognize and explicate biases inherent in the perspective of the dominant U.S. culture.
Engage in class (and out-of-class) discussions about class topics
Be better positioned as a citizen of the world, in terms of valuing diversity and being able to analyze world cultures for how they might benefit (or cost) individual and family development.

Top

Language Development

Philosophical, social, intellectual, and emotional contexts of language acquisition and usage.

SFL 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Content and Theory

Critically evaluate the development of language and communication in children.
Be able to analyze basic theoretical and empirical issues and concepts associated with language acquisition.
Understand and discuss communicative development in infancy, semantic and syntactic development, language and literacy in the school years.

Media, Family, and Human Development

Aspects of media and their potential effects on family interactions and human development across the lifespan.

SFL 358

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Content and Theory

Discuss the frequency of use of forms of media.
Describe the major theories and associated research that are used to describe media research.
Critically examine media theory and research in the field and apply course material to your own experiences.
Understand how media may influence human development.
Discuss how media can shape the family.

Research and Evaluation Methodologies

- Demonstrate research skills by researching a topic area relevant to the media.

Top

Child Life in Healthcare Settings

Roles of child life specialists in preparing children and families for healthcare experiences. Content includes psychosocial and developmental needs of children, adolescents, and families in healthcare settings and impact of illness, injury, and hospitalization on the child and family.

SFL 359

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 210
Recommended	SFL 331, 333, 351.
Taught	Fall, Winter

Course Outcomes

Human Development Content and Theory

Describe the contents of the official documents of the Child Life Council (CLC), including the Code of Ethical Responsibility, Child Life Competencies, and Standards of Clinical Practice, the Child Life Mission, Values and Vision Statements, and the Code of Professional Practice.

Human Development Content and Theory

Describe the contents of the official documents of the Child Life Council (CLC), including the Code of Ethical Responsibility, Child Life Competencies, and Standards of Clinical Practice, the Child Life Mission, Values and Vision Statements, and the Code of Professional Practice.
Identify the elements of child life practice in direct and non-direct services in pediatric health care including a historical review of the profession and its development in the evolution of children's healthcare.
Use developmental theory to assess the impact of illness, injury and health care on patients and families, identifying the stressors and developmental and psychosocial treatment issues that affect the healthcare experience of a child and family including siblings.
Be able to apply the key principles of patient- and family-centered care, including principles of respect and dignity, information sharing, supporting participation in care, and collaboration in relationship to child life practice.
Compare both historical and current perspectives on the rationale for, and techniques and outcomes of preparation, as well as accepted preparation methods for healthcare encounters and life-changing events.

Human Development Content and Theory

Identify the elements of child life practice in direct and non-direct services in pediatric health care including a historical review of the profession and its development in the evolution of children’s healthcare.

Human Development Content and Theory

Use developmental theory to assess the impact of illness, injury and health care on patients and families, identifying the stressors and developmental and psychosocial treatment issues that

affect the healthcare experience of a child and family including siblings.

Human Development Content and Theory

Be able to apply the key principles of patient- and family-centered care, including principles of respect and dignity, information sharing, supporting participation in care, and collaboration in relationship to child life practice.

Human Development Content and Theory

Compare both historical and current perspectives on the rationale for, and techniques and outcomes of preparation, as well as accepted preparation methods for healthcare encounters and life-changing events.

Advanced Family Finance

Time value of money principles applied to family finance.

SFL 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 260
Taught	

Course Outcomes

Content and Learning

- Develop advanced critical analytical skills, financial knowledge, and planning capabilities applied to money in the family.
- Demonstrate knowledge of “best principles and practices” that simplify financial life, and builds wealth in ways that strengthen one’s family, community, and financial future.

Research and Methodologies

Critically evaluate theories and methods used in family and personal finance research as reported in scientific and popular literature.

Work, Family, and Community: Exploring Interconnections

How family life and employment interact with each other and with other community contexts (school, church, government, recreation, media, the economy, and health care, etc.) in patterns of mutual influence.

SFL 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	

Course Outcomes

Content and Theory

Critically examine the reciprocal interactions of the course content concerning marriages, homes, and families.
Analyze how current events, trends, and changes in these contexts affect marriages, homes, and families.
Demonstrate writing, critical thinking, problem-solving, and presentation skills to be better prepared to personally make a difference in the contexts discussed in class.
Understand how to better manage your own marriage, home, and family as they interface with the contexts discussed in class.
Analyze how to be an effective advocate for shaping the contexts covered in class to be more supportive of strong marriages, homes, and families.

Top

Teaching Methods and Instruction in Family and Consumer Sciences Education

Developing meaningful and engaging instruction for secondary students; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

SFL 377

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	SFL 276R
Taught	Fall, Winter

Course Outcomes

Standard #1: Learner Development

- The candidate understands cognitive, linguistic, social, emotional and physical areas of student development.

Standard #2: Learning Differences

- The candidate understands individual learner differences and cultural and linguistic diversity.

Standard #3: Learning Environments

- The candidate works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.

Standard #4: Content Knowledge

- The candidate understands the central concepts, tools of inquiry, and structures of the discipline.

Standard #5: Assessment

- The candidate uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in content standards have been met.

Standard #6: Instructional Planning

- The candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content areas, Core Curriculum standards, instructional best practices, and the community content.

Standard #7: Instructional Strategies

- The candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.

Standard #8: Reflection and Continuous Growth

- The candidate is a reflective practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.

Standard #9: Leadership and Collaboration

- The candidate is a leader who engages collaboratively with learners, families, colleagues, and community members to build a shared vision and supportive professional culture focused on student growth and success

Standard #10: Professional and Ethical Behavior

- The candidate demonstrates the highest standard of legal, moral, and ethical conduct as specified in Utah State Board Rule R277-515.

Practicum in Secondary Education

Field-based teaching experience directed at helping prospective teachers learn to give demonstrations, prepare for lab experiences, and execute the experience using meaningful and engaging instruction for students in the Family and Consumer Sciences content.

SFL 378

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	SFL 276R
Recommended	SFL 110, 185, and 276R.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Management

Manage a food or clothing preparation lab by purchasing, maintaining, and caring for equipment and supplies.

Organization

Organize the labs so that they operate in the utmost efficiency through scheduling division of labor.

Teach and Assist

Assist and teach in lectures and labs demonstrating knowledge of food and clothing content through proper care and use of equipment, preparation principles and techniques.

Assessment

The student will teach a lesson using best practice strategies and be assessed on that lesson based on the BYU CPAS Standards.

History of Apparel

Costume, clothing, and textiles as mediums for understanding the stages and states of individuals, families, and societies; apparel diversity and cultural identity.

SFL 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Content and Learning

- Critically analyze how western cultural heritage is evidenced in the evolution of clothing through time periods.
- Be able to distinguish clothing from various points in time by their characteristics and details.
- Be able to recognize the importance of catalytic events, people and technological developments and how they influenced fashion.
- Demonstrate how to use vocabulary and terminology specific to particular periods of time in order that we may more accurately express ourselves and communicate clearly.
- Understand how the value systems and beliefs of societies are reflected in their clothing.
- Be able to conduct personal research of interest and share those findings in a professional manner with the class.

Top

Advanced Clothing Studies: Patternmaking

Flat pattern design, basic drafting, and basic draping for women's apparel.

SFL 387

Hours	3.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	SFL 287
Note	Student-supplied materials required.
Taught	Fall, Winter

Course Outcomes

Content and Learning

- Understand and apply flat pattern principles and methods to create patterns for women's apparel.
- Demonstrate how to manipulate fabrics through draping to create basic styles for women's apparel.
- Demonstrate how to apply basic pattern drafting techniques to create basic patterns from measurements for women.
- Create a record of work done with accompanying examples of styles made in class.
- Demonstrate the use of correct terminology.
- Apply pattern making principles in fabric test items.

Special Topics in Family Life

Specific topics in home and family living, human development, marriage and family studies, or marriage and family therapy.

SFL 395R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Investigation of Special Topics

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in human development and family studies.

Top

Academic Internship

Supervised professional experiences linking academic learning with experience in the field.

SFL 399R

Hours	1.0 - 9.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Internship program coordinator's consent.
Note	Forty-five internship hours required per credit hour.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship

Complete a supervised internship in an employment setting or agency related to human development, marriage, family, or home.
Link academic learning and coursework with these professional experiences.
Complete a minimum of 45 hands-on hours per credit.

Addiction, Recovery, Healing in Marriage and Families

Addiction, recovery, and healing are examined in marriage and family context; beginning preparation for relationship-oriented addiction recovery counseling careers.

SFL 400

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & SFL 290 & STAT 121; instructor's consent for students from other departments.
Recommended	SFL 336.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Students Content and Theory

- Students will gain a compassionate as well as academic understanding of the nature and experience of addiction that informs them of how persons can assist in recovery in a helping role--learning both academically and from the firsthand perspectives of individuals, couples, and families struggling with addiction and striving for recovery.
- Students will be aware of clinical diagnostic criteria used by helping professionals to identify the presence of a substance or behavioral addiction or compulsion.
- Students will understand the numerous dimensions and dynamics contributing to powerlessness of addiction and will understand how that knowledge informs recovery work and intervention.
- Students will be able to evaluate couple/family relationships affected by addiction and each couple's/family's needs in recovery.
- Students will learn a model for recovery and healing in relationship context.
- Building on the entire course curriculum and experience students will be able to outline a process for individual recovery and relationship healing from addiction.

Research/Creative Works Practicum

Research/Creative works experience in a project directed by a faculty member.

SFL 403R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Research

Students will conduct research with a mentoring professor which may include literature reviews, data collection, data coding, data management, data analysis, constructing statistical tables, writing proposals for conferences, and writing manuscripts to be submitted for publication.

Administering Programs for Young Children

Strategies for planning and administering quality programs in settings for young children. Budgeting, staffing, accrediting, selecting equipment, etc.

SFL 420

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	SFL 222
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Evaluation Methodologies

Develop strategies for assessing, recording, and reporting children's progress as well as evaluating the overall effectiveness of the program.
Critically evaluate ways to contribute to the profession by addressing the individual needs of the families; influencing public policy; and becoming involved in research.

Content and Theory

Demonstrate how to operationalize appropriate curriculum based on your understanding of development and be able to critically design early childhood programs.
Plan the physical environment including financing and budgeting of an early childhood program.
Obtain information and guidelines on nutrition, health, and safety services for young children.

Biological Foundations of Human Development

Biological, genetic, and neurological foundations of human development and their interactions with family socialization processes.

SFL 449

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Content and Theory

- Understand how biological process influences human development.
- Understand and synthesize the intersections between biology, psychology, and behavior in a developmental context.

Research and Evaluation Methodologies

Critically examine and analyze current research in the areas of developmental psychobiology.

Effective Writing and Analysis

- Demonstrate critical thinking/writing skills.

Moral Development

Theories and applications of moral development, including moral reasoning, moral emotions, contextual factors, and socialization influences that influence moral decisions and moral behavior.

SFL 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Winter

Course Outcomes

Content and Theory

Critically examine and discuss selected topics in moral development, as well as being able to apply the information and skills learned in this class to your own life.
Understand the different constructs that contribute to moral development, such as cognition, emotion, identity, context, and culture.
Be able to discuss socialization influences that impact children's moral development, such as parents, peers, teachers, and media.

Research and Evaluation Methodologies

- Identify and discuss the major theories of moral development, as well as the various research methods used in the study of moral and prosocial development.

Effective Writing and Analysis

- Think and write in a synthesized, analytical fashion, combining information across sources rather than merely summarizing information.

Advanced Family Processes

Integrating theory, research, and application of ideas introduced in SFL 160, focusing on key theoretical points, how research is conducted and applied, communication patterns, ritualization, conflict, distance regulation, crises, stress, and building family strengths.

SFL 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Research and Methodology

Understand the research on family processes
Critically evaluate the research on family processes
Synthesize the research on family processes

Evaluative Writing

Create recommendations for family issues using your understanding, evaluation, and synthesis of the research on family processes.

Top

The Family and the Law

Legal environment of the family system, with emphasis on husband-wife and parent-child relationships, rights, and responsibilities.

SFL 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Content and Theory

Critically analyze the historical and practical application of the law to your family.
Critically analyze the profound implications that family law has on your relationships.
Critically analyze the legitimacy of laws governing unnerving and sometimes painful issues.
Be able to discuss sensitive issues different than your own in order to broaden your understanding as well as hone your ability to judge.
Understand and synthesize issues addressed in class such as marriage, adoption, infertility, divorce, addiction, etc.

Marital and Family Therapy/Enrichment Techniques

Theories and techniques. Professional family enrichment and therapy applied to couples and families.

SFL 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	Fall

Course Outcomes

Content and Theory

Analyze and assess marital and family behavior.Describe ways of modifying marital and family systems using both educational/enrichment approaches and therapy approaches.

Research and Evaluation Methodologies

Interview and evaluate couples and families.Use appropriately self-report measures.Observe marital and family behavior in meaningful ways.Set intervention goals based on observation and assessment.

Research and Evaluation Methodologies

Interview and evaluate couples and families.Use appropriately self-report measures.Observe marital and family behavior in meaningful ways.Set intervention goals based on observation and assessment.

Effective Writing and Analysis

Write reports describing interpersonal dynamics.

Effective Writing and Analysis

Write reports describing interpersonal dynamics.

Philosophies of Family Work and Relationships

Changes in household labor across time, current issues around gender and household labor, and philosophical perspectives of family work and family relationships.

SFL 471

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	

Course Outcomes

Content and Theory

Understand and synthesize the historical evolution of family work and the roots of home management.
Demonstrate knowledge of the core assumptions of current theoretical and research perspectives on family work.
Analyze gendered perspectives on men's and women's "unique" contributions to family life.
Communicate ideas clearly and engage in critical thinking as you write essays, take quizzes, and take exams.
Critique and think more clearly about your own family work paradigms.

Top

Temporal Welfare in Families

Assumptions, philosophy, and theory accounting for resource allocation, use, and meaning in families.

SFL 472

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	

Course Outcomes

Content and Learning

- Critically apply knowledge of principles of provident living as methods of economy in the creation of home as a sacred center for family life.
- Critically apply knowledge of principles of provident living as methods of economy in treating practical human needs as opportunity for moral and temporal growth in family members.
- Critically apply knowledge of principles of provident living as methods of economy in helping to establish a vital community.

Secondary Student Teaching - Consumer Science

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

SFL 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a major GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Recommended	All core and education classes.
Taught	Fall, Winter

Course Outcomes

SFL 476R - Student Teaching- Family and Consumer Sciences

Upon completion of the Family and Consumer Sciences Program, teacher candidates meet the needs of secondary students through competencies related to Utah Affected Teaching Standards. *Program outcomes* include:
Learner and Learning:
Candidates understand how students learn and develop, recognize individual and cultural diversity, and design learning environments that create positive classroom climates.

Instructional Practice

Candidates utilize content knowledge, assess to inform instruction, plan instruction based upon Core Curriculum standards, and implement instructional strategies that engage students and promote content understanding.

Professional Responsibility

Candidates continually reflect on and evaluate their teaching practices, actively seek opportunities to grow professionally, engage in ethical behavior, and collaborate with stakeholders (students, parents, and other professionals in the learning community).

Utah Effective Teaching Standards

Candidates will demonstrate basic competency in the Utah Effective Teaching Standards as assessed by the *Clinical Practice Assessment System*

Moral Foundations of Family Life

How the moral domain is central to human experience; implications for family life of theories and practices that acknowledge agency and the ethical.

SFL 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	

Course Outcomes

Understand the philosophical foundations of human science

1a. Explain how all theory and research in human science is based on a philosophy of science and a philosophy of human being.
1b. Give examples of specific assumptions we make when we attempt to explain ourselves—when we seek to understand the meaning of our experience.

How an ontology of human being informs our work

2. Describe and give an example of how our concepts of human being (what it means to be human) connect to how we understand what or who we are and to how we explain our experience.

How a philosophy of moral agency transforms our explanations

3. Create (or report examples from your experience) of how seeing the moral domain as central to human experience changes how we explain attitudes and behavior. (Or, “Give examples of how we explain human experience when we take the idea of moral agency seriously.”)

How our philosophy of human being informs intervention effor

4.Explain (using at least two contrasting philosophies as examples) the implications of how philosophies and assumptions inform how we make sense out of research results and the directions we choose when we intervene in people's lives. [For example, what informs how we do family life education and therapy?]

Understand how the Restored Gospel informs the ethical

5. Identify and give examples of how the Restored Gospel either strengthens, revises, or obliterates academic philosophies used to understand human experience.

Top

Advanced Clothing Studies: Construction

Three-dimensional fitting of apparel and advanced garment construction.

SFL 487

Hours	3.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	SFL 287 or equivalent sewing skills.
Note	Fee.
Taught	Fall, Spring

Course Outcomes

Content and Learning

- Apply the four aspects of fit and apply them to create correct fit in the basic garment.
- Be able to identify a new range of construction and style details and execute them well.
- Become more independent in sewing activities.
- Develop and improve skill levels of sewing techniques.
- Assemble a professional quality planned and organized portfolio of assigned techniques.
- Demonstrate sewing and fitting vocabulary and use terms correctly.

Top

Women's Home-Based Entrepreneurs

Exploration of home-based businesses through interaction with practicing professionals.

SFL 488R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Course no longer taught

Course no longer taught.

The Family and Public Policy

Investigation of public policy processes related to legislation and laws affecting home economics/home and family life. Funding and grantsmanship.

SFL 489

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 160 or concurrent enrollment.
Taught	

Course Outcomes

Family Studies Content and Theory

Demonstrate an understanding of why we are called to be aware and involved as "responsible citizens" (and "officers of government") to "strengthen the family as the fundamental unit of society."

Family Studies Content and Theory

Demonstrate an in depth understanding of how law and public policy strive-and struggle-to help couples form and sustain healthy marriages and reduce divorce.

Family Studies Content and Theory

Demonstrate a broader, general understanding of other family related policy and legislation designed to strengthen family life and children's development.

Family Studies Content and Theory

Utilize experience gained in the class in preparing to influence family policy bypreparing a legislative testimony or similar document on a chosen topic.

Family Studies Content and Theory

Become involved in an effort to promote (or oppose) some legal or public policy initiative in an attempt to "strengthen the family as the fundamental unit of society".

Advanced Issues in Human Development

Evaluation of research on physical, mental, emotional, and social development.

SFL 490

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SFL 101 & STAT 121 & SFL 290; SFL 210 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Content and Theory

Critically evaluate issues related to studying developmental processes as well as study and practice critical thinking skills.
Critically synthesize information learned from previous human development courses by examining how biological (e.g., temperament) and environmental (e.g., parents and peers) processes interact to shape development.
Demonstrate how to examine current issues in human development developmentally.
Critically synthesize the information, skills, and abilities learned in the first three units in an examination of the period of development recently termed "emerging adulthood" (ages 18-27).

Family Life Education: Integrating Theory, Research, and Practice

Integrating theory, research, and practice. Developing competencies to design, implement, and evaluate family flife education programs. Preparing to work preventively with couples, parents, and families in areas such as marriage preparation, marriage enhancement, and parenting.

SFL 498

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Senior standing; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Family Studies Content and Theory

Develop and articulate a personal philosophy of family life education.
Be able to apply a framework for the development of family life education programs.
Learn principles and practices for teaching about family life in a variety of traditional and contemporary venues, including workshop and self-directed approaches.
Practice workshop teaching and receive peer, clientele, and instructor feedback.
Be able to utilize principles and practices for reaching diverse audiences.
Be able to utilize principles and strategies for multiplying their reach through collaborative partnerships and social marketing.

Research and Evaluation Methodologies

Be able to utilize a variety of approaches to evaluating family life education programs.
Critically evaluate the quality of several examples of family life education programs.

Effective Writing and Analysis

Design a family life education program using scholarly literature and best practices.

First-Year Slovenian

SLN 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Credit by examination only.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Slovenian

SLN 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	SLN 101
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Slovenian

SLN 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	SLN 102
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

SLN 211R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	SLN 201
Note	Credit by examination only. Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Slovenia

SLN 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SLN 201 or foreign residence experience.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

(Soc-WS) Introduction to Women's Studies

An introduction to the most important issues affecting women's lives and to contributions made by women both nationally and internationally. The course will include historical, sociological, psychological, theological, legal, and/or cultural, and other approaches.

SOC 222

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Basic Knowledge of Women's Studies

1. Students will be able to define and use the critical vocabulary basic to the field of women's studies.

Social Structures and Women's Lives

2. Students will be able to recognize the ways in which social structures and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.

Women's Contributions and History

3. Students will begin to gain an appreciation of the contributions of women throughout history and internationally.

Research and Communication Skills

4. Students will be able to perform and present research related to women's studies in oral and written formats.

Behavior and Decision-making

5. Students will begin to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.

Methods of Research in Sociology

Tools of social research; survey, experimentation, content analysis, secondary analysis, qualitative research, evaluation research, data processing and analysis, and report writing.

SOC 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Soc 111 or 112 or 113.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Applied Social Research Methods

Research methods training for conducting research in applied settings using social research methods such as needs assessments, social impact analysis, and program evaluations.

SOC 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 121 & SOC 300
Taught	Fall

Course Outcomes

Know and Understand the full range of Methodologies

Graduates know the full range of methodologies, the basic epistemological assumptions associated with each, the criteria for evaluating quality research, and how to select and implement the appropriate method to test a hypothesis or address a research question.

Ability to Estimate and Interpret Statistics

Graduates are able to estimate and interpret univariate and bivariate statistics and generalize their meaning to the appropriate population.

Know How to Code and Interpret Qualitative Data

Graduates know how to code and interpret qualitative data or how to code and prepare quantitative data for statistical analysis.

Analyze Data and Summarize Findings

Graduates have the necessary skills to analyze data and summarize findings including a. basic familiarity with spreadsheet programs and statistical packages, b. the analytic process of comparing across categories, c. how to chart historical trends, and d. how to summarize findings for written or oral presentation.

Top

Research Proposal for Evaluation Research

Students will prepare a proposal, including literature review, research questions and research design. The proposal must then be approved by the organization, the professor, and IRB. Students must receive instructor approval to enroll.

SOC 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 301 & IAS 220; or SOC 301 & SOC 340; Consent of instructor required.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Data Analysis, Presentation, and Management

Framing research questions, locating available data, using programs and statistical packages for univariate and bivariate analysis, presenting and summarizing findings.

SOC 307

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 300 & STAT 121; Major status.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Social Inquiry

Basic ideas and arguments forming sociological inquiry, including philosophical foundations, philosophy of social science, and development of classical theory and contemporary theory.

SOC 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 111; or SOC 112; or SOC 113
Taught	Fall, Winter

Course Outcomes

Sociological Inquiry

Students will deepen understanding of the basic ideas and arguments that inform contemporary sociological inquiry, especially the philosophical foundations, some basic features of philosophy of social science, and the development of classical theory.

Sociological Theory

Students will become conversant with the conceptual and philosophical foundations of the major theoretical perspetives of sociology.

Critical Assessment

Students will be able to critically assess the strengths and weaknesses of each theoretical perspective.

Top

Contemporary Sociological Theory

Ideas, critiques, and arguments that form contemporary sociological inquiry.

SOC 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 310
Taught	

Course Outcomes

Please contact the individual department for outcome information.

(Soc-SFL 333) Adolescent Development in the Family and Other Social Contexts

Examining developmental and social contexts of adolescents, emphasizing the importance of the family. Other contexts include peers, religion, community, schools, and cross-cultural issues.

SOC 318

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Content and Theory

Critically examine and discuss selected topics in adolescent development, as well as being able to apply the information and skills learned in this class to your own life.
Identify and discuss the major theories of adolescent development, as well as the various research methods used in the study of adolescent development.
Understand the important developmental changes that young people experience during this period and during their transition to adulthood.
Discuss why at-risk issues are so pronounced during this period and understand prevention and intervention measures that can be taken by families to help them cope with this transition.

Effective Writing and Analysis

Synthesize (both in thought and writing) information on adolescent development, and apply this information to "real" adolescents with whom you come into contact.

Sociology of Innovation

Investigates group, network, organizational, and institutional arrangements that foster creativity and innovation, and examines classical and contemporary theories of social change and collective behavior.

SOC 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Theories and Methods

Students will be conversant with the theories and methods associated with social science research on innovation. The major theories include micro-level theories of personality and cognitive processes; meso-level theories of group, network, and organizational innovation; and macro-level theories of diffusion and collective behavior.

Controversies and Debates

Students will understand the major controversies and debates, new developments, emerging issues, and current trends in social sicnec research on innovation.

Critical Assessment

Students will be able to critically assess the strengths and weaknesses of current social science theories and research on innovation. Students will analyze the elements of argument of various theoretical perspectives.

Critical Writing

Students will prepare a research paper in which they formulate a research question, identify and analyze data, and report results, as well as interpret their findings. Students will produce an original research paper that will address a real-world problem related to innovation.

Top

Class Inequality

Causes and consequences of class, status, and power differences.

SOC 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Learning outcomes

Become more aware of the social inequality around us,

Social Inequalities

Become more aware of the social inequality around us,

Social justice

Participate in and evaluate organizations that are attempting to create greater social justice and form your own ideas about what can be done about inequality

Social Structure

Understand how social structure contributes to inequality

Research

Understand how sociologists do research on inequality

Connections

Learn to see the connection between sociological concepts and the inquality you observe in everyday life

Top

Racial and Minority-Group Relations

Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

SOC 323

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Introduction to the Sociology of Religion

Origin, growth, and organizational development of religious groups; church activity, conversion, secularization, religious change.

SOC 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Understanding Sociology of Religion

Acquire a basic understanding of the major theories, concepts, and perspectives used by sociologists to study religion in the modern world.

Understanding Scientific Study of Religion

Acquire a basic understanding of the issues and debates concerning the scientific study of religion and the use of sociological theories and methods for the study of religion.

Critical Thinking about Religion

Develop the ability to think critically about the study of religion and the place of religion in modern life and society.

Analysis and Writing

Develop the ability to analyze issues related to the study of religion and communicate the analysis in writing (i.e., forming and presenting an argument, using appropriate scholarly language, writing respectfully, etc.).

Top

Sociology of Education

Social origins of goals and curricula; theories of change and control; the nature of achievement in education.

SOC 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Sociology of the LDS Church and Its People

The LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

SOC 327

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Major substantive areas of sociological analysis

Students become "conversant with the substantive areas of sociology and the variety of theories and research methods associated with these substantive areas," as they apply to the sociology of religion in general and the sociology of Latter-day Saint life in particular. They learn several of the "major controversies and debates, new developments, emerging issues, and current trends" as they impact the study and interpretation of Latter-day Saint life in the contemporary academic and intellectual world. Students also are helped "to critically assess the strengths and weaknesses of current sociological theories and research relating to substantive areas," in this case Latter-day Saint life both historically and in the 20th and 21st centuries.

Diversity of social life, inequality, social conflict, and r

Students have direct experience in comparative analysis both at the individual and group level, in interpersonal contexts as well as in vicarious and analytical experience, whereby they learn "the limitations of extrapolating from their own experience" and confront "how the life experience of others may differ from their own," both within social categories (e.g., comparisons with the life experience of other Latter-day Saints) and across social boundaries (e.g., comparisons with members of other faiths or national populations). Students experience "how race, class, and/or gender intersect with other social categories," in this instance, religious membership or national identities, "to create a variety of life experiences." They also learn to "articulate the sources of social conflict and describe the relations of power in modern society" as they consider both the history of the often-hated minority that was the Latter-day Saints and the contemporary setting and participation of Latter-day Saint people in modern and postmodern society.

Theoretical perspectives that inform sociological analysis

Students consider the underlying assumptions and "basic ideas and arguments forming sociological inquiry" as they apply to the sociology of religious life, especially the experience of Mormon people and Mormondom generally. Conflict theory, functionalism, social psychological perspectives,

demographic perspectives are all brought into play as they affect the study of Latter-day Saint culture. Special attention is paid to the differences between postmodern and modern theoretical perspectives as they impact definitions of "truth" and "reality" and as they apply to theorizing about and doing research on people's ideas of religion and transcendence.

Diversity of research methodologies

Diversity of research methodologies are illustrated; the "fit" of various approaches to the study of religious life are evaluated. This is not a methods course, but as issues of research methodology affect the confidence one can have in the findings of researchers who study Mormonism, issues of methodology are discussed and we learn to distinguish good from poor research.

Accessing, reviewing, and analyzing current sociological lit

Because our focus is social science literature on Mormonism across more than a century, the emphasis on "current" is limited, but because many of our readings and several of the "classics" students review are current, we contribute in part to awareness of the current state of social science analysis of religion, and Mormonism in particular. Students demonstrate their knowledge of substantive areas as applicable to research on LDS populations in their critiques of "classic" sociological studies of Mormonism, ideally demonstrating both the strong points and weaknesses of high quality and/or high profile studies of Mormon thought, life, and people.

Opportunities for integrating life goals and professional an

Both the advantages and the disadvantages of sociological perspectives (the plural here is important; there are many social science perspectives, and to speak of *the* sociological perspective is a distortion) with respect to interpreting daily life and religious life are emphasized throughout the course. Dilemmas and challenges of trying to live an integrated spiritual and successful temporal existence within contemporary societies are stressed throughout the course. Throughout, we stress the importance to the religious life of systematic, honest, and sophisticated awareness of intellectual fads and foibles, changing trends and worldviews, varying standards and assumptions, patterns of globalization and secularization. More than many sociological courses, this one is devoted to the overall aim of BYU education to integrate spiritual and secular life goals and interest, to combine professional and career interests with a more specialized awareness of how religious organizations, beliefs, and institutions fit within and change along with the wider society, and the challenges associated with the sometime conflict of individual, family, organizational and societal interests.

Top

Sociology of Sport

Analysis of the sociological aspects of sport and their relationship to politics, economics, stratification, education, and family. Focus on concepts, theory, and related research.

SOC 328

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Medical Sociology

Social epidemiology, the sick role, sociocultural definitions of and responses to illness, and the organization of medical-health delivery systems.

SOC 329

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Understanding of social and structural factors

Students will gain awareness of the social and structural factors which influence health, healing, and illness. Particular emphasis is given to: (1) influenc eof the social environment on health and illness; (2) health and illness behavior; (3) health care prasctitioners and their relationships with patients; and (4) the health care system. Students will be introduced to the literature and be conversant regarding the primary social and structural factors influencing health and illness.

Diversity and health factors

Students will gain understanding and awareness of the gender and race and ethnic differences related to health and illness.

oral and written presentation

Students will debate a current topic related to the sociology of medicine which will require them to be conversant with the debate and develop oral presentation skills. In addition, students will research and present in written form a medical phenomenon in sociological terms.

Cultural Sociology

Recent theories and research in sociological approaches to meaning, including cultural systems and institutions, everyday life, symbolism, agency, power, texts, and globalization.

SOC 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Cultural sociology concepts, theories, and research methods

- Students will learn concepts, theories, and research methods associated with cultural sociology, with an emphasis on current issues in the subfield.

Bibliographic Search and Literature Review

- Students will be introduced to doing a bibliographic search and a literature review.

Bibliographic Search and Literature Review

- Students will be introduced to doing a bibliographic search and a literature review.

Analytic and Sytopical reading skills

- Students will be introduced to analytic and syntopical reading skills.

Career options

- Students will learn about educational and career options related to sociology, with an emphasis on those related to cultural sociology.

Career options

- Students will learn about educational and career options related to sociology, with an emphasis on those related to cultural sociology.

Top

(Soc-Nurs) End-of-Life Care

End-of-life (EOL) care from spiritual, physical, and psychosocial perspectives. Comparisons from various cultural/ethnic backgrounds. Complexities of EOL care including impact on families, health care system, and society. Personal perspectives about death, dying, and bereavement.

SOC 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Attitudes Toward Death

Identify societal attitudes toward death

Guiding Prinicples Of Care

Outline guiding principles of end-of-life care

Palliative Care and Hospice Care

Compare and contrast palliative care versus hospice including historical factors.

Models of Care for the Dying

Distinguish between the medical model & patient-centered approach to dying

End of Life Preferences for Care

Summarize discrepancies in patient and provider end-of-life preferences

Personal Perspectives

Compose personal attitudes toward death and dying

Top

Social Organization and Change

Understanding processes of social organization, change, and development in contemporary society.

SOC 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Soc 111 and 310.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Sociology of International Development

Paradigms of development and poverty; international, national, and grass roots approaches to promote development and reduce poverty; and application in developing nations.

SOC 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Soc 111 or 112; IAS 220.
Taught	Fall, Winter

Course Outcomes

Theory

Become familiar with different theories about development.

Social Institutions

Understand the relationship between development and major social insitutions.

Organizations

Learn about what different organizations are doing to promote beneficial development.

Apply

Learn to apply what you have learned to a specific aspect of development.

Integrate

Integrate what you have learned to develop your own approach to development.

Top

World Populations

Fertility, mortality, and migration patterns of world populations as they relate to current social, economic, political, and religious issues.

SOC 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

(Soc-Psych) Introduction to Social Psychology

Conformity and obedience; socialization, norms, roles; attitudes, leadership, group processes.

SOC 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

1. Unique contribution of social psychology

Students will be able to identify the unique contribution of social psychology to social science, situating the discipline within the larger domain of psychology and contrasting it with related disciplines, such as sociology.
Measurement: Multiple choice tests, short essays.

2. Research methods and ethics

Students will be able to understand the use of surveys, laboratory and field experiments in conducting social psychological research, and understand the ethical principles of informed consent, deception and debriefing when conducting research with human participants.
Measurement: Multiple choice tests, short essays.

3. Substantive areas of inquiry

Students will be able to identify substantive areas of social psychological inquiry, including the self, person perception, attitudes and persuasion, group processes, stereotyping and prejudice, interpersonal attraction, helping behavior and aggression.
Measurement: Multiple choice tests, short essays.

4. Contributions of major thinkers and contributors

Students will be able to identify and explain the contributions of major thinkers and contributors of classic and contemporary theory and research in social psychology, such as Leon Festinger and Stanley Milgram.
Measurement: Multiple choice tests, short essays.

5. Applications of social psychology

Students will be able to identify how social psychological theory and research have been applied to domains outside the discipline, such as in health settings and the law.

Measurement: Multiple choice tests, short essays.

Top

Introduction to Family Sociology

Definitions of "family"; surveying the family as a context for sex, marriage, work, social reproduction, and violence in Western societies.

SOC 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Assessing Sociological Theories and Research

Be able to critically assess the strengths and weaknesses of current sociological and demographic theories and research related to family sociology.

Understanding Diversity and Inequality

Recognize how race, class, and gender intersect with family life and be familiar with the current literature on families and inequality.

Accessing, Reviewing, and Analyzing Current Literature

Be able to read current literature, synthesize main points across articles and develop an original thesis or argument in writing that is supported by the literature.

Substantive Knowledge

Know the major controversies and debates, as well as demographic trends related to the family in the United States.

Application to Life

Integrate current literature on family and determine family patterns for your personal future family.

Top

Theoretical Foundations of Marriage and Family

Comparative analysis of basic ideas and arguments for understanding marriage and family found in social science, social and political theory, law, and other forms of cultural discourse.

SOC 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Sociology of Aging

Demographic and social factors related to aging: agencies, serving older citizens, and role of community in solving problems of aged.

SOC 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required for students in gerontology minor and/or certificate programs.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Sociology of Gender

Gender in social institutions: family, social hierarchies, economics, education, organizations, religion, and science.

SOC 367

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Conversant in Theory of Gender

- Students will become acquainted with the major theoretical perspectives both sociological theories of gender, as well as other disciplinary perspectives.
- Students will be able to evaluate gender through the lens of contrasting theoretical perspectives both in writing and in class discussions.

Gender: Individual, Interactions, Institutions

- Students will recognize how gender operates at the level of the individual, in social interaction, and in social institutions.
- Students will be able to discuss how gender influences individual identity, social interactions, and social institutions.
- This ability will be assessed by exams (breadth) and short paper assignments (depth).

Application of Gendered Perspectives

- Students will be able to apply gendered perspectives to everyday living. This will be developed in a class project to be presented orally.
- Students will be able to apply gendered perpectives to their own lives. This will be assessed in short essay assignments and in small class discussion groups.

Top

The Sociology of Urban Life

Norms, social controls, and social processes in urban areas in both historical and contemporary perspectives.

SOC 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Deviant Behavior and Social Control

Theory and research related to deviance. Specific topics include psychosis, addiction, homosexuality, violence, and rape, among others.

SOC 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Juvenile Delinquency

Lawlessness of children and adolescents: causation, treatment, prevention, and outlook.

SOC 383

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Special Topics in Contemporary Sociology

Course content varies from year to year.

SOC 390R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Social structures

Students will be able to recognize the ways in which social structure and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.

Contributions

Students will begin to gain an appreciation of the contributions of women throughout history and internationally.

Present

Students will be able to perform and present research related to women's studies in oral, written, and/or multi-media formats.

Informed choices

Students will be able to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.

Vocabulary

Students will be able to define and use in speech and writing the critical vocabulary basic to the field of women's studies.

Academic Internship

Individualized work or volunteer experience in either a research setting or some kind of field placement with an organization.

SOC 399R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of instructor required.
Recommended	Soc 307 and related 300-level courses.
Taught	Fall, Winter, Spring

Course Outcomes

Lifelong practice

Establish a lifelong practice of making connections and creating a network of people that will help the student develop professionally

Professionalism

Develop a professional sense of the work that will help the students identify personal learning outcomes for the semester

Interactive service work

Learn about what sociologists call "interactive service work" or jobs that require working with individuals

Organizational analysis

Produce a professional analysis of the organization where the student works

Research project

Complete a research project that addresses some need in the organization for which the student is working

Qualitative Research Methods

Purposes, methods, and limitations of qualitative research. Includes participant observation and hermeneutics skills.

SOC 404

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Taught	Fall, Winter

Course Outcomes

Qualitative Research Epistemology

Students will be able to explain the epistemological assumptions of qualitative research methods, how to select the appropriate qualitative research method to address a research question, and the criteria for evaluating qualitative research methods.

Qualitative Research Methods: Design and Data Collection

Students will be able to design and conduct an in-depth interview study, an oral history interview study, a focus group study, an ethnography, a qualitative content analysis study, a qualitative case study, and a mixed-method study.

Qualitative Research Methods: Analysis

Students will be able to code and interpret qualitative data. (This may include the use of qualitative data analysis software.)

Writing and Representation of Qualitative Research

Students will be able to write a qualitative methods and findings section, as for a qualitative research article.

Educational and Career Planning

Students will be able to connect what they are learning in the sociology program and/or classes with educational and career options.

Top

Multiple Regression Analysis and Social Science Computing

Data analysis and computer use in sociology; least squares and logistic regression techniques; SPSS and its use in conducting data analysis. Research report required.

SOC 405

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307
Taught	Fall, Winter

Course Outcomes

Learning Outcomes

- Students will be able to read and understand social scientific journal articles
- Students will be able to inspect and transform data in preparation for testing a regression model.
- Students will know the assumptions of regression analysis.
- Students will be able to test regression models.
  Students will know how to present their findings both written an orally.

Top

Understanding Modern Societies

Comparative-historical theory and research on the political, economic, social, and cultural processes in the formation, social organization, and future prospects of modern societies.

SOC 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Sociology of Organizations

Examines organizational arrangements that maximize performance, innovation, and well-being; effective ways to develop social networks; diverse organizational forms like strategic alliances, multinational corporations, and NGOs.

SOC 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Inequality and Society

Distribution of economic and social resources (financial, status, prestige, power, and authority) as they relate to life changes, lifestyle, and social justice.

SOC 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	Fall

Course Outcomes

Empathy

Develop Christ-like empathy for individuals and groups who struggle in society and find ways to extend compassion

Inequality literature

know the origins and developments of inequality literature; understand origins of inequality and contemporary arguments grounded in qualitative and quantitative evidence; understand limitations of data collection

Nature vs. nurture

Be conversant in the nature vs. nurture argument using the history of the IQ test to outline the development of dognitive skill debate.

Top

Political Sociology

Analysis of power and decision-making, political institutions, grass root politics, stratification, and political activity, social movements and revolutions, science/religion and politics. Writing intensive.

SOC 424

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Markets and Society

Economic sociology exploring social dynamics of market behavior from an interdisciplinary perspective; topics include social factors related to value, price, and price volatility.

SOC 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	Fall

Course Outcomes

Basic tenets of economic sociology

Students will develop an understanding of the field of economic sociology.

Sociological perspective

Students will demonstrate their understanding of basic economic phenomena from a sociological perspective.

Application

Students will apply their knowledge to understanding and interpreting real-world events.

Research and writing

Students will improve their ability to develop ideas through research and writing.

Top

Sociology of Work and Occupations

Distinction between work and occupation, changes in the nature of work and labor force, impacts of work, mobility in work life, and occupational attainment.

SOC 426

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

The Family and Social Change

Changing patterns of family-related behaviors, functions, and forms. Demographic, economic, and ideological forces shaping the family.

SOC 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Senior Capstone Part 1

This is the first semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.

SOC 455R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Note	Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.
Taught	Fall

Course Outcomes

Accessing, reviewing, and analyzing: Capstone Experience

Students will be able to:

- Conduct electronic bibliographic searches and determine the quality of the research they find.
- Demonstrate their knowledge of substantive areas, theory, and research methodologies by developing an original sociological argument in writing (e.g. literature review, research proposal, theoretical analysis, etc.)
- Write a research paper in which they formulate a research question, identify data to answer their question, and review the literature.

Integrating life goals and professional and career interests

Students wil be able to:

- Integrate the knowledge and skills learned in the sociology program with their career interests by translating their skills into a resume.
- Develop an original research product that can be submitted as a writing sample to graduate schools, or to employers based on their educational and career goals.

Senior Capstone Part 2

This is the second semester of a two-semester capstone with advanced substantive material and the integration and application of concepts and skills from earlier courses to produce a professional research paper.

SOC 456R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 455R
Note	Fulfills GE Advanced Writing and Oral Communication credit if both Soc 455R and Soc 456R are completed.
Taught	Winter

Course Outcomes

Original Research: Capstone Experience

Based on the model developed in Soc 455R, students wil be able to:

- Download data and recode variables for regression analysis
- Use statistical techniques to test hypotheses and analyze the model they derived from the literature
- Construct tables presenting research findings
- Present findings in manuscript form, as well as in an oral poster presentation

Top

Issues in Family Sociology

Advanced sociological analysis of current issues relating to the family (e.g., theory, methodology, parenting, marriage, divorce, family crises, race, gender, etc.).

SOC 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Crime, Justice, and Corrections

Nature and extent of criminal behavior; current theory and research related to causes of crime and treatment of criminals.

SOC 481

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC 307 & SOC 310
Recommended	Soc 404 or 405 or concurrent enrollment.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Special Topics in Sociology

Course content varies from year to year.

SOC 490R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Directed Reading in Sociology

Individualized reading program supervised by faculty member. Student selects reading topic and completes systematic in-depth reading of related literature.

SOC 495R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of instructor required.
Taught	

Course Outcomes

Literature

Students will develop and read literature from specific sub-field within sociology.

Summarize

Students will evaluate, synthesize, and summarize literature in a specific sub-field of sociology.

Top

Directed Research in Sociology

Individualized research program supervised by faculty member. Student selects topic and completes a research project.

SOC 497R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of instructor required.
Taught	

Course Outcomes

Research outline

Students will develop research project under direction of faculty mentor.

Research participation

Students will engage in a mentored research project that may involve reviewing the literature, data collection, data analysis, and/or preparing manuscripts, etc.

Top

Advanced Political Sociology

Social basis of political behavior. Modern theories and research concerning use of power and decision making.

SOC 524

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Analysis

Students will demonstrate the ability to analyze and critique current literature on political sociology.

Research Proposal

Students will produce a graduate-level, testable research proposal on political sociology.

Data Management

Students will become familiar with data sets suitable for testing hypotheses on political sociology.

Sociology of Religion

Influences of social factors in the development of various religious systems.

SOC 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Soc 111, 325, or instructor's consent.
Taught	

Course Outcomes

Theories

Students will be able to explain selected theoretical frameworks in the sociology of religion.

Criticism and Analysis

Students will be able to assess critically both published and unpublished texts relevant to religion, including datasets and other materials, in establishing meaningful frameworks and problems for study.

Writing

Students will be able to participate in all stages of preparing an original, publishable contribution to the sociology of religion.

Teamwork

Students will be able to organize and conduct team research on joint projects.

Sociology of the LDS Church and Its People

An advanced analysis of the LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

SOC 527

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Analysis

Students will demonstrate the ability to analyze and critique current literature on the sociology of the LDS Church and peoples.

Research Proposal

Students will produce a graduate-level, testable research proposal on the LDS Church and peoples.

Data Management

Students will become familiar with data sets suitable for testing hypotheses on the LDS Church and peoples.

Top

Sociology of Rural Communities

Review and critique of major theoretical and methodological approaches to the study of community, with a focus on rural communities.

SOC 528

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Soc 311, 370, or instructor's consent.
Taught	

Course Outcomes

Critical Analysis

Students will demonstrate the ability to analyze and critique current literature on the sociology of communities.

Research Proposal

Students will produce a graduate-level, testable research proposal on communities.

Data Management

Students will become familiar with data sets suitable for testing hypotheses on communities.

The Individual and Family in Later Years

Developmental aspects of aging, focusing on the biophysical, cognitive, social, affective, and pathological dimensions in people aged 50 and over.

SOC 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Critical Analysis

Students will demonstrate the ability to analyze and critique current literature on the sociology of geronotology.

Research Proposal

Students will produce a graduate-level, testable research proposal on gerontology.

Data Management

Students will become familiar with data sets suitable for testing hypotheses on geronotology.

Top

Special Topics in Sociology

Course content varies from year to year.

SOC 590R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Data Management

Students will become familiar with data sets suitable for testing hypotheses on the subject of the seminar.

Research Proposal

Students will produce a graduate-level, testable research proposal on the subject of the seminar.

Critical Analysis

Students will demonstrate the ability to analyze and critique current literature on the subject of the seminar.

Top

Directed Readings

Individualized reading program supervised by faculty member.

SOC 595R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	None
Note	Pass/Fail only.
Taught	

Course Outcomes

Literature

Students will develop and read literature from specific sub-field of sociology.

Synthesize

Students will evaluate, synthesize, and summarize literature in specific sub-field of sociology.

Top

Pro-Seminar

Current developments in sociology including research, proposals, professional meetings, teaching, and finding a job.

SOC 598R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Introduction to Social Work

Social welfare as a social institution; social work as a profession.

SOC W 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

CSWE Educational Policy 2.1.1

Identify as a professional social worker and conduct oneself accordingly.
(Core Competency #1)
Foundation:
a. advocate for client access to the services of social work
b. practice personal reflection and self-correction to assure continual professional development
c. attend to professional roles and boundaries
d. demonstrate professional demeanor in behavior, appearance, and communication
e. use supervision and consultation

CSWE Educational Policy 2.1.2

Apply social work ethical principles to guide professional practice.
(Core Competency #2)
Foundation:
b. make ethical decisions by applying standards of the National Association of Social Workers Code of Ethics (NASW, 1999) and, as applicable, of the International Federation of Social Workers/International Association of Schools of Social Work Ethics in Social Work, Statement of Principles (IFSW, 2004)
c. tolerate ambiguity in resolving ethical conflicts
d. apply strategies of ethical reasoning to arrive at principled decisions

CSWE Educational Policy 2.1.3

Apply critical thinking to inform and communicate professional judgments.
(Core Competency #3)
Foundation:
a. distinguish, appraise, and integrate multiple sources of knowledge, including research-based-knowledge and practice wisdom
c. demonstrate effective oral and written communication i working with individuals, families, groups, organizations, communities, and colleagues.

CSWE Educational Policy 2.1.4

Engage diversity and difference in practice.

(Core Competency #4)
Foundation:
a. recognize the extent to which a culture's structures and values may oppress, marginalize, alienate, or create or enhance privilege and power

CSWE Educational Policy 2.1.5

Advance human rights and social and economic justice.
(Core Competency #5)
Foundation:
b. advocate for human rights and social and economic justice

CSWE Educational Policy 2.1.6

Engage in research-informed practice and practice-informed research.
(Core Competency #6)
Foundation:
a. use practice experience to inform scientific inquiry
b. use research evidence to inform practice

CSWE Educational Policy 2.1.7

Apply knowledge of human behavior and the social environment.
(Core Competency #7)
Foundation:
b. critique and apply knowledge to understand person and environment

CSWE Educational Policy 2.1.8

Engage in policy practice to advance social and economic well-being and to deliver effective social work services.
(Core Competency #8)
Foundation:
a. analyze, formulate, and advocate for policies that advance social well-being
b. collaborate with colleagues and clients for effective policy action

CSWE Educational Policy 2.1.9

Respond to contexts that shape practice.
(Core Competency #9)
Foundation:
a. continuously discover, appraise, and attend to changing locales, populations, scientific and technological developments, and emerging societal trends to provide relevant services
b. provide leadership in promoting sustainable changes in service delivery and practice to improve the quality of social services

CSWE Educational Policy 2.1.10(A)

Engagment
(Core Competency #10[A])
Foundation:
a. substantively and effectively prepare for action with individuals, families, groups, organizations, and communities
c. develop a mutually agreed-on focus of work and desired outcomes

CSWE Educational Policy 2.1.10(B)

Assessment
(Core Competency #10[B])
Foundation:
a. collect, organize, and interpret client data
b. assess client strengths and limitations
c. develop mutually agreed-on intervention goals and objectives
d. select appropriate intervention strategies

CSWE Educational Policy 2.1.10(C)

Intervention
(Core Competency #10[C])
Foundation:
a. initiate actions to achieve organizational goals
b. implement prevention interventions that enhance client capacities
c. help clients resolve problems
d. negotiate, mediate, and advocate for clients
e. facilitate transitions and endings

Social Welfare Policy

Social legislation processes; analysis of social policy and the knowledge available to social workers for involvement in social planning and policy change.

SOC W 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC W 200
Taught	Fall

Course Outcomes

Knowledge:

1. To identify the historical development and evaluation of social welfare in the United States.
2. To understand the role and structure of social welfare issues and policies in our complex society.
3. To have a knowledge of the policy-making process in both formal and informal aspects.
4. To have a knowledge and understanding of the impact of social policies on the nations minorities and vulnerable populations, (e.g. race, culture, class, gender, sexual orientation, religion, physical or mental abilities.)
5. To develop the skills necessary to promote equity, justice, and fairness in society.
6. To show how our society evolved into a community of diversity.

Values:

7. To understand the importance and the value of learning from one another.
8. To develop ideals, values, and attitudes that are compatible with the social work values and ethical system.

Values:

9. To understand in detail at least one framework which may be used to analyze social policies.
10. To generate alternative policies arrived at the same or different objectives concerning the focal
issues.

Social Work Practice with Individuals

Methods of social work practice within a generalist framework; interventions at the individual, family, group, organization, and community levels.

SOC W 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SOC W 200
Taught	Winter

Course Outcomes

Course Objectives

This course is designed to introduce the student to the values, knowledge, and skills involved in the practice of social work as a profession, and to gain a broad view of direct social work practice.
Specifically, the student should:
1. Become acquainted with multiple areas of social work practice.
2. Understand the helping process: engagement, assessment, evaluation, and termination.
3. Learn skills necessary for micro and mezzo level applications.

Specific Behavioral Objectives

Through participation in this course, students will be prepared to:
1. Define the term "Direct Practice" and understand the role it plays in the social work profession in today's complex society.
2. Describe the historical developments of the social work profession and its evolvement over the last 100+ years.
3. Describe how social work practice is guided by a foundation of values, principles, and ethics.
4. Demonstrate an understanding of the contents of the NASW Code of Ethics.
5. Identify the basic helping skills used in social work.
6. Identify social work practice grounded in sound theory and empirical research.

Top

Crisis Intervention

Assessment and intervention in crisis situations with clients.

SOC W 570

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

CSWE Educational Policy 2.1.3

Apply critical thinking to inform and communicate professional judgments.
(Core Competency #3)
Foundation:
a. distinguish, appraise, and integrate multiple sources of knowledge, including research-based-knowledge and practice wisdom.
b. analyze models of assessment, prevention, intervention, and evaluation.
Advanced:
a. engage in reflective practice.
b. identify and articulate clients' strengths and vulnerabilities.
c. evaluate, select, and implement appropriate multidimensional assessment, diagnostic, intervention, and practice evaluation tools.

CSWE Educational Policy 2.1.4

Engage diversity and difference in practice.
(Core Competency #4)
Foundation:
b. gain sufficient self-awareness to eliminate the influence of personal biases and values in working with diverse groups
c. view themselves as learners and engage those with whom they work as informants.
Advanced:
a. research and apply knowledge of diverse populations to enhance client well-being.
b. work effectively with diverse populations.

CSWE Educational Policy 2.1.9

Respond to contexts that shape practice.
(Core Competency #9)
Foundation:
a. continuously discover, appraise, and attend to changing locales, populations, scientific and technological developments, and emerging societal trends to provide relevant services.
b. provide leadership in promoting sustainable changes in service delivery and practice to improve the quality of social services.

Advanced:
a. assess the quality of clients' interactions within their social contexts, specifically families.

CSWE Educational Policy 2.1.10(C)

Intervention
(Core Competency #10[C])
Foundation:
b. implement prevention interventions that enhance client capacities.
c. help clients resolve problems.
d. negotiate, mediate, and advocate for clients.
e. facilitate transitions and endings.
Advanced:
a. critically evaluate, select, and apply best practices and evidence-based interventions.
b. demonstrate the use of appropriate clinical techniques for a range of presenting concerns identified in the assessment, including crisis intervention strategies as needed.
c. collaborate with other professionals to coordinate treatment interventions.

Top

Social Work in the School Setting

Overview of knowledge and skills essential to the practice of social work in educational settings; emphasizes practical interventions when working with student/family/teacher/community resources.

SOC W 580

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Objectives:

1. To provide students with a basic understanding of public school policies, laws, procedures, roles, and expectations of all players including, administrators, staff (counselors, psychologists, social workers, custodians, coaches) parents and students.
2. To develop an awareness of the resources available in the community to assist families in the school setting.
3. To provide students the opportunity to reflect, synthesize and apply the various concepts examined in class in the context of their own experiences and understanding.
4. Understand the role and expectation of a school social worker.
5. Gain familiarity with research methods into effectiveness of social work practice in schools.
6. Gain knowledge of NASW's standards of school social work practice.

Top

Social Services for the Aging

Process and impact of social service delivery systems on the aged.

SOC W 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Utah state certificate available.
Taught	Winter odd years

Course Outcomes

Objectives:

1. Be able to recognize dversity (race, gender, sexual orientation, SES etc) of aging population in the United States.
2. Be able to articulate predominant theories of aging.
3. Be able to articulate biological and psychosocial changes related to aging.
4. Be able to identify social, psychological, economic, and political challenges faced by other adults (i.e. ageism, poverty, elder abuse, retirement, intamacy, end of life care, support system, etc).
5. Demonstrate ability to advocate social/economic justice.
6. Demonstrate ability to assess and intervene in gerontoloical setting.
7. Demonstrate ability to address social policy issues for older adults.
8. Develop ability to practice ethically within principle of NASW Code of Ethics.

Global Issues of Children at Risk

Analyzing major challenges facing children and their families globally, including poverty, malnutrition, poor health care, gender-based discrimination, child labor and sexual exploitation, AIDS orphans, child soldiers, and refugees.

SOC W 585

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Learning Outcomes:

1. Gain basic information regarding the current condition of children globally---their challenges and resources.
2. Learn of the global community's acknowledged and unacknowledged obligations to assist the most vulnerable of its children.
3. Become familiar with the international, regional, and national policies and efforts in place to address some of the most difficult challenges.
4. Incorporate a family-based framework into addressing the challenges faced by children, focusing on solutions which emphasize the strengthening of families as a priority.
5. Appreciate the complex nature of the interplay between economic, political, and cultural aspects of the global and national communities which produce, and must be considered in addressing, the problems and challenges that arise out of such interplay.
6. Have a hands-on service experience locally which will illuminate the challenges faced by children globally.
7. Be able to produce a term paper in which he or she will thoroughly explore one topic in depth and present a summary to the entire class.
8. Be tested on the objective knowledge of the student on the topic areas.

Top

Directed Readings

SOC W 595R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Directed Readings

Under the direction of a mentored professor, students will critically examine, investigate, and integrate the literature for a topic of interest in social work

Foundational Spanish 1

Fundamentals of Spanish, emphasizing communication. (Accelerated sections available.) Pass/fail only.

SPAN 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Note	For students with no previous Spanish.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Respond in Spanish to simple questions

Respond in Spanish to simple questions on the most common features of daily life

Convey minimal meaning to interlocutors

Convey minimal meaning to interlocutors experienced with dealing with foreigners by using isolated words, lists of words, memorized phrases and some personalized recombinations of words and phrases.

Satisfy limited number of needs

Satisfy a very limited number of immediate needs through the use of spoken Spanish.

Respond in written Spanish

Respond in written Spanish at the same level as indicated in outcomes related to speaking.

Understand common basic cultural practices and products

Understand common basic cultural practices and products related to greetings and family life in some Spanish-speaking countries.

Top

Foundational Spanish 2

Continuation of Span 101. Fundamentals of Spanish, emphasizing communication. (Accelerated sections available.) Pass/fail only.

SPAN 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Span 101.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Using Spanish, participate in simple, direct conversations

Using Spanish, participate in simple, direct conversations on generally predictable topics related to daily activities and personal environment.

Create with the language and communicate personal meaning

Create with the language and communicate personal meaning to sympathetic interlocutors by combining language elements in discrete sentences and strings of sentences.

Obtain and give information

Obtain and give information by asking and answering questions.

Sustain basic communicative exchanges

Sustain and bring to a close a number of basic, uncomplicated communicative exchanges, mostly in a reactive mode.

Satisfy simple personal needs using spoken Spanish

Satisfy simple personal needs and social demands to survive in the target language culture.

Respond in written Spanish

Respond in written Spanish at the same level as indicated in preceding objectives related to spoken Spanish.

Understand common basic cultural practices and products

Understand common basic cultural practices and products related to travel in some Spanish-speaking countries.

University Spanish 1

Continued development of grammar, cultural understanding, reading, writing, and conversation skills as introduced in foundational courses. Students are expected to attain an Intermediate-Mid proficiency level.

SPAN 105

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Two years of high school Spanish or Span 101/102 or placement by diagnostic test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Simple Conversation

Use Spanish to maintain simple verbal conversations on everyday topics.

Writing

Communicate using paragraph level discourse in writing.

Communication

Be understood by sympathetic native speakers despite occasional misunderstandings.

Verbal Narration

Describe and narrate in the past present and future a portion of the time.

Culture

Understand that hispanic culture is vast and diverse.

Culture

Demonstrate understanding of and appreciation for Hispanic cultures.

University Spanish 2

Expanded development of grammar, cultural understanding, reading, writing, and conversation skills as introduced in foundational and intermediate courses. Students are expected to attain an Intermediate-Mid to Intermediate-High proficiency level.

SPAN 106

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Span 105.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Conversation

Use Spanish to maintain simple verbal conversations on everyday topics.

Writing

Communicate using paragraph level discourse in writing.

Communication

Be understood by sympathetic native speakers despite occasional misunderstandings.

Narration

Describe and narrate in the past present and future a portion of the time.

Culture

Understand that hispanic culture is vast and diverse.

Culture

Demonstrate understanding of and appreciation for Hispanic cultures.

Top

Spanish Conversation 1

Development of conversation skills in Spanish.

SPAN 111R

Hours	2.0 Credit, 2.5 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Concurrent enrollment in Span 105.
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Oral Comprehension

Understand main ideas and some facts from interactive exchanges and aural texts.

Spanish Conversation 2

Continued development of conversation skills in Spanish.

SPAN 112R

Hours	2.0 Credit, 2.5 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Concurrent enrollment in Span 106.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Knowledge

Students will deepen their understanding of Spanish conversation.

Top

Spanish Choir

Choir that meets weekly to rehearse and perform songs in Spanish from a variety of musical genres.

SPAN 119R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Rehearse and perform choral works

Rehearse and perform choral works written in Spanish as well as Spanish translations of choral works written in other languages.

University Spanish 3

Continued development of grammar, cultural understanding, conversation skills, writing, and reading through the study of literature. Students are expected to attain an Intermediate-High proficiency level.

SPAN 205

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Four years of high school Spanish, Span 106, or placement by test.
Note	Fulfills the University Core Languages of Learning requirement. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Language Structure

Consolidate the student's understanding of the basic structures of the Spanish language and demonstrate intermediate proficiency in Spanish as defined by the American Council on the Teaching of Foreign Languages (ACTFL) proficiency guidelines for reading, writing, speaking, and listening.

Improve oral and literacy language skills.

Provide students with a moderate knowledge of the Spanish language and cultures, thus broadening their perception of humanity and its varied manifestations.

Improve oral and literacy language skills.

Interpret and analyze a selection of literary works in Spanish within their historical and cultural context.

Intensive Spanish Skills Development

Intensive development of oral and literacy skills at the Intermediate High to Advanced Low level, with emphasis on improving grammatical accuracy, fluency, and cultural competence. Intended to prepare students for Span 321 and subsequent courses.

SPAN 206

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Spanish 205 or placement by test.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Communicate orally in interpersonal and presentational modes

Communicate orally in Spanish with confidence at the Intermediate High to Advanced Low level, in both interpersonal and presentational modes.

Write compositions to meet academic needs

Write reactions to readings and short papers on literary works with sufficient grammatical accuracy to meet academic needs in higher-level courses.

Comprehend authentic oral and written texts

Comprehend authentic narrative and informative texts from various Spanish-speaking countries, both oral and written, on topics of general interest.

Interpret cultural products, practices, and perspectives

Discuss a range of cultural products and practices from Spanish-speaking countries and interpret the cultural perspectives that they imply.

Top

Spanish Conversation 3

Continued development of conversation skills in Spanish.

SPAN 211R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Concurrent enrollment in Span 205.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Spanish Conversation 4

Continued development of conversation skills in Spanish.

SPAN 212R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	Concurrent enrollment in Span 206.
Taught	Fall, Winter

Course Outcomes

Oral Communication

Communicate effectively in most real-life situations at the interpersonal level, including academic, professional, or social situations.

Oral Comprehension

Understand main ideas and most facts from interactive exchanges and aural texts.

Cultural Dimensions of Communication

Ability to handle successfully a variety of uncomplicated communicative tasks in straightforward social situations, including theverbal and nonverbal messages.

Top

Spanish Conversation 5

Continued development of conversation skills in Spanish.

SPAN 311R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Will not count for major or minor.
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Oral Communication

Communicate orally in Spanish in real-life situations, including academic, specialized, and public contexts.

Spanish Conversation 6

Continued development of conversation skills in Spanish.

SPAN 312R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Will not count for major or minor.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Comprehension

Demonstrate proficiency in the comprehension of oral messages

Articulate positions

Present to an audience a variety of topics including the ability to develop and articulate positions in Spanish.

Discussion

Understand someone else speaking about a discipline-related topic and be able to engage that person in discussion.

Evaluation

Evaluate the use of language to convey meaning, to inform, and to persuade.

Third-Year Spanish Reading, Grammar, and Culture

Intensive study and practice with Spanish grammar, vocabulary, and writings incorporating cultural and literary readings.

SPAN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Placement by test.
Note	First class for returned Spanish-speaking missionaries. Fullfills the University Core Languages of Learning requirement. Required for Spanish major and minor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Analyze literary works

Identify and analyze a selection of literary works in Spanish within their historical and cultural context.

Write short compositions

Write short compositions, including informal and some formal correspondence, narratives, descriptions, or summaries, using paragraph-level connected discourse.

Apply grammar rules

Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Third-Year Spanish Composition

Study and practice of different writing styles, developing research skills.

SPAN 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Note	Strongly recommended for students continuing on to a graduate program.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Write argumentative essays

Write argumentative essays analyzing specific texts or topics, introducing a clear thesis and developing arguments to support the thesis using valid reasoning and sufficient evidence.

Write expository research papers

Write expository research papers that gather and synthesize information from multiple sources, develop and support the topic with well-chosen facts and examples, and organize ideas to make important connections and distinctions.

Apply writing strategies and processes

Develop and improve writing through multiple drafts by planning, revising, editing, and incorporating feedback.

Apply writing conventions

Apply writing conventions from appropriate style guides (e.g., MLA, APA, Chicago, etc.) in composing papers and citing sources.

Give oral presentations

Effectively deliver formal oral presentations that are tailored to a specific audience, making use of appropriate presentational media.

Convey meaning accurately

Convey meaning orally and in writing using a register and level of grammatical accuracy appropriate for academic and professional audiences.

Top

Spanish for the Professions

Introduction to professional terminology, documentation, and correspondence.

SPAN 323R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Winter

Course Outcomes

Acquire specialized vocabulary

Acquire specialized Spanish vocabulary related to one or more professional fields.

Read authentic documents

Read and interpret authentic documents and informative texts related to a specific professional field.

Compose written documents

Compose written documents for a specific field, such as correspondence, reports, or case studies, incorporating protocols and a level of accuracy appropriate for a professional audience.

Apply writing strategies and processes

Develop and improve writing through multiple drafts by planning, revising, editing, and incorporating feedback.

Demonstrate intercultural awareness

Demonstrate awareness of cultural issues involved in working with Spanish speakers, such as their economic and political realities, social and professional practices, and cultural beliefs and values.

Apply professional skills

Demonstrate practical application of professional skills by researching job opportunities, observing, or volunteering in a particular field.

Top

Survey of Hispanic Linguistics

Introduction to linguistics of Spanish: phonetics, phonology, morphology, syntax, semantics, history of the Spanish language, philology, dialectology, sociolinguistics, and psycholinguistics.

SPAN 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Explain general principles of linguistics

Identify and explain the foundational concepts of linguistics.

Describe major subfields of linguistics

Describe elements of the sound system, the structure of words and sentences, and the semantic properties of Spanish.

Relate linguistic principles to language variation

Relate basic principles of linguistics and knowledge of its major subfields to how language varies socially, geographically, and temporally.

Spanish Phonetics and Pronunciation

Spanish sound system; underlying concepts of Spanish speech production and applications to pronunciation.

SPAN 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Describe articulatory phonetics

Describe the physiology of sound production and how the sounds of Spanish are articulated.

Analyze structure of Spanish sound system

Explain and analyze the principles underlying the Spanish sound system and the relationships among its basic units.

Transcribe texts phonetically

Transcribe phonetically both oral and written texts in Spanish.

Improve Spanish pronunciation

Demonstrate improvement in the pronunciation of Spanish.

Top

Introduction to Spanish Literature

Readings in modern Hispanic literatures, focusing on formal literary analysis.

SPAN 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 321 or concurrent enrollment.
Note	Course is prerequisite to 400-level literature courses.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Describe literary genres

Describe and analyze the most salient elements of key literary genres including poetry, prose, and theater.

Apply tools of literary interpretation

Apply fundamental tools of literary interpretation through reading, writing, and the discussion of a balanced selection of works from Spain and Spanish America.

Write about literature

Write in Spanish about literature with a reasonable degree of grammatical correctness and fluency.

Iberian Civilization

Culture, history, art, music, and traditions of Spain.

SPAN 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 321 or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department, Summer

Course Outcomes

Describe geographic regions

Describe the principal geographic regions, that might include topological features, important cities, and local traditions, customs, and languages.

Analyze historical periods and current events

Describe and analyze historical periods and current events (e.g., political, social, artistic, and religious developments).

Describe cultural products, institutions, and practices

Recognize and describe important cultural products (e.g., art, literature, architecture, and music, including important works and individuals), cultural institutions, and cultural practices.

Discuss influence of own culture

By comparison, recognize and discuss the influence of their own cultural background on their attitudes, beliefs, and worldview.

Conduct research

Engage in research that demonstrate an advanced awareness of cultural and historical knowledge.

Special Topics in Iberian Culture

An in-depth examination of some aspect of Iberian culture and civilization. Subject matter will vary. This course is recommended for those individuals who may already have a broad exposure to the culture and civilization of Spain and/or those who desire a more focused cultural experience.

SPAN 346R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Identify, describe, and discuss cultural aspects

Identify, describe, and discuss aspects of a specific culture or non-literary cultural topic or theme.

Critically analyze cultural products and practices

Critically analyze cultural products and practices in their historical and social contexts from the perspectives of members of the culture.

Conduct cultural research

Conduct research on a particular cultural topic and formally present the results in oral presentations or written papers.

Spanish American Culture and Civilization

Culture, history, art, music, and traditions of Spanish America.

SPAN 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 321 or concurrent enrollment.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Describe geographic regions

Describe the principal geographic regions, that might include topological features, important cities, etc.

Analyze historical periods

Describe and analyze historical periods and current events (e.g., political, social, artistic, and religious developments).

Describe cultural products, institutions, and practices

Recognize and describe important cultural products (e.g., art, literature, architecture, and music, including important works and individuals), cultural institutions, and cultural practices.

Discuss influence of own culture

By comparison, recognize and discuss the influence of their own cultural background on their attitudes, beliefs, and worldview.

Conduct research

Engage in research that demonstrate an advanced awareness of cultural and historical knowledge.

Special Topics in Spanish American Culture

An in-depth examination of some aspect of Spanish American culture and civilization. Subject matter will vary. This course is recommended for those individuals who may already have a broad exposure to the culture and civilization of the Spanish-speaking countries of the Americas and/or those who desire a more focused cultural experience.

SPAN 356R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Identify, describe, and discuss cultural aspects

Identify, describe, and discuss aspects of a specific culture or non-literary cultural topic or theme.

Critically analyze cultural products and practices

Critically analyze cultural products and practices in their historical and social contexts from the perspectives of members of the culture.

Conduct cultural research

Conduct research on a particular cultural topic and formally present the results in oral presentations or written papers.

Top

Mexican-American Culture

Contemporary culture (education, popular and fine arts, worldview, attitudes, etc.) of the Mexican-American in the U.S.

SPAN 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 321 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Artistic Products

Recognize and describe important cultural products, such as art, literature, architecture, and music, including important works and individuals, as pertaining to Mexican American culture.

Cultural Institutions

Describe important cultural institutions, including family and religion.

Cultural Practices

Discuss important cultural practices, including customs, traditions, celebrations, festivals, etc

Recent Developments

Analyze recent cultural and social developments, including political, social, religious, and artistic events, placing them in historical context.

Cultural Background

Students should be able to recognize, compare, and evaluate the influence of their own cultural background on their attitudes, beliefs, and worldview, in relation to the Mexican- American world.

Techniques of Spanish Instruction

Instructional strategies and methodological approaches for developing proficiency and intercultural competence in Spanish. Key topics include standards-based lesson planning/curriculum development, use of technology, performance-based assessment, and addressing student diversity.

SPAN 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321 & SPAN 326 & SPAN 345; or SPAN 321 & SPAN 326 & SPAN 355
Note	For students not enrolled in Spanish teaching major or minor.
Taught	Fall, Winter, Summer

Course Outcomes

Discuss theories of language learning

Discuss basic theories of language teaching and learning.

Plan units and lessons

Plan Standards-based units and lessons, aligning assessments with learning objectives.

Teach language skills

Teach beginning-level vocabulary, grammar, culture, and the four skills (speaking, listening, reading, writing).

Assess learning

Assess students' language and culture learning.

Spanish Teaching Methods 1

History of language teaching methods; standards-based unit and lesson planning; strategies for teaching speaking, listening, reading, writing, grammar, and vocabulary.

SPAN 377

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	SPAN 321 & SPAN 326 & SPAN 345; or SPAN 321 & SPAN 326 & SPAN 355; Spanish Teaching major or minor status.
Taught	Fall, Winter

Course Outcomes

Discuss the benefits of studying a foreign language

Discuss the benefits of studying a foreign language.

Discuss historical trends in language teaching

Discuss major historical trends in foreign language teaching.

Set up your classroom

Discuss ways of setting up your classroom to motivate students to learn Spanish.

Plan Standards-based lessons

Use the World-Readiness Standards for Learning Languages to plan units and lessons.

Select and evaluate textbooks

Select and evaluate textbooks for your program.

Teach oral skills

Plan and implement various methods for teaching speaking skills (including pronunciation, conversation, games, and songs), and listening comprehension.

Teach grammar and vocabulary

Plan and implement methods for teaching grammar and vocabulary.

Top

Spanish Teaching Methods 2

Strategies for teaching culture; use of instructional media and technology; assessment of learner performance; foreign language program models; planning for continuing professional development.

SPAN 378

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	SPAN 377
Taught	Fall, Winter

Course Outcomes

Implement Standards-based instruction

Use professional reading to develop a research-based repertoire of instructional strategies that help secondary students meet each of the National Standards for Foreign Language Learning

Address three modes of communication

Design units, lessons, and activities that develop students' proficiency in Spanish across the three modes of communication

Teach cultural products, practices and perspectives

Contextualize language learning experiences in cultural products, practices, and perspectives using various techniques for teaching and assessing culture learning

Assess student learning

Develop and adapt assessments to evaluate students' proficiency and provide them with feedback that will improve their performance

Enhance instruction with technology

Utilize a variety of emerging technologies to enhance instruction, develop language proficiency and cultural competence, improve your professional productivity, and support your professional

Adapt instruction for diverse learners

Adapt learning experiences appropriately to better meet the needs of culturally diverse learners, including students with a variety of learning styles and special needs

Compare program models

Compare and contrast various program models for world language learning

Participate in professional development

Participate professionally in the school community, in professional organizations and professional development activities, and engage in professional dialogue and reflection with colleagues to improve teaching skills and your program

Practicum in Teaching Spanish

Implementing meaningful and engaging instruction for secondary students in Spanish; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

SPAN 380

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	SPAN 377; concurrent enrollment in Span 378; Spanish Teaching major status.
Taught	Fall, Winter

Course Outcomes

Create appropriate learning experiences

Craft meaningful, standards-based, developmentally and contextually appropriate language learning experiences in Spanish for students

Engage students in culture learning

Contextualize language learning experiences in cultural products, practices, and perspectives using various techniques for engaging students in critical thinking and problem-solving regarding culture

Informally assess student understanding

Use informal assessments to evaluate students' understanding

Reflect on professional practice

Engage in professional dialogue and reflection with your mentor teacher to improve your own professional practice

Contemporary Culture

Contemporary Spanish (or Spanish- American) culture: the people and their customs and institutions.

SPAN 395R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For Study Abroad programs only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Micro-Cultural Comptetence

Through a series of cultural proofs (visits, interviews, observations), develop a familiarity with the host culture at the level of the individual.

Macro-Cultural Competence

Through readings, develop a familiarity with macro forces (historical, political, economical) that have shaped the host culture.

Top

Academic Internship: Spanish Language Field Experience

On-the-job experience.

SPAN 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Demonstrate capacity to contextualize internship responsibilities and experiences within an academic framework.

Top

Introduction to Translation

Readings, individual research projects, and group translation activities. How the translation profession works. Developing the ability to translate general financial and legal texts. Learning to read texts critically.

SPAN 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall, Winter

Course Outcomes

Methods of Translation

Explain and apply methods for resolving common translation problems.

Evaluation

Demonstrate the ability to evalute translation quality.

Industry Knowledge

Demonstrate understanding of the translation industry.

Top

Beginning Translation and Interpretation, English to Spanish

Introduction to history, theory, and principles of translation and interpretation dealing specifically in English to Spanish.

SPAN 415A

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 321 & SPAN 322
Taught	Fall Term 1

Course Outcomes

Problem resolution

Explain and apply methods for resolving common translation problems

Basic Translation Skills

Demonstrate the ability to translate basic texts, such as newspaper articles

Research

Apply the research skills needed to translate texts required by this course

Research Skills

Use published research to analyze translator-training programs

Beginning Translation and Interpretation, Spanish to English

Introduction to history, theory, and principles of translation and interpretation, dealing specifically in Spanish to English.

SPAN 415B

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 415A
Taught	Fall Term 2

Course Outcomes

Transfer and Strategic Competences

Students will be able to identify and effectively execute the stages of the translation process, from (ST) analysis to the production of a functionally adequate Target Text (TT).

Theoretical-historical competence:

Students will be able to apply basic concepts of Skopostheorie and translation-oriented Source Text analysis to real translation tasks.

Consecutive interpreting competence

Students will be able to recognize and apply basic note-taking techniques and carry out short consecutive interpreting exercises with real speeches.

Top

Intermediate Translation and Interpretation, English to Spanish

Systematic study and contrastive exercises in translation and interpretation from English to Spanish. Translation of texts in general conceptual fields.

SPAN 416A

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 415B
Taught	Winter Term 1

Course Outcomes

Translation of Speeches

Demonstrate the ability to interpret speeches on general topics

Technical Translation

Demonstrate the ability to translate technical texts-legal, medical, commercial-of moderate difficulty

Research Skills

Apply the research skills needed to translate texts required by this course

Logical Thinking

Apply principles of logic to evaluate arguments in different kinds of texts

Intermediate Translation and Interpretation, Spanish to English

Systematic study and contrastive exercises in translation and interpretation from Spanish to English. Translation of texts in general conceptual fields.

SPAN 416B

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 416A
Taught	Winter Term 2

Course Outcomes

Translating Speeches

Apply principles of logic to evaluate arguments in different kinds of texts

Technical Translation

Demonstrate the ability to translate technical texts-legal, medical, commercial-of moderate difficulty

Research Skills

Apply the research skills needed to translate texts required by this course

Logical Thinking

Apply principles of logic to evaluate arguments in different kinds of texts

Top

Advanced Translation and Interpretation, English to Spanish

Translation of texts in specific fields. Simultaneous interpretation. From English to Spanish.

SPAN 417A

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 416B
Taught	Fall Term 1

Course Outcomes

Interpretation of Speeches

Demonstrate the ability to interpret speeches on topics-legal, medical, commercial-requiring some specialized knowledge

Technical Translation

Demonstrate the ability to translate technical texts-literary, legal, medical, commercial, scientific-that would typically be found in academic journals

Research Skills

Apply the research skills needed to translate texts required by this course

Translation Theory

Demonstrate an understanding of how translation theory has developed, particularly since the 1900s

Top

Advanced Translation and Interpretation, Spanish to English

Translation of texts in specific fields. Simultaneous interpretation. From Spanish to English.

SPAN 417B

Hours	1.5 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	SPAN 417A
Taught	Fall Term 2

Course Outcomes

Interpretation of Speeches

Demonstrate the ability to interpret speeches on topics-legal, medical, commercial-requiring some specialized knowledge

Technical Translation

Demonstrate the ability to translate technical texts-literary, legal, medical, commercial, scientific-that would typically be found in academic journals

Research Skills

Apply the research skills needed to translate texts required by this course

Translation Theory

Demonstrate an understanding of how translation theory has developed, particularly since the 1900s

Top

Translation and Interpretation Project

Individual translation and/or interpretation projects.

SPAN 418

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 417A & SPAN 417B
Taught	Winter

Course Outcomes

Translation Theory

Demonstrate an understanding of how translation theory has developed, particularly since the 1900s

Translation Theory

Demonstrate understanding of translation theory by completing a detailed theoretical introduction for the capstone project.

Top

(Span-Port) Problems in Translation

Introduction to the language industry, with an emphasis on computer translation tools and project management. Students will complete translation projects and learn how to supervise group projects.

SPAN 419

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321; or PORT 321
Taught	Fall, Winter

Course Outcomes

Discuss the future of translation technology

Discuss the possible future of translation technology, including future applications of existing technology and future development of new technologies, drawing on class assignments and a personal project.

Define specifications for a translation project

Define a set of specifications for a translation project based on text type, audience, and purpose.

Create and use a bi-text corpus

Create a bi-text corpus and derive translation memory and terminology from that bi-text corpus.

Complete a translation project

Use machine translation, translation memory, and terminology in conjunction with a translation environment tool to complete a translation project according to the project's specifications.

Fourth-Year Grammar

Fourth-year study of Spanish grammar and usage.

SPAN 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Taught	Fall, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Sylistic Errors in Spanish Composition

Recognize stylistic errors in Spanish composition and acquire the necessary strategies for their correction.

Syntactic Structures

Improve the knowledge of syntactic structures of Spanish.

Vocabulary

Enrich passive and active vocabularies of Spanish.

Short Essays

Demonstrate competence in writing short essays in Spanish that conform to the "advanced" level as described in the ACTFL proficiency guidelines.

Listening Comprehension

Improve listening comprehension of authentic Spanish sources.

Top

Border Spanish

Mexican-American speech patterns, including language contact and bilingualism.

SPAN 423

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 326 or Span 329.
Note	Previous course in linguistics strongly recommended.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Linguistic Knowledge of Border Spanish

Students will demonstrate a knowledge of principal features of (Mexican-American) Popular Spanish in terms of semantics, morphosyntax, and phonetics/phonology.

Theoretical constructs

Students will understand and be able to describe succinctly S-E bilingual contact phenomena, such as borrowing, code-switching, and language maintenance/shift.

Cultural Awareness

Students will gain a greater understanding of and appreciation for Mexicans and Mexican-Americans living in the U.S.

Top

Contrastive Analysis of the Structures of Spanish and English

Contrastive analysis of phonology, morphology, syntax, and semantics of Spanish and English.

SPAN 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Span 326 or Span 329.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Contrasting English and Spanish

Students will be able to explain the chief differences and similarities between the structures of the English and Spanish languages.

Basic Principles

Learn the basic principles of Spanish phonology, morphology (both derivational and inflectional), syntax and sociolinguistics.

Assumptions in Modern Linguistics

Learn what the assumptions of modern linguistics are (e.g., natural language is based on the use of signs; language is a social phenomenon; oral language takes precedence over written language; linguistics is descriptive, not prescriptive; variation is intrinsic to language; language is highly structured; there are linguistic universals; etc.)

Solving Linguistic Problems

Be able to solve linguistic problems in the teaching and learning of a second language.

Top

Bilingualism

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Dialectology

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Language Planning

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Semantics

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Sociolinguistics

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Special Topics in Spanish Linguistics

Course content varies yearly; focuses on specific area of linguistics such as dialectology or sociolinguistics.

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Syntax

SPAN 429R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Top

Hispanic Cinema

Introduction to study of film; background in appreciating best of motion picture art in Spain and Spanish America.

SPAN 438

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 339
Note	Previous experience with film useful but not required.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Apply tools of film analysis

Demonstrate a mastery of basic tools of film analysis through the study of a variety of films from various film industries from Spain and Spanish America.

Recognize film history

Recognize key moments and figures of film industries of Spain and Spanish America

Write persuasive essays

Write cogent, persuasive essays using the tools of film analysis.

Top

Hispanic Theatre Production

Theory and practice of dramatic performance. Includes participation in play to be performed during semester.

SPAN 439R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Director's consent
Note	No more than 3 hours of 439R credit may count toward any degree.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Demonstrate understanding of dramatic theory and practice

Demonstrate understanding of the theory and practice of dramatic performances.

Participate in production of a play

Participate in the production of a play during the course of the semester.

Develop research and writing skills

Develop skills in researching and writing about theatre.

Medieval Spanish Literature

Spanish literature from El Cantar de Mio Cid (1140) through La Celestina (1499).

SPAN 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	Fall odd years

Course Outcomes

Discuss and assess important texts

Discuss and assess the most important texts of the Spanish medieval tradition, including such works as *El cantar de Mio Cid* and *La Celestina*.

Discuss historical and social context

Demonstrate an awareness of the historical and socio-cultural backdrop of Hispanic medieval literature.

Conduct research

Meaningfully and appropriately engage with the most relevant secondary scholarship on Spanish medieval literature.

Write about literature

Demonstrate an ability to write meaningfully and insightfully about Spanish medieval literature, observing relevant academic protocols.

Survey of Spanish Literature

Literary masterpieces of Spain.

SPAN 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 339
Taught	Fall, Winter, Spring, Summer Contact Department
Offered	Independent Study also.

Course Outcomes

Interpret texts

Formulate interpretations of literary texts that take into account their socio-historical and aesthetic contexts.

Differentiate among contexts

Define and differentiate among periods, representative authors, schools, movements, ideological trends, and the historical contexts of Spanish literature.

Write interpretive/research papers

Write cogent, persuasive, and grammatically correct interpretive essays that demonstrate competence in library research skills and the appropiate use of secondary sources.

Golden Age Literature

Sixteenth- and seventeenth-century Spanish literature.

SPAN 443R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	Fall odd years, Spring

Course Outcomes

Authors

Students will be able to demonstrate knowledge about one or more authors from the 16th and/or 17th centuries.

Historical and Literary Context

Students will be able to analyze the texts studied in terms of the historical, cultural, and literary context of the Early Modern world.

Genre

Students will be able to describe, analyze and discuss one or more of the genres of Early Modern Spanish literature and the conventions connected with the genre(s).

Research and Writing

Students will strengthen their research and writing skills by producing essays about, editions of, and/or translations of 16th and 17th-century Spanish texts.

Life-long reading

Students will develop the skills necessary to appreciate and enjoy reading Early Modern Spanish texts.

Don Quijote

In-depth study of Cervantes' El ingenioso hidalgo don Quijote de la Mancha.

SPAN 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	

Course Outcomes

Reading the text

Students will read *Don Quijote de la Mancha* in its original version, taking into account plot and character development, symbolism, cultural and literary context, literary antecedents, and subsequent influence.

Theory and Interpretation

Students will comment on different strategies for reading, writing and translating (using critical vocabulary) as discussed in the *Quijote,* and will explain the different critical stances, including the "hard" perspective and the "soft" perspective.

Genre

Students will trace the stylistic innovations introduced by Cervantes in the *Quijote,* and its intersections with other genres (e.g. theater, poetry).

Realism, Metafiction

Students willanswer the question of whether el *Quijote* really is the first modern novel as many claim it to be. Students will identify and analyze episodes in the novel that display realism and metafiction, and will recognize the impact the *Quijote* has had on the development of these modes in the subsequent development of the western novel.

Top

Nineteenth-Century Literature

Romanticism (1770s through 1870s) and/or the novels of Benito Perez Galdos and his contemporaries.

SPAN 446R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Detailed Knowledge

Demonstrate a detailed knowledge of Spanish romantic and/or realist literature.

Approaches

Apply relevant analytical and theoretical approaches to the subject matter in question.

Twentieth-Century Spanish Literature

Genre (twentieth-century novel, drama, or poetry) or particular school (Generation of 1898, Generation of 1927, etc.) emphasized.

SPAN 448R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	Winter even years

Course Outcomes

Literary History

Demonstrate thorough understanding of twentieth-century Spanish literary history.

Critical Practice

Demonstrate ability to apply key terms in critical practice (e.g., practical criticism, structural analysis, hermeneutics, etc.).

Advanced Research and Writing

Develop advanced skills in research techniques and academic writing.

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to 20th-century Spanish Literature.

Special Topics in Spanish Literature

Specific topics in Spanish (peninsular) literature. Course content will vary each semester to offer optimum exposure to all areas of Spanish literature.

SPAN 449R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 441
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer even years

Course Outcomes

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Research

Write essays in Spanish, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Literary Study Skills

Develop the habits and skills for Spanish literary study that inspire continued learning.

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to special topics in Spanish Literature.

Top

Colonial Literature

SPAN 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critically analyze literature

Demonstrate an ability to critically analyze early Spanish American literature through insightful in-class participation, oral presentations, and written assignments.

Early Spanish-American Literature

Indigenous literature (Maya, Nahuatl, etc.) and other texts written in Spanish Colonial America through eighteenth century.

SPAN 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter even years, Spring Contact Department, Summer Contact Department

Course Outcomes

Apply theoretical approaches

Apply a variety of analytical and theoretical approaches to the study of early Spanish American writings as literature and as a reflection of the early cultures of the Spanish-speaking countries of the Americas.

Demonstrate textual knowledge

Demonstrate a strong knowledge of a broad range of the important literary and historical texts of the early Spanish American period and of the historical and cultural contexts in which they were produced.

Top

Pre-Columbian Literature

SPAN 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critically analyze literature

Demonstrate an ability to critically analyze early pre-Columbian literature through insightful in-class participation, oral presentations, and written assignments.

Survey of Hispanic-American Literature

Literary masterpieces of Spanish America.

SPAN 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 339
Taught	Fall, Winter, Spring Contact Department, Summer

Course Outcomes

Interpret texts

Formulate interpretations of literary texts that take into account their socio-historical and aesthetic contexts.

Differentiate among contexts

Define and differentiate among periods, representative authors, schools, movements, ideological trends, and the historical contexts of Spanish American literature.

Write interpretive/research papers

Write cogent, persuasive, and grammatically correct interpretive essays that demonstrate competence in library research skills and the appropiate use of secondary sources.

Top

The Spanish American Novel

Selected Spanish-American novelists such as Juan Rulfo, Gabriel Garcia Marquez, Alejo Carpentier, Mario Vargas-Llosa, etc.

SPAN 454R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Demonstrate understanding of contexts

Demonstrate a strong understanding of the historical, social, and literary contexts of the novels and authors studied.

Interpret novels

Demonstrate critical acuity in interpreting individual novels, drawing appropriately on the tools of literary criticism and theory.

Prepare a research paper

Express one's insights in a research paper which makes appropriate use of secondary sources and demonstrates mastery of MLA protocols.

Top

Spanish-American Poetry

Selected Spanish-American poets, movements, and national traditions.

SPAN 455R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Poetry Interpretation

Demonstrate critical acuity in interpreting individual poems, making appropriate reference to formal poetic devices.

Poetry Contexts

Demonstrate a grasp of the historical, social, and literary contexts of the poems and poets studied.

Research Paper

Express one's insights in a research paper which makes appropriate use of secondary sources.

Top

Spanish American Drama

Twentieth-century theatre from Spanish America and Brazil.

SPAN 456R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Detailed Knowledge

Demonstrate a detailed knowledge of a particular topic, text or set of texts, or author(s) from the Spanish literary tradition.

Approaches

Apply relevant analytical and theoretical approaches to the subject matter in question.

Professionalism

Demonstrate professionalism in all facets of the course, including oral presentations and signficant writing assignments.

Hispanic-American Short Story

Introduction and development of an important literary genre in Spanish America, including works of Jorge Luis Borges, Julio Cortazar, Juan Rulfo, Gabriel Garcia Marquez, etc.

SPAN 458R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall odd years, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Basic Bibliography

Master basic bibliographical techniques related to the short story genre.

Formal Aspects of the Short Story

Demonstrate a firm grasp of the formal aspects of the short story genre.

History and Key Figures

Gain a working knowledge of the history and principal figures of the Spanish American short story.

Special Topics in Spanish American Literature

Specific topics in Latin American literature. Course content will vary each semester to offer optimum exposure to all areas of Latin American literature.

SPAN 459R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter Contact Department, Spring even years, Summer Contact Department

Course Outcomes

Aesthetic Constructs, Genres, and Context

Recognize aesthetic constructs, genre differences and similarities, ideological trends, and historical contexts.

Research

Write essays in Spanish, including one final research paper, that demonstrate an advanced knowledge of the use of language and literary criticism.

Literary Study Skills

Develop the habits and skills for Spanish literary study that inspire continued learning.

Literary Analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to special topics in Spanish-American Literature.

Top

Spanish-Speaking American (Mexican-American) Literature

Spanish-English literature of the Mexican-American within the United States.

SPAN 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 451
Taught	Fall Contact Department, Winter even years, Spring Contact Department, Summer Contact Department

Course Outcomes

Summarize and discuss literary history

Summarize and discuss Mexican-American literary history.

Conduct research and write academically

Develop advanced skills in research techniques and academic writing.

Apply tools of literary analysis

Understand and properly apply the tools of literary analysis, as well as critical and philosophical concepts which may apply to Mexican-American Literature.

Top

Secondary Spanish Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

SPAN 476

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Span 377, 378, and 380.
Taught	Fall, Winter

Course Outcomes

Integrate learning into teaching

Critically integrate professional readings, coursework, and teaching experiences into a repertoire of options for professional thought and action

Improve language, culture, and teaching skills

Improve your Spanish language proficiency, your cultural understanding, and your ability to help students see patterns in the language.

Create appropriate learning experiences

Craft standards-based, developmentally and contextually appropriate, meaningful learning experiences in Spanish that support the growth of students' language proficiency

Engage students in culture learning

Contextualize language learning experiences in cultural products, practices, and perspectives and use various techniques for engaging students in critical thinking and problem-solving regarding culture

Utilize communicative techniques and technologies

Utilize a variety of communication techniques and emerging technologies to foster active inquiry and collaboration in the classroom, to develop language proficiency and cultural competence, to foster students' intrinsic motivation, and to support your own professional productivity and growth

Assess student learning

Develop and adapt a variety of traditional and alternative assessments (including performance-based assessments, portfolios, projects, and self-assessments) to inform instruction, to evaluate

students' proficiency across all three modes of communication, to provide feedback that will improve student performance, and to report student progress

Engage in professional development and reflection

Participate professionally in the school community, in professional organizations and professional development activities, and engage in professional dialogue and reflection with colleagues and community agencies to support students, improve your teaching, and strengthen your program

Adapt instruction for diverse learners

Adapt learning experiences appropriately to better meet the needs of culturally diverse learners, including students with a variety of learning styles and special needs

Top

Directed Research in Spanish

Under faculty member's direction, designing and conducting research project covering material not normally presented in regular course work. Research paper required.

SPAN 480R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Written proposal subject to department approval.
Note	Total Span 480R credit toward bachelor's degree not to exceed 3 hours.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Research skills

Conduct advanced, independent research on a topic in Hispanic studies.

Top

Senior Proficiency Evaluation

Course meets only once to provide information on the Oral Proficiency Interview and Writing Proficiency Test, required of all majors and teaching minors.

SPAN 491

Hours	0.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No major or minor credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Spanish Speaking Proficiency

Receive an Advanced Low or better on the Oral Proficiency Interview.

Capstone Course in Spanish

A culminating experience for Spanish as a first or second major. Students will be able to articulate the value of the Spanish BA and will develop strategies and a rationale for applying the skills acquired during their undergraduate studies.

SPAN 493

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Senior status or departmental advisor's consent.
Note	Course must be taken concurrently with an approved upper-division, senior-level (e.g. 400-level) course in the semester prior to graduation.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Assemble a portfolio

Students will assemble a portfolio of artifacts demonstrating their language ability, cultural competence, critical thinking and expression, and application of their language skills to their personal and professional life.

Reflect on learning

Students will reflect on their learning and experiences as a Spanish/Portuguese major at BYU and set goals for continued language use and improvement.

Top

Secondary Spanish Teaching Internship

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

SPAN 496

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Span 377, 378, and 380.
Taught	Fall, Winter

Course Outcomes

Integrate learning into teaching

Critically integrate professional readings, coursework, and teaching experiences into a repertoire of options for professional thought and action

Improve language, culture, and teaching skills

Improve your Spanish language proficiency, your cultural understanding, and your ability to help students see patterns in the language.

Create appropriate learning experiences

Craft standards-based, developmentally and contextually appropriate, meaningful learning experiences in Spanish that support the growth of students' language proficiency

Adapt instruction for diverse learners

Adapt learning experiences appropriately to better meet the needs of culturally diverse learners, including students with a variety of learning styles and special needs

Engage students in culture learning

Contextualize language learning experiences in cultural products, practices, and perspectives and use various techniques for engaging students in critical thinking and problem-solving regarding culture

Utilize communicative techniques and technologies

Utilize a variety of communication techniques and emerging technologies to foster active inquiry and collaboration in the classroom, to develop language proficiency and cultural competence, to foster students' intrinsic motivation, and to support your own professional productivity and growth

Assess student learning

Develop and adapt a variety of traditional and alternative assessments (including performance-based assessments, portfolios, projects, and self-assessments) to inform instruction, to evaluate students' proficiency across all three modes of communication, to provide feedback that will improve student performance, and to report student progress

Engage in professional development and reflection

Participate professionally in the school community, in professional organizations and professional development activities, and engage in professional dialogue and reflection with colleagues and community agencies to support students, improve your teaching, and strengthen your program

Problems in Spanish Grammar

Application of contemporary grammatical concepts to problems in Spanish grammar.

SPAN 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Winter odd years, Spring Contact Department, Summer even years

Course Outcomes

Grammar Rules and Problems

The student enrolled in *Problems in Spanish Grammar* will carefully examine and formulate more accurate and complete rules for several recalcitrant grammar "problems" by reading and studying selections from grammarians and researchers who provide insights into the problem in question. The student's ability to synthesize coherent and meaningful generalizations will be objectively tested by exams and further evaluated while he or she participates in classroom discussion.

Descriptive and Prescriptive Grammars

The student enrolled in *Problems in Spanish Grammar* will acquire a greater understanding of both descriptive and prescriptive grammars and their function and limitations. The student will also acquire specialized terms employed by grammarians and morphosyntacticians. The student's ability to understand and use these terms appropriately will also be objectively measured by examination.

Research Paper

Complete a research paper/presentation on a particular grammar point or construction. This assignment will test a student's ability to locate appropriate refereed sources, read and synthesize them and prepare a written document and oral presentation according to a recognized style manual.

Romance Philology

Comparative study of the evolution of Latin into modern Romance languages.

SPAN 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Historical Context

Situate Latin and the Romance Languages in their "external" (i.e. political and literary) historical context.

Phonological Evolution

Recognize the "laws" of regular phonological evolution (e.g. syncope, lenition, diphthongization, etc.).

Language Comparison

Compare the “major” (i.e. literary) Romance languages as far as their phonological development is concerned.

Lexical Differences and Etymology

Summarize the major lexical differences across Romance languages and some of the basic principles of etymology.

Summarize Research

Become familiar with articles published in professional journals relating to the subject matter and produce accurate and meaningful written summaries and reactions to them.

Transcription

Learn the rudiments of transcribing medieval or Renaissance manuscripts.

Top

History of the Spanish Language

Linguistic sources that contributed to formation of the Spanish language.

SPAN 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Winter even years, Summer odd years

Course Outcomes

Nominal and Verbal Systems

Acquire a basic knowledge of the changes undergone by the nominal and verbal systems of Latin and Castilian (e.g. the demise of the case system, the development of new verbal tenses, etc.).

Scholarly Articles

Demonstrate the ability to summarize and discuss in a clear and concise manner several scholarly articles on the topic of the history of the Spanish language.

Political and Literary Contexts

Situate Latin and Castilian in their political and literary historical contexts.

Phonological Development

Recognize the laws of regular phonological development (e.g. syncope, lenition, diphthongization, etc.).

Lexicon Sources

Identify the sources of the Castilian lexicon.

Theory

Understand the different theories that claim to understand the relation between Latin and the Romance languages, especially the relation between Latin and Castilian.

Linguistic Standardization

Understand the process of linguistic standardization in Romance and its implications for the linguistic map of the Iberian Peninsula.

Special Topics in Spanish Linguistics

Topics include semantics, dialectology, and sociolinguistics.

SPAN 529R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	SPAN 325; or SPAN 326; or SPAN 329
Taught	Fall, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Read and analyze research

Read and analyze research articles related to special topic.

Prepare a research paper/project

Produce an original research paper/project centered on the theme of the seminar.

Spanish Language Teaching Procedures

Mastery of skills specific to foreign language instruction. Lectures, demonstrations, practical experience.

SPAN 577

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	For public school teachers.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Discuss language learning theories

Discuss basic theories of language teaching and learning.

Plan units and lessons

Plan Standards-based units and lessons, aligning assessments with learning objectives.

Teach language skills

Teach beginning-level vocabulary, grammar, culture, and the four skills (speaking, listening, reading, writing).

Assess learning

Assess students' language and culture learning.

Top

Academic Internship: Spanish Internship

SPAN 599R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	SPAN 321
Note	For supervised internship credit on BYU Study Abroad programs only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Internship

Demonstrate capacity to contextualize internship responsibilities and experiences within an academic framework.

Top

Intercollegiate Athletics

STAC 100R

Hours	0.5 Credit, 2.0 Lecture, 10.5 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Competence and technique

Demonstrate competence and proper technique in chosen sport through practice and competition for the University Intercollegiate Athletics team.

Top

Intercollegiate Athletics: Cheer

STAC 100R

Hours	0.5 Credit, 2.0 Lecture, 10.5 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Intercollegiate Athletics: Women's Volleyball

STAC 100R

Hours	0.5 Credit, 2.0 Lecture, 10.5 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Rules, strategies and scoring

Demonstrate proficiency with the rules, strategies and scoring for the sport in practice and in competition.

Skills and fitness improvement

Demonstrate improvement in sport skills and physical fitness in practice and in competition.

Top

Adapted Physical Education

STAC 102R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Department approval.
Taught	

Course Outcomes

Outcome variable

Accommodate students who are enrolled in a regular activity class and have accessability needs as determined by the University and the department.

Top

Dance Aerobics

Aerobic dance is an individualized dynamic fitness program designed to bring about an increase in total body fitness for participants of all levels of condition, ability, and needs.

STAC 104

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Effective Workouts

Students will learn how to perform a safe and effective workout for total body fitness.

Self-Evaluation

Students will evaluate their own physical fitness and set individual goals for improvement.

Scientific Principles

Students will demonstrate an understanding of basic scientific principles regarding cardiovasular endurance, strength, flexibility, and lean/fat body ratio by passing a written exam.

Top

Badminton, Beginning

STAC 106

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Fundamental skills

Demonstrate competence in the fundamental skills of badminton: clear, smash, drive and drop through class drills, practice and competition.

Rules and strategies

Demonstrate an understanding of the rules, strategies, and scoring in badminton by passing a written test.

Pilates

Pilates strengthens and tones muscles, improves posture, provides flexibility and balance, unites body and mind, and enables a sense of mental control.

STAC 107

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

Effective Workouts

Students will learn how to perform a safe and effective workout for total body fitness.

Self-Evaluation

Students will evaluate their own physical fitness and set individual goals for improvement.

Scientific Principles

Students will demonstrate an understanding of basic scientific principles regarding cardiovasular endurance, strength, flexibility, and lean/fat body ratio by passing a written exam.

Zumba

Zumba Fitness is a dance exercise program designed to bring about an increase in total body fitness for participants of all levels of condition, ability, and needs.

STAC 108

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Healthy Perspectives

Students will establish healthy perspectives on body image and appropriate health goals.

Self-Evaluation

Students will evaluate their own health and determine needed changes.

Dance Movements

Students will learn a variety of Latin, international, and folk dance movements adapted for the purpose of exercise.

Scientific Principles

Students will demonstrate an understanding of basic principles of exercise, physiology, and health maintenance by passing a written exam.

Top

Yoga

Yoga teaches how to exercise and/or meditate in order to unify the mind, body and spirit, feeling quiet in your mind, strong and energized in your body, and peaceful in your spirit.

STAC 109

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Basic Principles

Students will demonstrate an understanding of basic yoga principles and practices by passing a written exam.

Sequencing and Alignment

Students will learn basic sequencing and alignment for an Ashtanga Vinyasa practice.

Yoga Practice

Students will develop a yoga practice that supports and honors their bodies.

Indoor Cycling

Students in the class will be guided through weekly cycling exercise sessions to improve their cardiovascular fitness and aerobic endurance as well as increase their leg muscle strength and power.

STAC 110

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Positioning Skills

Students will learn proper bicycle positioning skills and techniques to provide comfort, safety and efficiency while cycling.

Basic Principles

Students will learn some basic principles of endurance training and be exposed to a variety of cycling exercise programs designed to develop muscular endurance, strength and power and demonstrate their understanding of these principles by passing a written exam.

Nutrition and Hydration

Students will understand basic principles of nutrition and hydration to support endurance exercise performance.

Top

Basketball, Beginning

STAC 111

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Fundamental skills

Demonstrate competence in the fundamental skills of basketball through class drills, practice and competition.

Rules and strategies

Demonstrate an understanding of the rules, strategies, and scoring in basketball by passing a written test.

Top

Basketball, Intermediate

STAC 112

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 111 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence in intermediate basketball skills through class drills, practice and competition.

Rules and stragegies

Demonstrate an understanding of the rules, strategies, and scoring in basketball by passing a written test.

Bowling, Beginning

STAC 116

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence in the fundamental skills of bowling through class drills, practice and competition.

Rules, vocabulary, and strategies

Demonstrate an understanding of the rules, vocabulary, strategies, and scoring in bowling by passing a written exam.

Benefits of bowling

Identify in a written exam the benefits of bowling as a physical activity and source of life-long enjoyment.

Intermediate Bowling

Demonstrate competence in the intermediate skills of bowling through class drills, practice, and competition. Demonstrate an understanding of the rules, vocabulary, strategies, and scoring in bowling by passing a written exam. Identify in a written exam the benefits of bowling as a physical activity and a source of life-long enjoyment.

STAC 117

Hours	0.5 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	STAC 116 or equivalent experience.
Taught	Fall, Winter

Course Outcomes

Skills

Demonstrate competence in the intermediate skills of bowling through class drills, practice, and competition.

Rules, vocabulary, and strategies

Demonstrate an understanding of the rules, vocabulary, strategies and scoring in bowling by passing a written exam.

Benefits of bowling

Identify in a written exam the benefits of bowling as a physical activity and a source of life-long enjoyment.

Diving, Springboard

STAC 121

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Fundamentals of diving

Demonstrate competence in the fundamentals of diving in eight different dives from five different groups from the 1-meter springboard.

Mechanics of diving

Demonstrate an understanding of diving mechanics by passing a written exam.

Flexibility

STAC 125

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Pre and post tests

Demonstrate the ability to assess flexibility progress through the completion of pre and post tests.

Strategies

Demonstrate an understanding of the strategies behind and importance of flexibility to improve and maintain good health by passing a written test.

Personal flexibility program

Demonstrate the ability to make life changing decisions about health and fitness by writing a one-month flexibility program.

Golf, Beginning

STAC 131

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate in drills and practice competence in the fundamental skills of golf on: drives, approaches, pitches, chips, and putts.

Playing the game

Demonstrate golfing skills by playing three 9-hole rounds of golf.

Rules and strategies

Demonstrate and understanding of the rules, strategies and scoring in golf by passing a written test.

Golf, Intermediate

STAC 132

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 131 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate in drills and practice competence in the fundamental skills of golf on: drives, approaches, pitches, chips, and putts.

Play the game

Demonstrate golfing skills by playing three 9-hole rounds of golf.

Rules and strategies

Demonstrate an understanding of the rules, strategies and scoring in golf by a written test.

Gymnastics, Beginning

STAC 136

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Skills

Identify specific skills for each apparatus.

Skills demonstration

Demonstrate elementary skills on each apparatus.

Strength and flexibility

Increase strength and flexibility.

Gymnastics terminology

Demonstrate an understanding of the course requirements and gymnastics terminology by passing an exam.

Jogging

STAC 139

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Exercise and nutrition

Demonstrate an understanding of the scientific principles of exercise and nutrition and their effects on the body by passing a written exam.

Personal training program

Demonstrate an understanding of training laws, principles, and theory by applying them when setting up a personal training program.

Avoid overtraining and injury

Learn to utilize correct running mechanics, nutritional principles and specific physiological and biomechanical testing to avoid overtraining and injury.

Martial Arts

STAC 141

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Proper etiquette in martial arts

Show and explain proper etiquette expected in martial arts in a written examination and through daily class activities.

Basic grappling control tactics

Perform basic grappling control tactics in class to defeat larger and stronger opponents.

Competition

Participate in grappling martial art competition.

Top

Physical Training--ROTC

STAC 143R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	For ROTC students only.
Taught	Fall, Winter, Spring

Course Outcomes

Air Force fitness standards

Demonstrate in class activities knowledge, ability, motivation and experience to maintain Air Force fitness standards.

Group physical training protocol

Demonstrate in class activities familiarity with customary Air Force exercises and group physical training protocol.

air Force Physical Fitness Assessment

Learn and practice exericses and techniques to get high scores on the Air Force Physical Fitness Assessment.

Fit lifestyle

Generate Esprit de Corps, teamwork, and positive attitude toward maintaining a fit lifestyle.

Physical Fitness (Army)

Demonstrate how to pass the APFT Army Physical Fitness Test scoring at least 70 in each event.
Demonstrate how to pass the CWST Combat Water Survival Test
Test individual ability to complete a four mile run in 36 minutes or less.
Test individual ability to complete a six mile ruck march in 90 minutes or less.
Employ a variety of exercise plans.
Produce improved cardiovascular endurance.
Transform and build physical strength.
Discover self-imposed limits.

Team Work (Army)

Generate determination to overcome challenges as a team.
Organize small group exercise periods.

Nutrition (Army)

Manage healthy and well balanced eating habits.

Racquetball, Beginning

STAC 146

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Safety precautions, rules and etiquette

Demonstrate an understanding of safety precautions, rules, etiquette of singles, doubles, and cut-throat games of racquetball by passing a written test.

Skills

Demonstrate proper form and technique equivalent to at least a level D on the following skills: Serves, offensive shots, defensive shots, offensive and defensive strategies, drills.

Racquetball, Intermediate

STAC 147

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Safety precautions, rules, and etiquette

Demonstrate an understanding of safety precautions, rules, and etiquette of singles, doubles, and cut-throat games of racquetball by passing a written test.

Skills

Demonstrate proper form and technique equivalent to at least a level C on the following skills: Serves, offensive shots, defensive shots, offensive and defensive strategies, drills.

Ice Skating

Developing figure skating and ice hockey skills.

STAC 150

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Taught off campus. Fee.
Taught	Fall, Winter

Course Outcomes

Skills

Demonstrate the ice skating skills covered in the course using proper technique and form in a 1:00-3:00 minute choreographed group or solo ice skating program to music or during an individual exam on ice with the instructor.

Knowledge of ice skating

Demonstrate knowledge of ice skating history, protocol, ice rinks, skates, and figure skating by passing a written exam.

Ice Hockey

Basic power skates, puck and stick handling, and game strategies.

STAC 151

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Taught off campus. Fee.
Taught	Fall, Winter

Course Outcomes

Skills

Demonstrate the ice hockey skills covered in the course using proper technique and form in an organized game.

Hockey rules

Demonstrate knowledge of hockey history, hockey equipment, ice rinks, and rules and strategies of playing hockey by passing a written exam.

Intermediate Ice Skating

Developing intermediate ice skating skills.

STAC 152

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 150 or equivalent.
Note	Taught off campus. Fee.
Taught	Winter

Course Outcomes

Skills

Demonstrate the ice skating skils covered in the course using proper technique and form in a 1:00-3:00 minute choreographed group or solo ice skating program to music or during an individual exam on ice with the instructor.

Ice skating knowledge

Demonstrate knowledge of ice skating history, protocol, ice rinks, skates and figure skating by passing a written exam.

Intermediate Ice Hockey

Developing intermediate ice hockey skills.

STAC 153

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 151 or equivalent.
Note	Taught off campus. Fee.
Taught	Winter

Course Outcomes

Skills

Demonstrate the ice hockey skills covered in the course using proper technique and form in an organized game.

Rule of Hockey

Demonstrate knowledge of hockey history, hockey equipment, ice rinks, and rules and strategies of hocky by passing a written exam.

Top

Self-Defense

Fundamental principles, skills, and techniques.

STAC 155

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate the punch, kick, strike, and block skills used to evade or excape an attack by passing a simulation test.

Effective responses

Demonstrate a knowledge of effective responses (verbal, physical, use of objects) to escape from an attack by passing a written exam.

Soccer, Beginning

STAC 156

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate basic soccer skills of : dribbling, trapping, passing, shooting, throw-in, goalkeeping, offense and defense strategies.

Rules and strategies

Demonstrate an understanding of the rules and strategies of soccer by passing a written final.

Soccer, Intermediate

STAC 157

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 156 or equivalent.
Taught	Fall Term 1, Winter Term 1, Spring, Summer

Course Outcomes

Skills

Demonstrate appropriate soccer skills by passing a skill assessment on: dribbling, trapping, passing, shooting, goalkeeping, heading, give-'n-go, support, through balls, back passing, etc.

Strategies and Rules

Demonstrate a knowledge and understanding of the game of soccer by passing a written exam.

Skiing, Beginning

STAC 161

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Sections formed on basis of ability. Students responsible for following costs: bus transportation, ski equipment, lift fees. Fee.
Taught	Winter

Course Outcomes

Skills

Demonstrate motor skills sufficient to enjoy participation in skiing or snowboarding by passing a daily skill acquisition assessment.

Mountain awareness, responsibility and equipment maintenance

Demonstrate an understanding of mountain awareness, mountain responsibility, and equipment maintenance by passing a written exam.

Skiing, Intermediate

STAC 162

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Sections formed on basis of ability. Students responsible for following costs: bus transportation, ski equipment, lift fees. Fee.
Taught	Winter

Course Outcomes

Skills

Demonstrate motor skills sufficient to enjoy participation in skiing or snowboarding as a lifelong physical activity by passing a daily skill acquisition assessment.

Mountain awareness, responsibility, and equipment maintenanc

Demonstrate an understanding of mountain awareness, mountain responsibility, and equipment maintenance by passing a written exam.

Skiing, Cross-Country

STAC 164

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Students responsible for following costs: bus transportation, ski equipment, trail fees. Fee.
Taught	Winter

Course Outcomes

Skills

Demonstrate the basic skills of cross country skiing in classic and skating disciplines.

Safety and equipment

Demonstrate an understanding of skiing safety, equipment, and fundamental definitions by passing a written exam.

Top

Swimming for Nonswimmers

STAC 170

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Form and technique

Demonstrate proper form and technique in the front and back float, front and back glide, freestyle, backstroke, and elementary backstroke.

Swimming technique

Demonstrate an understanding of swimming technique by passing a written exam.

Swimming, Beginning

STAC 171

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Form and technique

Demonstrate proper form and technique in the standard swimming strokes (freestyle, backstroke, and breaststroke) and pass a written exam.

Fitness level

Demonstrate a beginning swimming fitness level by completing a 500-yard swim test.

Swimming workouts

Demonstrate ability to correctly set up swimming workouts by submitting a sample workout.

Top

Swimming, Intermediate

STAC 172

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 171 or equivalent.
Taught	Fall, Winter

Course Outcomes

Form and technique

Demonstrate proper form and technique in all four competitive strokes and pass a written exam.

Fitness

Demonstrate an intermediate swimming fitness level by completing a 650-yard swim test.

Beginning Scuba Diving

Developing scuba diving skills. Open Water Diver Certification upon successful completion.

STAC 175

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Taught off campus. Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

SCUBA skills

Demonstrate mastery of the basic, fundamental skills of SCUBA by completing the PADI Open Water Diver certification in both pool and open water.

Understanding of dive theory and equipment

Demonstrate an appropriate understanding of SCUBA diving theory by passing 4 quizzes and a final exam on the following subjects: diving physics and physiology, euipment, dive planning, emergency procedures, aqutic life and environment.

Intermediate Scuba Diving

This class focuses on specialty techniques of SCUBA diving for divers who are already open water certified. The class is taught by Dive Utah (diveutah@diveutah.com).

STAC 176

Hours	0.5 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	StAc 175 or equivalent.
Note	Taught off campus. Fee.
Taught	Fall, Winter

Course Outcomes

SCUBA Skills

Demonstrate mastery of more advanced specialty areas of diving, such as deep diving, altitude diving and peak performance bouyancy and their corresponding skills by completing the PADI Adventure Dive.

Understanding of dive theory

Demonstrate an appropriate understanding of specialty diving theory by completing five Knowledge Reviews from the Adventures in Diving manual that correspond to the dives that will be done in open water.

Water Aerobics

Exercise workout in water emphasizing flexibility, strength, and endurance.

STAC 179

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	For nonswimmers and swimmers.
Taught	Fall, Winter

Course Outcomes

Water exercises

Demonstrate an understanding of a variety of exercises in the water, including cardiovascular, muscle strengthening, and toning by showing an exercise routine to the class.

Aerobics fitness

Demonstrate an appropriate level of aerobics fitness and an understanding of basic water aerobic principles by passing a written exam.

Tennis, Beginning

STAC 181

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Motor skills

Demonstrate basic tennis stroke techniques of: ground strokes, serves, volleys, overheads and lobs.

Tennis game and equipment

Demonstrate an understanding of essential tennis information regarding equipment, etiquette, facilities, scoring, and playing of the game by passing a written exam.

Top

Tennis, Intermediate

STAC 182

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 181 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Motor skills

Demonstrate intermediate level tennis stroke techniques on: ground strokes, serves, volleys, overheads and lobs.

The game of tennis

Demonstrate an understanding of essential tennis information regarding equipment, etiquette, facilities, scoring, and playing of the game using singles strategy and doubles strategy by passing a written exam.

Tennis, Advanced

STAC 183

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 182 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Advanced tennis skills

Demonstrate competence in the advanced skills of tennis of: ground strokes, volleys, mashes, and serves. Demonstrate understanding of the game of tennis regarding rules, techniques and strategy by passing a written exam.

Improve the game

Demonstrate improvement in your game by learning how to play as a and against a counterpuncher, all-courter, and serve and volleyer.

Unforced errors

Demonstrate improvement in game by reducing unforced errors.

Top

Volleyball, Beginning

STAC 186

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence in the fundamental skills of volleyball by passing a skill assessment on: underhand and overhand serves, forearm passing, setting, attacking, blocking, serve reception techniques, 4-2 offense and defense strategies.

Rules and strategies

Demonstrate an understanding of the rules, strategies, and scoring in volleyball by passing a written test.

Top

Volleyball, Intermediate

STAC 187

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	StAc 186 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence in intermediate volleyball skills on: floater and top spin serves, forearm passing, setting, back setting, strong side and weak side attacking, blocking, serve reception techniques, 6-6, 5-1, and 6-2 offenses, and 4-2 defensive strategies.

Rules and strategies

Demonstrate an understanding of the rules, strategies, and scoring in volleyball by passing a written test.

Top

Volleyball, Advanced

STAC 188

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 187 or equivalent.
Taught	

Course Outcomes

Furloughed

This course has been furloughed.

Top

Weight Training, Beginning

STAC 191

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Concepts and strategies

Demonstrate an understanding of the concepts and strategies associated with weight training by passing a written exam.

Muscle strength

Demonstrate a foundation of muscle strength by taking a muscle strength test.

Top

Weight Training, Intermediate

Theory and technique of maximal strength development, emphasizing "power" and "Olympic" lifts.

STAC 192

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	STAC 191 or equivalent.
Taught	

Course Outcomes

Concepts and strategies

Demonstrate an understanding of the concepts and strategies associated with weight training by passing a written exam.

Muscle strength

Demonstrate a foundation of muscle strength by taking amuscle strength test.

Team Manager Internship

Interacting with athletic teams; testing personal management methods under the supervision of trained personnel.

STAC 199R

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Team management

Demonstrate organization, competency and reliability as an asset to the management of the assigned team.

Strategies, rules, game day preparation

Demonstrate proficiency in practice strategies, NCAA rules and game day preparation with the assigned sport.

Extramural Lacrosse

STAC 201R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence and proper technique in skills of the sport through practice and competition for the University extramural team.

Rules and strategies

Demonstrate proficiency with the rules, strategies and scoring in the sport through game preparation and execution in competition.

Physical fitness

Demonstrate improvement in sport skills and physical fitness.

Extramural Racquetball

STAC 201R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence and proper technique in skills of the sport through practice and competition for the University extramural team.

Rules and strategies

Demonstrate proficiency with the rules, strategies and scoring in the sport through game preparation and execution in competition.

Physical fitness

Demonstrate improvement in sport skills and physical fitness.

Extramural Rugby

STAC 201R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence and proper technique in skills of the sport through practice and competition for the University extramural team.

Rules and strategies

Demonstrate proficiency with the rules, strategies and scoring in the sport through game preparation and execution in competition.

Physical fitness

Demonstrate improvement in sport skills and physical fitness.

Extramural Soccer

STAC 201R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence and proper technique in skills of the sport through practice and competition for the University extramural team.

Rules and strategies

Demonstrate proficiency with the rules, strategies and scoring in the sport through game preparation and execution in competition.

Physical fitness

Demonstrate improvement in sport skills and physical fitness.

Extramural Sports

STAC 201R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate competence and proper technique in skills of the sport through practice and competition for the University extramural team.

Rules and strategies

Demonstrate proficiency with the rules, strategies and scoring in the sport through game preparation and execution in competition.

Physical fitness

Demonstrate improvement in sport skills and physical fitness.

Techniques of Lifeguarding

First-aid and lifeguard skills training, including instruction in CPR, and American Red Cross certification for lifeguard training.

STAC 277

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Swim competency test (given first day of class).
Taught	Winter

Course Outcomes

Skills

Demonstrate competency in all required lifeguarding skills and activities that prevent, recognize and respond to emergencies.

Providing care

Demonstrate ability to provide care for injuries and sudden illnesses until emergency medical services take over.

Top

Water Safety Instructor Training

Leads to American Red Cross WSI certification. Swimming teaching methods that include teaching swimming to special needs students.

STAC 278

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	ARC Swimmer--level competency.
Taught	

Course Outcomes

Certification

Acquire American Red Cross certification to teach swimming and water safety courses.

Preparing courses

Demonstrate how to plan and organize courses using block and lesson plans.

Teaching courses

Practice teaching techniques and demonstrating required skills.

Top

Pedagogical Techniques in Exercise Sciences

Teaching methodologies for instruction in fitness and sports courses.

STAC 585

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Graduate student with teaching assistantship in Student Activities.
Taught	Fall

Course Outcomes

Developing lesson plans

Develop a Semester Unit Plan for an activity class they teach.

Teaching activites

Develop a list of activities appropriate for each of the four parts of the lesson plan for the activity class they teach. Incorporate these activities into the Semester Unit Plan.

Evaluation

Students will use evaluation techniques that are fair and reflective of the students' abilities and knowledge. Techniques will be aligned with course objectives and outcomes.

Collaboration

improve their teaching through collaboration with other GTA's teaching their activity class

Course Evaluation Techniques

use in their own courses, evaluation techniques that are fair and reflective of the student's abilities and knowledge. Techniques aligned with course objectives and outcomes.

Teaching Issues Discussion

Teaching assistants will use the class as a forum for discussion of issues related to teaching.

Camaraderie and Mutual Support

Teaching assistants will feel camaraderie and mutual support among one another.

Introduction to Statistics

Fundamental ideas and applications of statistics.

STAT 105

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 97 or equivalent.
Taught	Spring

Course Outcomes

The Value of Statistics

Understand and appreciate the value of statistics as a discipline and its relevance for general education

Observational Studies and Simple Experiments

Evaluate the validity of research findings from observational studies and simple experiments by asking appropriate questions regarding data collection and analysis

Graphical Methods and Numerical Summaries

Analyze data using appropriate graphical methods and numerical summaries

Observational Studies and Experiments

Distinguish between observational studies and experiments in terms of how data is collected and what appropriate conclusions to make

Potential Associations

Determine potential associations between two categorical and between two quantitative variables

Estimation and Hypothesis Tests

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem

Top

Honors Principles of Statistics

Graphical displays and numerical summaries, data collection methods, probability, sampling distributions, confidence intervals and hypothesis testing involving one or two means and proportions, contingency tables, correlation and simple linear regression.

STAT 121

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	MATH 110 or equivalent.
Taught	Fall
Offered	Independent Study also.

Course Outcomes

Observational Studies and Experiments

Differentiate between observational studies and experiments

Three Sampling Designs

Identify three sampling designs: simple random sample, stratified, and multi-stage

Three Designs of Experiments

Identify three designs of experiments: completely randomized, randomized block and matched-pairs

Appropriate Conclusions

Interpret and make appropriate conclusions from plots of data

Plots of Data

Interpret and make appropriate conclusions from plots of data

Measures of Center and Spread

Calculate and interpret measures of center and spread

Quantitative and Categorical Variables

Determine potential association between two quantitative and two categorical variables

Technical Language

Communicate using technical language about probability and variation

Estimation and Hypothesis Tests

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem

Outcomes of Estimation

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem

Data Collection

Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference

Research Problem

Determine the appropriate statistical procedure to use for a given research problem or data set

Statistical Procedure

Determine the appropriate statistical procedure to use for a given research problem or data set

Great Works Experiment

Complete at least one Great Works experiment

Core Concept and Religious Beliefs

Articulate the relationship between the course core concepts and his or her own religious beliefs

Real-life Problems

Apply course principles to solve real-life problems

Top

Principles of Statistics

Graphical displays and numerical summaries, data collection methods, probability, sampling distributions, confidence intervals and hypothesis testing involving one or two means and proportions, contingency tables, correlation and simple linear regression.

STAT 121

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Recommended	MATH 110 or equivalent.
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also; Honors also.

Course Outcomes

Observational Studies and Experiments

Differentiate between observational studies and experiments

Three Sampling Designs

Identify three sampling designs: simple random sample, stratified, and multi-stage

Three Designs of Experiments

Identify three designs of experiments: completely randomized, randomized block and matched-pairs

Appropriate Conclusions

Interpret and make appropriate conclusions from plots of data

Plots of Data

Interpret and make appropriate conclusions from plots of data

Measures of Center and Spread

Calculate and interpret measures of center and spread

Quantitative and Categorical Variables

Determine potential association between two quantitative and two categorical variables

Technical Language

Communicate using technical language about probability and variation

Estimation and Hypothesis Tests

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem

Outcomes of Estimation

Interpret and communicate the outcomes of estimation and hypothesis tests in the context of a problem

Data Collection

Understand the importance of data collection and how it dictates the appropriate statistical method and acceptable inference

Research Problem

Determine the appropriate statistical procedure to use for a given research problem or data set

Statistical Procedure

Determine the appropriate statistical procedure to use for a given research problem or data set

Great Works Experiment

Complete at least one Great Works experiment

Core Concept and Religious Beliefs

Articulate the relationship between the course core concepts and his or her own religious beliefs

Real-life Problems

Apply course principles to solve real-life problems

Top

Introduction to R Programming

Base R programming skills, introductory statistical analysis and graphics, simulation of introductory statistical concepts.

STAT 123

Hours	1.5 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Install R

Install R, R packages, and R workbench

Import and export raw data files

Import and export raw data files (e.g. text, excel, csv, etc.). This includes different variable types (numeric, character, date, time currency, etc.)

Manipulate and transform data

Manipulate and transform data

Create R objects

Create R objects (e.g. matrices, data frames, lists, etc.)

Create reports

Create basic detail and summary reports

Debugging R code

Identify and correct data, syntax, and programming logic errors

Use R statements and packages

Use R statements and packages to:

1. Compute numerical statistics used in introductory statistics
2. Create simple graphs and charts used in introductory statistics
3. Create simple simulation studies (e.g. Central Limit Theorem, Confidence Intervals, Power, etc.)

SAS Base Programming Skills

Base SAS programming skills, introductory statistical analysis and graphics, simulation of introductory statistical concepts.

STAT 124

Hours	1.5 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201; or Stat 301.
Taught	Fall Term 2, Winter Term 2, Spring

Course Outcomes

Import and export raw data files

Import and export raw data files (e.g. text, excel, csv, etc.). This includes different variable types (e.g. numeric, character, date, time, currency, etc.)

Manipulate and transform data

Manipulate and transform data

Create and combine SAS data sets

Create and combine SAS data sets

Create reports

Create basic detail and summary reports using ODS and SAS procedures

Debugging SAS code

Identify and correct data, syntax, and programming logic errors

Use SAS statements and procedures

Use SAS statements and procedures to:

1. Compute numerical statistics used in introductory statistics
2. Create simple graphs and charts used in introductory statistics
3. Create simple simulation studies (e.g. Central Limit Theorem, Confidence Intervals, Power, etc.)

Introduction to Bayesian Statistics

The scientific method; conditional probability; Bayes' Theorem; conjugate distributions: Beta-binomial, Poisson-gamma, normal-normal; Gibbs sampling.

STAT 151

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 112
Recommended	Concurrent enrollment in MATH 113.
Taught	Fall, Winter

Course Outcomes

Bayes' Theorem

Explain how conditional probability and Bayes' Theorem relate to the analysis of data via the Bayesian paradigm

Conjugate Priors, Binomial, and Poisson Distributions

Identify the conjugate priors of the normal (mean and variance), binomial, and Poisson distributions and derive the respective posterior distributions

Gibbs and Metropolis Samplers

Explain why Gibbs and Metropolis samplers work and when they are appropriate to use

Code in R

Code in R a Gibbs sampler and/or Metropolis sampler for a simple non-conjugate posterior distributions

Bayesian Analysis

Interpret and explain the results of Bayesian analysis

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

STAT 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department chair's and internship coordinator's consent
Taught	

Course Outcomes

Appropriate Dress and Etiquette

Practice appropriate dress and etiquette in varied business settings

Work Ethics

Demonstrate good work ethics

Written and Oral Communication

Demonstrate effective written and oral communication skills as they report on their internship

Top

Statistics for Engineers and Scientists

The scientific method; probability, random variables, common discrete and continuous random variables, central limit theorem; confidence intervals and hypothesis testing; completely randomized experiments; factorial experiments.

STAT 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 112; or MATH 119
Taught	Fall, Winter

Course Outcomes

Numerical and Graphics Summary

Compute numerical and graphics summary statistics using professional statistical software and explain difference between populations given the summaries (numerical or graphical)

Simple Problems

Solve simple problems using axioms of probability, conditional probability, independence, and Bayes' theorem

Compute Probabilities

Compute probabilities, expected value, and variance using the pdf of a discrete univariate random variable

Normal Distribution

Compute probabilities for the normal distribution

Sampling Distribution

Understand the definition of the sampling distribution of x-bar, and identify the mean, variance, and shape of the sampling distribution given the population information

Experimental Design

Understand the basics of experimental design, including the definition of the experimental unit, response, variable, factor(s), and level(s) of a basic experiment, and the role of randomization and replication to permit causal inference

Interval for μ

Compute the confidence interval for μ from a random sample and make the correct decision about an experiment when given a confidence interval

Test Statistic and P-Value

Compute the test statistic and *p*-value for H0 : $\mu = \mu 0$ from a random sample

One-factor ANOVA Table

Compute the ANOVA table for data from a completely randomized design using professional statistical software

Two-factor ANOVA Table

Compute the ANOVA table for data from a two factor experiment using professional statistical software

Statistically Significant Interaction

Explain a statistically significant interaction

Two Factor Experiment

Perform an analysis and write a 5–10 page technical report of the results with appropriate tables and graphics (likely in a group)

Top

Applied R Programming

Advanced R programming skills; communicate with other packages and programs.

STAT 223

Hours	1.5 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	STAT 123
Recommended	Concurrent enrollment in Stat 124.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Advanced R programming

Solve complex problems using advanced R programming methodology

R functions

Create and use R functions

Efficient R code

Understand how to write efficient R code

Control external programs

Control external programs like SAS and Excel

Top

Applied SAS Programming

Advanced SAS programming skills, advanced DATA step programming, ODS, simple MACRO programs, Proc SQL, Proc REPORT, communicate with other packages and programs.

STAT 224

Hours	1.5 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	STAT 124
Recommended	Concurrent enrollment in Stat 123.
Taught	Fall Term 2, Winter Term 2, Spring

Course Outcomes

Advanced DATA step programming

Solve complex problems using advanced DATA step programming statements

SAS MACRO facility

Create and use SAS MACRO facility

SAS SQL

Write and interpret SAS SQL code

Efficient SAS code

Understand how to write efficient SAS code

Control external programs

Control external programs like R and Excel

Top

Analysis of Variance

Scientific method, statistical thinking, sources of variation, completely randomized design, ANOVA, power and sample size considerations, multiple testing, randomized complete blocks, factorial designs, interactions. Introduction to statistical software.

STAT 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201; or Stat 301.
Recommended	Concurrent enrollment in MATH 112.
Taught	Fall, Winter, Spring

Course Outcomes

Define Parts of a Basic Experiment

Define the experimental unit, response variable, factor(s), and level(s) of a basic experiment

Randomization & Replication in Causation

Understand the role of randomization and replication in inferring causation

Completely Randomized Design

Perform a completely randomized design and construct the ANOVA table in SAS and R

Minimum Number of Replicates

Compute the minimum number of replicates in a completely randomized design to achieve a given level of power

Pairwise Tests of Differences in Means

Compute pairwise tests of differences in means in SAS and R to understand a significant overall F-test

Randomized Complete Block Design

Perform a randomized complete block design and construct the ANOVA table in SAS and R

Factorial Design

Perform a factorial design and construct the ANOVA table in SAS and R

Statistically Significant Interaction

Explain a statistically significant interaction

Split Plot and Two-Way ANOVA

Describe the differences between a split plot and a two-way ANOVA

Write a technical report

Work in teams to write a technical report and make a technical presentation of a designed experiment.

Top

Methods of Survey Sampling

Sampling frames; questionnaire design; simple random, systematic, stratified, and cluster sampling methods; comparing domain means; contingency table analysis.

STAT 234

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201; or Stat 301.
Taught	Fall

Course Outcomes

Sampling

Identify and sample using simple random sampling and various forms of stratified sampling, cluster sampling, and systematic sampling

Basic Designs

Accurately identify and perform variance calculations for basic designs

Real Project

Participate in a real project involving sampling methodologies and appropriate point estimate and variance calculations

Graphical Representations

Create graphical representations of results

Written and Oral Communication

Demonstrate effective written and oral communication skills as they present their findings

Top

Discrete Probability

Set theory; discrete probability; conditional probability; finite sample spaces; discrete random variables (pdf, cdf, moments).

STAT 240

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201; or Stat 301.
Taught	Fall, Winter, Summer

Course Outcomes

Set Theory and Basic Set Operations

Apply fundamentals of set theory and basic set operations

Discrete Sample Space

Enumerate the elements of a discrete sample space

Counting Techniques

Demonstrate familiarity with counting techniques---sampling with order, without order, binomial coefficients

Probability Problems in Finite Sample Spaces

Solve probability problems in finite sample spaces

Solve Problems

Solve problems using axioms of probability, conditional probability, independence, and Bayes theorem

Discrete Random Variables

Calculate expected values and variances of discrete random variables

Discrete Distributions

Understand the assumptions and properties of the named discrete distributions (Bernoulli, binomial, Poisson, geometric)

Solve Problems

Solve problems with the pdf, cdf, moments of discrete univariate random variables

Top

Theory of Interest

Theory of interest, annuities, amortization, financial derivatives. Prepares for SOA Exam FM.

STAT 274

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 112
Recommended	Pass SOA Exam P.
Taught	Fall, Winter

Course Outcomes

Exam FM

The primary learning outcome of this course is to prepare students for Exam FM offered by the Society of Actuaries

Time Value of Money

Recognize, understand, and compute problems relating to time value of money, including simple and compound interest, present and future value, and nominal and effective rates of interest

Annuity

Recognize, understand, and compute problems relating to annuities with payments that are not contingent, including annuity-immediate, annuity-due, perpetuity, and arithmetic or geometric increasing payment annuity

Loans

Recognize, understand, and compute problems relating to loans, including principal, interest, term of loan, outstanding balance, final payment, amortization, and sinking fund

Bonds

Recognize, understand, and compute problems relating to bonds, including price, redemption value, par value, coupon and coupon rate, yield rate, callable and non-callable, and accumulation of discount

General Cash Flow

Recognize, understand, and compute problems relating to general cash flows and portfolios, including yield rate and rate of return, current value, convexity, yield curve, and stock price and dividend

Immunization

Recognize, understand, and compute problems relating to immunization, including cash ï¬?ow

matching, full immunization, and Redington immunization

General Derivatives

Recognize, understand, and compute problems relating to general derivatives, including derivatives, ask and bid price, short selling, stock index, spot price, credit risk, and margin

Additional Understanding

Recognize, understand, and compute problems relating to additional understanding of options, hedging and investment strategies, forwards and futures, and swaps as time in class permits

Introduction to Analytics

Introduction to R, Rstudio, knitr, LaTeX, SQL, beamer, and Git. Build and access an SQL database. Propose and prepare written and oral presentations answering a question of interest to a non-technical decision maker.

STAT 281

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 121; or STAT 151; or STAT 201
Taught	Fall

Course Outcomes

Install Packages

Install R, R packages, RStudio, Latex, VPN, and MSQL Workbench

Databases

Create and access a MySQL database

Git

Keep track of code versions using Git

Presentation in Beamer

Prepare oral presentations in beamer

Latex Reports

Prepare a non-technical written report in Latex

knitr

Prepare documentation and reproducible code using knitr

Communication of Statistical Results

Introduction to writing within the discipline including the effective use of graphics, tables, and equations. Resources and guidelines for writing and presenting statistical results.

STAT 290

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	STAT 230 & WRTG 150; or STAT 230 & PHIL 150; or STAT 230 & ENGL 115
Taught	Fall, Winter

Course Outcomes

Technical Report

Write a technical report on a statistical analysis

Statistical Graphics

Create effective statistical graphics

LaTeX

Use LaTeX to create documents and presentations

Ethics

Understand ethical considerations in misleading presentation of data

Top

Introduction to Regression

Regression, transformations, residuals, indicator variables, variable selection, logistic regression, time series, observational studies, statistical software.

STAT 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 230 & MATH 112
Recommended	Stat 123 and Stat 124; MATH 113 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

ANOVA and Regression

Explain the difference between ANOVA and regression, and their computational methods

Inference

Explain the difference in inference between a designed experiment and observational study

Regression Model

Fit a regression model in SAS and R

Transformations

Apply appropriate transformations to the response variable to improve agreement with regression assumptions

Diagnostics

Use residuals and influence diagnostics to assess model fit, agreement with regression assumptions, and identify outliers and influential observations

Indicator Variables

Create sets of indicator variables for categorical explanatory variables

Subset Regression Model

Apply step-wise selection to identify a subset regression model that selects the most significant explanatory variables from a large data set

Logistic Regression Model

Fit a logistic regression model in SAS and R

ARIMA Model

Fit an ARIMA(p,d,q) model and generate forecasts with prediction intervals in SAS and R

Inference

Continuous random variables (pdf, cdf, moments); sampling distributions; Central Limit Theorem; frequentist inference (estimation, intervals); Bayesian inference (estimation, intervals); simulation.

STAT 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 240 & MATH 113
Recommended	Stat 123 and Stat 124.
Taught	Fall, Winter

Course Outcomes

Named Continuous Distributions

Understand assumptions and properties of named continuous univariate distributions: normal, beta, gamma, exponential.

Solve Problems

Solve problems using pdf's and cdf's of continuous distributions

Moments

Calculate expectation, variance, covariance, and correlation

Central Limit Theorem

Understand the Central Limit Theorem via simulation and use it to calculate probabilities

Population Proportion and Mean

Make inferences on a population proportion using a random sample from a binomial distribution and on a population mean using a random sample from a normal distribution with known variance, including:

- deriving the sampling distributions of the sample mean and proportion
- deriving the posterior distributions of the mean and proportion using conjugate priors
- deriving the maximum likelihood and Bayes estimators of the mean and proportion
- using a pivot to construct an approximate 100(1 - α)% confidence intervals for the mean and proportion
- constructing Bayesian confidence intervals for the mean and proportion

Top

Statistical Theory for Actuaries

Probability theory; discrete, continuous, mixture random variables; loss distributions; moment-generating functions; conditional probability, expectation; total probability; stochastic independence; transformations. Prepares for SOA Exam P.

STAT 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 340
Taught	

Course Outcomes

Named Distributions

The assumptions and properties of the following named distributions: Bernoulli, Binomial, Hypergeometric, Negative Binomial, Poisson, Uniform, Gamma, Exponential, Normal, and Pareto

Functions

Probability density functions, cumulative distribution functions, moment generating functions, and moments of univariate random variables

Properties

The properties of joint, conditional, and marginal distributions

Transformation

The transformation of random variables using the CDF technique, change of variables, sums of random variables, convolution, and the MGF technique

Actuarial Problems

Applying mathematical statistics in actuarial science. Prepares for SOA Exam P.

STAT 372

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	STAT 370.
Taught	Winter

Course Outcomes

Exam P

The primary learning outcome of this course is to provide additional Exam P preparation for students who have completed Statistics 370

Solving Problems

Students will, upon course completion, be more adept at solving problems related to material covered in Statistics 370

Top

Statistical Models for Financial Economics

Valuation of derivative securities, stock price simulation, risk management techniques, interest rate models. Prepares for SOA exam MFE.

STAT 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 274 & STAT 370
Taught	Winter odd years

Course Outcomes

Put-call Parity

Use put-call parity to determine the relationship between prices of European put and call options and to identify arbitrage opportunities

Binomial Model

Calculate the value of European and American options using the binomial model

Black-Scholes option-pricing model

Calculate the value of European options using the Black-Scholes option-pricing model

Interpret the option Greeks

Interpret the option Greeks

Cash flow characteristics

Explain the cash flow characteristics of the following exotic options: Asian, barrier, compound, gap, and exchange

Lognormal distribution and Black-Scholes formula

Explain the properties of a lognormal distribution and explain the Black-Scholes formula as an expected value for a lognormal distribution

Itô's lemma

Apply Itô's lemma in the one-dimensional case

Lognormal stock prices

Simulate lognormal stock prices

Delta-Hedging

Explain and demonstrate how to control risk using the method of delta-hedging

Vasicek and Cox-Ingersoll-Ross bond price models

Evaluate features of the Vasicek and Cox-Ingersoll-Ross bond price models

Top

Statistical Computing

Create and interact with relational databases comprised of large real world data; integrate previous course work into a single research project from formulation to final report; solve statistical problems using a combination of SAS, R, and SQL skills.

STAT 424

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 223 & STAT 224 & STAT 330
Taught	Winter

Course Outcomes

Design and create databases

Demonstrate ability to design and create databases for collecting and storing study data, including structures and tools to simplify the process

Use SQL

Be able to use SQL queries from SAS, R, and database tools to work wit databases and extract data for analysis

Use SAS/IML

Use SAS/IML to work with matrices and compute summaries of data including importing data from SAS datasets and exporting results to SAS datasets

Regular expression matching

Use regular expression matching in SAS, R, and other tools to extract relavent parts of data or manipulate text to make data analysis simpler

Write custom R functions

Write custom R functions to analyze data and to pass to other processing tools

Create and run basic simulations

Create and run basic simulations in R and SAS to explore the bahavior or routines and do basic power studies

Additional Tools

Demonstrate knowledge about additional tools in SAS, R, and stand alone tools that could aid in preparing data for analysis

Experimental Design

Basic designs, power and sample size, Latin squares, incomplete blocks, change-over designs, factorials, fractional factorials, confounding, split-plots, response surface designs.

STAT 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 330 & MATH 313
Recommended	Stat 340.
Taught	Winter

Course Outcomes

Experimental Design Plan

Choose an experimental design plan that is appropriate for the research problem at hand

Construct the Design

Construct the design, including determining the proper number of replicates and the creation of a randomized data collection form

Collect the Data

Execute the plan to collect the data, or advise a colleague to do it

Determine the Model

Determine the model appropriate for the data

Fit the Model

Fit the model to the data, and verify that the assumptions have been satisfied

Interpret and Present

Interpret the results and present the data in a meaningful way to answer the research problem at hand

Top

Nonparametric Statistical Methods

Permutation tests, rank-based methods, analysis of contingency tables, bootstrap methods, curve fitting.

STAT 435

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 330; or STAT 511
Taught	Winter

Course Outcomes

Examples of Trade-Off

Explain and provide examples of the trade-off between parametric assumptions and efficiency of statistical inference

Rank-Based Methods

Compute the following rank-based methods: Wilcoxon Rank-Sum test, Mann-Whitney test, Signed-Rank test, Kruskal-Wallis test, and Spearman Rank Correlation

Parametric Assumptions and Statistical Inference

Explain and provide examples of the trade-off between parametric assumptions and efficiency of statistical inference

Compute Rank-Based Methods

Compute the following rank-based methods: Wilcoxon Rank-Sum test, Mann-Whitney test, Signed-Rank test, Kruskal-Wallis test, Spearman Rank Correlation

Contingency Tables

Compute the following tests for contingency tables: Fisher's exact test, Mantel-Haenszel test, McNemar's test

Permutation Tests

Formulate and compute permutation tests for 2-sample, K-sample, and contingency tables

Bootstrap Confidence Intervals

Formulate and compute bootstrap (resampling) confidence intervals

Generalized Additive Models

Compute generalized additive models (GAM) with splines or smoothers for possible nonlinear effects in R

Applied Bayesian Statistics

Bayesian analogs of t-tests, regression, ANOVA, ANCOVA, logistic regression, and Poisson regression implemented using both JAGS and Proc MCMC

STAT 451

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	STAT 151 & STAT 330; Concurrent enrollment in STAT 340.
Taught	

Course Outcomes

Fit and Interpret Bayesian Model

Students will be able to apply, implement and interpret a fully Bayesian approach to relevant statistical problems, including design, model selection, model fit steps.

Write code in R

Students will be able to generate their own analysis of Bayesian models in R.

Understand, Explain, and Demonstrate

Students will be able to understand, explain and demonstrate basic Bayesian theory and its usefulness in real-world applications.

Quality Control and Industrial Statistics

Six sigma; tools with which to define, measure, analyze, improve, control. Advanced concepts in control charts, applying experimental design for process and product improvement.

STAT 462

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 201; or STAT 240 & STAT 330
Recommended	Stat 340.
Taught	Fall

Course Outcomes

Role of Quality Improvement

Explain the role of quality improvement as a business strategy

Variability in Processes and Process Outputs

Explain the relationship between variability in processes and process outputs and the quality and cost of the results produced

DMAIC

Use the six sigma DMAIC process for quality improvement projects

Design and Use Charts

Design and use Shewhart, Cusum, and EWMA control chars to recognize common and special causes of variability

Contruct Plans

Construct attribute and variables acceptance sampling plans

Measurement Analysis Tools

Use other useful quality tools for measurement analysis, discovering root causes, and eliminating quality problems

Top

Introduction to Reliability

Mathematics, distributions, management, and maintenance of basic reliability concepts; collection and analysis of test data; fault tree analysis; applying reliability in various areas.

STAT 466

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 201; or STAT 330
Recommended	Stat 340, Stat 462.
Taught	Winter

Course Outcomes

Reliability Concepts

Discuss reliability concepts

Fit Distributions

Fit standard parametric distributions to censored reliability test data

Analyze Data

Analyze data from accelerated life tests

Model reliability

Model reliability for simple systems

Predict

Predict field failures

Repairable Systems

Analyze repairable systems

Reliability Plot

Make reliability plots of data

Bayesian Analysis

Complete basic Bayesian analysis of reliability

Top

Applied Time Series and Forecasting

Data mining, univariate ARIMA time series theory and application, seasonal models, spatial correlation models, conditional heteroscedastic models in financial time series, case studies.

STAT 469

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 330 & STAT 340
Taught	

Course Outcomes

Define Functions

Define the autocovariance and autocorrelation functions

Define Weak Stationarity

Define weak stationarity

Define Process

Define white noise process

AR and MA Model

Derive the mean, autocovariance, and autocorrelation of an AR and MA model

ARMA

Define an ARMA (p, q) process

Order of an ARIMA

Select the order of an ARIMA model from the sample ACF and sample PACF

Fit an ARIMA

Fit an ARIMA (p, d, q) model and generate forecasts with prediction intervals in R

Life Contingencies

Life tables, survival functions, contingent annuities, insurance, premiums, reserves, joint annuities and insurance. Prepares for SOA Exam MLC.

STAT 475

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 474; or STAT 274
Taught	Winter

Course Outcomes

Exam MLC

The primary learning outcome of this course is to prepare students for Exam MLC offered by the Society of Actuaries

Survival Models

Recognize, understand, and compute problems relating to survival models, including defining and computing expected values, variances, probabilities, and percentiles for continuous and discrete survival-time random variables

Insurances and Annuities

Recognize, understand, and compute problems relating to life insurances and annuities, including expected values, variances and probabilities for present-value-of-benefit random variables defined on survival-time random variables, considerations for life insurances and annuities, and liabilities analyzing the present value-of-future-loss random variables

Top

Statistical Distributions for Actuarial Modeling and Data Analytics

Analyze data from a risk-based application; select a suitable model and estimate parameters using MLE, method of moments, and Bayes methods; determine goodness of fit and measures of confidence for decision making.

STAT 477

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	STAT 340
Recommended	Pass SOA Exam P.
Taught	Winter

Course Outcomes

Survival, severity, frequency, and aggregate models

Recognize, understand, and complete problems related survival, severity, frequency and aggregate models and learn how to model data for each of these

Basic risk measures

Recognize, understand, and complete problems related to basic risk measures

Fitting empirical models

Recognize, understand, and complete problems related to fitting empirical models to data and apply statistical estimation procedures

Constructing parametric models

Recognize, understand, and complete problems related to constructing parametric models. Estimate parameters, apply unbiasedness consistency, UMVUE, and MSE to survival, severity, frequency, and aggregate models.

Simulation and resampling methods

Recognize, understand, and complete problems related to simulation and resampling methods for model validation

Top

Special Topics in Statistics

STAT 495R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Stat 495R

This is a course with no set curriculum. The learning objectives will be determined by the directing instructor. The outcomes will be specific to the special topic as directed by the professor. In general, after completion of a special topics course in statistics, the student will:

Understanding of and Competence in Subject Matter

Demonstrate understanding of and competence in subject matter, varying by course topic

Historical Context or Modern Relevance

Explain the historical context or modern relevance of the selected special topics curriculum

Proficiency in Specialized Quantitative Methods

Develop proficiency in specialized quantitative methods and their use in a modern statistical software package

Report or Presentation of Authentic Data

Prepare a report or presentation documenting an authentic data analysis using the tools of the special topics curriculum

Top

Academic Internship: Statistics

On-the-job experience or internships for undergraduates. Report is required.

STAT 496R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department coordinator's consent.
Taught	

Course Outcomes

Appropriate Dress and Etiquette

Practice appropriate dress and etiquette in varied business settings

Work Ethic

Demonstrate good work ethics

Written and Oral Communication

Demonstrate effective written and oral communication skills as they report on their internship experience

Top

Introduction to Statistical Research

Review of current literature and survey of present status of significant statistical research; collaborative work between student and faculty.

STAT 497R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Department chair's consent.
Taught	

Course Outcomes

Research Project

Contribute to the research project in terms of literature review, data analysis, and reporting of preliminary results

Work Ethic

Demonstrate good work ethics (punctuality to meetings, follow-up of action items, and so forth)

Initiative

Show initiative in the conduct of research

Honors Thesis

STAT 499R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Literature Review

Perform a literature review

Principles of Research Process

Understand the principles of the research process

Statistical Methodology

Apply sound statistical methodology to research situations

Ethical Procedures

Follow ethical procedures for storing, analyzing, and presenting data

Reproducible Code

Document reproducible code

Display Evidence

Display evidence of intellectual/professional growth and development

Communicate

Communicate statistical ideas, arguments, and conclusions effectively

Top

(Stat-Chem-C S-Geol-Math-MthEd-Phscs) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

STAT 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Top

Statistical Methods for Research 1

Basic statistical methodologies and experimental design. Topics include simple analysis of variance, multiple regression, analysis of covariance, model selection.

STAT 511

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 121; or equivalent.
Taught	Fall, Winter

Course Outcomes

Randomization

Describe the role of randomization and replication in inferring causation

JMP

Use JMP (or other software) to read in data and compute numerical and graphical summaries of the data

T-Test

Use a t-test (one-sample, paired, and two-sample) to perform inference on means and know what the assumptions for use are

ANOVA

Fit a one-way ANOVA and construct an interpret the ANOVA table in JMP (or other software)

Simple and Multiple Linear Regression

Fit both simple and multiple linear regression and interpret the results

Assess Model Fit

Use residuals and influence diagnostics to assess model fit, agreement with regression assumptions, and identify outliers and influential observations

Scientific Literature

Critically read scientific literature of their field involving parametric linear models with a continuous response

Top

Statistical Methods for Research 2

Advanced statistical methodologies and experimental design. Topics include multi-way analysis of variance, mixed models analysis of variance, logistic regression, log-linear models, time series models, principal components, canonical correlation, common experimental designs.

STAT 512

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	STAT 511
Taught	Winter

Course Outcomes

Two-Way ANOVA

Fit a two-way ANOVA and interpret the main effects and interaction

Fixed and Random Effects

Explain the differences between fixed and random effects and interpret computer output from mixed model analyses

Evidence of Autocorrelation

Identify evidence of autocorrelation and fit an ar(1) model to analyze continuous time series data

Multivariate Data

Recognize multivariate data, and appropriately carry out principal components analysis and canoncial correlation analysis using statistical software

Interpret and Calculate

Interpret and calculate odds, odds ratios, risk differences, and relative risks from 2x2 contingency tables and describe which measures are justified in prospective and retrospective studies

Assess Associations

Use X^2 tests and Fisher's Exact tests to assess associations in 2x2 contingency tables

Fit and Interpret

Fit and interpret simple generalized linear regression models (binary response data and count

response data) and draw appropriate conclusions justified by the study design

Construct Designs

Construct a factorial design and a screening design

Top

Linear Models

Theory of estimation and testing in linear models. Analysis of full-rank model, over-parameterized model, cell-means model, unequal subclass frequencies, and missing and fused cells. Estimability issues, diagnostics.

STAT 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	Fall

Course Outcomes

Course Outcomes

Upon successful completion of this course, the student will be able to:

Understand Derivation

Understand derivation and distribution of linear and quadratic forms.

Understand Definitions

Understand definitions of non-central chi-square, t, and F distributions.

Derive Maximum Likelihood

Be able to derive maximum likelihood estimates of parameters in a linear model with normal, independent errors.

BLUE and MVUE

Understand Best Linear Unbiased Estimation (BLUE) and Minimum Variance Unbiased Estimation (MVUE) in linear models.

Estimate

Know how to estimate in both the unconstrained and constrained model.

Hypothesis Tests

Know how to implement hypothesis tests in the normal linear model.

All Mean Model

Be able to implement the all mean model in one-way and multiway fixed designs.

Multiple Comparison

Know how to test in a multiple comparison setting.

Lack of Fit

Be able to derive and use measures of lack of fit and importance.

Seems of Squares

Understand the difference and compute Type I and Type III seems of squares.

Missing Cells

Understand and be able to compute tests and estimates when a design has data missing in some cells.

Top

Modern Regression Methods

Weighted least squares, Bayesian linear models, robust regression, nonlinear regression, local regression, generalized additive models, tree-structured regression.

STAT 536

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 535 & STAT 624; or departmental consent.
Taught	Winter

Course Outcomes

STAT 536

This course trains students in using statistical methods for modeling a response variable as a function of explanatory variables. Stat 535 (a prerequisite) covered linear models, and this course attempts to cover the complement set. At a minimum you will learn the derivation, computation, and application of the different methods on data.

Linear Regression

Review Linear Regression Models

Weighted Least Squares

Review Weighted Least Squares, Mixed Models

Bayesian

Bayesian Linear Regression

Measurement

Measurement Error Models

Linear Models

Generalized Linear Models (logistic)

Model Assessment

Model Assessment and Selection

Shrinkage Methods

Shrinkage Methods, Bias-Variance Tradeoff, Subset Selection

Local Regression

Local Regression (splines, smoothers)

GAM

Generalized Additive Models (GAM)

Tree-based Models

Tree-based Models, Random Forests

Boosting

Boosting, Bayesian Adaptive Regression Trees

p >> n

p >> n

Survival Analysis

Basic concepts of survival analysis; hazard functions; types of censoring; Kaplan-Meier estimates; Logrank tests; proportional hazard models; examples drawn from clinical and epidemiological literature.

STAT 538

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	STAT 340
Taught	Winter

Course Outcomes

Theory of Survival Analysis Methods

Understand the basic underlying theory of survival analysis methods

Estimation

Conduct estimation of the survival function for a single sample

Formal Comparison

Conduct formal comparison of survival functions for two samples

Formal Analysis

Conduct formal analysis through incorporation of covariates

Formal Analysis in Different Settings

Conduct formal analysis in high-dimensional, low-sample size settings

Assess Appropriateness

Be able to assess the appropriateness of the use of methods for a given data set (given the scientific questions of interest and given the data characteristics)

Effectively Communicate

Be able to effectively communicate the results of data analyses

Statistical Consulting

Introduction to statistical consulting, oral presentations, presentation packages, written reports. Extensive applied experience in the Center for Collaborative Research and Statistical Consulting.

STAT 590R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	Winter

Course Outcomes

Work in a Team

Work in a team with members from other disciplines

Elicit Information

Elicit the relevant information from a non-statistician in order to complete the correct statistical analysis

Communicate Concepts

Communicate statistical concepts to a non-statistician

Oral and Written Presentations

Make oral and written presentations of statistical results to a non-statistician

Top

Graduate Seminar in Statistics

STAT 591R

Hours	0.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Statistical Research

Identify areas of emergent statistical research

Effective Presentation

Describe elements of the effective presentation of statistical results to a specialized audience

Top

Biostatistical Methods

STAT 595R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Stat 595R

This is a course with no set curriculum. The learning objectives will be determined by the directing instructor. The outcomes will be specific to the special topic as directed by the professor. In general, after completion of a special topics course in statistics, the student will:

Demonstrate Understanding

Demonstrate understanding of and competence in subject matter, varying by course topic

Explain Historicity and Relevance

Explain the historical context or modern relevance of the selected special topics curriculum

Develop Proficiency

Develop proficiency in specialized quantitative methods and their use in a modern statistical software package.

Expert Systems in Statistics

STAT 595R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught

Demonstrate Understanding

Demonstrate understanding of and competence in subject matter, varying by course topic

Explain Context

Explain the historical context or modern relevance of the selected special topics curriculum

Develop Proficiency in Methods

Develop proficiency in specialized quantitative methods and their use in a modern statistical software package

Theory of Risk

STAT 595R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Exam C

The primary learning outcome of this course is to prepare students for part of Exam C offered by the Society of Actuaries.

Survival/Severity/Frequency/Aggregate Models

Recognize, understand, and complete problems related to Survival, Severity, Frequency and Aggregate models. Learn how to model data for each of these.

Risk

Recognize, understand, and complete problems related to basic risk measures.

Empirical Models

Recognize, understand, and complete problems related to fitting empirical models to data and applying statistical estimation procedures.

Estimation

Recognize, understand, and complete problems related to constructing parametric models: estimate parameters, apply unbiasedness, consistency, UMVUE, and MSE to survival, severity, frequency, and aggregate models.

Simulation and Resampling

Recognize, understand, and complete problems related to learning simulation and resampling methods for model validation.

Academic Internship: Statistics

On-the-job experience. Report required.

STAT 599R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Apply Knowledge

Apply classroom knowledge and skills to day-to-day statistical tasks

Personal Career Goals

Explore personal career goals and expectations

Problem Solving Skills

Develop problem solving skills

Appropriate Dress and Etiquette

Practice appropriate dress and etiquette in varied business settings

Effectively Communicate

Effectively communicate results of statistical analyses to clients, supervisors, and colleagues

Effective Written and Oral Communication

Demonstrate effective written and oral communication skills as they report on their internship experience

Top

Essential College Skills

Developing essential college skills. Aims of BYU, values and goals, sound thinking skills. Learning styles and adjustment to college courses. College requirements and planning.

STDEV 100

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Educational Goals

1. Articulate their educational values and goals and how they align with the purposes of a BYU education.

Time Management

2. Analyze the effectiveness of their own planning/scheduling system and be able to demonstrate that they understand sound time management and goal setting principles.

Study Skills

3. Add new study and test preparation (study) skills to their existing repertoire.

Effective Study and Learning

Learning to learn: motivation, time management, reading, listening, notetaking, test preparation, and memorizing.

STDEV 109

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Time Management

Students will be able to apply individualized time management strategies to their coursework and other activities.

Memory

Students will be able to apply intentional memorization strategies.

Reading

Students will demonstrate the application of effective college reading strategies.

Note Taking

Students will be able to produce course lecture notes using a systematic note-taking system.

Test-Preparation and Test-Taking

Students will be able to apply effective college test-preparation and test-taking strategies.

Top

Career Exploration

Applying theories of individual, academic, and career development to the university student. Exploring university opportunities and college majors; graduation planning.

STDEV 117

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Knowledge of Career Choices

Increase knowledge of college majors, career options, and additional world-of-work factors that influence career choice.

Personal Awareness

Develop greater awareness of personal qualities, interests, skills, and values that play a role in career-decision making.

Increased Confidence

Demonstrate increased confidence and ability to make decisions as well as progress towards making career decisions.

Resources

Display an awareness of and ability to access educational and career information resources.

Top

Introduction to Tutoring

Developing college-level tutoring skills; academic success and the tutoring cycle. Leads to level-one tutoring certification of the College Reading and Learning Association.

STDEV 132

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Students will understand the goals, roles and best practices of tutoring.

Performance

Students will achieve CRLA level proficiency in tutoring.

Affective

Students will appreciate the value of tutoring.

Advanced Tutoring

Developing advanced-level tutoring approaches and analytical thinking. Leads to level-two tutoring certification of the College Reading and Learning Association.

STDEV 133

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Cognitive (Knowledge)

Students will understand advanced tutoring skills.

Affective (Feeling)

Students will appreciate the value of tutoring specific groups.

Performance (Doing)

Students will achieve CRLA advanced-level proficiency in tutoring.

Life Planning and Decision Making

Individual development in life planning and decision making, emphasizing personal maturity, goal setting, and decision making abilities in areas of common concern to young adults.

STDEV 140

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Developmental Theories

Understand developmental theories as they relate to young adult development, and evaluate your individual progress within the scope of these theories.

Decision Making

Learn the main components of decision making and come to a better understanding of your personal decision making style and ways in which you may want/need to adapt it to better suit your needs.

Personality Development

Become familiar with basic concepts of personality development and be able to identifyyour individual personality strengths and challenges

Goal Setting

Learn the components of goal setting and accomplishment and be able to set attainable goals for yourself.

Time Management

Learn the principles of time management and how it applies to decision making and life planning.

Individual Development

Applying theories of psychological development (including rational living, positive psychology, and dialectical behavior therapy) in a self-assessment approach to promoting self-awareness and psychological development.

STDEV 141R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Achieving Balance

Learn skills to achieve balance and competency in the developmental challenges facing college students and throughout the lifespan.

Developmental Theory

Understand developmental theories on predictable life challenges at different stages of life.

Personal Development

Learn and practice skills and psychological theories related to six areas of personal development.

Goals and Growth

Set goals in each of the six areas, create a plan for implementing these goals, practice skills related to these goals and report on their progress.

Top

Integrity for Life: Building Personal Character

Exploring integrity in depth, applying critical thinking to moral dilemmas, creating a personal vision for developing character intentionally.

STDEV 145

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Please contact the individual department for outcome information.

Top

Public Speaking

Principles and methods of public speaking; speaking experiences.

STDEV 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Effective Visual Aids

Be able to produce and employ effective visual aids in your presentations.

Speaking to the Audience

Know how to speak publicly so your audience will really listen and understand.

Extemporaneous Public Speeches

Construct and deliver effective extemporaneous public speeches.

Speech Anxiety and Nonverbal Communication

Manage speech anxiety and effective use nonverbal communication to inform, persuade, enlighten, and impact your audience.

Analytical Listening and Observation

Develop analytical, listening, and observation skills.

Top

Law Lecture Series

Exploring legal professions. Primary focus on guest lecturers representing various legal professions.

STDEV 168R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Legal Education and Career

1. Understand what a legal education and career requires and provides.

2. Choosing a Legal Career

2. Accurately assess whether or not a legal education and career is the correct choice for them.

Top

Introduction to Health Professions

Overview of health professions: medical, dental, and other specialties. Primary focus on guest lectures from various practitioners and clinicians.

STDEV 170

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understand Significant Number of Health Profession

1. Students will gain a basic understanding of a significant number of health professions.

Lecture with Health Care Professionals

2. Students will increase knowledge of health professions through class presentations with health care professionals.

Lecture with Health Care Professionals

2. Students will increase knowledge of health professions through class presentations with health care professionals.

Serve to Learn

3. Students will learn more about health care provision through service learning in preparation for service-oriented health professions.

Serve to Learn

3. Students will learn more about health care provision through service learning in preparation for service-oriented health professions.

Understand Requirements

4. Students will increase awareness of the requirements to enter various health professions and where to find additional information about their preferred health care field.

Understand Requirements

4. Students will increase awareness of the requirements to enter various health professions and where to find additional information about their preferred health care field.

Top

Academic Internship

Work experience evaluated by supervisor and faculty mentor and posted on transcript.

STDEV 199R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department internship coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Career Choice

Students will be able to better determine major and/or career paths based on hands-on experiences in the internship provider workplace setting.

Top

Academic Internship: Legal Internship

Work experience evaluated by supervisor and faculty mentor and posted on transcript.

STDEV 199R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department internship coordinator's consent
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding the Legal Profession

Students will have a better understanding of what a legal education and career requires and provides.

Deciding about Law

Students will be able to accurately assess whether or not a legal education and career is the correct choice for them.

Top

Success in College Reading

Learning and practicing introductory strategies for improved college-level reading.

STDEV 205

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Special Topics in Student Development

STDEV 214R

Hours	0.5 - 3.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Performance Psychology

Learning psychological barriers to peak performance. Developing effective techniques and routines to enhance performance.

STDEV 247

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Constitutional Research

The United States Constitution; research on original sources used to create the Constitution.

STDEV 260

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Analytic Skills

Know and develop interpretation and analytic skills regarding the 7 articles and 27 amendments to the Constitution.

Current Issues

Understand the current issues surrounding Constitutional articles and amendments.

Skill Development

Improve their editing and research skills.

Top

The Law in Literature

Examining how the law--including the justice system, attorneys, judges, and clients--has been portrayed in literary works.

STDEV 261

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Legal Education

Have a better understanding of what a legal education and career requires and provides.

Law as a Career

Be able to more accurately assess whether or not a legal education and career is the correct choice for them.

Analysis of Media

Be able to critically analyze portrayals of law in literature and other media forms to assess for accuracy.

Top

Prelaw Leadership

Leadership skills and strategies for members of the PLSA Board. Successful planning, implementation, and execution of prelaw activities.

STDEV 268R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Legal Education and Career

Understand what a legal education and career requires and provides.

Choosing a Legal Career

Assess whether or not a legal education and career is the correct choice for them.

Leadership

Learn how to effectively plan, implement, and carry-out effective academic activities for large groups of undergraduate students.

Preview of Dentistry

Preview of dentistry with lectures by dentists; overview of required courses; application process; recommended extracurricular opportunities.

STDEV 271

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Dental Profession

Increase understanding of the dental profession.

Application for Dental School

Understand the application process for dental school and analyze their individual preparation for this process.

Application Process

Students will understand the application process for dental school and analyze their individual preparation for this process.

Increase Understanding of the Profession

Students will increase their understanding of the dental profession.

Preview of Medicine

Preview of medical practice with lectures by doctors; overview of required courses; application process; recommended extracurricular opportunities.

STDEV 272

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Application for Medical School

Understand the application process for medical school and analyze their individual preparation for this process.

Application Process

Students will understand the application process for medical school and analyze their individual preparation for this process.

Understanding of the Profession

Students will increase their understanding of the medical profession.

Medical Profession

Increase understanding of the medical profession.

Preview of Optometry

Preview of optometry with lectures by optometrists; overview of required courses; application process; recommended extracurricular opportunities.

STDEV 273

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Increase Understanding of the Profession

Students will increase understanding of the optometry profession.

Increase Understanding of Profession

Students will increase understanding of the optometry profession.

Prepare for Optometry School

Students will understand the application process for optometry school and analyze their individual preparation for this process.

Preparation for Optometry School

Students will understand the application process for optometry school and analyze their individual preparation for this process.

Top

Preview of Physician Assistant

Preview of the physician assistant profession and PA school application process. Guest presentations by practicing PAs, PA school representatives, and pre-health advisors.

STDEV 274

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	St Dev 170.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Pre-Health Leadership

Leadership skills and strategies for leaders of pre-health clubs. Successful planning, implementation, and execution of pre-health club activities.

STDEV 278R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Learning Through Service: Theory and Application of Service

Theories, applications, methods, and approaches to service.

STDEV 290

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department

Course Outcomes

Motivation

Assess personal motivations and capacities for service.

Theory

Learn and apply service and learning theories in their personal service interactions.

Identity

Facilitate students' service "identity," and aspirations for meaningful future service.

Roles

Explore their roles as citizens and potential service opportunities and responsibilities related to family, civic, career, and church life.

Competence

Enhance students' ability to gain related competence, skill, and understanding by reflecting on their service. Action-reflection tools and concepts will be modeled in the course to encourage students to make intentional learning connections with their personal values, beliefs, academic interests, individual skills, etc, and their service contributions.

Top

Advanced Reading Strategies for College Success

Developing improved speed and comprehension skills through selection and practice of college reading strategies.

STDEV 305

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Knowledge

Describe the reading principles and strategies appropriate for various text types and reading purposes. Explain what the strategy is, why it is important, how to do it, and when or under what conditions to apply it. Explain what reading is, especially academic reading.

Action

Select, adapt, and practice the reading strategies that make the greatest contribution to students' understanding, learning and reasoning from their university texts.

Knowledge

Describe the reading principles and strategies appropriate for various text types and reading purposes. Explain what the strategy is, why it is important, how to do it, and when or under what conditions to apply it. Explain what reading is, especially academic reading.

Action

Select, adapt, and practice the reading strategies that make the greatest contribution to students' understanding, learning and reasoning from their university texts.

Progress

Demonstrate improvement from their baseline reading speed and comprehension rates.

Progress

Demonstrate improvement from their baseline reading speed and comprehension rates.

Confidence

Increase their confidence in being able to read any academic text with engagement and understanding. Decrease stress and procrastination related to reading.

Affect

Increase their confidence in being able to read any academic text with engagement and understanding. Decrease stress and procrastination related to reading.

Career Strategies for Employment and Internships

Preparing for employment and internship opportunities. Practical strategies to facilitate internship and/or career preparation: resumes, cover letters, networking, interviewing, and Internet research.

STDEV 317

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Increased Self-Understanding

1. Develop an accurate understanding of self in regards to career interests, abilities, values, and preferences.

Professional Documents

2. Incorporate best-practices into preparing professional documents such as resumes, cover letters, reference pages, and thank-you notes.

Professional Presence

3. Demonstrate principles of professional communication in regards to interviewing and networking.

Job Search Strategies

4. Utilize effective job-search strategies.

Graduate School Preparation: Practical Strategies for Becoming a More Competitive Applicant

Preparing students to craft competitive graduate school application documents. Pragmatic strategies to facilitate preparation and understanding of references, graduate program research, personal statements, scholarships and financial aid, entrance exams, resumes and interviewing.

STDEV 318

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Graduate School Documents

Understand how to construct effective graduate school documents to become a successful and competitive applicant.

Personal Statement, Resume

Create well-crafted personal statements, resumes and applications.

Letters of Reference/Funding

Learn to secure reference letters, scholarships and financial aid.

Interviewing Skills

Understand and practice successful interviewing strategies.

Exam Preparation

Learn to effectively approach and take graduate school entrance exams.

Top

Student Leadership Development

Analysis, synthesis, and integration of personal leadership experienced in an academic context. Successful leadership: decision making, communications, planning, team building, motivation, and interpersonal skills.

STDEV 358R

Hours	0.5 - 3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Conflict Resolution

Survey of gospel principles, LDS teachings, secular theories, communication skills, and negotiation strategies for application in varying conflict management and dispute resolution situations. Includes simulation exercises and videos on negotiation and problem-solving techniques.

STDEV 359

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Dispute Resolution Methods

Recognize the different dispute resolution methods and conflict styles most commonly practiced in society and their advantages and disadvantages.

Nature of Conflict

Describe the nature of conflict in human interactions and how way of being is more important than behavior in influencing relationships and determining outcomes of conflict.

Way of Being

Apply the concepts about way of being and how to make things go right in relationships through specific homework assignments.

LDS Concepts on Conflict Resolution

Describe the primary principles of conflict resolution taught by Christ and leaders of the LDS Church and how those principles strengthen our ability to have a responsive way of being.

Dialoguing Skills

Explain the difference between dialoguing and debating and apply the key skills for dialoguing.

Negotiation Strategies

Describe basic negotiation strategies and practice negotiating in role-play scenarios.

Top

Mediation Techniques and Practices

Mediation techniques emphasizing practical application and observation of actual mediations.

STDEV 364

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Mediation Process

Know and apply the phases of the basic mediation process.

Preparation

Know how to prepare for a mediation session and be able to present the essential elements of a mediator's opening statement.

Identify Issues

Be able to identify issues and interests of the parties and set an agenda for the mediation session.

Performance

Be able to skillfully conduct a mediation conference with joint and private meetings, allowing the disputing parties uninterrupted time for expressing viewpoints and interactive time to effectively exchange information, arguments, and offers of settlement.

Closing the Session

Be able to assist the parties in building and writing an agreement and to properly close the mediation session.

Rules and Ethics

Understand the basic rules of behavior for the parties in a mediation session and the common ethical practices of mediators.

Legal Education and Practice

Successful legal education and practice. Preparation for those planning to attend law school.

STDEV 365

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Legal Cases

Students will be able to read, understand, and brief a legal case.

Law School Examination

Students will be able to effectively study and prepare for a law school final examination.

Legal Research

Students will understand the major secondary sources used in legal research.

Communication

Students will learn how to effectively communicate with others (focusing on legal aspects)

Assimilation

Students will practice assimilating all legal research into a deliverable final product (memo/brief)

Top

Prelaw Review Journal Writing

Editing and publication for Pre-law Review authors and editors.

STDEV 368R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Pre-Law Review

Understand the procedure for publishing the Prelaw Review.

Citation Guide

Know how to use the Bluebook citation style guide.

Writing Skills

Improve essential legal writing skills.

Relationships

Work effectively in writing and editing relationships.

Top

Dental School Preparation Laboratory Experience

Dental laboratory practices; tooth terminology, morphology, and anatomy. Procedures including oral pathology, diagnosis, and X-rays.

STDEV 375

Hours	2.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

1. General knowledge of dentistry

Students will gain a basic understanding of dental sciences in preparation for their first semesters of dental school.

General Knowledge of Dentistry

Students will gain a basic understanding of dental sciences in preparation for their first semesters of dental school.

Dental Technology and Current Issues

Students will learn basic dental terminology and current issues in dentistry to better prepare them for the dental school interviewing process.

3. Manual dexterity

Students will develop manual dexterity for skills that are required to perform dentistry.

Manual Dexterity

Students will develop manual dexterity for skills that are required to perform dentistry.

2. Dental terminology and current issues

Students will learn basic dental terminology and current issues in dentistry to better prepare them for the dental school interviewing process.

Top

Dental Internship

Internships with health care providers.

STDEV 399R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Health Professions Internship

Internships with health care providers.

STDEV 399R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Gain Experience Through Shadowing Professionals

Students will gain valuable experience by shadowing and working with current health professionals.

Improve Ability to Communicate in a Professional Setting

Students will improve their ability to converse with health care professionals.

Research Different Healthcare Practices

Students will learn about different healthcare practices.

Develop Professional Relationships

Students will develop meaningful professional relationships with their internship providers.

Top

Medical Internship

Internships with health care providers.

STDEV 399R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Medical and Dental School Application

Preparation for medical and dental school applications; entire application process, including school identification and submission.

STDEV 470

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Application Process

Increase understanding of the medical/dental school application process. They will understand the various components of the application process and how to access resources to facilitate their professional school application.

Preparation

Assess their individual preparation for the professional school application process.

2. Assess their individual preparation for the professional school application process.

Application Process

Increase understanding of the medical/dental school application process. They will understand the various components of the application process and how to access resources to facilitate their professional school application.

3. Improve writing skills, particularly in respect to the personal statement.

Writing Skills

Improve writing skills, particularly in respect to the personal statement.

Interviewing Skills

Improve interviewing skills.

4. Improve interviewing skills.

Bachelor of General Studies Capstone

Culminating course required for bachelor of general studies degree: analyze and evaluate BGS experience in light of the "Aims of a BYU Education" and summarize this experience in a reflective paper, integrate material learned in emphasis by completing a scholarly essay, and demonstrate accomplishment of learning outcomes.

STDEV 490

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	STDEV 100; completion of all other BGS program requirements.
Taught	
Offered	Independent Study only.

Course Outcomes

Please contact the individual department for outcome information.

Top

Advanced Legal Internship

Legal research; courtroom observation; client and attorney interaction; and reflection exercises.

STDEV 496R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Legal internship coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Career Choice

Accurately assess whether or not a legal education and career is the correct choice for them.

Legal Education

Understand what a legal education and career requires and provides.

Comfort

Increase comfort interacting with legal professionals.

First-Year Swedish

Basic language skills. Includes International Cinema.

SWED 101

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Comprehension

Students will comprehend Swedish as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Swedish well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)

Writing

Students will be able to write short messages and well-articulated sentences in Swedish on familiar topics.

Language Learning Strategies

Students will develop comprehension and learning strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Swedish-speaking countries.

First-Year Swedish

Basic language skills. Includes International Cinema.

SWED 102

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Comprehension

Students will be able to comprehend Swedish as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Swedish well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.)

Writing

Students will be able to write short messages and well-articulated sentences in Swedish on familiar topics.

Language Learning Outcomes

Students will develop strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Swedish-speaking countries.

Second-Year Swedish

Conversation, vocabulary building, and reading and writing skills, emphasizing reading. Includes International Cinema.

SWED 201

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	Swed 102 or equivalent experience.
Taught	Fall

Course Outcomes

Comprehension

Students will be able to comprehend Swedish as they hear and read authentic language relating to familiar topics with strategies to even derive meaning out of less familiar topics.

Speaking and Writing

Students will be able to speak and write Swedish well enough to satisfy immediate needs. (Students will learn to communicate in social situations asking and answering questions, carrying out transactions, and talking about a variety of topics of common interest in present, past, and future times.)

Conversation

Students will be able to participate actively in conversations about Swedish-speaking countries, concrete topics, and current events.

Opinions

Students will be able to begin expressing and supporting opinions about familiar topics.

Second Year Swedish

Emphasis on literature and culture with continued writing, grammar, listening, and speaking. Includes International Cinema.

SWED 202

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	SWED 201
Note	Culminating course for GE Foreign Language requirement (except for returned missionaries or those with equivalent experience). This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Literature and Cultural History

Students will be able to identify and define key characteristics of the important moments in Swedish cultural history and place significant works in a meaningful cultural and historical context using the basic tools of literary analysis.

Comprehension

Students will be able to comprehend Swedish as they hear and read authentic language relating to familiar and less familiar topics.

Speaking and Writing

Students will improve their reading and writing skills in Swedish by beginning to communicate in connected and extended discourse, expressing and supporting opinion, and navigating less-familiar topics and situations.

Cultural Literacy

Students will display an informed awareness of contemporary and historical culture in Sweden and reflect thoughtfully upon their own native culture. They will use their cultural knowledge to use appropriate linguistic choices in their communication in Swedish.

Swedish Culture

Students will broaden and deepen their perception and appreciation of /Swedish culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

SWED 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Swed 102 or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Fluency

Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Vocabulary

Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

SWED 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Swed 211R or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to relate current events, plots of books or movies, and state opinion.

Fluency

Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Vocabulary

Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Pronunciation

Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Advanced Swedish

Third-year course in Swedish. Developing advanced language skills in speaking, reading, listening, and writing as defined by ACTFL standards.

SWED 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Swed 202 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent Swedish language experience. Required course for obtaining language credit by examination (Swed 101, 102, 201, 211R).
Taught	Fall

Course Outcomes

Speech and Writing

Students will develop their ability to narrate and describe in the present and past time frames, use connected discourse, and learn to manage complications in the language through communicative strategies, without patterns of breakdown. Students will develop partial control of their ability to support their opinions and hypothesize about abstract topics, in the context of extended discourse. You should be able to discuss various subjects with ease and debate your position with success using a number of strategies.

Critical Thinking, Accuracy, Text Types

Students will analyze and employ proper grammatical, lexical, phonological and literary functions in descriptive and narrative texts, in summaries, detailed descriptions and narrations, analyses and argumentative essays.

Listening Comprehension

Students will be able to understand a variety of advanced topics and dialects and use this as a basis for communication.

Swedish Culture

Students will broaden and deepen their perception and appreciation of Swedish culture.

Swedish Literature

Readings in Swedish literature: introduction to basic literary concepts. Includes International Cinema.

SWED 340

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Recommended	Swed 321 or equivalent experience.
Note	Culminating course for GE Foreign Language requirement.
Taught	Winter

Course Outcomes

Analytic and Writing Skills

Students should be able to insightfully analyze important literary and artistic works from Swedish cultural history and be able to communicate this analysis through articulate and well-organized written and oral presentations in Swedish. Students will also develop basic research skills.

Cultural Literacy

Students will be able to relate the ideas and issues raised by the works studied in class to their own cultural situation as well as to their experience with contemporary Swedish culture. They will reflect upon and develop an appreciation for the expression of ideas that make up Swedish cultural history and even value the expression of perspectives and opinions they do not necessarily share.

Swedish Culture

Students should understand key historical trends and works from Swedish culture, recognize connections between these works, and be able to relate them to the development of contemporary cultural developments.

Life-Long Learning

Students should better know how to understand, interpret, and thoughtfully reflect upon the literature and art they will encounter in later life.

Top

Academic Internship

On-the-job experience in Swedish.

SWED 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department's consent.
Taught	

Course Outcomes

Professional Experience

Improve professional experience and appreciation of cultural practices in an international context.

History of Creativity and Innovation in the Arts, Science, and Technology 1

Western civilization from Egyptian antiquity to Renaissance from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

TECH 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Problem Solving

Identify, formulate, and solve problems through enhanced personal creativity.

Life-long learning

Recognize the need for and will engage in lifelong learning.

Ethics

- Understand ethical situations and dilemmas within a historical and contemporary framework.

History of Creativity and Innovation in the Arts, Science, and Technology 2

Western civilization from Renaissance to present from perspective of changes in civilization enabled by technology. Creativity throughout history. How to improve personal creativity.

TECH 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Summer

Course Outcomes

Problem-solving

- Identify, formulate, and solve problems through enhanced personal creativity.

Ethics

Understand ethical situations and dilemmas within a historical and contemporary framework.

Life-long learning

- Recognize the need for and will engage in lifelong learning.

Top

Exploration in Innovation Design Techniques

Through a series of hands-on experiences, students explore principles, methods, and tools of innovation and design thinking in technology and engineering.

TECH 312

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Innovation Lab Learning Outcomes

1. Understand what is meant by the term innovation.
2. Understand and be able to apply the principles of innovation lab; User centered, collaborative, make ideas concrete, and guided by the components.
3. Be able to apply principles of problem findng and shaping.
4. Be able to apply principles of divergent thinking to explore and define ideas.
5. Understand the principles for judging/evaluating creative/innovative ideas.
6. Be able to effectivly communicate your ideas to others. (Leadership component)

Understanding

Gain better appreciation and understanding of innovation

New Ideas

Develop an ability to generate new ideas

Innovation

Develop innovation skills to develop ideas into products and processes

Collaboration

Collaborate as a team to complete a project

Public Speaking

Present ideas and work to the class

Top

Communication Technologies and Systems

Use of, interaction with, and teaching about communication, technologies.

TEE 125

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Outcomes - Level 1

UETS Standard 4: Content Knowledge
UETS Standard 7: Instructional Strategies
UETS Standard 6: Instructional Planning
UETS Standard 8: Professional Growth/Reflection
STL Standard 1. Students will develop an understanding of the characteristics and scope of technology (as it pertains to communication technologies).
STL Standard 2. Students will develop an understanding of the core concepts of technology (as it pertains to communication technologies).
STL Standard 3. Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study (as it pertains to communication technologies). STL Standard 4. Students will develop an understanding of the cultural, social, economic, and political effects of technology (as it pertains to communication technologies).
STL Standard 5. Students will develop an understanding of the effects of technology on the environment (as it pertains to communication technologies).
STL Standard 6. Students will develop an understanding of the role of society in the development and use of technology (as it pertains to communication technologies).
STL Standard 7. Students will develop an understanding of the influence of technology on history (as it pertains to communication technologies).
STL Standard 8. Students will develop an understanding of the attributes of design (as it pertains to communication technologies).
STL Standard 9. Students will develop an understanding of engineering design (as it pertains to communication technologies).
STL Standard 10. Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving (as it pertains to communication technologies).
STL Standard 17:Students will develop an understanding of and be able to select and use information and communication technologies.

Course Outcomes - Level 2

1. Historical Development: Introduce students to past communication technologies, with a focus on their development, usability, sustainability, evolution, and relative impact on: society, politics, economy, environment, and leisure.
2. Ethics: Help students develop an understanding of the ethical development and use of communication technologies.
3. User and Actor Skills: Help students develop the skills to not only be users, but actors in the positive development and evolution of society's Technology (Postman, 1999).
4. Tools and Services: Expose and train students in a broad range of communication technology tools and services (i.e., Wiki language, desktop publishing, web authoring, HTML and CSS languages, Flash and JavaScript, social bookmarking, Video and TV production, RSS and ATOM feeds and subscriptions, Pod and podcasting, digital photography (techniques, tools, storage), computer hardware and networking issues, GPS technologies, and 3D modeling.
5. Technology Assessment: Throughout this semester students will be asked to collect, implement, and assess the relative value of various contemporary technologies, and will be asked to discuss if and how the technologies should be used in classrooms and in the world.

Top

Processes and Prototyping with Wood

Processes for and prototyping with wood and wood-based composites.

TEE 200

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter even years, Spring odd years

Course Outcomes

TEE 200 Course Outcomes - Level 1

1. STL Standard 8: Students will develop an understanding of the attributes of design.
2. STL Standard 9: Students will develop an understanding of engineering design.
3. STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.
4. STL Standard 11: Students will develop the abilities to apply the design process.
5. STL Standard 12: Students will develop the abilities to use and maintain technological products and systems.
6. STL Standard 19: Students will develop an understanding of and be able to select and use manufacturing technologies.
7. STL Standard 20: Students will develop an understanding of and be able to select and use construction technologies.

TEE 200 Course Outcomes - Level 2

1. Students will be able to visualize how components are joined and how to communicate this through drawings and specifications.
2. Students will understand the properties of wood as a material and how these properties impact design of projects using wood and wood products.
3. Students will select and use subtractive processes in prototype construction: sawing, shaping, milling, turning, routing, etc.
4. Students will select and use additive processes in prototype construction: joining, laminating, fastening, etc.
5. Students will be able to identify, and use hand tools including tools for measuring, layout, sawing, planing, scraping, shaping, clamping, drilling, driving, and sharpening.
6. Students will be able to accurately set-up and safely use woodworking machinery including the jointer, surface planer, table saw, panel saw, radial arm saw, power miter saw, bandsaw, thickness sander, mortiser, boring machine, lathe, and drill press.

7. Students will have experience with the use of electric, pneumatic, and cordless power hand tools including routers, drills, and sanders.
8. Students will be able to apply methods of clamping, gluing, and assembly, sanding, and finishing.
9. Students will experience practical problem solving in working with industrial materials, tools, and machines.
10. Students will experience the importance of caring, hard work, planning, initiative, and patience, in making a project that is well designed, includes quality workmanship, and is nicely finished.
11. Students will learn concepts and methods of teaching safe use of woodworking equipment.
12. Students will be able to apply basic machine and hand tool maintenance.

Top

Electronics for Technology and Engineering Teachers

Teaching electronic, construction, and transportation systems.

TEE 225

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Outcomes Level 1

UETS STANDARD 4- Content Knowledge: The teacher understands the central concepts, tools of inquiry, and structure of the discipline. ***STL Standard 3:*** *Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.·*

- BMG: Technology transfer occurs when a new user applies an existing innovation developed for one purpose in a different function.
- BMH: Technological innovation often results when ideas, knowledge or skills are shared within a technology, among technologies or across other fields.
- BMI: Technological progress promotes the advancement of science and mathematics.

STL Standard 7: *Students will develop an understanding of the influence of technology on history.*

- BMG: Most technological development has been evolutionary, the result of a series of refinements to a basic invention.
- BMH: The evolution of society has been directly affected by, and has in turn affected, the development and use of tools and materials.
- BMI: Throughout history, technology has been a powerful force in reshaping the social, cultural, political, and economic landscape.
- BMO: The information age places emphasis on the processing and exchange of information.

STL Standard 10: *Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.·*

- BMF: Troubleshooting is a problem-solving method used to identify the cause of a malfunction in a technological system.
- BMG: Invention is a process of turning ideas and imagination into devices and systems. Innovation is the process of modifying an existing product or system to improve it.
- BMH: Some technological problems are best solved through experimentation.

STL Standard 17: Students will develop an understanding of and be able to select and use information and communication technologies.·

- BML: Information and communication technologies include the inputs, processes, and outputs associated with sending and receiving information.
- BMM: Information and communication systems allow information to be transferred from human to human, human to machine, machine to human, and machine to machine.
- BMO: Communication systems are made up of source, encoder, transmitter, receiver, decoder, storage, retrieval, and destination.
- BMP: There are many ways to communicate information, such as graphic and electronic means.
- BMQ: Technological knowledge and processes are communicated using symbols, measurement, conventions, icons, graphic images, and languages that incorporate a variety of visual, auditory, and tactile stimuli.

Course Outcomes - Level 2

1. Students will be able to describe the basic electronic concepts of voltage, amperage, resistance & power.
2. Students will be able to use Ohm's and Watt's law to perform basic calculations in an electronic circuit.
3. Students will be able to describe how voltage, amperage, power & resistance behave in series and parallel circuits and be able to calculate unknown quantities in a circuit.
4. Students will be able to use a power supply, breadboard, basic components, and a digital multi-meter to build, test and troubleshoot basic electronic circuits.
5. Students will be able to use a digital multi-meter, oscilloscope and digital logic probe to test, troubleshoot and repair faulty circuits.
6. Students will be able to identify basic electronics components and describe the function of each component.
7. Students will be able to identify and draw the basic schematic symbols used to represent electronics components in a circuit.
8. Students will be able to use appropriate materials and equipment (including simulation software, CNC Mill, soldering iron) to design and build a working electronic circuit that is a solution to a technological problem and/or need.
9. Students will be able to successfully calculate unknown quantities and complete labs associated with magnetism, electromagnetic induction, capacitors, semiconductors, transformers and alternating current.
10. Based on a set of given inputs and desired outputs, students will be able to design a digital electronic circuit as a solution to a technological problem or need.
11. Students will be able to collect technical data and to apply appropriate math and science knowledge to see the connections between technology and other fields of study.
12. Students will be able to describe historical examples of discoveries, experiments, innovations and inventions related to electronics communications technology and be able to provide examples of technology transfer and how these technologies affected past and current society.

Top

Processes and Manufacturing with Metals and Polymers

Processes for and manufacturing with metals and polymers.

TEE 229

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TEE 200; or concurrent enrollment.
Note	Fee.
Taught	Winter

Course Outcomes

TEE 229 Course Outcomes - Level 1

1. STL Standard 4: Students will develop an understanding of the cultural, social, economic, and political effects of technology.
2. STL Standard 5: Students will develop an understanding of the effects of technology on the environment.
3. STL Standard 6: Students will develop and understand of the role of society in the development and use of technology.
4. STL Standard 7: Students will develop and understanding of the influence of technology on history.
5. STL Standard 8: Students will develop an understanding of the attributes of design.
6. STL Standard 9: Students will develop an understanding of engineering design.
7. STL Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.
8. STL Standard 11: Students will develop the abilities to apply the design process.
9. STL Standard 12: Students will develop the abilities to use and maintain technological products and systems.
10. STL Standard 13: Students will develop the abilities to assess the impact of products and systems.
11. STL Standard 19: Students will develop an understanding of and be able to select and use manufacturing technologies.
12. STL Standard 20: Students will develop an understanding of and be able to select and use construction technologies.

TEE 229 Course Outcomes - Level 2, Polymers Unit

Student will be able to:
1. Use an existing object to make a silicone mold for casting multiple identical objects.
2. Cast duplicate polyurethane objects in a silicone mold.
3. Vacuum form a sheet of plastic to a desired shape.
4. Lay-up a fiberglass mold to be used for casting a urethane foam object.

5. Cast a urethane (Nerf) foam object in a fiberglass mold.
6. Produce a polymer/wood composite.
7. Use a 3D printer to create a simple ABS prototype of an object.
8. Describe qualities of polymers as they pertain to design and polymer fabrication.
9. Understand the fundamental safety procedures and protocol associated to the various manufacturing and fabrication processes associated to the different polymer domains.
10. Evaluate the economic and environmental issues associated with the different polymers and their related manufacturing processes.

TEE 229 Course Outcomes - Level 2, Metals Unit

Students will be able to:
1. Describe classifications, properties and characteristics of many different metals.
2. Identify and understand the different types of information indicated on a drawing.
3. Apply safe work habits when operating tools and equipment.
4. Accurately measure with and read a ruler, venier calipers, and various gauges.
5. Use tools to make a layout for a project.
6. Identify, select, and safely use basic hand tools in metalworking.
7. Identify and correctly use several types of metal fasteners.
8. Cut, bend and make a sheet metal project using several different tools.
9. Demonstrate the soldering and brazing process.
10. Demonstrate how to use an oxy-acetylene torch to cut metal.
11. Correctly use various tools to make a bench metal project.
12. Correctly select the rod and adjust arc welding equipment.
13. Correctly setup and adjust the current and feed rate for a MIG welder.
14. Use a MIG welder to strike an arc, run a bead, and make a butt and lap joint to given specifications.
15. Correctly use a metal lathe to make a specified project.
16. Correctly use a CNC mill to make a specified project.

TEE 229 Course Outcomes - Level 2, Manufacturing and Free Enterprise Unit

Students will be able to work within an organization to:
1. Conduct market research for product selection.
2. Develop design drawings and engineering drawings.
3. Design and use jigs and fixtures in producing a finished product.
4. Develop a manufacturing system and produce multiples of a product.
5. Set up and conduct a manufacturing pilot run and production run.
6. Establish methods for quality control in manufacturing.
7. Organize a manufacturing enterprise.
8. Keep records relative to finances, labor, and material purchase and use.
9. Develop practices and attitudes for safe use of equipment and tools.
Students will understand:
1. Historical aspects and impacts of manufacturing.
2. Principles of manufacturing including material flow, converting raw materials and standard stock into finished products, economy of motion and material use, interchangeability of parts, product design for manufacture, and tasks involved in manufacturing a finished product.
3. Principles of free enterprise including types of ownership, product selection and design, marketing techniques, corporate structure in manufacturing, and record keeping.

Video Production and Nonlinear Editing

Teaching video in education to inspire, communicate, and develop creativity. Fundamentals include planning, storyboarding, camera techniques, composition, assembling, and editing video projects.

TEE 251

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TEE 125 & TEE 255; or instructor's consent.
Taught	Winter

Course Outcomes

Course Outcomes - Level 2

1. Provide students an opportunity to gain an understanding of the technical, creative, and cultural, political, economic, and environmental impact of photography, television and film/video media.
2. Expose and train students in contemporary video, film, TV, and photography pre-production, production, and post-production techniques.
3. Expose and train students to effectively use contemporary video, film, TV, and photography tools (i.e., Final Cut Pro, DVD Studio, Studio Code, Adobe Creative Suite, Camera Switcher, HD Video, digital SLR cameras, Celtix [script writing], lighting and audio recording equipment, and so forth).
4. Teach students the primary elements of photography and TV/Film production, which are:

1. Principles of audio, including micing techniques and handling of common audio problems.
2. Camera placement and operations, including a basic understanding of camera color balancing and various important framing techniques.
3. Lighting techniques, including existing light, bounced light and three-point lighting.
4. Technical and production differences between standard definition (SDTV) and HDTV/DTV production.
5. Elements of effective visual composition.
6. Editing techniques: assembly and insert, on-line and off-line, linear and random access, and the use of time-code.
7. A general understanding of the pre-production, production, and post-production stages for both TV and film, including associated audio and video equipment.

Top

Visual Communication Design

Teaching visual design principles and processes through digital and print media.

TEE 255

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TEE 125; or instructor's consent.
Taught	Winter

Course Outcomes

Teacher Preparation

Prepare you to teach communications technology, graphic design, and web design.

Basic Skills

Provide an opportunity to learn the basics of graphic design.

Profession

Introduce you to the visual communications profession and professional literature.

Application

Gain competency in applying the design principles in both print and web mediums.

Course Outcomes - Level 1

UETS Standard 4: Content Knowledge
UETS Standard 7: Instructional Strategies
UETS Standard 6: Instructional Planning
UETS Standard 8: Professional Growth/Reflection
STL Standard 1. Students will develop an understanding of the characteristics and scope of technology (as it pertains to communication technologies).
STL Standard 2. Students will develop an understanding of the core concepts of technology (as it pertains to communication technologies).
STL Standard 3. Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study (as it pertains to communication technologies). STL Standard 4. Students will develop an understanding of the cultural, social, economic, and political effects of technology (as it pertains to communication technologies).
STL Standard 5. Students will develop an understanding of the effects of technology on the environment (as it pertains to communication technologies).
STL Standard 6. Students will develop an understanding of the role of society in the development and use of technology (as it pertains to communication technologies).
STL Standard 7. Students will develop an understanding of the influence of technology on history

(as it pertains to communication technologies).
STL Standard 8. Students will develop an understanding of the attributes of design (as it pertains to communication technologies).
STL Standard 9. Students will develop an understanding of engineering design (as it pertains to communication technologies).
STL Standard 10. Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving (as it pertains to communication technologies).
STL Standard 17:Students will develop an understanding of and be able to select and use information and communication technologies.

Course Outcomes - Level 2

1. Students will prepare to teach communication technology - specifically graphic design in print and web formats. To accomplish this students will first learn the primary and fundamental theories of design, and develop associated skills and understanding by completing a variety of projects, including but not limited to: user experience designs for a variety of web applications, print designs in the form of advertisements and identity design. Second, students will design instructional ideas for use in both industry and educational settings (i.e., lesson and unit plans), which they will have evaluated by peers, instructor, and through application (i.e., they will teach their lesson plan(s) in an educational setting).
2. Students will be introduced to the visual communication profession and associated professional literature. Field trips, readings, and client work will be the primary methods of meeting these criteria.
3. Students will gain competency in applying the design principles in both print and web mediums. As note above the course assignments will provide the means for accomplishing this outcome. In addition, peer evaluations, and student presentations will help accomplish this outcome.

Top

Exploration of Teaching A

Lecture series directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

TEE 276A

Hours	2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment with TEE 276B.
Taught	Fall

Course Outcomes

Introduction

Educator Preparation Program Outcomes
This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.
As students progress through the Technology and Engineering teacher education program, they should gain knowledge, dispositions and skills that will enable them to become effective teachers. The standards that encompass the knowledge, dispositions and skills that teachers should have are known as the UETS standards and can be found on the TEE Outcomes webpage. The following UETS standards will be addressed in this class (TEE 276).

Course Outcomes - Levels 1 and 2

Course Outcomes - Level 1 (Listed as STL and UETS); Course Outcomes - Level 2 (Listed in the table and below as objectives and how assignments meet level 1 criteria).
Upon completion of this course students will:
Identify and demonstrate characteristics of an effective teacher, including:

- Positive expectations
- Classroom management
- Lesson preparation
- A knowledge of one's own strengths and weaknesses
- Participate in clinical field experience to observe and to engage in meaningful education practices.
- Research and present supplementary educational research materials.
- Demonstrate an understanding of current issues facing public schools.
- Reflect in writing, discussion, and assignment the effective teacher model and how it is reinforced through public school observation and experience.
- Evaluate and assess one's own commitments and practices relative to teaching and learning with frequent reflections on teaching practices.

A description of how these will be met are outlined in the table below:

Course Objectives	UETS Standard (Utah Effective Teaching Standards)	Assignment	Assessment
Student will become aware of the UETS Standards and will select and reflect about course assignments using these standards.	All	School Observations Final	Checklist Rubric
Student will become aware of the State Core Requirements in their content area and will connect lessons to the core.	1, 6	School Observations TWS 2 Inquiry Lesson Plan	Checklist Rubric Rubric
Student will discuss complex issues that relate to their content area and the public purposes of education including the Moral Dimensions of Education (Goodlad).	1, 4, 9	TWS 1-4 Final	Rubric Rubric
Student will experience the cultural of the school he/she visits and will consider his/her personal disposition to teach.	1, 4, 9	School Observation Field Experience Demographics Form	Checklist Checklist
Student will understand that teachers design instruction for specific learning goals, students' characteristics and needs, and learning contexts.	1, 2, 4, 9	School Observation TWS 4 Inquiry Lesson Plan	Checklist Rubric
Students will experience teachers using on-going analysis of student learning to make instructional decisions.	6, 7, 8, 9	School Observations	Checklist
Students will be able to access professional resources including websites, organizations, conferences, etc., that are available for their professional development.	8, 9	Final	Rubric
Students will articulate their motivation, strengths, and weaknesses for becoming a teacher.	8	Final	Rubric

Students will learn and practice the Standards for Technological Literacy (20).	All	In-class peer teaching Final Exam

Top

Exploration of Teaching B

Field-based initial experience directed at helping prospective teachers understand demands and opportunities associated with teaching secondary students.

TEE 276B

Hours	2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	FBI fingerprint and background clearance; concurrent enrollment with TEE 276A.
Taught	Fall

Undergraduate Seminar

Student leadership training, including organization and operation of student technology education clubs. College Lecture attendance required. Separate program sections.

TEE 291R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required each semester for undergraduate majors not enrolled in TTE 391R or 491R.
Taught	Fall, Winter

Course Outcomes

Introduction

Educator Preparation Program Outcomes
This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.
As students progress through the Technology and Engineering teacher education program, they should gain knowledge, dispositions and skills that will enable them to become effective teachers. The standards that encompass the knowledge, dispositions and skills that teachers should have are known as the UETS standards and can be found on the TEE Outcomes webpage. The following UETS standards will be addressed in this class (TEE 291R).

Course Outcomes - Level 1

- **UETS Standard 1 - Learner and Development:** The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.
- **UETS Standard 3 - Learning Environments:** The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.
- **UETS Standard 4 - Content Knowledge:** The teacher understands the central concepts, tools of inquiry, and structure of the discipline.
- **UETS Standard 5 - Assessment:** The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.
- **UETS Standard 6- Instructional Planning:** The teacher plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.
- **UETS Standard 7- Instructional Strategies:** The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.

Course Outcomes - Level 2

1. Students will understand what technology and engineering education is, and why it is important, and how it fits within the context of the educational system, specifically, CTE (Career and Technology Education).
2. Students will participate in various professional development activities (i.e., guest lectures, service projects, national and regional/state conferences) to gain insight and experience in educational settings related to technology and engineering education.
3. Students will participate as TEECA (technology and engineering education collegiate association) members. This experience will provide the students with collaborative service, competition, and professional development opportunities.

Top

Creativity, Engineering, and Problem Solving

Designing solutions to technological problems using innovation, creativity, experimentation, problem solving, and engineering design. Manufacturing systems; teaching methods and prototype development.

TEE 330

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Course Outcomes - Level 1

1. **UETS STANDARD 4 - Content Knowledge:** The teacher understands the central concepts, tools of inquiry, and structure of the discipline.
2. **STL Standard 2:** Students will develop an understanding of the core concepts of technology.
3. **STL Standard 3:** Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.
4. **STL Standard 8:** Students will develop an understanding of the attributes of design.
5. **STL Standard 9:** Students will develop an understanding of engineering design.
6. **STL Standard 10:** Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.
7. **STL Standard 11:** Students will develop the abilities to apply the design process.

Course Outcomes - Level 2

1. Students will incorporate the concepts of group goals, individual accountability, group processing and practice interpersonal and small group skills in order to work cooperatively in a group engineering design project.
2. Students will incorporate various systems (e.g., electronic, mechanical, hydraulic, pneumatic, thermal) as they use the engineering design process to design an invention, innovation or solution to a design problem.
3. Students will know the steps of the engineering design process and then document and apply this process in building a solution to a design activity.
4. Students will use the steps of the engineering design process to innovate a new design

solution to a common household item.

5. Students will create an operations manual (design portfolio) which includes a self-evaluation, peer evaluation, sketches made during the ideation stage, problem-solving log, copy of the computer program and final drawing of the engineering design project.
6. As a group, students will verbally and visually present their design portfolio to the rest of the class.
7. During the engineering design process, students will identify the constraints and limitations of the design problem, consider trade-offs, and then design, build a prototype, test, optimize and troubleshoot a design solution to a problem.
8. Students will collect technical data and then apply math and science knowledge in contextual setting.
9. Students will learn the basics of computer control systems, including, inputs, outputs, and feedback loops; and be able to design, build and program a microprocessor-driven system to drive a specific set of output devices based upon inputs to the system from various sensors and feedback mechanisms.
10. Students will build and program a robot as a solution to a given problem.
11. Students will know the basics of radio control devices and then use these principles to design a solution to a problem.
12. Students will identify a variety of engineering related curriculum resources that are currently available for them to use in their future classrooms.

Top

Principles of Technology and Engineering

Teaching technology and engineering concepts in education. Developing problem-solving skills by tackling technological and engineering problems.

TEE 340

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Outcomes - Level 1

1. **UETS STANDARD 4 - Content Knowledge:** The teacher understands the central concepts, tools of inquiry, and structure of the discipline.
2. **STL Standard 4:** Students will develop an understanding of the cultural, social, economic, and political effects of technology.
3. **STL Standard 5:** Students will develop an understanding of the effects of technology on the environment.
4. **STL Standard 6:** Students will develop an understanding of the role of society in the development and use of technology.
5. **STL Standard 8:** Students will develop an understanding of the attributes of design.
6. **STL Standard 9:** Students will develop an understanding of engineering design.
7. **STL Standard 11:** Students will develop the abilities to apply the design process.
8. **STL Standard 12:** Students will develop the abilities to use and maintain technological products and systems.
9. **STL Standard 16:** Students will develop an understanding of and be able to select and use energy and power technologies.
10. **STL Standard 20:** Students will develop an understanding of and be able to select and use construction technologies.

Course Outcomes - Level 2

1. Students will understand and be able to differentiate between the concepts of force, work, energy and power in mechanical, fluid, electrical and thermal systems.
2. Students will be able to perform calculations to determine the amount of work, energy or power of various mechanical, fluid, electrical or thermal systems.

3. Students will know and be able to use the engineering design cycle to design a prototype of a solution to a power, energy and/or transportation problem.
4. Students will be able to identify, describe, and perform basic calculations for simple machines (e.g. levers, gears, pulleys, hydraulic systems).
5. Students will be able to use equipment and materials to perform basic power and energy experiments.
6. Students will understand basic terminology related to construction technologies and be able to identify and describe the basic components of a structure.
7. Students will know how to use tools and equipment to process various materials in order to design, build and test a structure as a solution to a technological problem.
8. Students will be able to use simulation software to design, build and test a structure as a solution to a technological problem.

Multimedia Authoring and Publishing

Developing advanced media authoring skills for teaching interactive design. Solving real-world interactive design problems for the World Wide Web, CD-ROM, and DVD-ROM in an entrepreneurial environment.

TEE 350

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TEE 125; or instructor's consent.
Taught	Spring

Course Outcomes

Course Outcomes - Level 1

Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

Top

Standards for Technological Literacy

The teaching of technological literacy and engineering problem solving in education specifically focusing on the fields of medical, agricultural, and energy and power technologies.

TEE 360

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Eng T 231 or concurrent enrollment; completion of the GE Physical Science and Biological Science requirements.
Taught	Fall

Course Outcomes

Course Outcomes - Level 1

1. **UETS Standard 4:** Content Knowledge. Each candidate understands the central concepts, tools of inquiry, and structure of the discipline.
2. **UETS Standard 6:** Instructional Planning. Each candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.
3. **UETS Standard 7:** Instructional Strategies. Each candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.
4. **STL Standard 3:** Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.
5. **STL Standard 7:** Students will develop an understanding of the influence of technology on history.
6. **STL Standard 8:** Students will develop an understanding of the attributes of design.
7. **STL Standard 11:** Students will develop the abilities to apply the design process.
8. **STL Standard 14:** Students will develop an understanding of and be able to select and use medical technologies.
9. **STL Standard 15:** Students will develop an understanding of and be able to select and use agricultural and related biotechnologies.
10. **STL Standard 16:** Students will develop an understanding of and be able to select and use energy and power technologies.

Course Outcomes - Level 2

1. Students will be able to create lesson plans that would enable a teacher to teach basic

principles involving STL Standard 14, Medical Technologies.

2. Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 15, Agricultural and Related Biotechnologies.
3. Students will be able to create lesson plans that would enable a teacher to teach basic principles involving STL Standard 16, Energy and Power Technologies.
4. Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 14, Medical Technologies.
5. Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 15, Agricultural and Related Biotechnologies.
6. Students will be able to demonstrate technical understanding of a few technological issues and think critically regarding the wise development and use of technology relative to STL Standard 16, Energy and Power Technologies.

Top

Teaching Methods in Technology Education

Developing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

TEE 377

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TEE 276B
Taught	Winter Term 1

Course Outcomes

Introduction

Educator Preparation Program Outcomes
This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.
As students progress through the Technology and Engineering teacher education program, they should gain knowledge, dispositions and skills that will enable them to become effective teachers. The standards that encompass the knowledge, dispositions and skills that teachers should have are known as the UETS standards and can be found on the TEE Outcomes webpage. The following UETS standards will be addressed in this class (TEE 377).

Course Outcomes - Level One

- **UETS Standard 1 - Learner and Development:**The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.
- **UETS Standard 3 - Learning Environments:**The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.
- **UETS Standard 4 - Content Knowledge:**The teacher understands the central concepts, tools of inquiry, and structure of the discipline.
- **UETS Standard 5 - Assessment:**The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.
- **UETS Standard 6- Instructional Planning:**The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.

- **UETS Standard 7- Instructional Strategies:**The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.

Course Outcomes - Level 2

1. Students will be able to identify the basic theories of student motivation and apply these theories to design classroom instruction for a technology and engineering classroom.
2. Students will be able to identify and differentiate between direct and inquiry- based instruction and to develop lesson plans using both instructional approaches.
3. Students will be able to develop instructional objectives that address cognitive, affective, and psychomotor domains of learning.
4. Students will be able to develop instructional objectives for each of the levels of Blooms taxonomy.
5. Students will be able to develop a disclosure document that outlines classroom procedures and student expectations appropriate for a T&E classroom.
6. Students will be able to identify instructional strategies and teaching methods that might be used in a T&E classroom and to incorporate these strategies into a lesson plan.
7. Students will be able to develop an assessment plan that includes strategies for formative and summative assessment in a T&E classroom.
8. Students will be able to develop a rubric for assessment of a technology and engineering classroom activity.
9. Students will be able to develop a plan for implementing problem solving strategies into their course instruction.
10. Students will be able to identify implications for how students learn; including addressing student pre-conceptions of course content, developing student competence in a content area, and developing strategies for meta-cognition. Students will also be able to identify interventions for each of these areas.
11. Students will be able to identify examples of student multiple intelligences and develop a plan for how this might affect instruction in the classroom.
12. Students will be able to describe appropriate procedures for implementing cooperative learning into classroom activities.

Top

Practicum in Technology Education

Implementing meaningful and engaging instruction for secondary students in technology education; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

TEE 378

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TEE 377
Taught	Winter Term 2

Course Outcomes

Course Outcome - Level 1

Educator Preparation Program Outcomes
This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB / 801-422-3426) can answer questions you have about the licensure requirements (http://education.byu.edu/ess/licensing.html) for your teaching major or minor.

- **UETS Standard 1 - Learner and Development:**The teacher understands cognitive, linguistic, social, emotional and physical areas of student development.
- **UETS Standard 2 - Learning Differences:** The teacher understands individual learner differences and cultural and linguistic diversity.
- **UETS Standard 3 - Learning Environments:**The teacher works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.
- **UETS Standard 4 - Content Knowledge:**The teacher understands the central concepts, tools of inquiry, and structure of the discipline.
- **UETS Standard 5 - Assessment:**The teacher uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in the content standards have been met.
- **UETS Standard 6- Instructional Planning:**The teacher plans instruction to support students in meeting rigorous learning goals by drawing uopn knowlege of content area, Core Curriculum standards, instructional best practices, and the community context.
- **UETS Standard 7- Instructional Strategies:**The teacher uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.
- **UETS Standard 8 - Reflection and Continuous Growth:** The teacher is a reflectiv practitioner who uses evidence to continually evaluate and adapt practice to meet the needs

of each learner.

Course Outcomes - Level 2

1. Students will identify the basic steps of the Backwards Design approach to curriculum development and use these steps to develop a curricular unit to be taught as part of the practicum experience in a middle school setting.
2. As part of their practicum experience, students will successfully develop and teach a curricular unit (including unit plan, lesson plans, assessments, lab experiences, instructional materials) in a middle school technology and engineering classroom. Note: the mentor teacher and the university supervisor will assess this practicum experience using the CPAS assessment.
3. During their practicum experience, students will demonstrate effective classroom management strategies.

Academic Internship

Work experience in technical and/or teaching environment. Internship will be supervised by employer and program internship coordinator. Formal technical report required.

TEE 399R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department chair's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experience

Student acquires professional experiences in any discipline within technology.

Professional Communication

Student demonstrates professional communication skills (report).

Converting Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Top

Furniture Design and Advanced Woodworking Processes

Designing several projects and building a significant piece of furniture. Topics include: current and past designers; surface decoration through coloring, texturing, pyrography; models, mock-ups, working drawings; bending, turning, advanced machining.

TEE 400

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TEE 200
Taught	Winter odd years

Course Outcomes

Course Outcomes - Level 1

Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

Course Outcomes - Level 2

1. Explore furniture design and design and build a significant piece of furniture.
2. Prepare a research report summarizing the life and key contributions of a furniture designer assigned/selected from the list provided and give a brief presentation (five minutes) to the class of your findings.
3. Construct 6 sketch models of possible furniture pieces.
4. Complete thumbnail design sketches of at least 24 pieces of furniture that could be appropriate to build in the class.
5. Complete a working drawing which includes a 3-view orthographic projection drawn to an appropriate scale, and full scale details of all joints and connections of materials (including those containing hardware).
6. If building a chair, a full-scale mock-up is required and will substitute for the primary views of the drawing requirement, full scale details of each joint or connection of materials is still required.
7. Complete a cost estimate using the Estimating Sheet provided.
8. Complete a plan of procedure detailing the sequence to be followed in building your furniture.
9. Using a variety of surface decoration/manipulation techniques make three surface decoration swatches approximately 1/4" x 2" x 5".

10. Design and make two full-scale, completely finished, functioning door or drawer pulls.

Top

Secondary Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

TEE 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Completion of all course work or departmental approval.
Taught	Fall, Winter

Course Outcomes

Course Outcomes - Level 1

1. **UETS Standard 1: Learner Development.** Each candidate understands cognitive, linguistic, social, emotional, and physical areas of student development.?
2. **UETS Standard 2: Learning Differences.** Each candidate understands individual learner differences and cultural and linguistics diversity.
3. **UETS Standard 3: Learning Environments?.** Each candidate works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.?
4. **UETS Standard 4: Content Knowledge.** Each candidate understands the central concepts, tools of inquiry, and structure of the discipline.
5. **UETS Standard 5: Assessment.** Each candidate uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in content standards have been met.?
6. **UETS Standard 6: Instructional Planning.** Each candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.
7. **UETS Standard 7: Instructional Strategies.** Each candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.
8. **UETS Standard 8: Reflection and Continuous Growth.** Each candidate is a reflective practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.?
9. **UETS Standard 9: Leadership and Collaboration.** Each candidate is a leader who engages collaboratively with learners, families, and colleagues, and community members to build a shared vision and supportive professional culture focused on student growth and success.?
10. **UETS Standard 10: Professional and Ethical Behavior.** Each candidate demonstrates the highest standard of legal, moral, and ethical conduct as specified in Utah State Board Rule R277-515.

Course Outcomes - Level 2

1. Students will work with a colleague to plan and teach curriculum.
2. Students will understand the physical, mental, emotional, and social demands of a junior high and/or high school teacher.
3. Students will complete the requirements for Secondary Education and licensure.

Top

Independent Research and Development

Individually preparing technical content associated with selected technological emphases.

TEE 490R

Hours	0.5 - 3.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	Program supervisor's consent.
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Course Outcomes - Level 1

Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy developed by the International Technology and Engineering Educators Association (ITEEA).

Top

Academic Internship

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

TEE 496

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	All course work or departmental approval; major GPA of 2.85; at least a C- in TEE 377.
Taught	Fall

Course Outcomes

Internship

Students will improve upon what they have learned at BYU by going out into industry and gaining additional experience through mentoring and teaching in the schools of the surrounding community.

Workshop in Applied Technology Education

Teaching and learning technological literacy skills. Reviewing and participating in current technological advances, with a focus on teaching practice and methods.

TEE 593R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Maximum of 2 credit hours applicable to MS program. Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Course Outcomes

Students will understand the current pedagogical techniques used in their teaching field of choice.

Top

Foundations in Education for English Language Learners

Identifying and assessing legal, linguistic, cultural, community, and familial issues affecting access of Limited English Proficient (LEP) student populations to education.

TELL 400

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Cultural Identity

Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to their thinking and behavior.

Theoretical Frameworks

Recognize and use a moral spiritual framework and the social science theoretical framework to guide multicultural and English language learner education.

Candidates know, understand, and use the major theories and research related to the structure and acquisition of language to help English language learners' (ELLs') develop language and literacy and achieve in the content areas.

Recognizing Racism

Recognize and acknowledge racism and discrimination in themselves, in others, and within institutions.

Culture's Effects

Acknowledge the dynamics of how culture effects students' language learning and school success and teachers' teaching.

Culturally and Linguistically Relevant Pedagogy

Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.

Historical Context of Diversity

Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.

Top

Second Language Acquisition

Processes and variables in native- and second-language development. How teachers can foster efficient acquisition of language, cognitive, and academic skills in second-language environments.

TELL 410

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	EL ED 323 & EL ED 203; or ELANG 223 & SC ED 353; or CPSE 425; For DLI minors: Sc Ed 353 only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Cultural Diversity

- Teacher Candidates know, understand, and use the major concepts, principles, theories, and research related to the nature and role of culture and cultural groups.
- Teacher Candidates create a learning environment that is sensitive to and supportive of English language learner's cultural identities, language and literacy development, and content area knowledge.

Top

Assessing Linguistically Diverse Students

Fundamental concepts in testing, use/interpretation of current instruments for language/academic assessment, appropriate placement of linguistically diverse students, and developing classroom language assessments.

TELL 420

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ELANG 223 & SC ED 353; or EL ED 203; For DLI minors: Sc Ed 353 only.
Taught	Fall, Spring

Course Outcomes

Assessment

Teacher Candidates will understand issues of assessment and accommodation and use a variety of measurement tools to evaluate English language learners for placement, proficiency and instruction.

Top

Developing K-12 Literacy in a Second Language

Instructional strategies, methodologies, and materials for developing reading and writing skills in a second language. Developing cognitive academic language proficiency and integrating multiple cultural perspectives.

TELL 430

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ELANG 223 & SC ED 353 & TELL 410
Taught	Winter, Summer

Course Outcomes

Language/Linguistics

Teacher Candidates will know, understand, and use the major concepts, theories, and research related to the nature and acquisition of language and linguistic systems to construct learning environments that support English learners' (EL's) development of English language proficiency: literacy, academic, and cognitive development.

Top

Language and Literacy Instruction in K-12 Dual Immersion Settings

Theory and rationale for developing language and literacy in two or more languages. Focus on the development of literacy instruction, including theory and methods applicable to K-12 dual language immersion classrooms.

TELL 435

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	FLANG 300 & TELL 410 & TELL 420; or FLANG 300 & TELL 410 & EL ED 213; OPI (Advanced-Mid), FBI fingerprint background clearance.
Taught	Winter

Course Outcomes

TELL 435 Course Outcomes

The students will:

- identify the historical and legal foundations of bilingual/dual-immersion education and relate these to specific requirements and procedures in Utah.
- identify different models of bilingual/dual-immersion programs in relation to characteristics of effective instructional practices in a variety of content subjects.
- identify and be able to articulate theories and philosophies of literacy development and language acquisition in a second language specific to teaching in bilingual/dual-immersion contexts.
- implement techniques, strategies, and tasks related to the teaching of content literacy and language in bilingual or dual-immersion programs.
- create meaningful lesson plans and activities that demonstrate appropriate decision making procedures to meet bilingual/dual-immersion educational program needs.

Content-Based Language Instruction

Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

TELL 440

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	TELL 410 & TELL 420; or TELL 410 & EL ED 213; or TELL 410 & CPSE 420
Recommended	El Ed 333, TELL 430, or CPSE 430 concurrently.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Instruction

Teacher Candidates know, understand, and use the Utah English Language Proficiency Standards in selection of programs, practices and strategies related to planning, implementing, and managing ESL and content instruction, including classroom, organization, teaching strategies for development and integrating language skills, and choosing and adapting classroom resources.

Content-Based Language Instruction in K-12 Dual-Language Immersion Settings

Theory, method, and practical application for teaching language in content area subjects such as math, science, and social studies in K-12 dual language immersion classrooms. Research-based principles used for the creation of criteria and frameworks for curriculum that integrates content-based instruction and second language learning needs.

TELL 445

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	TELL 435; OPI (Advanced-Mid); PRAXIS II; FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

TELL 445 Course Outcomes

- Identify both historical and contemporary movements and research concerning bilingual/dual-language immersion programs in the United States and internationally.
- Identify different models of bilingual/dual-immersion programs in relation to characteristics of effective instructional practices and standard-based procedures in a variety of content subjects for bilingual/dual language immersion learners.
- Identify and be able to articulate rationales for integrating the teaching of subject content matter and target language objectives in a variety of content-based approaches.
- Create meaningful lesson plans and activities that demonstrate appropriate decision-making procedures to merge subject matter and target language to the identity needs of dual language immersion students in one-way and two-way settings.
- Create and demonstrate an understanding of formative and summative assessments concerning the use of language to learn content and literacy
- Demonstrate an understanding of language as a material carrier of meaning through case studies, lesson plans, and field experience. Implement contextualized and situational use of language components (including linguistic, cultural-historical content, and identity issues). Integrate technology and other tools for bilingual/dual-language immersion students.

Family, School, and Community Partnerships

Standards, principles, policies, and processes of partnering with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

TELL 450

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ELANG 223 & TELL 410 & SC ED 353; or EL ED 203 & EL ED 323 & TELL 410
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Family, School and Community Partnerships

Teacher Candidates understand the role and contribution of family and community in the cognitive, linguistic and social development of students. They will provide support and advocacy for ELs and their families and understand the history, laws, and policies of ESL teaching and work in partnerships with families and communities to create positive learning environments.

TESOL K-12 Student Teaching

Supervised, full-day experience to develop and demonstrate competence in teaching English Learners in an approved public school setting. Observation is stressed initially, with responsibility for teaching increasing across the four-week experience.

TELL 477R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	TELL 440; FBI fingerprint background clearance.
Note	Can be taken concurrently with student teaching/internship in a diverse-language setting.
Taught	Fall, Winter, Spring

Course Outcomes

Learning Outcome

Teacher Candidates demonstrate the knowledge and skills to construct, implement, and manage learning environments by using assessments, learning strategies and teaching methods that integrate language skills within content instruction and align with the Utah English Language Proficiency Standards (WIDA 2012) and the Utah Core Curriculum (USOE ESL Standards for Language/Linguistics and Instruction).

Dual-Language Immersion K-12 Student Teaching

Supervised, full-day experience to develop and demonstrate competence in teaching content in a foreign language in an approved public school setting. Observation is stressed initially, with responsibility for teaching increasing across the four-week experience.

TELL 478R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TELL 435 & TELL 445; FBI fingerprint background clearance; Language teaching methods in the target language; Passing OPI at advanced-mid; Praxis II.
Taught	Fall, Winter

Course Outcomes

TELL 478R Course Outcomes

Students who successfully complete this course will:

- Successfully use formative assessment strategies for individual students to determine instructional level in the target language.
- Determine comprehensible instructional input necessary for effective learning in a dual-immersion setting.
- Successfully organize, plan, implement and evaluate a unit of instruction in their target language in a dual-immersion setting. The unit will align with the Utah State common core curriculum, provide accommodations or modification strategies required for individual students being instructed, and evaluate language and academic development.

Top

Assessment of English Language Learners K-12

Major concepts, principles, theories, and research relating to assessing English as a second language and English language learners (ELLs); using appropriate measurement tools in evaluating ELLs' performance in placement, proficiency, and instruction.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Assessment of ELL's

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

Content-Based Instruction for English Language Learners

Major concepts, principles, theories, and research relating to content-based instruction for ELLs; creating learning environments that support academic development of ELLs.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

ELL Content Instruction

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

Culture, Issues, and Policy for Educating English Language Learners

Major concepts, principles, and theories relating to educating English language learners; creating learning environments supporting educational progress and achievement.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Culture, Issues, Policies for ELLs

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

Current Topics in English Language Learning

Topics vary.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

diversity

Candidates will explore special topics in teaching English Language Learners under the direction of a specific instructor.

Family, School, and Community Collaboration for English Language Learners

The role and contribution of families, schools, and communities in developing ELLs' developing knowledge, skills, and dispositions to collaborate in the support and advocacy of ELLs and their families.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

diversity

Candidates will explore special topics in teaching English Language Learners under the direction of a specific instructor.

Family, School, Community Collaboration

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

Literacy Development for English Language Learners

Major concepts, principles, theories, and research relating to developing literacy in English for ELLs in K-12 schools; creating learning environments that promote literacy development.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Literacy for ELLs

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Understanding Second Language Acquisition for K-12 Schools

Major concepts, principles, theories, and research relating to acquisition of English as a second language; creating learning environments supporting the development of English proficiency.

TELL 589R

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

SLA for K-12 schools

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

Introduction to Visual Literacy

Overview of visual communication, with hands-on experience in multimedia design and tools, structured to increase awareness of visual functions and develop beginning proficiency with computer-assisted visual communications.

TMA 100

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Visual Literacy

Students will demonstrate knowledge in visual literacy. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Introduction to the Theatre

Reading, viewing, analyzing, writing about, and interacting with contemporary plays and performances to explore both theatre fundamentals and ways theatre addresses questions and concerns of our time. Lab required.

TMA 101

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter
Offered	Independent Study also.

Course Outcomes

Production Experience

Students will demonstrate a deeper appreciation for each of the participating aspects of theatrical production by researching, collaborating, visualizing, and mounting an original play.

Critical Analysis

Students will demonstrate the tools to critically observe and read theatre within its historical and contemporary contexts through reading, writing, viewing, analyzing, discussing, and actively participating.

Production Service

Students will render a minimum 10 hours of service to a live theatre project during the semester. The service can be in the form of acting, stage-managing, writing, dramaturgy, or working technical on a project.

Introduction to Film

Analytical studies for understanding and appreciating media forms and messages, as well as basic history, theory, and aesthetics. Lab required.

TMA 102

Hours	3.0 Credit, 4.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Intelligent Film Viewing

Students will become active, intelligent film viewers.

Elements of Film

Students will be exposed to the practical elements of film.

Story and Style Strategies

Students will learn about a wide range of stories and stylistic strategies utilized by film artists and institutions.

Film Analysis

Students will become familiar with new and helpful ways of receiving films. They will be able to evaluate and analyze films in a variety of contexts.

Top

New Media Tools

Introductory course to familiarize students with using new media tools.

TMA 104

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Media arts major or minor status.
Taught	Fall, Winter

Course Outcomes

Expanding Knowledge

Students will become familiar with new and helpful ways of receiving films. They will be able to evaluate and analyze films in a variety of contexts.

Story Creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Top

Using Basic Media Tools

Introductory course to familiarize students with basics in camera, lighting, and sound fundamentals.

TMA 105

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	Media arts major or minor status or animation major status; concurrent enrollment in TMA 185.
Taught	Fall, Winter, Spring

Course Outcomes

Expanding Knowledge

Students will become familiar with new and helpful ways of receiving films. They will be able to evaluate and analyze films in a variety of contexts.

Story Creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Top

Media Arts Experience

Practical introductory experience working in media environments (including film and broadcast facilities).

TMA 110

Hours	1.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	Premajor status.
Taught	

Course Outcomes

Media Arts Experience

Students will participate in media arts-based experiences. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Collaboration, Research, and Visualization

Overview and practical applications of principles of collaboration, research, and visualization as essential elements of appreciation and production of new media and media arts projects.

TMA 112

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	TMA 102; Acceptance into media arts program.
Taught	Fall, Winter

Course Outcomes

Story Resources

Students will identify story resources.

Working Stories Together

Students will experiment with the ways that those stories might work together.

Communicating Stories to Audiences

Think about the ways they might communicate those stories visually and aurally to audiences.

Story Processes

Practice processes of conceptualization, creation, and dissemination of story ideas.

Top

Reading and Constructing Narratives

Analyzing basic narrative principles; conceptualizing and writing narratives for media arts.

TMA 114

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Media Arts major or minor status.
Taught	Fall, Winter

Course Outcomes

Storytelling and Narrative Methods

The objective of this class is to explore a range of story types that you should all know about. You have different career aspirations, but practitioners and scholars alike will want to be able to read, comprehend, and adapt/implement this array of narrative methods.

Critical Tools

To equip students with a set of critical tools that will aid them in their production work.

Foundational Content

To establish a solid foundation for students as they prepare to take higher-level Critical Studies courses.

World Construction and Influence

To provide students a stronger understanding of how the world around them is constructed and how they might better participate in, resist, and/or affect that world.

Top

Introduction to Performance Studies

Textual analysis of traditional plays. Introduction to performance studies. Ritual, play, performativity, performing, performance processes, and global and intercultural performance.

TMA 115

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Theatre arts studies major or minor status; or BFA acting major or acting pre-major status; or theatre education major status.
Taught	Fall, Winter

Course Outcomes

Performance Studies Vocabulary

Students will define and provide examples of the vocabulary of Performance Studies.

Performance Studies History

Students will identify many of the key figures and movements that have contributed to the history of Performance Studies.

Performance Analysis

Students will utilize the vocabulary of Performance Studies to analyze various performances in the world around them.

Top

Voice and Diction

Skills involved in producing an effective voice; International Phonetic Alphabet. Lab required.

TMA 121

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	BFA MDT or theatre education major status; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Breathing and Speaking Techniques

Students will practice voice production techniques, including Fitzmaurice and Linklater methods, identifying a "personal voice", integrating voice work, acting technique, emotional dexterity, use of impulses , and self-discovery in performance

IPA and Standard American Stage Dialect

Students will identify and articulate key characteristics of the International Phonetic Alphabet and the Standard American Stage Dialect and integrate the Standard American Stage Dialect into acting performance.

Evaluation and Work Ethic

Students will self-evaluate individual progress and performance, practice effective and supportive vocal coaching and peer evaluation, and apply professional work habits.

Top

Voice Production and Phonetics 1

Foundational exercises to aid in freeing tensions, habits/patterns, and finding the natural state of the voice. Lab required. Introduction to the use of Standard American Stage Dialect with International Phonetic Alphabet. Identification of speech/articulation problems.

TMA 122

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	BFA acting or acting pre-major status; or instructor's consent.
Taught	Fall, Spring

Course Outcomes

Methods of Voice Production

Students will practice voice production techniques, including Fitzmaurice and Linklater methods, identifying a "personal voice", integrating voice work, acting technique, emotional dexterity, use of impulses , and self-discovery in performance.

Deconstruction and Reconstruction

Students will deconstruct areas of physical and emotional tension and apply restructured breathing and speaking techniques.

International Phonetic Alphabet and Standard American Speech

Students will identify and articulate key characteristics of the International Phonetic Alphabet and the Standard American Stage Dialect and integrate the Standard American Stage Dialect into acting performance.

Evaluation and Work Ethic

Students will self-evaluate individual progress and performance, practice effective and supportive vocal coaching and peer evaluation, and apply professional work habits.

Tension and Breathing Techniques

Begin to deconstruct areas of physical and emotional tension and apply restructuring breathing techniques to text

Body Awareness

Have a greater awareness of their own bodies address individual problems which can inhibit sound through specific exercises

Self-Awareness

Gain greater self-awareness and acceptance of their “holistic” self without judgment

Emotional Vulnerability

Increase emotional vulnerability in their acting

Breath Capacity

Increase breath capacity for power and support in monologue work

Spirituality, Voice and Art

Develop a larger concept of spirituality which includes use of their bodies and voices a well as their spirits; emulate gospel principles in their art as well as in their lives

Acting Fundamentals

Fundamental acting skills: exercises in perception, objective/action, thought processes, scoring of scripts. Lab required.

TMA 123

Hours	2.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Compassion and Empathy in Art and Life

Develop a gospel-centered sense of empathy and compassion that will serve as a foundation for the actor on stage and screen, as well as a foundation for living a more Christian life. Acting Fundamentals Students will demonstrate a knowledge of and an ability to integrate fundamental acting principles.

Professional Practice and Behaviors

Students will apply professional work habits of dependability, promptness, cooperation, a sense of ensemble, and the ability to make independent choices.

Acting Analysis

Develop practical acting analysis skills via studio work including objectives, tactics, obstacles, beats, given circumstances.

Critical Observation

Develop critcial observation skills through attendance at theatrical performances, and the reading of selected dramatic texts.

Yoga and Alexander Technique

Techniques of relaxation, breath, focus, and posture to enhance actor's body and voice as a whole integrated tool in performance.

TMA 125

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	BFA acting or acting pre-major status; or instructor's consent.
Taught	Fall, Spring

Course Outcomes

Body Awareness

Students will have a greater awareness of their own body.

Meditation

Students will demonstrate focused control over their own minds and bodies.

Yoga Practice

Students will practice various Yoga positions, which creates greater breath capacity, flexibility, strength and relaxation.

Balance

Students will demonstration a sense of balance and centering.

Beginning Stage Combat

Basic hand-to-hand stage combat instruction. Introduction to tumbling and falls.

TMA 127

Hours	1.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	BFA acting, acting pre-major, or theatre education major status; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Weapons History

Students will describe the historical development of weapons.

Dexterity and Concentration

Students will practice physical dexterity and concentration skills.

Stage Combat Vocabulary and Skill

Students will recognize and use basic stage combat vocabulary.

Combat Choreography

Students will integrate stage combat choreography into text and scene work.

Safety First

Students will practice appropriate safety procedures.

Acting 1: BFA or Pre-BFA

Accelerated fundamental acting skills: exercises in perception, objective/action, thought processes, scoring of scripts. Lab required.

TMA 128

Hours	3.0 Credit, 6.0 Lecture, 1.0 Lab
Prerequisites	BFA MDT or acting pre-major status; or instructor's consent.
Note	Designed specifically for acting pre-major students and first-year music dance theatre students.
Taught	Fall

Course Outcomes

Empathy and Compassion in Work and Life

1. Develop a gospel-centered sense of empathy and compassion that will serve as a foundation for the actors' work
on stage and screen, as well as a foundation for living a more Christian life.

Acting Fundamentals

2. Demonstrate a knowledge of and an ability to integrate fundamental acting principles and analysis skills into performance.

Professional Practice and Behavior

3. Develop professional work habits of dependability, promptness, cooperation, a sense of ensemble, and the ability to make independent choices.

Performance and Text Analysis

5. Develop critical observation skills through attendance at theatrical performances, and the reading of selected dramatic texts.

Top

Theatre Production 1

Introduction to technical support for realized production; production team techniques; production concept; realized production analysis.

TMA 160

Hours	1.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Production Theories

Students will demonstrate an understanding of foundational production theories through oral response.

Production Analysis

Students will analyze the effectiveness of elements of production based on a creative teams' concept, production theories, and design elements.

Production Assignments

Students will receive their hands-on production experiences (TMA 260 and TMA 360).

Top

Practicum: Television

Practicum in beginning television production skills. Topics will vary by semester.

TMA 170R

Hours	0.5 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

BYU Broadcasting Shadowing

Students are expected to gain knowlege and skills by shadowing a Television Professional at BYU Broadcasting.

Top

Practicum: Cinematic Skills

Fundamentals of cinematic skills.

TMA 184R

Hours	0.5 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

LDS Motion Picture Studios Shadowing

Students are expected to gain added knowlege and skills by shadowing a Film Professional at the LDS Motion Pictures Studio.

Basic Media Production

Introduction to basics of film and video production. Includes lecture and practical lab experiences with audio and video.

TMA 185

Hours	3.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	Media arts major/minor status or animation major status; concurrent enrollment in TMA 105.
Taught	Fall, Winter, Spring

Course Outcomes

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Story Creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Production Management: Beginning

Fundamentals of media production; budgeting, scheduling, and management skills.

TMA 187

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Key Crew Responsibilities

Understand the responsibilities of all key crew positions; emphasizing what is taken upon yourself when youagree to fill a certain position on a film, specifically the role of Producer and Unit Production Manager.

Script Scheduling and Scripting

Effectively break down, schedule, and budget a script and who should be involved; where and how to savemoney and where to spend it.

Problem Solving

Problem solve.

Student Opportunities

Grants, scholarships, funds available, student discounts, etc.

Academic Internship

Off-campus experience or internship in theatre and media arts.

TMA 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre students: TMA 115 and application. Media students: TMA 112 and 114 and 185/105 and application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Individual Internship

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Top

Academic Internship: Media

Off-campus experience or internship in media arts.

TMA 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 112 & TMA 114 & TMA 185; Media major status. By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship Outcomes

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Top

Academic Internship: Theatre

Off-campus experience or internship in theatre.

TMA 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 115; Theatre major status. By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship Outcomes

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Dramatic Performance: Antiquity to Renaissance

Civilization from Greek antiquity through Renaissance, primarily from perspective of dramatic literature and performance. Ways in which performance functions within particular socioeconomic, political, religious, and aesthetic perspectives.

TMA 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Historical Context

Students will demonstrate a general working knowledge of major historical periods, philosophical trends, and performance movements and will draw connections between society and performance, through writing and class discussion.

Great Works

Students will analyze great works of literature through multiple perspectives-society, culture, politics, economics, gender roles, religion-to better understand the ways in which dramatic performance functioned in particular times and places.

Self-representation

Students will appraise 1) how we represent the world, others, and ourselves and 2) the consequences of these representations for our families, our communities, and ourselves.

Dramatic Performance: Renaissance to the Present

Civilization from Renaissance through present, primarily from perspective of dramatic literature and performance. Ways in which performance functions within particular socioeconomic, political, religious, and aesthetic perspectives.

TMA 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Summer

Course Outcomes

Students will appraise 1) how we represent the world, others, and ourselves and 2) the consequences of these representations for our families, our communities, and ourselves.

Special Projects 1

Special projects in theatre and media arts.

TMA 215R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Special Projects 1: Media

Special projects in media arts.

TMA 215R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Special Projects 1: Theatre

Special projects in theatre arts.

TMA 215R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Workshop 1: Acting

Experience in production: acting.

TMA 220R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	By audition only.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Performance Project

Students will prepare a role in a mainstage production synthesizing and showcasing the research, creative process, and collaboration of the rehearsal process.

Work Ethic

Students will apply professional work habits of dependability, promptness, cooperation, preparation, and the ability to make independent choices.

Compassion and Empathy in Art and Life

Students will develop a gospel-centered sense of empathy and compassion that will serve as a foundation for the actor on stage and screen, as well as a foundation for living a more Christian life.

Voice Production and Phonetics 2

Advanced exercises to aid in freeing tensions, habits/patterns, and finding the natural state of the voice. Lab required. Continued study and mastery of Standard American Stage Dialect with International Phonetic Alphabet. Identification of speech/articulation problems.

TMA 222

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	TMA 115; BFA acting or acting pre-major status. By audition only.
Taught	Winter, Summer Contact Department

Course Outcomes

Methods of Voice Production and Integration

Students will practice advanced voice production techniques specific (but not limited to) Linklater and Fitzmaurice methods, integrating voice work, acting technique, emotional dexterity, use of impulses, and self-discovery in performance.

Deconstruction & Reconstruction

Students will Deconstruct areas of physical and emotional tension and apply restructured breathing and speaking techniques.

International Phonetic Alphabet and Standard American Speech

Students will continue to identify and articulate key characteristics of the International Phonetic Alphabet and the Standard American stage Dialect and integrate Standard American stage dialect into acting performance.

Evaluation and Work Ethic

Students will Self-Evaluate individual progress and performance, practice effective and supportive peer coaching and evaluation, and apply professional work habits.

Acting Improvisation

Discovery of emotion, thought process, and impulse through improvisation.

TMA 223

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 124; or TMA 228; BFA acting or BFA MDT or acting pre-major status. By audition only.
Taught	Fall

Course Outcomes

Assessment Skills

Students will assess improvised performances.

Analysis Skills

Students will analyze scripted texts for objectives, tactics, obstacles, and relationships and apply that analysis to improvised performances.

Performance and Impulse Skills

Students will demonstrate their acting ability and the ability to suppress reasoned acting choices and embrace their immediate impulses via improvisational exercises and scene work.

Expression

Students will identify and explore different ways of using their body to express emotion and characterization.

Acting for Film and TV

On-camera techniques for features, sitcoms, industrials, and commercials.

TMA 224

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 124; or TMA 228; BFA acting major or acting pre-major status. By audition only.
Taught	Fall, Winter

Course Outcomes

Script Analysis

Students will analyze a script with an eye toward camera acting.

Genre Exploration

Students will practice acting for various genres of electronic media, demonstrating competency in various acting techniques and the ability to take direction.

Self-Evaluation of Acting

Students will evaluate their individual strengths and weaknesses and modify their acting practices based upon that evaluation.

Film Language and Practice

Students will demonstrate familiarity with film language and tools of the trade in a variety of professional situations, including auditioning.

Top

Neutral Mask

Use of masks in teaching specificity of movement, communication, and emotion.

TMA 225

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 125 & TMA 128 & TMA 228; By audition only.
Taught	Winter

Course Outcomes

Storytelling with the Body

Students will utilize their bodies to communicate thought process, relationship, and emotion.

Laban Techniques

Students will employ laban techniques in order to break old acting habits and acquire a larger palate for physical and emotional choices.

Mask Techniques

Students will apply techniques of mask by creating a fully realized character.

Top

Acting Explorations

Exploration into various Western acting techniques, styles, and practices to provide further acting experiences as part of a liberal arts education.

TMA 227

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	TMA 123
Taught	Fall, Winter, Spring

Course Outcomes

Communication Skills

Students will demonstrate communication skills (focus, objectives & actions, active listening, character empathy, kinesthetic energy, etc.) drawn from a variety of acting traditions.

Professionalism

Students will acquire the positive work habits of an actor, i.e.: dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Performance Analysis

Students will demonstrate their ability to analyze a play from an actor's point of view.

Acting 2

Integrating acting skills; building a character through exercises and scene work.

TMA 228

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 123; or TMA 128; BFA acting or BFA MDT or acting pre-major status. By audition only.
Taught	Fall, Winter, Spring

Course Outcomes

Character Analysis

Students will create character analyses which allow them to build the inner life of the character.

Stage Technique

Students will demonstrate basic skills in stage technique (focus, listening, objectives & actions, communication, listening, character empathy, etc.)

Professional Practice and Behavior

Students will acquire the positive work habits of an actor, i.e.: dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Performance Analysis

Students will deomonstrate their ability to analyze a play from an actor's point of view.

Musical Scene Study

In-depth study of two genres of musical theatre; text analysis, research, written assignments.

TMA 229

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 228 & MUSIC 161 & DANCE 140; BFA acting or BFA MDT major status. By audition only.
Taught	Winter

Course Outcomes

Knowledge Acquisition

- Recognize the need for all actors to be able to work in a musical production.
- Recognize the basic construction of a musical.
- Be familiar with the vocal and dance expectations placed on a performer in a musical.
- Understand the collaborative process involved in mounting a musical.
- Understand the demands placed on the performer in a 'golden age' and contemporary musical.

Skill Acquisition

- Text analysis skills that allow the actor to maximize information provided in brief librettos
- Ability to add depth and history to characters that are not multi-layered as written
- Ability to recognize and play the subtext in brief librettos
- Ability to bring honesty to extended realism/dated text often found in musical librettos.
- Ability to service the stereotypes found in musical theatre without pandering to them
- Ability to submerge quickly into the imaginary world of short scenes often found in musicals
- Ability to act IN and ON the text and music in a musical
- Ability to make choices that capture the "essence" of an acting scene in a musical as readily as the music and dance do
- Ability to work quickly with little rehearsal of the "book scenes" of a musical
- Ability to adapt one's "concentration mix" when acting/singing/dancing in a musical.

Behavioral Modification

- Develop professional wok habits including dependability, punctuality, cooperation and dedication.
- Further develop sensory organs that allow one to see, hear, smell, taste and touch more fully
- Further develop the actors' innate sense of following an impulse, objective, honesty, and working through a partner

Script Analysis for Production

Principles of analyzing theatrical scripts for production; fundamental elements of stage directing. Lab required.

TMA 236

Hours	2.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Script Analysis

Students will analyze play scripts in preparation for (theoretical) productions.

Structures and Genres

Students will demonstrate a working knowledge of dramatic structures and genres.

Directing Principles

Students will practice beginning directing principles.

Artistic Praxis

Students will participate in activities that expand their thinking about theatre and its relationship to the world.

Screenwriting 1

Basic narrative and nonfiction (documentary, educational, industrial, multimedia) screenwriting principles through reading, viewing, testing, and completing writing assignments.

TMA 241

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 291 or 292 or concurrent enrollment.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Personal Experience and Point of View

Draw on your own experiences to develop a unique point of view; observe your world to find stories to tell.

Art of Screenwriting

Understand and practice the basic artistic principles of screenwriting, including use of character, structure, images, meaning, theme, etc.

Professional Practices

Learn practices of professionalscreenwriting, including formatting, economy of description, etc.

Constructive Feedback

Give constructive feedback on others' stories; learn to receive constructive feedback on your own work.

Playwriting 1

Basic playwriting principles through reading, completing writing assignments, testing, and writing the first draft of a one-act play.

TMA 251

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 or instructor's consent.
Taught	Fall
Offered	Independent Study also.

Course Outcomes

Writing Processes

Students will begin to develop their own process of writing and tapping inspirational sources for content and subject matter by writing and refining 3 ten-minute plays.

Theatrical Storytelling

Students will become familiar with the elements and principles of theatrical storytelling and character development through reading playwriting textbooks, writing 10-minute plays, and participating in classroom discussions and lectures.

Theatrical Structures

Students will become familiar with multiple theatrical structures and character development through reading playwriting textbooks, writing ten-minute plays, and participating in classroom discussions and lectures.

Script Analysis

Students will begin to develop the skills to accurately and thoughtfully analyze their own theatrical writing and the writing of others through reading playwriting textbooks, and participating in classroom discussions and lectures.

Top

Puppetry

Theories, techniques, and experience constructing and operating puppets for use in performance, recreational, and educational settings.

TMA 252

Hours	2.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	Theatre education major status or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Design

Students will learn to design, build and manipulate the following types of puppets:

- Marionette
- Wannabe Puppet
- Found Object/Recycled Puppet
- Big Mouth (Muppet)
- Parade Puppet

Manipulation and Performance

Students will learn to use puppet strategies and skills in traditional and non-traditional environments including

- Schools
- Churches
- Arts/Community Centers
- Boys/Girls Clubs
- Etc

Ethics

Use puppets to explore social and ethical issues within a targeted community.

Storytelling

Theories, techniques, and practice in the art of constructing and telling stories for use in performance, recreational, and educational settings.

TMA 257

Hours	2.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	Theatre education major status or instructor's consent.
Taught	Winter, Spring

Course Outcomes

Individual Storytelling Skill and Style

Students will develop unique individual skills and styles in storytelling, demonstrating ability to create imagery, use vocal animation and characterization, and produce effective story sequences, supported by skilled delivery (body, voice, use of space).

Writing about Performances

Students will survey and respond to a variety of storytelling styles by observing and writing about live, video and audio performances.

Teaching Strategies

Students will develop teaching strategies and coaching styles designed to support storytellers in targeted communities such as schools, businesses, the entertainment industry, churches, family, etc.

Professional Relationships

Students will foster supportive relationships by connecting to national and local storytellers and organizations.

Top

Theatre Drafting

Basic training in manual and computer-aided drafting as well as visualization for theatre.

TMA 258

Hours	2.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Professional Skills

Student will employ basic hand and computer drafting techniques for applied theoretical in-class projects.

Portfolio

Students will create and assess effective materials for their personal portfolios.

Principles of Design for Stage and Screen

Survey of visual design principles for theatre, film, television and related media; collaborative team techniques; research theory; script analysis; production concept; applied approaches to costume, scenic, lighting, makeup, property and sound design.

TMA 259

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 101 & 236; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Collaboration

Students will demonstrate basic team collaborative techniques through multiple in-class activities.

Research

Students will utilize strong research approaches for solving unique production design challenges.

Script Analysis

Students will analyze production scripts to determine the needs of the design.

Design Skills

Student will employ basic design techniques to realize production designs for theoretical in-class productions.

Top

Theatre Production 2

Beginning practical experience in specialized shops or backstage experience on realized productions.

TMA 260R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160 and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Theatre Collaboration

Students will collaborate in a synthesis of all elements of theatre (playwriting, design and technology, directing, acting, dramaturgy, stage management)

Top

Theatre Production 2: Costumes

Practical experience in the costume shop. Hands-on training for further production experience.

TMA 260R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160 and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Application

Students will engage in theatre production including work in costumes.

Theatre Collaboration

Students will collaborate in a synthesis of all elements of theatre (playwriting, design and technology, directing, acting, dramaturgy, stage management)

Top

Theatre Production 2: Make-up/Props/Lighting

Practical experience in the make-up, props, and lighting labs. Hands-on training for further production experience.

TMA 260R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160 and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Application

Students will engage in theatre production including work in makeup, props, and lighting.

Top

Theatre Production 2: Scene Shop

Practical experience in the scene shop. Hands-on training for further production experience.

TMA 260R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160 and instructor's consent.
Taught	Fall, Winter

Course Outcomes

Technical Experience

Students will participate in a hands-on experience in a technical area such as wardrobe, lighting, sound, or as a member of the backstage crew for a fully realized production.

Top

Theatre Production 2: Theatre Education

Practical experience for secondary education students in the scene shop, costume shop, and lighting lab. Hands-on training for further production experience.

TMA 260R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 276; Theatre education major status. Instructor's consent.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Application

Students will participate in theatre production education.

Writing for Animation

Traditional screenwriting emphasizing stories for the medium of animation.

TMA 261

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Writing for Animation

Students will demonstrate their ability to write for animation. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Principles of Stage Craft

Introduction to basic stage craft techniques: scenic tools and materials; construction, rigging and handling of scenery pieces; basic scenery painting techniques; properties construction and acquisition; related stage safety and maintenance.

TMA 266

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 and 160; or instructor's consent.
Taught	Winter

Course Outcomes

Construction Techniques

Students will demonstrate a foundational knowledge of basic scenery construction techniques.

Construction Practice

Students will participate in realized scenery construction projects.

Principles of Makeup

Introduction to basic makeup application for stage and screen: corrective, glamour and age; stylized approaches; putty construction; crepe hair; wig application techniques.

TMA 267

Hours	2.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Basic Makeup Application

Students will demonstrate basic flat makeup skills through projects in corrective, glamour, and age.

Two Dimensional Techniques

Students will create special makeup projects using putty and crepe hair.

Production Experience

Students will participate in one realized makeup production.

Special Effects

Students will demonstrate the correct application for hair, putty and other special effects products.

Hair Application

Students will perform basic wig applications.

Applied Design

Students will apply previous makeup skills for a stylized project and a complete character, including makeup and hair.

Top

Practicum: Television

Practicum in intermediate television production and direction. Topics will vary depending on specific television programs under production.

TMA 270R

Hours	1.0 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Application

Students will use skills and knowledge in television based in a professional setting.

Top

Beginning Non-Fiction and New Media Storytelling

Principles and techniques of new media production, information gathering, conceptualizing, and storytelling.

TMA 273

Hours	4.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	TMA 105 & TMA 185 & TMA 187; TMA 293 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Story Creation

Students will begin to conceptualize, write, shoot, and edit non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration

Top

Exploration of Teaching Theatre

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

TMA 276

Hours	3.0 Credit, 6.0 Lecture, 3.0 Lab
Prerequisites	TMA 115 & TMA 160; Theatre education major status. FBI fingerprint and background clearance.
Taught	Fall

Course Outcomes

Education Theory and Practice

Understand the theoretical and practical nature of education;

Learning Styles

Evaluate a variety of learning styles;

Personal Teaching Style

Objectively begin to understand their personal teaching style;

Teaching Experience

Gain practical teaching experience;

Teaching Talents

Acquire confidence in their teaching talents;

Lesson Plan Development

Learn to develop specific lesson plans and educational units;

Portfolio Development

Create a professional education portfolio;

Teaching Resources

Learn about teaching resources and information.

New Media Conceptualization

Concepts and techniques for creating new media production.

TMA 277

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Majors/minors: TMA 293, 295. Non-majors: no prerequisites.
Taught	Fall

Course Outcomes

New Media Storytelling

Understand history, theory, principles of new media storytelling

Audience-specific New Media Story

Develop a new media story. focus story to a specific audience.

Incorporating LDS Themes

Incorporate lds themes into story in a way that is authentic and accessible to a modern audience.

Top

Practicum: Cinematic Skills

Intermediate cinematic skills.

TMA 284R

Hours	1.0 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Cinematic Skills

Students will participate in a practicum experience that will develop their cinimatic skills. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Production: Intermediate

Survey and application of the basics of narrative and nonfiction, including 16-mm film. Lecture, discussion, lab, and individual/group experiences and critiques.

TMA 285

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	TMA 105 & TMA 185 & TMA 187; TMA 291 or 292 (or concurrent enrollment).
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Production Decision Making

Make practical production decisions.

Film Project: Pre- through Post- Production

Guide a film from pre-production, through production, to post-production.

Effective Communication

Collaborate effectively with other filmmakers in the creation of a film.

Production Position Experience

Function in at least 15 different positions, including Unit Production Manager, Location Manager, CastingDirector, Director, 1st Assistant Director, 2nd Assistant Director, Cinematographer, 1st Assistant Camera, Gaffer, Grip, Sound Recordist, Script Supervisor, Art Director, Post-production Supervisor, Editor, Foley Artist, Dialogue Editor, Mixer.

Equipment, Tools, and Technology

Use the equipment, tools and technologies associated with each position.

Top

Media Arts History 1

Survey of social, aesthetic, business, and technical dimensions of film and media from 1895 to 1945.

TMA 291

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 112 & TMA 114
Taught	Fall, Spring

Course Outcomes

World Cinema: 1895 to 1946

Familiarize students with the history of world cinema from 1895 to 1946 as informing and informed by culture, social history, emerging technologies and industry adaptations, and trends in visual art.

Top

Media Arts History 2

Survey of social, aesthetic, business, and technical dimensions of film and media from 1946 to present.

TMA 292

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 112 & TMA 114
Taught	Winter, Summer

Course Outcomes

World Cinema: Post-WWII

To familiarize students with the history of post-WWII world cinema as informing and informed by culture, social history, emerging technologies and industry adaptations, and trends in visual art.

History of Documentary and Nonfiction Film

Introduction to and contextualization of documentary film from its inception to present.

TMA 293

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	TMA 112 & TMA 114
Taught	Winter, Spring

Course Outcomes

Non-Fiction Films

To watch a lot of non-fiction films. And enjoy them *perhaps immensely). Meanwhile: to consider the idea of the nonfiction film from its beginning to the present day; to explore a range of approaches, styles, and individuals associated with the documentary idea; to discuss social and ethical issues that emerge around documentary film making; finally to consider how our own lives (as film makers, film critics, and normal people) are informed and shaped by documentary sensibilities. (or ought to be).

History of Animation

Origins and developments of animation internationally to the present, focusing on aesthetic, technical, political, and economic aspects of the medium.

TMA 294

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Media Arts major/minor status or Animation major status or Illustration major status.
Taught	Winter

Course Outcomes

Popular Culture

Students will discuss animation (film, television, Internet) as a microcosm of the larger aesthetic and social developments of popular culture artifacts.

Historical Contexts

Students will examine the relationship of text, subtext, and context in animated fare, as well as animation as it influences and is influenced by art, society, history and technology.

Genre

Students will analyze the significance of generic conventions and themes both diachronically and synchronically.

Secondary Literature

Students will identify and appraise scholarly material related to animation studies.

Top

History of the Moving Image

Continuities and changes in the moving image from 1895 to the present, focusing on implications of emerging and converging media for spectatorship, social and individual identity construction, and potential sharing of spirituality.

TMA 295

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 112 & TMA 114
Taught	Fall, Winter, Spring

Course Outcomes

Moving Images and Their Operations

Examine moving images and their operations as spirituality, art, technology, social force, and economics.

Moving Image Development: 1895 to Present

Explore spectator/user involvement in concrete aspects of the development of the moving image, from 1895 to the present.

Role of Contemporary Media

Thoughtfully consider the roles of contemporary media in shaping and revealing individual and social identities.

Collaboration and Practice

Collaboratively identify and share information on current practices involving media interactivity and its impacts upon the "user."

Top

Academic Internship

Off-campus experience or internship in theatre or media arts.

TMA 299R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre students: TMA 115 and application. Media students: TMA 112 and 114 and 185/105 and application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship Outcomes

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Top

Academic Internship: Media

Off-campus experience or internship in media arts.

TMA 299R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 112 & TMA 114 & TMA 185; By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship Outcomes

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Top

Academic Internship: Theatre

Off-campus experience or internship in theatre arts.

TMA 299R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 115; By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Internship Outcomes

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Top

Music Theatre in Contemporary Culture

Analysis of the form, evolution, and influence of music dance theatre in Western culture.

TMA 300

Hours	1.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 290 & DANCE 243R & DANCE 244R; concurrent enrollment in Dance 300 and Music 300. MDT major status.
Recommended	Concurrent enrollment in Music 328 and Dance 328 and TMA 328.
Taught	Fall

Course Outcomes

MDT Analysis and Communication

Students will be able to analyze, synthesize and articulate the significant facets of music, dance and theatre within the historical context of the musical theatre genre.

History of Music Dance Theatre

Students will be able to analyze, synthesize and articulate the significant facets of music, dance and theatre within the historical context of the musical theatre genre.

Contemporary Performance Practices

Advanced studies in performance theory and practice.

TMA 301

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 & TMA 236
Taught	Fall, Winter

Course Outcomes

Trends in Contemporary Performance

Students will achieve an understanding of the trends in contemporary performance, and analyze what it means in terms of art, representation, and practice.

Performance Analysis

Students will analyze different performances by identifying particular performance styles and wrestling with their implications.

Critical Engagement

Students will critically engage with notions of representation, ethics, and spirituality through dialogue, writing, and performance.

Performance Experience

Students will engage with contemporary performances practices through acting, designing, devising, writing, moving, and more.

Community Formation Processes

Students will engage in the process of community formation through theoretical discussion, collaboration, and service to one another.

Studies in British Theatre Performance

Analytical and theoretical study of theatre history, dramatic literature, and performance from the Renaissance to the present through pre- and post-performance study and discussion of a play presented in London by some of the world's most notable theatre companies.

TMA 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance in the Theatre in London Study Abroad program.
Taught	Spring

Course Outcomes

Interpret Dramatic Texts

Students will increase their capacity to read and interpret dramatic texts

Engage Critically

Students will increase their capacity to engage critically in the relationship between the text and the performance through writing and discussion

Discussion Techniques

Students will increase their capacity to enegage critically with a theatrical performance in terms of aesthetics, values an dpreferences through writing and discussion

Expand Performance Techniques

Students will increase their capacity to experience a range of techniques in performance

Special Projects 2

Intermediate projects in theatre or media arts.

TMA 315R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Story creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Special Projects 2: Assistant Stage Managers

Intermediate projects for assistant stage managers.

TMA 315R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	By application only.
Taught	Spring Contact Department

Course Outcomes

Story creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Special Projects 2: Media

Intermediate projects in media arts.

TMA 315R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Story creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Special Projects 2: Theatre

Intermediate projects in theatre.

TMA 315R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts major status. By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Story creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Special Projects 2: Young Company Teaching Artists

Intermediate projects for Young Company Teaching Artists.

TMA 315R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in TMA 455R. By application only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Story creation

Students will begin to conceptualize, write, shoot, and edit fiction and non-fiction stories.

Text Analysis

Students will engage with texts about storytelling and production processes.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Top

Theatre and Media Arts Instruction

Developing teaching methods and techniques for instruction in theatre and media arts classroom.

TMA 316

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Theatre students: instructor's consent. Media arts students: TMA 102 and 112 and 114 and instructor's consent.
Taught	Fall, Winter

Course Outcomes

Theatre: Effective Teaching Principles

Students will identify and apply the principles of effective teaching.

Theatre: Personal Teaching Philosophy

Studens will develop a personal philosophy for effective teaching.

Top

Theatre and Media Arts Instruction: Media

Developing teaching methods and techniques for instruction in the media arts classroom.

TMA 316

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 102 & TMA 112 & TMA 114; Instructor's consent.
Taught	Winter

Course Outcomes

Theatre: Effective Teaching Principles

Students will identify and apply the principles of effective teaching.

Theatre: Personal Teaching Philosophy

Studens will develop a personal philosophy for effective teaching.

Theatre and Media Arts Instruction: Theatre

Developing teaching methods and techniques for instruction in the theatre classroom.

TMA 316

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall

Course Outcomes

Theatre: Effective Teaching Principles

Students will identify and apply the principles of effective teaching.

Theatre: Personal Teaching Philosophy

Studens will develop a personal philosophy for effective teaching.

Top

Advanced Narrative Production

Preproduction and production of short projects, including digital and 16-mm sound film in narrative form. Discussion, lab, and individual/group experiences and critiques.

TMA 319

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 241 & TMA 285; By application only.
Recommended	TMA 123.
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Refining Media Directing Skills

This course is designed to help students in focusing and refining their media directing skills aswell as applying producorial skills in an advanced production setting. Film and video production can be a costly enterprise. It is hoped that students unable to afford advanced production projects will not be denied the opportunity of developing advanced directing skills. It is further hoped that students hired to direct projects professionally will be able to distinguish themselves as directors by understanding a variety of approaches and the tools available to realize a concept.
The course intends to help students utilize the tools of direction – contrasted with the duties of production – to more clearly understand the director's craft as storyteller.

Voice Over

Studio procedures and protocol, skills involved in producing effective reading choices, creation and cataloging voice over characters for commercial and animation voice overs.

TMA 321

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For acting, advertising, and animation majors, and anyone interested in learning voice over techniques.
Taught	Fall

Course Outcomes

Technique

Students will demonstrate the ability to recognize, create, perform with, and talk about moment-to-moment awareness and authenticity.

Peer Evaluation

Student will evaluate the voice-acting work of their peers.

Fluency

Students will demonstrate fluency in studio protocol and terminology.

Classical Voice

Speech techniques (word stress, inflection, pitch, pace, etc.) applied in the classical play.

TMA 322

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	BFA acting or MDT major status. BFA acting majors: TMA 222 and 228. BFA MDT majors: TMA 121 and 228.
Taught	Fall

Course Outcomes

Voice Exploration

Students will explore a variety of voice pedagogies and practices and apply the techniques to the performance of classical texts.

Performance

Students will produce work at a consistently competitive level of expertise.

Standard American Speech Dialect Mastery

Students will demonstrate mastery of Standard American Speech dialect.

Goal Setting

Students will identify and achieve at least one personal/professional goal that will help them individually clarify and utilize their "personal voice."

Top

Kennedy Center American College Theatre Festival

Coaching students who will participate in the Kennedy Center American College Theatre Festival.

TMA 323R

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	By application only.
Taught	

Course Outcomes

Individual Festival Outcomes

Because of the specific nature of the festival course, students work with his or her advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Acting Classics

Acting skills helpful in classical literature, emphasizing Shakespearean scansion and text analysis.

TMA 324

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 222 & TMA 228; BFA acting major status. By audition only.
Taught	Fall

Course Outcomes

Scansion and Folio Text Analysis

Students will show proficiency with scansion and folio text analysis for Shakespearean text.

Skill Integration in Performance

Students will apply fundamental acting principles and vocal techniques to the performance of assigned scenes and monologues from classical texts.

Play and Character Analysis

Students will demonstrate their ability to analyze a play from an actor's point of view and choose objectives, actions, and obstacles congruent with the historical text.

Positive Work Habits

Students will practice positive work habits of an actor, i.e. dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Top

Stage Combat

Skills of safe hand-to-hand combat, including use of rapier, dagger, and broadsword, for stage and screen.

TMA 325

Hours	2.0 Credit, 4.0 Lecture, 2.0 Lab
Prerequisites	TMA 125 & TMA 127 & TMA 225; BFA acting major status.
Taught	Fall

Course Outcomes

SAFD Techniques

Students will use SAFD techniques to safely and believably perform in a theatrical production using various weapons for period stage plays.

Physical Coordination

Students will demonstrate improved individual physical coordination.

SAFD Technical Terrminology

Students will use various technical terms from a glossary of SAFD Lexicon.

Rapier, Dagger, and Broadsword Techniques

Students will model correct fighting techniques for rapier, rapier and dagger, and broadsword.

Body Awareness and Storytelling

Students will demonstrate a deeper awareness of body and its impact on the storytelling process in scene work.

Top

Divine Comedy

Participation as performers, writers, directors, or crew members of a sketch comedy group.

TMA 326R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	By audition only.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Script, Movement and Score Analysis

The integration and performance of information gathered from careful research and analysis of movement style, script and score.

TMA 328

Hours	1.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TMA 229; BFA MDT major status. Concurrent enrollment in Dance 328 and Music 328.
Recommended	Concurrent enrollment in Music 300 and Dance 300 and TMA 300.
Taught	Fall

Course Outcomes

Landmark Musical Theatre Works Record

Students will have compiled a written record of these 'landmark' musical theatre works as a personal resource guide.

Landmark Productions in American Musical Theatre

Students will be familiar with the selected 'landmark' productions of the American musical theatre.

Performance Improvement

Students will have learned to implement into their musical theatre performance essential acting, vocal, and movement skills as outlined in the evaluation forms.

Performance Ratings

Student performance work will be consistently rated in the 3.5 and above category based on the evaluation form scale.

Integrating Performance Feedback

Students will be able to integrate into their performance detailed feedback from faculty/peers.

Professional Conduct

Students will approach their work in a competent, courteous and professional manner.

Theatre and Film Acting Conservatory

Extensive work on a theatre or film project through semester, culminating in performance of play or preview of film/video.

TMA 329

Hours	3.0 Credit, 6.0 Lecture, Arr Lab
Prerequisites	TMA 122 & TMA 224; BFA acting major status. By audition only.
Taught	Winter even years

Course Outcomes

Script Analysis

Students will analyze a script.

Performance

Students will perform a role in a full-length play production.

Expanding Comfort Zone

Students will demonstrate the ability to work beyond their comfort zone in terms of emotional risks and personal acting habits.

Ensemble Development

Students will collaborate with other actors to develop a trusting ensemble.

Assistant Directing

Assisting directors for departmental productions.

TMA 330R

Hours	2.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	TMA 336; Theatre arts studies major status. Instructor's consent.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Critical Thinking

Students will enlarge their skills of rational thinking, problem solving, and decision-making.

Collaboration and Communication

Students will refine their ability to collaborate, innovate, and communicate effectively.

Production Support

Students will expand their ability to have patience, faith and charity in the process of helping the director realize the production they have conceived.

Top

Directing Narrative Literature

Theory and practice of adapting, directing, and performing nondramatic literature. Readers Theatre.

TMA 331

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	TMA 115; Theatre arts studies major status.
Taught	Fall Contact Department

Course Outcomes

Creative Foundations

Gain experience selecting, adapting and performing various forms of narrative literature and other written materials.

Production Processes

Learn to adapt, direct and perform a style of theatre that offers an alternative to conventional theatre within the boundaries of church, community, educational organizations, and professional theatre.

Collaboration and Character Building

Instill in our hearts and minds the vision and skills necessary to enter a ward or stake community, a classroom, a community theatre or a professional theatre and use narrative performance techniques to bring people to Christ.

Top

Directing Principles and Practices

Theories and processes of taking a scene from script to production. Lab required.

TMA 336

Hours	3.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	TMA 301
Taught	Fall, Spring

Course Outcomes

Directing Process

Students will develop their own method of directing through examining and employing a wide variety of prominent directors' processes.

Communication

Students will enlarge the ability to communicate through theatre by taking scenes from the text to performance through interpretation, analysis, composition, and pre-production work.

Collaboration

Students will practice the collaborative nature of theatre production by working with actors, designers, dramaturgs, and classmates in order to tell compelling stories.

Artistic Decisions

Students will make artistic decisions that are informed by principles of human interaction, the spirit of truth, and the light of Christ.

Top

Screenwriting 2

Intermediate conceptualization, screenwriting, and development for narrative or nonnarrative projects.

TMA 341R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 114 & TMA 241; major status. By application only.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Playwriting 2

Workshop course designed to assist more advanced students in furthering their playwriting skills by writing the first draft of a full-length play.

TMA 351

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 251; or instructor's consent.
Taught	Winter

Course Outcomes

Writing Processes

Students will begin to establish their own process of writing and tapping inspirational sources for content and subject matter by writing and refining 2 one-act plays.

Theatrical Storytelling

Students will begin to master the elements and principles of theatrical storytelling and character development through reading the work of other playwrights, writing one-act plays, and participating in classroom discussions and lectures.

Theatrical Structures

Students will apply appropriate elements of theatrical structures and character development through writing and revising one-act plays, and participating in classroom discussions and lectures.

Script Analysis

Students will demonstrate the skills to accurately and thoughtfully analyze their own theatrical writing and the writing of others by successfully drafting their one-act plays, and participating in classroom discussions and lectures.

Drama in the Elementary Classroom

Varied teaching methodologies for application of drama within the pre-K--6 classroom. Dual emphasis on Utah state elementary drama standards as well as integration with core curricula.

TMA 352

Hours	2.0 Credit, 4.0 Lecture, Arr Lab
Prerequisites	Theatre education major status: TMA 101 or 102; TMA 276. Or early childhood education or elementary education major status. Or instructor's consent.
Taught	Fall, Winter, Spring
Offered	Independent Study also.

Course Outcomes

Dramatic Activities: USOE Curriculum

Successful students in this course will be able to use various dramatic activities to effectively teach across the Utah State Office of Education's (USOE) core and drama curriculum for elementary school grades.

Theatre Presentation and Activities

Successful students in this course will be able to create and perform collaborative theatre presentations, lead creative drama activities and utilize process drama and Mantle of the Expert with confidence and skill.

Top

Theatre Production 3

Advanced practical experience in specialized shops or backstage experience on realized productions.

TMA 360R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160; and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Stage Management Specific

Students will apply the basics of stage management as an assistant stage manager within the domain of an BYU production and distinguish the skills and characteristics necessary to be an effective stage manager and overall successful theatre practitioner.

Theatre Production 3: Costume/Makeup

Advanced practical experience in the costume shop or make-up lab, or backstage experience on realized productions.

TMA 360R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160; and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Advanced Technical Production Experience

Students will participate in a hands-on experience in costuming and makeup for a fully-realized production.

Top

Theatre Production 3: Lights/Sound

Advanced practical experience in the lighting or sound labs, or backstage experience on realized productions.

TMA 360R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160; and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Advanced Technical Production Experience

Students will participate in a hands-on experience in lights and sounds for a fully-realized production.

Theatre Production 3: Scenery/Props

Advanced practical experience in the scenery or prop shops, or backstage experience on realized productions.

TMA 360R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 160; and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Advanced Technical Production Experience

Students will participate in a hands-on experience in a technical area such as wardrobe, ligthing, sound, or as a member of the backstage crew for a fully-realized production.

Top

Theatre Production 3: Stage Management

Advanced practical experience in stage management on realized productions

TMA 360R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Concurrent enrollment in TMA 361 and 369.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Evaluation

Students will evaluate their hands-on experience in writing.

Top

Stage Management 1

Principles and objectives of stage management. Assistant stage managers for departmental productions will be selected from students enrolled in this course.

TMA 361

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Theatre arts studies major or minor status; or theatre education major status: TMA 276. Or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Skill Development

Students will identify the basics of stage management at an introductory level.

Practical Application

Students will perform the responsibilities of an assistant stage manager in pre-production, rehearsals, tech rehearsals, performance/calling a show, and post-production responsibilities within educational, community, and professional settings.

Top

Costume Design

Comprehensive course in costume design for stage and screen; renderings; costume theory; script research; costume paperwork; collaboration techniques; preparation for work as assistant and/or full designer positions in departmental productions.

TMA 362

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 236 and 259 or concurrent enrollment; or instructor's consent.
Recommended	TMA 462 or concurrent enrollment.
Taught	Fall

Course Outcomes

Concept and Approach

Students will apply script analysis and the use of a director's concept in the creation of an effective costume design for a production.

Communication and Collaboration

Students will demonstrate collaborative communication, both orally in a production team and artistically through the costume rendering, as preparation for co-design and full costume design assignments for the Department of Theatre & Media Arts.

Professional Skills

Students will demonstrate professional costume rendering and computer-aided graphic skills in figure proportions, stance and fabric manipulation.

Portfolio

Students will produce effective visual materials for personal portfolios and demonstrate an ability to constructively critique other designers' portfolios.

Top

Scenic Design

Comprehensive course in scenic design for stage and screen: scenic history and theory; renderings and model construction; script research; scenic paperwork; collaboration techniques; preparation for work as assistant and/or full designer positions in departmental productions.

TMA 363

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 236 and 258 and 259 or concurrent enrollment; or instructor's consent.
Recommended	TMA 366R or concurrent enrollment.
Taught	Winter

Course Outcomes

Theatrical Scene Design

Students will demonstrate advanced knowledge of the art and craft of theatrical scenic design and its role within the collaborative process of theatre production.

CONCEPT AND APPROACH

Students will apply script analysis and the use of a director's concept in the development of a scenic environment for a production.

Scene Design Fundamentals

Students will employ advanced techniques of scenic design in theoretical productions in preparation for future projects.

COMMUNICATION AND COLLABORATION

Students will demonstrate collaborative communication, both orally in a production team and artistically through scenic paperwork and renderings as preparation for co-design and full scenic design assignments for the Department of Theatre & Media Arts.

PROFESSIONAL SKILLS

Students will demonstrate professional rendering, drafting, modeling and computer-aided design skills for theoretical stage design projects.

PORTFOLIO

Students will produce effective visual materials for personal portfolios and demonstrate an ability to constructively critique other designers' portfolios.

Lighting Design

Comprehensive course in lighting design for stage: collaboration techniques; lighting theory; instruments and lighting systems; preparation for work as assistant and/or full designer positions in departmental productions.

TMA 364

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 235 and 258 and 259 or concurrent enrollment; or instructor's consent.
Recommended	TMA 366R or concurrent.
Taught	Fall

Course Outcomes

Design Analysis

Students will evaluate multiple University productions for effective use of controllable qualities of light to achieve desired functions of light.

Design Process

Students will practice a process for designing light for live performance.

Design Porfolio

Students will produce effective visual materials for a design portfolio.

Sound Design

Comprehensive course in sound design for stage: sound reinforcement; stage equipment; sound space design; collaboration techniques; preparation for work as assistant and/or full designer positions in departmental productions.

TMA 365

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 259; or instructor's consent.
Taught	Winter

Course Outcomes

CONCEPT AND APPROACH

Students will apply script analysis and the use of a director's concept in the development of an effective sound design for a production.

COMMUNICATION AND COLLABORATION

Students will demonstrate collaborative communication, both orally in a production team and artistically through the sound design and paperwork, in preparation for co-design and full sound design assignments for the Department of Theatre & Media Arts.

PROFESSIONAL SKILLS

Students will demonstrate professional sound design paperwork and use industry standard equipment to develope a sound design.

PORTFOLIO

Students will produce effective materials for personal portfolios and demonstrate an ability to constructively critique other designers' portfolios.

Production Topics

Topical theory and skill training in specialized performance support areas including: scenic art, hand drafting, CAD systems, and production design.

TMA 366R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

PROFESSIONAL SKILLS

Students will demonstrate professional skills in intermediate topic areas as preparation for realized production work.

PORTFOLIO

Students will produce effective materials for personal portfolios and demonstrate an ability to constructively critique other designers' portfolios.

Makeup Design

Comprehensive course in makeup design for stage and screen: prosthetics; advanced makeup effects; makeup theory; script research; collaboration techniques; preparation for work as assistant and/or full designer positions in departmental productions.

TMA 367

Hours	3.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	TMA 259 & TMA 267; or instructor consent.
Taught	Fall, Winter

Course Outcomes

CONCEPT AND APPROACH

Students will apply script analysis and the use of a director's concept in the creation of an effective makeup design for a production.

COMMUNICATION AND COLLABORATION

Students will demonstrate collaborative communication, both orally in a production team and artistically through the makeup and hair renderings, as preparation for co-design and full costume design assignments for the Department of Theatre & Media Arts.

PROFESSIONAL SKILLS

Students will demonstrate professional rendering and computer-aided graphic skills in makeup, hair and prosthetic design and construction.

Design Theory

Students will employ basic design principles in analyzing and creating makeup designs for various projects.

PORTFOLIO

Students will produce effective visual materials for personal portfolios and demonstrate an ability to constructively critique other designers' portfolios.

Top

Scenic Art

Basic approaches to painting and finishing scenic elements. Priming, lay-in, texturing, and effects. Possible work painting on departmental productions.

TMA 368

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 or instructor's consent. Theatre arts studies major or minor status, or theatre education major status.
Taught	Fall

Course Outcomes

Scenic Art

Students will demonstrate knowledge of the basic techniques used in scenic painting.

Scenic Painting Projects

Students will employ scenic painting techniques in theoretical and realized projects, including the use of textures, graining, marbleizing, washes, bricks, stone, drapery, distressing, as well as other methods used by scenic artists.

Top

Design and Technology Projects 1: Assistant Stage Managers

Practical experience working as main season assistant stage managers; related topics.

TMA 369R

Hours	1.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre arts studies major or minor status. Concurrent enrollment in TMA 360 and 361. Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Production Experience

Students will create an element of Theatre in a fully-mounted production.

Top

Design and Technology Projects 1: Production Stage Managers

Practical experience working as main season production stage managers; related topics.

TMA 369R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 236 & TMA 259
Taught	Fall, Winter

Course Outcomes

Technical Management Experience

Students will manage aspects of technical theatre in a BYU mainstage production.

Top

Design and Technology Projects 1: Young Ambassadors

TMA 369R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Production Experience

Students will create an element of Theatre in a fully-mounted production.

Top

Design Practicum

Practical experience working as assistant designers; practicum experience in related performance design and/or technology topic areas.

TMA 369R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 236 and 259 and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Production Experience

Students will create an element of Theatre in a fully-mounted production.

Top

Practicum: Television

Practicum in advanced mentored television productions offered as needed for student projects.

TMA 370R

Hours	1.0 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Production Experience

Students will create an element of Theatre in a fully-mounted production.

Top

Media Collaboration

Experience collaborating with senior capstone media arts experience.

TMA 372R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	TMA 114; major status. By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Crew Experience

This course should give students the opportunities to gain professional film crew experience by working on approved institutional productions.

Theory and Practice of Teaching Drama in Elementary Classrooms

Theory and methods of teaching drama to young people, grades K-6. Emphasis on creative drama, process drama and contemporary trends in drama pedagogy at the elementary level.

TMA 375

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

1.

Successful students in this course will be able to use various dramatic activities to effectively teach drama and non-drama curriculum for grades K-5.

2.

Successful students in this course will be able to create and perform collaborative theatre presentations, lead creative drama activities and utilize process drama with confidence and skill.

3.

Successful students in this course will be able to identify and implement 21st Century Learning Skills in their drama-based curriculum.

Theatre Methods and Instruction: Design

Developing meaningful and engaging instruction for secondary students in theatre; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

TMA 377A

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	TMA 276; Theatre education major or minor status. FBI fingerprint and background clearance.
Taught	Winter

Course Outcomes

Teaching Technical Theatre

Students will build an understanding of the structure and creative processes involved in teaching technical theatre and designing a theatre production.

Teaching Experience

Students will observe and practice teaching technical theatre in a high school setting.

Lesson Plan Development

Students will learn to create and develop specific lesson plans and educational units in technical theatre.

Technical Theatre Resources

Students will identify and evaluate a variety of technical theatre resources including the Internet.

Confidence

Students will gain confidence in their technical abilities.

Top

Theatre Methods and Instruction: Secondary Curriculum

Developing meaningful and engaging instruction for secondary students in theatre; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

TMA 377B

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	TMA 276 & TMA 377A & TMA 377C; TMA 260R (theatre education section). Theatre education major or minor status. FBI fingerprint and background clearance.
Taught	Fall

Course Outcomes

Teaching Competency

Demonstrate competency in theatre content and the pedagogical presentation of theatre concepts.

Literary Principles and Theatre Content

Understand basic literacy principles and apply them to theatre content.

Instructional Design and Delivery

Design and deliver instruction to help young learners develop proficiency in theatre content and critical thinking.

Instructional Design for Young Learners

Design instruction to help young learners develop independent and cooperative life long learning skills.

Diverse Learners

Create a nurturing and motivating learning environment that helps diverse learners succeed.

Lesson Planning and Pedagogical Strategies

Plan lessons, units and courses based on the understanding of theatre content and theatre standards, as well as pedagogical strategies.

Personal Competence

Reflect on their personal competence and the effects of their own instructional choices and

seeks opportunities to improve.

Assessment Development and Use

Create and use assessments to evaluate learners as well as the effectiveness of their own instruction.

Theatre Methods and Instruction: Applied Theatre

Practicing contemporary theatre-in-education (TIE) methods to be employed in practical secondary education settings.

TMA 377C

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	FBI fingerprint and background clearance.
Taught	Fall, Spring

Course Outcomes

TIE and TO Experiences

Successful students in this course will be able to facilitate the devising process for Theatre in Education (TIE) and Theatre of the Oppressed (TO) experiences.

Applied Theatre Performances and Workshops

Successful students in this course will be able to create and facilitate Applied Theatre performances and workshops.

Theatre Methods and Instruction: Elementary Curriculum

Practicing contemporary elementary education methods students will later employ in practical education settings.

TMA 377D

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	TMA 375; Theatre Education major status. FBI fingerprint and background clearance.
Taught	Winter

Course Outcomes

Lesson and Unit Planning

Successful students in TMA 377D will plan lessons and units based on their understanding of state and national K-6 drama and core curriculum standards.

Instructional Design and Delivery

Successful students in TMA 377D will design and deliver instructions to help elementary students develop skills in drama and core curriculum content.

Advocacy in the Arts

Successful students in TMA 377D will demonstrate ability to advocate for the arts in an elementary setting.

Drama and Education Methodologies

Successful students in TMA 377D will reflect on current methodology regarding drama and education.

Personal Competence

Successful students in TMA 377D will reflect on their personal competence, and the effects of their own instructional choices, and seek opportunities for improvement.

Top

New Media Producing and Directing

Pre-production and production of short projects. Discussion and individual/group experiences and critiques.

TMA 378R

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	TMA 277 & TMA 293 & TMA 295; media arts major or minor status.
Taught	Fall, Winter

Course Outcomes

This course is currently on hiatus.

Top

Design Studio

Performance design studio experience in team collaboration, portfolio building, and faculty mentored projects.

TMA 379R

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 236 and 259; one or more of TMA 362, 363, 364, 365, and 367; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Production Skills

Students will identify and apply design step-by-step processes in the realization of in-class projects.

Communication & Collaboration

Students will demonstrate collaborative communication skills as they complete design assignments in a production team environment.

Portfolio

Students will develop their personal portfolio materials and demonstrate an ability to constructively critique other designers' portfolios.

Top

Dramaturgy 1

Research and apply hands-on theatrical skills in four critical studies areas: literary management, production dramaturgy, new play development, educational outreach.

TMA 380

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 115; or instructor's consent.
Taught	Fall

Course Outcomes

Evaluate Dramaturgy

Students will evaluate dramaturgical documents, presentations, and practices.

Collaboration

Students will collaborate with others in dramaturgical exercises.

Do Dramaturgy

Students will generate dramaturgical documents.

Self-Assessment

Students will assess their own dramaturgical work and practices.

Practicum: Cinematic Skills

Advanced cinematic skills.

TMA 384R

Hours	1.0 - 6.0 Credit, Arr Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Practical Cinematic Skills

These courses teach specific cinematic skills regarding Cinematography, Sound, Editing, Visual and Practical Effects, Lighting, Post-Production and more.
Students will learn how to use these tools, in collaboration with other students, to prepare to be competitive in the film industry.

Production Skill Sets

Behind the camera principles & practices including shooting field content & interviews, editing, directing, producing, graphics supervision).

Talent Development

Studying & polishing effective techniques for anchors, reporters, analysts, and play-by-play on-air personalities.

Production Management: Advanced

Overview of techniques for managing large arts projects, involving individual and team projects.

TMA 387

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	TMA 187; media arts major status; media arts foundation courses.
Taught	Fall, Winter

Course Outcomes

Detecting Good Stories

Detect good stories and what to do next.

Producer Role and Responsibilities

Further understand what a producer is, specificall the creative sides to a producer; better understand producing through the research of successful producers past and present.

The Current Film Industry

Find necessary information to keep current on the film industry, including researching and finding box office numbers; individuals active in the industry; how problems are addressed and solved; marketing; etc.

Top

Media Arts Crew

Practical supervised experience in media arts production. Exposure to protocols, as well as organizational and technical aspects.

TMA 388R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	TMA 114 & TMA 185; By application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Crew Experience

This course should give students the opportunities to gain professional film crew experience by working on approved professional productions.

Top

Producing Symposium

Developing organizational skills by workshop meetings with industry professionals, who share their producing experiences, styles, and strategies.

TMA 389R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 114; media arts major status. By application only.
Taught	Fall, Winter

Course Outcomes

This course is currently on hiatus.

Top

Introduction to Media Arts Theory

Identifying and analyzing contemporary film and media theories, with application to specific media texts.

TMA 391

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 291; or TMA 292
Taught	Fall, Spring

Course Outcomes

Personal Framework and Values

Articulate and develop your personal framework of how films make meaning and implement those values in his/her own filmmaking. Film viewing and film analysis.

Canonical Film Theory

Using canonical film theory paradigms and vocabulary, understand and apply multiple ways spectators construct meanings while viewing films.

Film Theory Analysis

Competently analyze key film theories from 1915 to the present and apply them to specific film texts.

Children's Media

Historical and theoretical survey of media for and about children and the literature that informs it; discussions and strategies relating to production, reception, pedagogy, and parenting.

TMA 392

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Children's Media History and Development

To survey the history of children's media, its various forebears (children's literature particularly) and components (film, television, interactive mult-media), and to consider some of the theoretical and practical implications of same; to study both texts and authors, signal moments and broad movements; to attend not only to conventional issues relating to production and criticism, but to also give special consideration to audience: reception, phenomenology, appropriation and the likening of outside material to one's own life and circumstances; to identify techniques by which teachers, parents and children together can make media an abiding part of an abundant relationship.

Top

Intermediate Nonfiction Production

Advanced readings, conceptualization, and practical applications of various nonfiction forms.

TMA 394

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	TMA 273; media arts major or minor status.
Taught	Fall, Winter

Course Outcomes

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Film Project: Pre- through Post- Production

Guide a film from pre-production, through production, to post-production.

Effective Communication

Collaborate effectively with other filmmakers in the creation of a film.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Dramatic Literature 1

Survey of dramatic texts, from ancient Greek to today, through Western literary theories, emphasizing performance.

TMA 395

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 & TMA 201 & TMA 202; Theatre arts studies major or minor status.
Taught	Fall

Course Outcomes

Dramatic Literature

Students will evaluate greats works of dramatic literature from the Greeks to the Present.

Critical Response

Students will create cogent and compelling responses to dramatic literature in a variety of different mediums-oral reports, production reviews, persuasive essays, and critical analyses.

Practicing Theory

Students will develop an ethics of representation through the application of linguistic theory and social theories to great works of dramatic literature.

Theorizing Practice

Students will create socially conscious, ideologically-grounded performances that respond both to their world views and contemporary issues in critical theory.

Dramatic Literature 2

Survey of dramatic texts, from ancient Greek to today, through global literary theories, emphasizing performance.

TMA 396

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 & TMA 201 & TMA 202; Theatre arts studies major or minor status.
Taught	Winter

Course Outcomes

Dramatic Literature

Students will evaluate greats works of dramatic literature from the Greeks to the Present.

Critical Response

Students will create cogent and compelling responses to dramatic literature in a variety of different mediums-oral reports, production reviews, persuasive essays, and critical analyses.

Practicing Theory

Students will develop an ethics of representation through the application of linguistic theory and social theories to great works of dramatic literature.

Theorizing Practice

Students will create socially conscious, ideologically-grounded performances that respond both to their world views and contemporary issues in critical theory.

Dramatic Literature 3

Survey of dramatic texts, from ancient Greek to today, through Western literary theories, emphasizing performance.

TMA 397

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 115 & TMA 201 & TMA 202; Theatre Arts Studies major or minor status.
Taught	Spring

Course Outcomes

Praxis

Students will be introduced to linguistic theory, critical historiography, and ecocriticism, as well as to great works of dramatic literature. They will synthesize these by practicing theory and theorizing practice.

Investigating Representation

Using a variety of methods-reading, writing, discussion, film viewing and performance-students will investigate how the presentation itself represents in each of its manifestations a specific way of thinking about/looking at the material world.

Literary Analysis

Students will analyze 10-15 great works of literature (both plays and philosophical essays) in written responses that are guided by prompts provided by the instructor.

Critical Analysis

Students will compose an 8-10 page critical analysis of a work of theatre, film, or other media, to either enrich or problematize both their reading of the theory and the work.

Theory in Performance

Students will stage a 10-15 minute scene from one of the plays that we will read, in an effort to apply to performance the theories we are learning.

Top

Academic Internship

Off-campus experience or internship in theatre or media arts.

TMA 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre students: TMA 115 and application. Media students: TMA 112 and 114 and 185/105 and application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Outcomes Specific to Experience

Because of the individual nature of the internship course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program level learning outcomes.

Top

Academic Internship: Media

Off-campus experience or internship in media arts.

TMA 399R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 112 & TMA 114 & TMA 185; By application only.

Top

Acting Capstone

Participation in a final acting project on the BYU main-stage season.

TMA 410

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA acting major status. By audition only.
Taught	Fall, Winter

Course Outcomes

BFA Senior Performance Project

Students will prepare a role in a BFA Senior Project synthesizing and showcasing the cumulative knowledge and skill attaind in the BFA program.

Positive Work Habits

Students will practice positive work habits, i.e. dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Compassion and Empathy in Art and Life

Students will develop a gospel-centered sense of empathy and compassion that will serve as a foundation for the actor on stage and screen, as well as a foundation for living a more Christian life.

Teaching Assistant Credit

Credit for teaching assistantships for TMA courses.

TMA 416R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	TMA 316; and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Effective Teaching Principles

Students will understand the prinicples of good teaching.

Pedagogical Philosophies

Students will be introduced to various pedagogical philosophies.

Teaching Skills

Students will develop skills in teaching.

Personal Teaching Style

Students will discover a personal style that will combine solid pedagogical philosophies and skills in teaching.

Teaching Assistant Credit: Media

Credit for teaching assistantships for TMA courses.

TMA 416R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	TMA 316; and instructor's consent
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Effective Teaching Principles

Students will understand the prinicples of good teaching.
Students will be introduced to various pedagogical philosophies.
Students will develop skills in teaching.

Pedagogical Philosophies

Students will be introduced to various pedagogical philosophies.

Teaching Skills

Students will develop skills in teaching.

Top

Teaching Assistant Credit: Theatre

Credit for teaching assistantships for TMA courses.

Course Outcomes

Effective Teaching Principles

Students will understand the prinicples of good teaching.
Students will be introduced to various pedagogical philosophies.
Students will develop skills in teaching.

Pedagogical Philosophies

Students will be introduced to various pedagogical philosophies.

Teaching Skills

Students will develop skills in teaching.

Top

Advanced Narrative Directing A

Working with actors; visual exression; artistic identity. Creating an advanced portfolio. Discussion, lab, individual/group experience and critiques.

TMA 419A

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 319; By application only.
Recommended	TMA 123.
Taught	

Course Outcomes

Narrative Directing

Students will demostrate an advanced knowledge in narrative directing. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Top

Advanced Narrative Directing B

Working with actors; visual expression; artistic identity. Creating an advanced portfolio. Discussion, lab, individual/group experience and critiques.

TMA 419B

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 419A; By application only
Taught	Winter

Course Outcomes

Narrative Directing

Students will demostrate an advanced knowledge in narrative directing. (This course has not been offered for a few years. The department is currently reviewing whether or not to offer it again. In the event that we do decide to begin offering it again, we will determine more specific outcomes at that time.)

Top

Performance Workshop 2

Advanced experience in production: acting.

TMA 420R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	By audition only.
Taught	Fall, Winter, Spring

Course Outcomes

Compassion and Empathy in Art and Life

Students will develop a gospel-centered sense of empathy and compassion that will serve as a foundation for the actor on stage and screen, as well as a foundation for living a more Christian life.

Performance Project

Students will prepare a role in a mainstage production syntehesizing and showcasing the research, creative process, and collaboration of the rehearsal process.

Work Ethic

Students will apply professional work habits of dependability, promptness, cooperation, preparation, and the ability to make independent choices.

The Business: Marketing Yourself as a Performer

Business aspects of the entertainment industry, including telephone interviews with entertainment industry personnel. Required research project.

TMA 421

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 229; BFA acting or BFA MDT major status. Or instructor's consent.
Taught	Winter

Course Outcomes

Career Approaches

Students leave the course with a positive/proactive attitude towards the business aspects of their career.

Employment and Training Resources

Students leave the course with a basic knowledge of the helpful resources available to them for finding employment as an actor and/or continuing their training in the field.

Dialects

Major stage dialects.

TMA 422

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	BFA acting or MDT major status. BFA acting majors: TMA 124 and 222. BFA MDT majors: TMA 121 and 124. By audition only.
Taught	Winter

Course Outcomes

Dialect Study

Students will engage in a process of dialect study for each dialect studied in the course.

International Phonetic Alphabet and Dialect Study

Students will identify and articulate key characteristics of the International Phonetic Alphabet and differentiate key changes in the International Phonetic Alphabet pertaining to each dialect studied.

Skill Integration

Students will integrate dialect, voice, and performance skills.

Evaluation and Work Ethic

Students will peer-evaluate acting and dialect skills, self-evaluate individual progress and performance, apply professional work habits of dependability, promptness, cooperation, preparation, and the ability to make independent choices.

Advanced Kennedy Center American College Theatre Festival

Coaching advanced students who will participate in the Kennedy Center American College Theatre Festival.

TMA 423R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	By application only.
Taught	Winter Term 1

Course Outcomes

Individual Festival Outcomes

Because of the individual nature of the festival course, students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program-level learning outcomes.

Advanced Acting

Scene studies in extended realism. Absurdism, American classics, Shaw, Chekhov, etc.

TMA 424

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 324. BFA acting major status. By audition only.
Taught	Winter

Course Outcomes

Play and Character Analysis

Students will analyze plays and characters from an actor's point of view, and will choose objectives, actions, and obstacles congruent with the historical text of modern classic texts.

Communication and Listening Skills

Students will employ honest communication and listening skills and demonstrate an ability to make choices that challenge individual emotional range.

Positive Work Habits

Students will continue practice the positive work habits of an actor, i.e. dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Top

Character Mask

Use of the body as a primary tool for character and script interpretation.

TMA 425

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	BFA acting major status. By audition only.
Taught	Fall odd years

Course Outcomes

Character in Performance

Students will apply created characterizations to performance texts.

Suzuki Method

Students will apply the Suzuki method, physicalizing a character "from the outside in."

Top

Music Dance Theatre: Senior Performance Project

Participation in an MDT performance group culminating in a showcase for agents and directors in New York City during April.

TMA 426

Hours	1.0 Credit, 0.0 Lecture, 5.0 Lab
Prerequisites	DANCE 361; MDT major status. Concurrent enrollment in Music 426 and Dance 426. By audition only.
Taught	Fall, Winter

Course Outcomes

Professional Feedback

Students will audition for and received feedback from industry professionals in two markets

Audition/Showcase Experience

Students will experience an audition/showcase situation in two entertainment markets

Audition Selections

Students will have several performance-ready audition selections prepared

Promotional Materials

Students will have professionally produced personal promotional material on hand

Master Classes

Students will experience Master Classes from working Broadway professionals

Entertainment Industry Type and Market

Students will recognize their 'type' and marketability within the entertainment industry

Professional Contacts

Students will establish professional contacts that will aid them in making the transitionfrom the academic to the professional world of theatre

Auditions

Auditions, cold reading, resumes, and the business end of acting, music, and dance for the professional performer.

TMA 427

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	BFA acting or MDT major status. BFA acting majors: TMA 229 and 325 and 422 and 424. BFA MDT majors: TMA 229 and 422 and Dance 240. By audition only.
Taught	Fall, Winter

Course Outcomes

Code of Ethics

Students will construct a personal ethical framework and a commitment to ethical conduct as it applies to auditioning in the performance industry.

Auditioning Skills

Students will identify, recognize, and apply effective cold reading, improvisation, prepared auditions and other auditioning skills.

Integration of Acting Skills

Students will apply improved acting skills, voice work, objective, use of impulses, and self-discovery to performance practice in general.

Evaluation and Work Ethic

Students will self-evaluate individual progress and performance, practice effective and supportive peer coaching and peer evaluation techniques, and apply professional work habits of dependability, promptness, cooperation, preparation, and the ability to make independent choices.

Performance: Recital

Thirty- to forty-five minute performance of cuttings from varied genres.

TMA 429

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TMA 229 and 422 and 424. BFA acting major status. By audition only.
Taught	Winter odd years

Course Outcomes

Scene and Monologue Preparation

Students will select and prepare four scenes and four monologues that will be performed for an invited audience at the end of the semester.

Positive Work Habits

Students will practice positive work habits of an actor, i.e. dependability, punctuality, cooperation, dedication, consideration of fellow actors, and ensemble work.

Identify and Expand Capabilities

Students will identify and expand their capabilities as a performer in order to gain flexibility and contrast of voice, movement, energies, dialect, and characterizations in performance.

Theatre Directing Practicum

Directing projects for class critique and public presentation.

TMA 436

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	TMA 336; instructor's consent
Taught	Fall, Winter

Course Outcomes

Production Processes

Strengthen their relationship with the Holy Spirit through preproduction work, rehearsals, and performances.

Collaboration and Communication

Test and refine their abilities to collaborate and communicate in creating theatrical performances.

Character Building

Build and strengthen their characters as they take full responsibility for a fully mounted performance.

Skill Development

Enlarge the intellectual range of their education by developing skills, breadth, and depth in the discipline of directing.

Screenwriting 3

Advanced narrative and/or nonfiction screenwriting principles. Emerging technology.

TMA 441R

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 291 & TMA 341R; or TMA 292 & TMA 341R; major status. By application only.
Taught	Winter, Summer

Course Outcomes

Feature-length Screenplay

To remain conversant with the tools of the screenwriter through lectures, readings, and student writings/readings, and to exercise these skills in the creation of a feature-length screenplay.

Writer/Dramaturg/Actor Workshop

Collaborative workshop developing new stage and screenplays through exercises, discussion, and writing. Scripts selected competitively; public readings at end of course.

TMA 443R

Hours	3.0 Credit, 6.0 Lecture, 1.0 Lab
Prerequisites	TMA 115 and instructor's consent.
Taught	Fall

Course Outcomes

Script Exploration

Students will develop the ability to objectively explore the merits of a new script and to identify strengths and weakness in new scripts.

New Play Development

Students will develop the ability to thoughtfully and accurately express their opinions in constrictive ways and to workshop this feedback appropriately.

New Play Development

Students will develop the ability to evaluate and appropriately apply feedback on their new scripts and to effectively rewrite their new scripts.

Playwriting 3

Workshop course designed to assist more advanced students in furthering their playwriting skills by writing or rewriting a play.

TMA 451R

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 351; Instructor's consent.
Taught	Winter

Course Outcomes

Writing Processes

Students will establish and codify their own process of tapping inspirational sources for the content and subject matter of their plays by writing and refining a full length play.

Theatrical Storytelling

Students demonstrate their mastery of the elements and principles of theatrical storytelling and character development through reading the work of other playwrights, writing a full-length play, and participating in classroom discussions and lectures.

Theatrical Structures

Students will demonstrate their mastery of the elements of theatrical structures and character development through writing and revising a full length play, and participating in classroom discussions and lectures.

Script Analysis

Students will demonstrate the skills to accurately and thoughtfully analyze their own theatrical writing and the writing of others by successfully drafting a full-length play, and participating in classroom discussions and lectures.

Theatre Tour

Theatre for young audiences; touring experience.

TMA 455R

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	By audition only.
Taught	Fall, Winter

Course Outcomes

Performance

Students will expand talents and skills for performing through challenging literature, blocking, choreography, characterization, and emitional commitment.

Alternative Productions

Students will be introduced to alternative aspects of production (through educational outreach programs, service opportunities, and theatre for young audiences).

Children's Literature, Practices, and Assessment

Students will explore children's literature and practices as well as synthesize performative and critical assessments.

Media in the Contemporary Classroom

Developing educational methods and techniques for using media in the specialized media classroom; study of educational models and theories related to historical and emerging media technologies.

TMA 457

Hours	3.0 Credit, 4.0 Lecture, 4.0 Lab
Prerequisites	TMA 276; or ENGL 276R
Taught	Winter

Course Outcomes

Media Education Theory and Practice

Examine media education theories and strategies of media education practice

Media and Media Literacy

Implement media and media literacy strategies into theatre or English curricula

Personal and Global Media Presence

Investigate the mediated world at large, considering personal media presence as well as the global media.

Local and Global Media Programs

Discuss and examine local and global media secondary programs.

Personal Pedagogical Standards

Develop personal pedagogical standards from which they create and teach a media infused curriculum for their future classroom

Media Literacy Education

Media literacy principles and basic film production in the context of educating students and teachers in local K-12 public schools.

TMA 458

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	TMA 102 & TMA 114; or instructor's consent.
Recommended	TMA 291, 292.
Taught	Fall

Course Outcomes

Personal and Global Media Presence

Investigate the mediated world at large, considering personal media presence as well as the global media.

Media Education Theory and Strategy

Examine media education theories and strategies of media education practice.

Local and Global Media Outreach

Discuss and examine local and global media outreach and after school programs.

Personal Pedagogical Standards

Develop personal pedagogical standards from which they create and teach a media curriculum.

Documentaries

Create photo, audio, and video documentaries that demonstrate the principles of community storytelling.

Professional Collaboration

Prepare to interact with elementary and secondary students and teachers who are currently using media in their classroom curricula.

Porfolio

Hands-on training in professional resumes, cover letters, job searches, and portfolio techniques for person-to-person layout, digital presentation, personal website creation and other emerging practices.

TMA 460

Hours	2.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	TMA 115; Theatre Studies major or minor status.
Taught	

Course Outcomes

Personal Development

Students will analyze and develop their own strengths and weaknesses in their areas of expertise.

Portfolio Development

Students will assess and refine their personal portfolio materials and demonstrate an ability to constructively critique other designers' portfolios.

Professional Networking

Students will present their personal work orally, digitally and through a professional web presence.

Stage Management 2

Stage management of BYU productions. Stage managers for departmental productions are enrolled in this course.

TMA 461R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 361; Theatre arts studies major or minor status. Concurrent enrollment in TMA 360 and 369. Instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Skill Development

Students will apply complex skills of stage management in pre-production, rehearsals, tech rehearsals, performance/calling a show, and post-production responsibilities within educational, community, and professional settings.

Collaboration

Students, as stage managers, will collaborate with directors and creative teams as stage managers to create a fully mounted theatre production.

Professional Development

Students will synthesize their stage management responsibilities into a portfolio.

Top

History of Costume

Costume, clothing, and textiles as mediums for understanding stages and states of individuals, families, and societies; apparel diversity and cultural identity.

TMA 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

EFFECTIVE RESEARCH

Students will demonstrate effective research techniques as resource for the production of historic costumes.

APPLIED HISTORY

Students will examine and write about the social, economic and political forces that influence clothing style throughout history.

COMMUNICATION

Students will teach what they have learned and demonstrate how they can serve others through their applied research.

Production Design

Introduction to design for film and television. Techniques, basic design elements, analysis, concept boards, budgets, and visits to film locations.

TMA 463

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	TMA 363 or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Production Design Projects

Students will create realized production designs for TMA student films or KBYU projects.

Production Design Practice

Students will demonstrate a working knowledge of production design for film and television through class assignments, field trips, and guest visits.

Top

Sound Reinforcement

Sound reinforcement theory and practice.

TMA 465

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 365
Taught	Fall

Course Outcomes

Foundational Knowledge

Students will describe key parts to a sound system.

Foundational Knowledge

Students will operate leading sound technology equipment.

Knowledge Application

Students will design and install sound systems to meet performance requirements.

Sound System Evaluation

Students will evaluate sound systems with advanced computer technology and explain the physics behind the analyzed results.

Career Development

Students will demonstrate skills working in groups and with other disciplines in a production scenario.

Top

Makeup Projects

Advanced projects in makeup application.

TMA 467R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Application

Students will use skills and knowledge in makeup projects.

Top

Clothing Understructures

Advanced skills in period clothing understructure construction.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Top

Fabric Dyes and Paints

Advanced skills in fabric manipulation with dyes and paints.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Top

Jewelry, Armor, and Masks

Advanced skills in jewelry, armor, and mask production.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	Fall, Winter

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Top

Millinery and Footwear

Advanced skills in millinery and footwear construction.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Specialty Costumes

Advanced skills in millinery, dyes, footwear, and allied project areas.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

CONSTRUCTION EXPERIENCE

Students will demonstrate skills in costume construction on specialized topics.

ANALYSIS AND PROBLEM SOLVING

Students will apply hands-on costume skills to real-life performance challenges.

PROFESSIONAL PRESENTATION

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Specialty Costumes: Dyes, Paint, and Fabric

Advanced skills in dyes, paint, fabric, and allied project areas.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	Fall odd years

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Specialty Costumes: Millinery and Mask

Advanced skills in millinery, mask, and allied project areas.

TMA 468R

Hours	2.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent only.
Taught	Fall even years

Course Outcomes

Construction Experience

Students will demonstrate skills in costume construction on specialized topics.

Analysis and Problem Solving

Students will apply hands-on costume skills to real-life performance challenges.

Professional Presentation

Students will create professional presentations that document and represent the creative process with a final project that aims past the classroom to a professional audience.

Theatre Management

Basic philosophies of box office, front-of-house, and theatre marketing.

TMA 469

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Skill Development

Students will, recognize the key elements vital to the operation of organizations in various performing arts facilities such as scheduling, budgeting, and marketing.

Practical Application

Students will demonstrate how to operate organizations in various performing arts facilities by creating budgets, marketing campaigns, and grant proposals.

Writer/Director Workshop (Narrative)

Collaborative directing, videotaping, editing, and revising scenes from advanced student scripts.

TMA 473R

Hours	0.5 - 3.0 Credit, 6.0 Lecture, Arr Lab
Prerequisites	Media arts major status. By application only.
Taught	Fall, Winter

Course Outcomes

Personal Vision

Incorporate authentic personal experiences, themes and insights into a capstone film project

Personal Vision

Incorporate authentic personal experiences, themes and insights into a capstone film project.

Directing

Employ skills of film directing to cinematically tell a story and utilize the interpersonal and logistical skills associated with this process

Directing

Employ skills of film directing to cinematically tell a story and utilize the interpersonal and logistical skills associated with this process.

Top

Writer/Director Workshop (Nonfiction)

Collaborative development, revision, and polishing of nonfiction or multimedia projects.

TMA 474R

Hours	0.5 - 3.0 Credit, 9.0 Lecture, Arr Lab
Prerequisites	Media arts major status. By application only.
Taught	Fall, Winter

Course Outcomes

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Story Creation

Students will begin to conceptualize, write, develop, schedule, and budget an advanced non-fiction project.

Story Creation

Students will begin to conceptualize, write, develop, schedule, and budget an advanced non-fiction project.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Research

Students will research a wide range of films and other texts that inform their non-fiction story, both conceptually and stylistically.

Research

Students will research a wide range of films and other texts that inform their non-fiction story, both conceptually and stylistically.

Top

Media Arts Capstone

Final collaborative project for media students. May be narrative, nonfiction, multimedia, writing, or critical studies format.

TMA 475R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Media arts major status. By application only.
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Film Project: Pre- through Post- Production

Guide a film from pre-production, through production, to post-production.

Film Project: Pre- through Post- Production

Guide a film from pre-production, through production, to post-production

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers.

Expanding Knowledge

Students will improve their capacity as story tellers and filmmakers

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Peer Evaluation and Collaboration

Students will present, discuss, analyze, and critique others work in the spirit of peer to peer collaboration.

Production Decision Making

Make practical production decisions.

Production Decision Making

Make practical production decisions

Secondary Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

TMA 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre education major status. Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in TMA 377A, B, C, D.
Taught	Fall, Winter

Course Outcomes

Moral Dimensions of Teaching

Students will be able to understand and apply the Moral Dimensions of Teaching that are:

- Scholarship
- Enculturation for democracy
- Meaningful collaboration
- Access to knowledge
- Academic excellence
- Nurturing pedagogy
- Social competence

Top

Issues in Media Arts

In-depth study of key media arts issues, within context of gospel principles.

TMA 477R

Hours	3.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	TMA 291, 292; media arts major status.
Taught	Fall, Winter

Course Outcomes

New Media and Cultural Development

Explore the ways this significant media arts issue developed over time.

Literature Review

Clarify definitions and practical functioning of significant concepts and paradigms.

Analysis of key texts

Analyze key texts and their relationship to culture in relationship to key concerns.

Nurturing Spirituality

Consider ethical and spiritual implcations of the issue.

Collaboration/Discussion

Collaboratively identify and share information on current relating to the specific issue.

Top

Advanced Design

Advanced techniques in performance design.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Application

Students will use skills and knowledge in advanced design.

Top

Advanced Design: Costumes

Advanced techniques in performance design for costumes.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Application

Students will use skills and knowledge in advanced design of costumes.

Top

Advanced Design: Scenic

Advanced techniques in performance design for scenic.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Professional Skills

Students will appraise and apply advanced design techniques on in-class projects.

Portfolio

Students will generate effective materials for their personal portfolios.

Top

Advanced Design: Lighting

Advanced techniques in performance design for lighting.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Application

Students will use skills and knowledge in advanced design of lighting.

Top

Advanced Design: Makeup

Advanced techniques in performance design for makeup.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Application

Students will use skills and knowledge in advanced design of makeup.

Advanced techniques in performance design for sound

Advanced techniques in performance design for scenic.

TMA 479R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Professional Skills

Students will appraise and apply advanced design techniques on in-class projects.

Portfolio

Students will generate effective materials for their personal portfolios.

Special Topics in Theatre Research

Special topics in focused historical, theoretical, or critical areas of performance research.

TMA 480R

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 395; or TMA 396
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Practical Experience

Students will gain in-depth practical experience in performance/research practices and methodologies not similarly treated elsewhere in the TMA curriculum.

Stay Current in Field

Students will become aware of and explore newly devloping ideas in theatre and performance studies.

Develop Research Strategies

Students will experience how a professional scholar deals with various research-related concerns: archives, methodologies, current academic conversations, etc.

Conduct Original Research

Students will conduct original research under the guidance of an expert in the subject area.

Professional Development

Students will become aware of the various ethical considerations that scholarship demands.

Top

Dramaturgy 2

Develop further research and hands-on theatrical skills in four critical studies areas: literary management, production dramaturgy, new play development, educational outreach.

TMA 483

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	TMA 380
Taught	Winter

Course Outcomes

Evaluate Dramaturgy

Students will evaluate dramaturgical documents, presentations, and practices.

Collaboration

Students will collaborate with others in dramaturgical exercises.

Do Dramaturgy

Students will generate dramaturgical documents.

Self-Assessment

Students will assess their own dramaturgical work and practices.

Top

Production Dramaturgy

Experience as lead dramaturg for main-stage productions; building casebooks and overseeing audience education efforts. Rehearsal and production meeting attendance required.

TMA 485R

Hours	1.0 - 3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	TMA 380 and instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Production Team Support

Students will generate research, conceptual, and textual support as needed and requested by the production team.

Collaborative Experience

Students will collaborate as a member of a production team and will collaborate with other dramaturgs in their production experiences.

Production Casebook Development

Students will process, document, and archive their production dramaturgy experience by creating a production casebook.

Design for Production

Practical experience working as performance designers, or related topics.

TMA 489R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Skills

Students will create fully realized designs for season productions, to include all required supporting materials.

Collaboration

Students will practice advanced collaborative skills through hands-on participation on realized production teams.

Communication

Students will employ effective communication skills through pre-production meetings, shop interactions and post-production reviews.

Portfolio

Students will generate effective materials for their personal portfolios.

Ethics, Aesthetics, and Theology

Analyzing and considering interrelationships of ethical, aesthetic, and theological dimensions of creating and performing media arts and theatre texts.

TMA 491

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 322 and 324 and 325. BFA acting major status.
Taught	Winter

Course Outcomes

Ethical Decision Making

Students will examine, define, and clarify the individual process of ethical decision making.

Moral Reasoning and Judgment

Students will develop improved moral reasoning skills and understand judgment processes for informed ethical decision making in the arts.

Personal Code of Ethics

Students will construct a personal ethical framework and make a commitment to ethical conduct as a professional in theatre and media arts and as a member of social communities.

Latter Day Saint Representation in the Arts

Students will compare and contrast examples of LDS representation in the arts and prepare to discuss their findings with industry professionals in an objective and informed way.

Media Arts Genres

Intensive analysis of a single major traditional media genre (i.e., western, musical, sitcom, or melodrama) with consideration of contextual, subtextual, and textual issues.

TMA 492R

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	TMA 291 or 292; media arts major or minor status.
Taught	Winter

Course Outcomes

Horror Genre Studies

To listen to a ton of lectures, read a ton of stories, and see a ton of films relating to a given genre. We will also learn about some of the social and historical factors that have informed narratives within that genre, as well as some of their many and evolving styles and conventions.

Analysis of a Specific Genre

Explore a specific genre as a microcosm of larger aesthetic and social development of popular cultural artifacts.

Scholarly Genre Study

Identify scholarly material related to genre study.

Context relationships

Consider the relationship of text, subtext, and context in genre film.

Analyze Conventions

Analyze the significance of conventions and themes both diachronically and synchronically.

Transcendence: Religion and Film

Historical, stylistic, and thematic survey of approaches to religious and spiritual subject matter in film.

TMA 494

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	TMA 291; or TMA 292; media arts major or minor status.
Taught	Winter

Course Outcomes

Transcendence in Cinema

Consider the history and nature of transcendence in cinema, it's operation in particular films, and the permutations of relationships between transcendence/spirituality and film.

Personal Paradigm

Explore and further articulate their personal paradigm of transcendence and film especially in its operation in specific cinematic texts.

Criticism Skills

Develop "experimental criticism" skills (as identified by C.S. Lewis), examining a text's impact on spectators and its relationship to the intent of its creators.

Scholarly Literature

Establish familiarity with the some of the scholarly literature on religion/values and film.

Academic Internship

Off-campus experience or internship in theatre or media arts.

TMA 496R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre Arts Studies and BFA Acting students: TMA 115; by application only. Theatre education students: completion of all course work or departmental approval; requires a GPA of 3.0 or higher; requires a C or higher in all education-related and major-required courses. Media students: TMA 112 and 114 and 185/105; by application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Expanding Knowledge

Students will improve their capacity as storytellers and filmmakers by observing and assisting in professional settings outside of BYU.

Effective Communication

Collaborate effectively with other professionals in the creation of a film, television series, or other media production.

Academic Internship: Media

Off-campus experience or internship in media arts.

TMA 496R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 112 & TMA 114 & TMA 185; by application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Expanding Knowledge

Students will improve their capacity as storytellers and filmmakers by observing and assisting in professional settings outside of BYU.

Effective Communication

Collaborate effectively with other professionals in the creation of a film, television series, or other media production.

Top

Academic Internship: Theatre

Off-campus experience or internship in theatre.

TMA 496R

Hours	0.5 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 115; by application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Specific to Internship

Because of the individual nature of the internship course students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program level learning outcomes.

Top

Media as a Mirror of Our Times

Interdisciplinary approach to media texts as aesthetic and historical documents expressing a people, place, and time.

TMA 497

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	TMA 291 or 292; media arts major or minor status.
Taught	Fall

Course Outcomes

Understand and Explore Culture and Social Values

Student will explore media text as cultural and historical documents reflecting social values and anxieties.
Students will utilizeInterdisciplinary approaches to analyze media texts aesthetically as determined by culture.

Top

Special Topics in Media Arts

Consideration of compelling issues in media arts practice, theory, history, and criticism.

TMA 498R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	TMA 291 or 292; media arts major or minor status.
Taught	Fall, Winter

Course Outcomes

Analysis

In-depth textual, contextual, and subtextual analyses of a compelling topic in media arts.

Paradigm Exploration

Paradigmatic exploration of emerging media arts issues in practice, theory and history.

Aesthetic and Historical implications

Thoughtful consideration of aesthetic and historical implications of special media arts topics.

Review of Applicable Texts

Consideration of representative texts of the media arts special topic.

Special Projects 3

Advanced special projects in theatre or media arts.

TMA 515R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts students: by application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Top

Special Projects 3: Media

Advanced special projects in media arts.

TMA 515R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts students: by application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Special Projects 3: Theatre

Advanced special projects in theatre.

TMA 515R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre and media arts students: by application.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Statement on Outcomes

Because this course serves as an umbrella for a number of different sections that provide a variety of learning experiences, the instructor of each section will list at least three (3) course-level learning outcomes for that section that are in line with the applicable program-level learning outcomes.

Directing Workshop

Advanced experience in directing.

TMA 536R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 436; application required.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Production Processes

Students will further strengthen their relationship with the Holy Spirit through preproduction work, rehearsals, and performances.

Skill Development

Students will further enlarge the intellectual range of their education by developing skills, breadth, and depth in the discipline of directing.

Character Building

Students will further build and strengthen their characters as they take full responsibility for a fully mounted performance.

Collaboration and Communication

Students will further test and refine their abilities to collaborate and communicate in creating theatrical performances.

Playwriting 4

Workshop course designed to assist more advanced students in furthering their playwriting skills by writing or rewriting a play.

TMA 551R

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	TMA 451 or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Writing Processes

Students will establish and codify their own process of tapping inspirational sources for the content and subject matter of their plays by writing a full length adaptation of an existing text.

Theatrical Storytelling

Students demonstrate their mastery of the elements and principles of theatrical storytelling and character development through reading the work of other playwrights, writing full length adaptation of an existing text, and participating in classroom discussions and lectures.

Theatrical Structures

Students will demonstrate their mastery of the elements of theatrical structures and character development through full length adaptation of an existing text, and participating in classroom discussions and lectures.

Script Analysis

Students will demonstrate the skills to accurately and thoughtfully analyze their own theatrical writing and the writing of others by full length adaptation of an existing text, and participating in classroom discussions and lectures.

Stage Management Project

Hands-on training for student stage managers through assigned realized productions, including supervision through full positions on stage and media productions. Department-arranged assignments.

TMA 561R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 461R. Theatre arts studies major or minor status. Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Skill Development

Students will apply complex skills of stage management in pre-production, rehearsals, tech rehearsals, performance/calling a show, and post-production responsibilities within educational, community, and professional settings.

Advanced Collaboration

Students, as stage managers, will collaborate with directors and creative teams as stage managers to create a fully mounted and challenging theatre production.

Professional Development

Students will synthesize their stage management responsibilities into a portfolio.

Top

Academic Internship

Off-campus experience or internship in theatre or media arts.

TMA 599R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre students: TMA 115; by application only. Media students: TMA 112 and 114 and 185/105; by application only. TMA graduate student: by application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Experience Outcomes

Because of the individual nature of the internship course students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program level learning outcomes.

Top

Academic Internship: Media

Off-campus experience or internship in media arts.

TMA 599R

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	TMA 112 & TMA 114 & TMA 185; by application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Experience Outcomes

Hours	1.0 - 9.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Theatre students: TMA 115; by application only. TMA graduate student: application only.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individual Experience Outcomes

Because of the individual nature of the internship course students work with their advisor to list at least three (3) objectives they hope to achieve that are in line with the program level learning outcomes.

First-Year Ukrainian

Basic language skills.

UKRAI 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Ukrainian

Basic language skills.

UKRAI 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	UKRAI 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Ukrainian

Grammar review and conversation.

UKRAI 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	UKRAI 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

UKRAI 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	UKRAI 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Ukraine

UKRAI 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Ukrai 201 or foreign residence experience.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	

Course Outcomes

Communication Skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

Top

First-Year Seminar

Aims of a BYU education in a disciplinary context. Topics vary by section and semester.

UNIV 101R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Unexpected Connections: Biology and Letters

The class, team-taught by professors from different disciplines, explores unities between biology and letters. Through reading, writing, and conversation, students gain understanding and skills to engage in real-life questions. Topics are announced in the class schedule.

UNIV 291

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	WRTG 150; or PHIL 150; or ENGL 115; or ELang 150.
Taught	Fall, Winter

Course Outcomes

At the end of UNIV 291, students will be able to:

1. Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the biological sciences and the study of literature and philosophy.
2. Apply sound and original thinking to address issues and problems in the world today. In so doing, demonstrate a mature understanding of the different roles that biology and letters play both in how we conceptualize and contextualize these issues and problems, and also in how we might deepen our understanding of and devise possible solutions for them.
3. Communicate effectively with diverse audiences on current issues and problems we face.
4. Model the disposition and character of an educated and faithful person. That is:
    1. Take seriously both the course topic and your own responsibility to work towards solutions to current issues and problems.
    2. Demonstrate the ability and the humility to learn from and collaborate productively with others who have backgrounds, views, or expertise different from your own.
    3. Articulate thoughtfully how your spiritual faith influences your understanding of and response to questions relevant to biology, literature, and philosophy.
    4. Examine and evaluate the strengths and weaknesses of your own ideas and arguments, as well as those of others, withholding final judgment until sufficient information has been gathered and relevant implications considered. Be able to recognize when that point has been reached.

Unexpected Connections: Physical Science and Culture

The class, team-taught by professors from different disciplines, explores unities between physical science and culture. Through reading, writing, and conversation, students gain understanding and skills to engage real-life questions. Topics are announced in the class schedule.

UNIV 292

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	WRTG 150; or PHIL 150; or ENGL 115; or ELang 150.
Taught	Fall, Winter

Course Outcomes

At the end of UNIV 292, students will be able to:

1. Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the physical sciences and from the perspectives of diverse culture, both Western and non-Western.
2. Apply sound and original thinking to address issues and problems in the world today. In so doing, demonstrate a mature understanding of the ways in which different cultural traditions affect how we conceptualize and contextualize issues and problems, in physical science, and also in how we might deepen our understanding of and devise possible solutions for them.
3. Communicate effectively with diverse audiences on current issues and problems we face.
4. Model the disposition and character of an educated and faithful person. That is:
    1. Take seriously both the course topic and your own responsibility to work towards solutions to current issues and problems.
    2. Demonstrate the ability and the humility to learn from and collaborate productively with others who have backgrounds, views, or expertise different from your own.
    3. Articulate thoughtfully how your spititual faith influences your understanding of and response to questions relevant to biology, literature, and philosophy.
    4. Examine and evaluate the strengths and weaknesses of your own ideas and arguments, as well as those of others, withholding final judgment until sufficient information has been gathered and relevant implications considered. Be able to recognize when that point has been reached.

Unexpected Connections: Social Science and Art

The class, team-taught by professors from different disciplines, explores the unities between social science and art. Through reading, writing, and conversation, students gain understanding and skills to engage real-life questions. Topics are announced in the class schedule.

UNIV 293

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	WRTG 150; or PHIL 150; or ENGL 115; or ELang 150.
Taught	Fall, Winter

Course Outcomes

At the end of UNIV 293, students will be able to:

1. Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the social sciences and the study of the Arts.
2. Apply sound and original thinking to address issues and problems in the world today. In so doing, demonstrate a mature understanding of the different roles that the social sciences and the arts play both in how we conceptualize and contextualize these issues and problems, and also in how we might deepen our understanding of and devise possible solutions for them.
3. Communicate effectively with diverse audiences on current issues and problems we face.
4. Model the disposition and character of an educated and faithful person. That is:
    1. Take seriously both the course topic and your own responsibility to work towards solutions to current issues and problems.
    2. Demonstrate the ability and the humility to learn from and collaborate productively with others who have backgrounds, views, or expertise different from your own.
    3. Articulate thoughtfully how your spiritual faith influences your understanding of and response to questions relevant to biology, literature, and philosophy.
    4. Examine and evaluate the strengths and weaknesses of your own ideas and arguments, as well as those of others, withholding final judgment until sufficient information has been gathered and relevant implications considered. Be able to recognize when that point has been reached.

First-Year Welsh

Pronunciation, grammar fundamentals, and vocabulary building, emphasizing conversation.

WELSH 101

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Welsh

Second-semester speaking, listening, reading, and writing skills.

WELSH 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	WELSH 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Welsh

Intermediate speaking, listening, reading, and writing skills.

WELSH 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	WELSH 102; Welsh 101 and 102; or equivalents.
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Top

Honors Writing and Rhetoric

Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.

WRTG 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fulfills General Education First-Year Writing requirement.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

LO1

Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.

LO2

Critically read texts. This includes:

1. analyzing how a text functions in a specific situation, community, or public;
2. analyzing the nuances of language (diction, figures of speech, tone, etc.);
3. identifying and evaluating the elements of an argument-claims, reasons, assumptions, and ethical, emotional, and logical appeals.

LO3

Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.

LO4

Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.

LO5

Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

Top

Writing and Rhetoric

Top

(WS-Soc) Introduction to Women's Studies

An introduction to the most important issues affecting women's lives and to contributions made by women both nationally and internationally. The course will include historical, sociological, psychological, theological, legal, and/or cultural, and other approaches.

WS 222

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Basic Knowledge of Women's Studies

1. Students will be able to define and use the critical vocabulary basic to the field of women's studies.

Social Structures and Women's Lives

2. Students will be able to recognize the ways in which social structures and issues (government, family, education, health-care institutions, the media, etc.) have affected and affect women's lives.

Women's Contributions and History

3. Students will begin to gain an appreciation of the contributions of women throughout history and internationally.

Research and Communication Skills

4. Students will be able to perform and present research related to women's studies in oral and written formats.

Behavior and Decision-making

5. Students will begin to make informed choices about their own behavior, health, education, and employment decisions based on their understanding of the role gender plays in relationships and society.

Mormon Women's History

The religious, domestic, economic, political, social and familial lives of Latter-day Saint women within the broader contexts of American women's history and Latter-day Saint history. Mormon women's relationship to national trends and their association with national women's organizations.

WS 332

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Recommended	WS 222.
Taught	Winter

Course Outcomes

History and Context

1. Students will demonstrate knowledge of Mormon Women's history-religious, social, political, familial, cultural, intellectual, etc.-within a larger historiographical context.

Research

o 2. Students will be able to grapple with primary and secondary sources in analytical ways and will become skilled at asking important questions and forming and supporting their own conclusions.

Top

Medieval European Women Writers

Readings in European literature by women in the Middle Ages (prior to 1500).

WS 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Key texts

Students will demonstrate familiarity with key texts written by women in medieval Europe

Women writers

Students will explain continuities found in the work of medieval women writers in Europe and later women writers in the West

Early Modern European Women Writers

Readings in European literature by women prior to 1700.

WS 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Textual Analysis

1. Students will be able to read critically women-authored texts and analyze them within their cultural and literary contexts in Early Modern Europe.

Cultural Awareness

2. Students will be able to recognize key female authors from this era, discern between literary genres and produce competent essays based on their critical engagement with course texts.

Appreciation of Women's Writing

3. Students will be able to evaluate, recognize the diversity of and develop an appreciation for "the other voice" in Early Modern Europe.

Modern European Women Writers

Readings in European literature by women after 1700.

WS 352

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Texts and Contexts

1. Students will demonstrate an ability to read critically women-authored literary texts and analyze them within their cultural and literary contexts in Modern Europe.

Research

2. Students will perform scholarly research on a text or texts related to the course and produce competent essays (literary criticism) to communicate that research.

Top

Pan American Women Writers

Readings in literature by women from throughout the Americas from 1600 to the present, with a particular focus on the intersections of gender, race, class, ethnicity, and age.

WS 354

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge of women writers.

Top

Women in Science

Women scientists, their challenges, and their contributions to scientific knowledge in many fields.

WS 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge of women in science

German Women's Literature

WS 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Contributions and Representations of Women

Students will be able to demonstrate a knowledge of women's contributions to and representations in a particular field: literature, politics, psychology, music, or theater, etc.

Critical Thinking

Students will strengthen their critical thinking skills through research, writing, and/or oral presentation opportunities.

Learning Objectives

Upon successful completion of this course, students will have developed:

- practice and proficiency in critical thinking, writing, and reading through written assignments
- knowledge of selected female literary traditions throughout the Americas
- competence in utilizing methods of feminist analysis that emphasize the intersections of race, gender, and class in shaping of women's experience throughout the Americas
- understanding of the role of social diversity in shaping students' own attitudes and values

Top

Women in Scripture

WS 390R

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Contributions and Representations of Women

Students will be able to demonstrate a knowledge of women's contributions to and representations in a particular field: literature, politics, psychology, music, or theater, etc.

Critical Thinking

Students will strengthen their critical thinking skills through research, writing, and/or oral presentation opportunities.

Learning Objectives

Upon successful completion of this course, students will have developed:

- practice and proficiency in critical thinking, writing, and reading through written assignments
- knowledge of selected female literary traditions throughout the Americas
- competence in utilizing methods of feminist analysis that emphasize the intersections of race, gender, and class in shaping of women's experience throughout the Americas
- understanding of the role of social diversity in shaping students' own attitudes and values

Women's Studies Special Topics

Subjects from a variety of disciplines related to women's studies and gender issues.

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Contributions and Representations of Women

Students will be able to demonstrate a knowledge of women's contributions to and representations in a particular field: literature, politics, psychology, music, or theater, etc.

Critical Thinking

Students will strengthen their critical thinking skills through research, writing, and/or oral presentation opportunities.

Women's Wellness

WS 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught

Top

Women's Studies Colloquium

Scholarly findings presented by researchers on topics relating to women's lives and experiences throughout history, across the world, and within ethnic, educational, and economic segments of society.

WS 392R

Hours	1.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	WS 222.
Taught	Fall, Winter

Course Outcomes

Current Research in Women's Studies

1. Students will become aware of some of the latest research in the field of women's studies carried out here at BYU and at other national and international institutions.

Engagement with Women's Studies Scholars

2. Students will engage with the lectures and lecturers by developing questions about the research and responding to each lecture.

Effective Oral Communication

3. Students will be able to formally introduce a speaker at a public event, respond to presentation in that setting, and/or lead a question & answer session.

Effective Written Communication and Analysis

4. Students will be able to evaluate and write clearly about the ideas presented in lectures.

Top

Mentored Study Experience

Readings and on-site research mentored by a faculty advisor and leading to a written product. Intended for students enrolled in a study abroad program or a course that takes place during a travel experience off campus.

WS 395R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	WS 222
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Contributions of Women in the Community

1. Students will demonstrate knowledge of the contributions of women (individually and collectively) to the history, culture, politics, religion, family, etc. of the community where the students are residing during their study experience.

Writing about Women in the Community

2. Students will read, write, and think analytically about the contributions and circumstances of women in that community.

Top

Women's Studies Internship

Credit for work on an international, national, or local internship relating to issues affecting women's lives. Students will submit a written report of their internship experience.

WS 399R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	WS 222
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Application

Students will demonstrate and apply skills an advanced level of knowledge as they work in a professional setting.

Theories of Women's Studies

Introduction to theoretical approaches to women's studies.

WS 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	WS 222 or instructor permission.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Primary Theoretical Texts

1. Students will be able to analyze and demonstrate a sound knowledge of a selection of primary documents related to historical and contemporary theories of women's studies.

Primary Theoretical Texts

1. Students will be able to analyze and demonstrate a sound knowledge of a selection of primary documents related to historical and contemporary theories of women's studies.

Research and Writing Skills

2. Students will be able to produce substantive and competent term papers and projects focused on issues raised by women's studies theories.

Research and Writing Skills

2. Students will be able to produce substantive and competent term papers and projects focused on issues raised by women's studies theories.

Top

Women's Studies Capstone

Synthesis of interdisciplinary studies of women; knowledge and skills necessary for advanced study or work in the field; mentored research and senior capstone project required.

WS 492

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	WS 222 & WS 392R
Taught	Winter

Course Outcomes

Critical Thinking and Research

1. Students will demonstrate their ability to read, write, and think analytically, and to carry out original research through their capstone projects.

Knowledge Application

2. Students will be able to apply their knowledge and experience from interdisciplinary women's studies courses to their mentored research projects.

Mentoring Experience

3. Students will be able to edit and refine their writing and presentation, and expand and develop their research and communication skills with guidance from their faculty mentors.

PhD, University of Utah, 2005

Christian T Asplund

Professor: Fine Arts and Communications > School of Music

BM, Brigham Young University, 1988
MA, Mills College, 1993
DMA, University of Washington, 1998

Christian Vance Sabey

Assistant Professor: Education > Counseling Psychology and Special Education

BS, Brigham Young University, 2002
MS, University of Utah, 2011
PhD, Utah State University, 2015

Christin Laray Porter

Associate Professor: Family Home and Social Sciences > School of Family Life

BS, Brigham Young University, 1990
MS, Purdue University, West Lafayette, 1992
PhD, Purdue University, West Lafayette, 1996

Christine Oakes

Director: OIT Support Services

Christine Tanner

Director: OneStop

Christophe Gerard Giraud-Carrier

Associate Professor: Physical and Mathematical Sciences > Computer Science

BS, Brigham Young University, 1991
MS, Brigham Young University, 1993
PhD, Brigham Young University, 1994

Christopher Andrew Mattson

Associate Professor: Engineering and Technology > Mechanical Engineering

BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, Rensselaer Polytechnic Institute, 2003

Christopher B Kirwan

Assistant Professor: Family Home and Social Sciences > Psychology

BS, University of Utah, 2001
MA, Johns Hopkins University, 2004
PhD, Johns Hopkins University, 2006

Christopher C Lund

Coordinator: David M. Kennedy Center

Professor: Humanities > Spanish and Portuguese

BA, Brigham Young University, 1967
MA, University of Texas, Austin, 1970
PhD, University of Texas, Austin, 1974

Christopher Croft Lynn

Associate Professor: Fine Arts and Communications > Art

BFA, Brigham Young University, 1999
MFA, The Ohio State University, 2002

Christopher Cutri

Associate Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 1995
MFA, Art Center College of Design, 1997

Christopher D Dromey

Professor: Education > Communication Disorders

BA, Brigham Young University, 1985
MA, State University of New York, Buffalo, 1990
PhD, University of Colorado, Boulder, 1995

Christopher E Crowe

Professor: Humanities > English

BA, Brigham Young University, 1976
MEd, Arizona State University, 1980
EdD, Arizona State University, 1986

Christopher E Wilson

Assistant Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 1999
MA, Brigham Young University, 2009
PhD, University of Florida, 2014

Christopher F Karpowitz

Associate Professor: Family Home and Social Sciences > Political Science

BA, Brigham Young University, 1994
MA, Brigham Young University, 1996
Certificate of Graduate Studies, Duke University, 1998
MA, Princeton University, 2000
PhD, Princeton University, 2006

Christopher G Hodson

Associate Professor: Family Home and Social Sciences > History

BA, Utah State University, 1998
MA, Utah State University, 1999
PhD, Northwestern University, 2004

John S Colton

Associate Professor: Physical and Mathematical Sciences > Physics and Astronomy

BS, Brigham Young University, 1994
MS, University of California, Berkeley, 1997
PhD, University of California, Berkeley, 2000

John S Lawson

Professor: Physical and Mathematical Sciences > Statistics

AA, Los Angeles Valley College, 1967
BS, Brigham Young University, 1969
MS, Brigham Young University, 1971
MS, Rutgers College, 1976
PhD, Polytechnic Institute of New York, 1984

John Sai Keong Kauwe

Associate Professor: Life Sciences > Biology

BS, Brigham Young University, 1999
MS, Brigham Young University, 2001
PhD, Washington University, St. Louis, 2007

John Scott Miller

Dean: Humanities

Professor: Humanities > Asian and Near Eastern Languages

BA, Brigham Young University, 1982
MA, Princeton University, 1986
PhD, Princeton University, 1988

John Serge Bennion

Associate Professor: Humanities > English

BA, Utah State University, 1977
MA, Brigham Young University, 1981
PhD, University of Houston, 1989

John Wallace Gardner

Assistant Professor: Management > Marketing and Global Supply Chain

BS, Brigham Young University, 1999
MBA, Brigham Young University, 2003
PhD, Ohio State University, 2012

Jon Kau

Assistant Dean: Student Life

Jon Tyson Hopkins

Professor: Life Sciences > Exercise Sciences

BS, Brigham Young University, 1996
MS, Indiana State University, 1997
PhD, Indiana State University, 2000

Jonathan C Cox

Assistant Clinical Professor: Non-College and Other Units > Counseling and Career Center

BS, Brigham Young University, 2001
PhD, Brigham Young University, 2008

Jonathan D Blotter

Professor: Engineering and Technology > Mechanical Engineering

BS, Utah State University, 1991
MS, Utah State University, 1993
PhD, Virginia Polytechnic Institute and State University, 1996

Jonathan G Sandberg

Professor: Family Home and Social Sciences > School of Family Life

BS, Brigham Young University, 1993
MS, Brigham Young University, 1995
PhD, Kansas State University, 1998

Jonathan Jayme Wisco

Associate Professor: Life Sciences > Physiology and Developmental Biology

BS, University of Washington, 1994
PhD, Boston University School of Medicine, 2003

Jonathan Kimball Alder

Assistant Professor: Life Sciences > Physiology and Developmental Biology

BS, University of Utah, 2001
PhD, Johns Hopkins University, 2007

Jonathan Mark Balzotti

Assistant Professor: Humanities > English

BA, University of Utah, 2007
MA, University of Utah, 2009
PhD, Iowa State University, 2014

Jonathan W Ostenson

Assistant Professor: Humanities > English

BA, Brigham Young University, 1997
MEd, University of Utah, 2005
PhD, University of Utah, 2010

Jonathon T Hill

Assistant Professor: Life Sciences > Physiology and Developmental Biology

BS, Brigham Young University, 2005
PhD, Columbia University, 2010

Joseph A Olsen

Assistant Dean: Family Home and Social Sciences

Associate Professor: Family Home and Social Sciences

MS, University of Utah, 1978
PhD, Brigham Young University, 1994

Joseph Charles McMurray

Assistant Professor: Family Home and Social Sciences > Economics

BA, Brigham Young University, 2004
PhD, University of Rochester, 2010

Top

Joseph Clark Franklin

Assistant Professor: Humanities > English

BA, Brigham Young University, 2007
MA, Ohio University, 2009
PhD, Texas Tech, 2012

Joseph Cory Barker

Teaching Professor: Physical and Mathematical Sciences > Computer Science

BS, Brigham Young University, 1982
PhD, Brigham Young University, 1994

Joseph Devon Ogden

Associate Teaching Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 1995
MBA, Brigham Young University, 2001

Joseph Douglas Parry

Dean: Undergraduate Education

Professor: Humanities > Comparative Arts and Letters

BA, Brigham Young University, 1985
MA, Brigham Young University, 1987
PhD, University of Utah, 1995

Joseph Evan Ostraff

Professor: Fine Arts and Communications > Art

BFA, Brigham Young University, 1982
MFA, University of Washington, 1984

Joseph Jones Ekstrom

Associate Professor: Engineering and Technology > School of Technology

BS, Brigham Young University, 1974
MS, Brigham Young University, 1976
PhD, Brigham Young University, 1992

Joseph Pratt Price

Associate Professor: Family Home and Social Sciences > Economics

BA, Brigham Young University, 2003
PhD, Cornell University, 2007

Joseph Q Monson

Associate Professor: Family Home and Social Sciences > Political Science

BA, Brigham Young University, 1996
MA, Brigham Young University, 1996
MA, Ohio State University, 1999
PhD, Ohio State University, 2004

Joseph Ward Moody

Professor: Physical and Mathematical Sciences > Physics and Astronomy

BS, Brigham Young University, 1980
MS, University of Michigan, Ann Arbor, 1984
PhD, University of Michigan, Ann Arbor, 1986

Joseph William Myrer

Professor: Life Sciences > Exercise Sciences

BPE, University of Calgary, Canada, 1974
MA, University of Windsor, 1977
PhD, Brigham Young University, 1983

Joshua A Udall

Associate Professor: Life Sciences > Plant and Wildlife Sciences

BS, Brigham Young University, 1995
MS, University of Idaho, 1997
PhD, University of Wisconsin, 2003

Joshua Andersen

Assistant Professor: Physical and Mathematical Sciences > Chemistry and Biochemistry

BS, Brigham Young University, 2001
DEGREES:PhD, University of Utah, 2006

Joshua H West

Assistant Professor: Life Sciences > Health Science

BA, Utah State University, 2005
MPH, San Diego State University, 2005
PhD, University of California, San Diego/San Diego State University, 2008

Joshua L Price

Assistant Professor: Physical and Mathematical Sciences > Chemistry and Biochemistry

BS, Brigham Young University, 2003
PhD, University of Wisconsin, 2008

Joshua R Gubler

Assistant Professor: Family Home and Social Sciences > Political Science

BA, Brigham Young University, 2002
MA, University of Utah, 2005
PhD, University of Michigan, 2011

Joyce Adams

Associate Teaching Professor: Family Home and Social Sciences

BA, Brigham Young University, 1992
Masters, Brigham Young University, 1995
PhD, Brigham Young University, 2006

Juan Alberto Arroyo

Assistant Professor: Life Sciences > Physiology and Developmental Biology

BS, University of Puerto Rico, 1991
PhD, Southern Illinois University School of Medicine, 2003

Julee Braithwaite

Director: Fine Arts and Communications

Julia D Ashworth

Assistant Teaching Professor: Fine Arts and Communications > Theatre and Media Arts

BA, Brigham Young University, 1996
MA, New York University, 2002

Julianne Holt-Lunstad

Associate Professor: Family Home and Social Sciences > Psychology

BS, Brigham Young University, 1994
MS, Brigham Young University, 1998
PhD, University of Utah, 2001

Julianne House Grose

Assistant Professor: Life Sciences > Microbiology and Molecular Biology

BS, University of Utah, 1994
PhD, University of Utah, 2003

Julie Ann Damron

Assistant Professor: Humanities > Asian and Near Eastern Languages

BA, Brigham Young University, 1991
MAT, School of International Training, 1993
PhD, Purdue University, 2000

Julie Crockett

Associate Professor: Engineering and Technology > Mechanical Engineering

BS, University of Denver, 2002
MS, University of California, San Diego, 2004
PhD, University of California, San Diego, 2007

Julie Dawn Melville Hite

Professor: Education > Educational Leadership and Foundations

BS, Brigham Young University, 1980
MOB, Brigham Young University, 1995
PhD, University of Utah, 1999

Julie Elizabeth Preece

Clinical Professor: Non-College and Other Units > Counseling and Career Center

BS, Brigham Young University, 1985
MEd, Brigham Young University, 1988
PhD, Brigham Young University, 1994

Julie L Franklin

Director: Residence Life

Julie Lyn Valentine

Assistant Teaching Professor: Nursing > Nursing Program

BSN, University of Arizona, 1984
MS, University of Utah, 2009

Justin B Kunz

Assistant Professor: Fine Arts and Communications > Design

BFA, Brigham Young University, 1999
MFA, Laguna College of Art and Design, 2011

Justin B Peatross

Professor: Physical and Mathematical Sciences > Physics and Astronomy

BS, Brigham Young University, 1988
MS, University of Rochester, 1990
PhD, University of Rochester, 1993

Justin Earl Weidman

Assistant Professor: Engineering and Technology > School of Technology

MS, Brigham Young University, 2010
PhD, Virginia Tech, 2012

Justin Fred White

Associate Professor: Humanities > Philosophy

BA, Brigham Young University, 2008
MA, University of California, Riverside, 2012
PhD, University of California, Riverside, 2015

K Codell Carter

Professor: Humanities > Philosophy

BS, University of Utah, 1963
MA, University of Utah, 1964
PhD, Cornell University, 1968

K Richard Young

Professor: Education > Counseling Psychology and Special Education

BS, University of Utah, 1969
MS, University of Utah, 1971
PhD, University of Utah, 1973

Kara J Stowers

Assistant Professor: Physical and Mathematical Sciences > Chemistry and Biochemistry

BS, University of Utah, 2006
BS, University of Utah, 2006
PhD, University of Michigan, 2012

Karen E Carter

Associate Professor: Family Home and Social Sciences > History

BA, Brigham Young University, 1995
MA, Brigham Young Univeristy, 2000
PhD, Georgetown University, 2006

Karen Elaine Auman

Assistant Professor: Family Home and Social Sciences > History

BA, Brigham Young University, 1985
MA, San Jose State University, 2005
PhD, New York University, 2013

Karen Evans

Director: University Advisement Center

Karen Huesmann Delacruz

Assistant Teaching Professor: Nursing > Nursing Program

BS, California State University, 1987
MS, University of Phoenix, 2001

Karen J Whitt

Assistant Professor: Nursing > Nursing Program

AS, Brigham Young University, 1984
BS, George Mason University, 2001
MS, George Mason University, 2002
PhD, George Mason University, 2008

Karen Miller Lundberg

Associate Teaching Professor: Nursing > Nursing Program

AS, Brigham Young University, 1979
BS, University of Utah, 2005
MS, University of Utah, 2007

Karine Marguerite Chesnel

Assistant Professor: Physical and Mathematical Sciences > Physics and Astronomy

MS, Ecole Normale Superieure, 1999
PhD, Joseph Fourier University, France, 2002

Karl Brandon Diether

Associate Professor: Management > Finance

BA, Brigham Young University, 1998
PhD, University of Chicago, 2004

Karl F Warnick

Professor: Engineering and Technology > Electrical and Computer Engineering

BS, Brigham Young University, 1994
PhD, Brigham Young University, 1997

Karlen E Luthy

Associate Professor: Nursing > Nursing Program

ADN, Utah Valley State College, 2000
BS, Brigham Young University, 2003
MS, Brigham Young University, 2005
DNP, Rush University, 2008

Kate Ruth Johnson

Assistant Professor: Physical and Mathematical Sciences > Mathematics Education

BA, Miami University, Ohio, 2002
MEd, University of Pittsburgh, 2004
PhD, Michigan State University, 2013

Top

Katharina Anne Paxman

Assistant Professor: Humanities > Philosophy

BA, University of Victoria, 2002
MA, Dalhousie University Halifax, Nova Scotia, 2005
Ph.D., University of Western Ontario, 2010

PD, Johns Hopkins University, 1987

Kendra Maria Hall-Kenyon

Associate Professor: Education > Teacher Education

BS, Brigham Young University, 1996
MA, Columbia University, 2002
PhD, Columbia University, 2002

Kening Lu

Professor: Physical and Mathematical Sciences > Mathematics

BS, Sichuan University, China, 1982
MS, Sichuan University, China, 1985
PhD, Michigan State University, 1988

Kenneth A Christensen

Associate Professor: Physical and Mathematical Sciences > Chemistry and Biochemistry

BS, Brigham Young University, 1992
PhD, University of Michigan, 1997

Kenneth Dean Plowman

Associate Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 1977
MPA, George Washington University, 1981
PhD, University of Maryland, 1995

Kenneth J Rodham

Teaching Professor: Physical and Mathematical Sciences > Computer Science

BS, Brigham Young University, 1990
MS, Brigham Young University, 1992
PhD, Brigham Young University, 1995

Kenneth L Kuttler

Professor: Physical and Mathematical Sciences > Mathematics

BS, Brigham Young University, 1974
MS, Brigham Young University, 1976
PhD, University of Texas, Austin, 1981

Kenneth Lowell Alford

Professor: Religious Education > Church History and Doctrine

BA, Brigham Young University, 1979
MA, University of Southern California, 1982
MA, University of Illinois Urbana-Champaign, 1988
PhD, George Mason University, 2000

Kent D Blad

Associate Dean: Nursing

Teaching Professor: Nursing > Nursing Program

AA, Snow College, 1983
BS, University of Utah, 1987
MS, Brigham Young University, 1999
DNP, University of Utah, 2010

Kent Eldon Seamons

Associate Professor: Physical and Mathematical Sciences > Computer Science

BS, Brigham Young University, 1986
PhD, University of Illinois, Urbana, 1996

Kent L Gee

Associate Professor: Physical and Mathematical Sciences > Physics and Astronomy

BS, Brigham Young University, 2001
MS, Brigham Young University, 2002
PhD, Pennsylvania State University, 2005

Kent P Jackson

Professor: Religious Education > Ancient Scripture

BA, Brigham Young University, 1974
MA, University of Michigan, 1976
PhD, University of Michigan, 1980

Kent Richmond Brooks

Associate Teaching Professor: Religious Education > Church History and Doctrine

BS, Brigham Young University, 1979
MEd, Brigham Young University, 1981
PhD, Brigham Young University, 1988

Kerk Layne Phillips

Associate Professor: Family Home and Social Sciences > Economics

BS, Brigham Young University, 1986
MA, University of Rochester, 1990
PhD, University of Rochester, 1991

Kerry David Soper

Associate Professor: Humanities > Comparative Arts and Letters

BFA, Utah State University, 1992
MA, Emory University, 1994
PhD, Emory University, 1998

Kerry M Muhlestein

Associate Professor: Religious Education > Ancient Scripture

BS, Brigham Young University, 1994
MA, Brigham Young University, 1997
PhD, University of California, Los Angeles, 2003

Kerry Michael Hull

Professor: Religious Education > Ancient Scripture

BA, Utah State University
MS, Georgetown University
PhD, The University of Texas at Austin

Keven A Prusak

Associate Professor: Education > Teacher Education

BS, Brigham Young University, 1986
MEd, Utah State University, 1990
PhD, Arizona State University, 2000

Kevin Burke Tew

Assistant Professor: Engineering and Technology > School of Technology

BS, Brigham Young University, 2001
DEGREES:MS, Brigham Young University, 2006
PhD, University of Utah, 2013

Kevin D Stocks

Professor: Management > School of Accountancy

BS, Brigham Young University, 1978
MAcc, Brigham Young University, 1978
PhD, Oklahoma State University, 1981

Kevin Darrell Seppi

Associate Professor: Physical and Mathematical Sciences > Computer Science

BS, Brigham Young University, 1982
MS, Santa Clara University, 1987
PhD, University of Texas, Austin, 1990

Kevin K McEwan

Assistant Teaching Professor: Nursing > Nursing Program

BSN, Boise State University, 1993
MSN, University of Phoenix, 1998

Associate Teaching Professor: Fine Arts and Communications > School of Communications

BFA, Art Center Collage of Design, Pasadena, 1977

Linda Ann Reynolds

Professor: Fine Arts and Communications > Design

AA, Ricks College, 1977
BA, Brigham Young University, 1981
MFA, University of Utah, 1993

Linda Jordan Mabey

Assistant Teaching Professor: Nursing > Nursing Program

BSN, Idaho State University, 1978
MS, University of Utah, 1988
DNP, University of Utah, 2009

Lindsay Adamson Livingston

Assistant Professor: Fine Arts and Communications > Theatre and Media Arts

BA, Brigham Young University, 2003
MA, University of California, Los Angeles, 2004
PhD, The Graduate Center, the City University of New York, 2013

Lisa Michelle Leavitt

Associate Clinical Professor: Non-College and Other Units > Counseling and Career Center

BS, University of Utah, 1999
MS, Brigham Young University, 2001
PhD, Brigham Young University, 2005

Lloyd David Newell

Professor: Religious Education > Church History and Doctrine

BA, Brigham Young University, 1980
MA, Brigham Young University, 1985
PhD, Brigham Young University, 1999

Loreen Allphin Flinders

Associate Professor: Life Sciences > Plant and Wildlife Sciences

BS, Brigham Young University, 1991
MS, Brigham Young University, 1992
PhD, University of Utah, 1996

Loren Dean Marks

Professor: Family Home and Social Sciences > School of Family Life

BS, Brigham Young University, 1997
MS, Brigham Young University, 1999
PhD, University of Delaware, 2002

Lori L Seely

Director: Family Home and Social Sciences

Lori L Wadsworth

Associate Professor: Management > Public Management

AS, West Valley College, 1980
BS, Brigham Young University, 1982
MPA, Brigham Young University, 1995
PhD, University of Utah, 2003

Loy Clark Callahan

Associate Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 1995
MA, West Texas A&M University, 1995
PhD, University of Oklahoma, 2002

Luke Benjamin Howard

Associate Professor: Fine Arts and Communications > School of Music

BMusEd, Sydney Conservatorium of Music, 1990
MA, Brigham Young University, 1994
PhD, University of Michigan, 1997

Lynn E Henrichsen

Professor: Humanities > Linguistics and English Language

BA, Brigham Young University, 1973
TESL Graduate Certificate, Brigham Young University, 1974
MA, Brigham Young University, 1975
EdD, University of Hawaii, Manoa, 1987

Lynne Ann Bennion

Clinical Professor: Non-College and Other Units > Counseling and Career Center

BS, Brigham Young University, 1981
MS, Purdue University, 1983
PhD, Purdue University, 1986

Lynnette Bloom Erickson

Associate Dean: Education

Associate Professor: Education > Teacher Education

BA, Brigham Young University, 1978
MA, Brigham Young University, 1987
PhD, Arizona State University, 1996

M Gerald Bradford

Director: Neal A. Maxwell Institute for Religious Scholarship

M Gerald Bradford

Director: Neal A. Maxwell Institute for Religious Scholarship

Nathan D Powers

Assistant Teaching Professor: Physical and Mathematical Sciences > Physics and Astronomy

BS, Brigham Young University, 2006
MS, University of Nebraska at Lincoln, 2009
PhD, University of Nebraska at Lincoln, 2014

Nathan Terry Balser

Assistant Professor: Fine Arts and Communications > Dance

BS, Brigham Young University, 1998
MFA, University of Utah, 2000

Nathaniel Todd Kramer

Associate Professor: Humanities > Comparative Arts and Letters

PhD, University of California, Los Angeles, 2005

Neal Cox

Associate Dean: Student Life

Neal Kepler Bangerter

Associate Professor: Engineering and Technology > Electrical and Computer Engineering

BS, University of California, Berkeley, 1995
MS, Stanford University, 2001
PhD, Stanford University, 2004

Ned C Hill

Professor: Management > Finance

BS, University of Utah, 1969
MS, Cornell University, 1971
PhD, Cornell University, 1976

Neil C Hansen

Associate Professor: Life Sciences > Plant and Wildlife Sciences

BS, Brigham Young University, 1992
MS, Brigham Young University, 1994
PhD, University of Minnesota, 1998

Top

Neil Edward Peterson

Assistant Professor: Nursing > Nursing Program

BS, Brigham Young University, 2007
MSN, University of Virginia, 2011
Post-Master's, University of Virginia, 2013
PhD, University of Virginia, 2014

Neil Longley York

Professor: Family Home and Social Sciences > History

BA, Brigham Young University, 1973
MA, Brigham Young University, 1975
PhD, University of California, Santa Barbara, 1978

Neil R Lundberg

Chair: Recreation Management

Associate Professor: Management > Recreation Management

BS, Brigham Young University, 1995
MS, Brigham Young University, 1997
PhD, Indiana University, 2006

Neil S Thornock

Associate Professor: Fine Arts and Communications > School of Music

BM, Brigham Young University, 2001
MM, Brigham Young University, 2003
DM, Indiana University, 2006

Newel Anthony Brown

Associate Professor: Humanities > German and Russian

BA, Southern Methodist University, 1998
MA, Bryn Mawr College, 2002
PhD, Bryn Mawr College, 2004

Nicholas A Mason

Coordinator: David M. Kennedy Center

Professor: Humanities > English

BA, Brigham Young University, 1993
MA, Brigham Young University, 1995
PhD, State University of New York, Stony Brook, 1999

Nicholas J Frederick

Assistant Professor: Religious Education > Ancient Scripture

BA, Brigham Young University, 2004
MA, Brigham Young University, 2006
PhD, Claremont University, 2013

Nicolaas Unlandt

Associate Professor: Humanities > French and Italian

BA, University of Amsterdam, 1983
MA, University of Amsterdam, 1985
PhD, University of Amsterdam, 1993

Nieves Perez Knapp

Associate Teaching Professor: Humanities > Spanish and Portuguese

BA, University of Oviedo, Spain, 1986
BA, University of Oviedo, Spain, 1990
MA, Brigham Young University, 1995
PhD, University of Oviedo, Spain, 2003

Nile W Hatch

Associate Professor: Management > Marketing and Global Supply Chain

BS, Brigham Young University, 1988
MS, Brigham Young University, 1989
PhD, University of California, Berkeley, 1995

Niwako Yamawaki

Associate Professor: Family Home and Social Sciences > Psychology

BS, University of Utah, 1995
MS, University of Utah, 1998
PhD, University of Utah, 2002

Norman B Finlinson

Executive Director: Student Academic and Advisement Services

Norman L Jones

Professor: Engineering and Technology > Civil and Environmental Engineering

BS, Brigham Young University, 1986
MS, University of Texas, Austin, 1988
PhD, University of Texas, Austin, 1990

Norman Wall Evans

Director: English Language Center

Associate Professor: Humanities > Linguistics and English Language

BA, Brigham Young University, 1979
MA, Brigham Young University, 1981
EdD, University of Southern California, 2001

Ole M Smith

Olga Bogach Stoddard

Assistant Professor: Family Home and Social Sciences > Economics

BS, Brigham Young University- Hawaii, 2005
MA, University of Hawaii, 2008
PhD, University of Hawaii, 2012

Oliver Kent Johnson

Assistant Professor: Engineering and Technology > Mechanical Engineering

BS, Brigham Young University, 2010
PhD, Massachusetts Institute of Technology, 2015

Orlando Alba

Professor: Humanities > Spanish and Portuguese

BA, Catolica Madre y Maestra, 1972
MA, University of Puerto Rico, 1978
PhD, Univ. Nacional de Educacion a Distancia, Madrid, Spain, 1988

Oscar A Pike

Professor: Life Sciences > Nutrition Dietetics and Food Science

BS, Brigham Young University, 1980
MS, Brigham Young University, 1982
PhD, Purdue University, 1986

P Scott Richards

Professor: Education > Counseling Psychology and Special Education

BS, Brigham Young University, 1981
MA, Brigham Young University, 1983
PhD, University of Minnesota, 1988

Pace Peterson Nielsen

Assistant Professor: Physical and Mathematical Sciences > Mathematics

BS, Brigham Young University, 2001
PhD, University of California, Berkeley, 2006

Pam Williamson

Director: Engineering and Technology

Pamela Jo Brubaker

Assistant Professor: Fine Arts and Communications > School of Communications

BA, Brigham Young University, 2000
MA, Brigham Young University, 2002
PhD, The Pennsylvania State University, 2012

Pamela Rust Hallam

Associate Professor: Education > Educational Leadership and Foundations

BS, Brigham Young University, 1979
MS, Brigham Young University, 1990
EdD, University of Utah, 2006

Pamela S Musil

Professor: Fine Arts and Communications > Dance

BS, Brigham Young University, 1978
MA, Brigham Young University, 1985

Parley Cougar Hall

Assistant Professor: Life Sciences > Health Science

BS, Brigham Young University, 1998
MS, University of Utah, 2003
PhD, University of Utah, 2009

Parris K Egbert

Professor: Physical and Mathematical Sciences > Computer Science

BS, Utah State University, 1986
MS, University of Illinois, Urbana, 1990
PhD, University of Illinois, Urbana, 1992

Pat Roy Vehrs

Associate Professor: Life Sciences > Exercise Sciences

BS, Northern Illinois University, 1984
MS, Northern Illinois University, 1986
PhD, Brigham Young University, 1991

Patricia Kay Ravert

Dean: Nursing

Professor: Nursing > Nursing Program

AS, Brigham Young University, 1974
BS, Brigham Young University, 1975
MS, Brigham Young University, 1994
PhD, University of Utah, 2004

Patrick Charles Madden

Associate Professor: Humanities > English

BS, University of Notre Dame, 1993
MA, Brigham Young University, 1999
PhD, Ohio University, 2004

Patrick R Steffen

Associate Professor: Family Home and Social Sciences > Psychology

BS, Brigham Young University, 1993
MS, University of Miami, 1996
PhD, University of Miami, 1998

BS, Birkbeck College, London, 1968
PhD, Birkbeck College, London, 1971

Roger G Harrison

Associate Professor: Physical and Mathematical Sciences > Chemistry and Biochemistry

BS, Utah State University, 1986
PhD, University of Utah, 1993

Roger L Reynolds

Roger Minert

Professor: Religious Education > Church History and Doctrine

BA, Brigham Young University, 1977
MA, Ohio State University, 1987
PhD, Ohio State University, 1991

Roger T Koide

Professor: Life Sciences > Biology

BA, Pamona College, 1980
PhD, University of California, Berkeley, 1984

Roger T Macfarlane

Associate Professor: Humanities > Comparative Arts and Letters

BA, Brigham Young University, 1985
MA, University of Michigan, Ann Arbor, 1987
PhD, University of Michigan, Ann Arbor, 1991

Rollin Hull Hotchkiss

Chair: Civil and Environmental Engineering

Professor: Engineering and Technology > Civil and Environmental Engineering

BS, Brigham Young University, 1976
MS, Utah State University, 1979
PhD, University of Minnesota, 1989

Ron W Channell

Associate Professor: Education > Communication Disorders

BS, Brigham Young University, 1977
MS, Brigham Young University, 1979
PhD, University of Utah, 1983

Ronald Albert Harris

Professor: Physical and Mathematical Sciences > Geological Sciences

BS, University of Oregon, 1982
MS, University of Alaska, Fairbanks, 1985
PhD, University of London, 1989

Ronald Brent Nuttall

Ronald Gene Worsham

Associate Professor: Management > School of Accountancy

BS, Brigham Young University, 1985
MAcc, Brigham Young University, 1985
PhD, University of Florida, 1994

Ronald K Chapman

Clinical Professor: Non-College and Other Units > Counseling and Career Center

BS, Brigham Young University, 1975
PhD, Brigham Young University, 1983

Ronald L Hager

Associate Professor: Life Sciences > Exercise Sciences

BS, Brigham Young University, 1991
MS, Brigham Young University, 1994
PhD, Arizona State University, 1997

Ronald M Saltmarsh

Associate Teaching Professor: Fine Arts and Communications > School of Music

BA, Brigham Young University, 1987
MBA, Brigham Young University, 1989

Ronald Paul Brough

Professor: Fine Arts and Communications > School of Music

BM, North Texas State University, 1981
MM, North Texas State University, 1983
DA, University of Northern Colorado, 1997

Ronald S Ulberg

Associate Teaching Professor: Nursing > Nursing Program

BS, Brigham Young University, 1976
AS, Weber State University, 1989
BS, University of Phoenix, 1992
MN, University of Phoenix, 2000

Roni Jo Draper

Professor: Education > Teacher Education

BS, University of Nevada, Reno, 1991
MS, University of Nevada, Reno, 1995
PhD, University of Nevada, Reno, 2000

Sven Eric Wilson

Chair: Political Science

Professor: Family Home and Social Sciences > Political Science

BA, Brigham Young University, 1989
MA, University of Chicago, 1992
PhD, University of Chicago, 1997

Tamara Mitchell Masters

Assistant Professor: Management > Marketing and Global Supply Chain

BS, University of Utah, 1983
MBA, University of Utah, 1988
PhD, University of Utah, 2012

Tara L Carpenter

Assistant Teaching Professor: Fine Arts and Communications > Art

BA, University of Utah, 2005
MFA, University of Utah, 2012

Taylor D Nadauld

Assistant Professor: Management > Finance

BS, Brigham Young University, 2002
PhD, Ohio State University, 2009

Teresa Anne Leavitt

Associate Teaching Professor: Education > Teacher Education

BS, Brigham Young University, 1998
MA, University of Phoenix, 2000
PhD, University of Nevada, 2008

Teresa Reber Bell

Assistant Professor: Humanities > German and Russian

BA, Brigham Young University, 1990
MA, Brigham Young University, 1992
PhD, University of Arizona, 2001

Terisa P Gabrielsen

Assistant Professor: Education > Counseling Psychology and Special Education

BS, Brigham Young University, 1982
MS, University of Utah, 2009
PhD, University of Utah, 2012

Terrell Alan Young

Professor: Education > Teacher Education

BS, Kansas State University, 1975
MEd, Utah State University, 1981
EdD, Brigham Young University, 1988

Terry Briggs Ball

Professor: Religious Education > Ancient Scripture

BS, Brigham Young University, 1979
MA, Brigham Young University, 1990
PhD, Brigham Young University, 1992

Thomas A Holmoe

Director: Intercollegiate Athletics

Thomas Allen Knotts

Associate Professor: Engineering and Technology > Chemical Engineering

BS, Brigham Young University, 2001
PhD, University of Wisconsin, Madison, 2006

Thomas Arvel Wayment

Director: Religious Studies Center

Professor: Religious Education > Ancient Scripture

BA, University of California, Riverside, 1994
MA, Claremont Graduate School, 1998
PhD, Claremont Graduate School, 2000

Thomas B Russell

Teaching Professor: Fine Arts and Communications > Theatre and Media Arts

BA, Brigham Young University, 1988

Thomas E Patterson

Manager: Faculty Relations

Thomas Eugene Robinson

Professor: Fine Arts and Communications > School of Communications

BS, Northern Arizona University, 1988
MA, University of Nevada, Las Vegas, 1992
PhD, University of Southern Mississippi, 1996

Thomas H Fletcher

Director: Advanced Combustion Engineering Research Center

Professor: Engineering and Technology > Chemical Engineering

BS, Brigham Young University, 1979
MS, Brigham Young University, 1980
PhD, Brigham Young University, 1983

Thomas H Morris

Professor: Physical and Mathematical Sciences > Geological Sciences

BS, Brigham Young University, 1981
MS, University of Wisconsin, Madison, 1983
PhD, University of Wisconsin, Madison, 1986

Thomas L Peterson

Associate Teaching Professor: Management > Organizational Leadership and Strategy

BA, Brigham Young University, 1981
MBA, Harvard Business School, 1983

Top
